IEE POWER AND ENERGY SERIES 32

Series Editors: Professor A. T. Johns
D. F. Warne

High voltage engineering and testing

2nd Edition

Other volumes in this series:

- Volume 1 **Power circuits breaker theory and design** C. H. Flurscheim (Editor)
- Volume 2 **Electric Fuses** A. Wright and P. G. Newbery
- Volume 3 **Z-transform electromagnetic transient analysis in high-voltage networks** W. Derek Humpage
- Volume 4 **Industrial microwave heating** A. C. Metaxas and R. J. Meredith
- Volume 5 **Power system economics** T. W. Berrie
- Volume 6 **High voltage direct current transmission** J. Arrillaga
- Volume 7 **Insulators for high voltages** J. S. T. Looms
- Volume 8 **Variable frequency AC motor drive systems** D. Finney
- Volume 9 **Electricity distribution network design** E. Lakervi and E. J. Holmes
- Volume 10 **SF₆ switchgear** H. M. Ryan and G. R. Jones
- Volume 11 **Conduction and induction heating** E. J. Davies
- Volume 12 **Overvoltage protection of low-voltage systems** P. Hasse
- Volume 13 **Statistical techniques for high-voltage engineering** W. Hauschild and W. Mosch
- Volume 14 **Uninterruptible power supplies** J. D. St. Aubyn and J. Platts (Editors)
- Volume 15 **Digital protection for power systems** A. T. Johns and S. K. Salman
- Volume 16 **Electricity economics and planning** T. W. Berrie
- Volume 17 **High voltage engineering and testing** H. M. Ryan (Editor)
- Volume 18 **Vacuum switchgear** A. Greenwood
- Volume 19 **Electrical safety: a guide to the causes and prevention of electrical hazards** J. Maxwell Adams
- Volume 20 **Electric fuses, 2nd Edn.** A. Wright and P. G. Newbery
- Volume 21 **Electricity distribution network design, 2nd Edn.** E. Lakervi and E. J. Holmes
- Volume 22 **Artificial intelligence techniques in power systems** K. Warwick, A. Ekwue and R. Aggarwal (Editors)
- Volume 23 **Financial and economic evaluation of projects in the electricity supply industry** H. Khatib
- Volume 24 **Power system commissioning and maintenance practice** K. Harker
- Volume 25 **Engineers' handbook of industrial microwave heating** R. J. Meredith
- Volume 26 **Small electric motors** H. Moczala
- Volume 27 **AC-DC power system analysis** J. Arrillaga and B. C. Smith
- Volume 28 **Protection of electricity distribution networks** J. Gers and E. J. Holmes
- Volume 29 **High voltage direct current transmission** J. Arrillaga
- Volume 30 **Flexible AC transmission systems (FACTS)** Y.-H. Song and A. T. Johns (Editors)
- Volume 31 **Embedded generation** N. Jenkins, R. Allan, P. Crossley, D. Kirschen and G. Strbac
- Volume 33 **Overvoltage protection of low voltage systems, 2nd Edn.** P. Hasse
- Volume 34 **The lightning flash** G. V. Cooray
- Volume 35 **The Control Techniques drives and controls handbook** B. Drury
- Volume 36 **Voltage quality in electrical power systems** J. Schlabach, D. Blume and T. Stephanblome (Editors)

Introduction <i>D.J. Allan</i>	1
1.1 History of high voltage engineering	2
1.2 High voltage power networks	4
1.3 EC Directives	6
1.4 The future of HV engineering	7
 1. Electric power transmission and distribution systems <i>I.A. Erinmez</i>	 9
1.1 Nature and development of transmission and distribution systems	9
1.1.1 Nature of transmission and distribution systems	9
1.1.2 Early developments (1880–1930)	11
1.1.3 Development of the transmission grid concept	13
1.1.4 Recent developments	19
1.2 Structure of transmission and distribution systems	23
1.2.1 Typical characteristics of transmission and distribution systems	26
1.2.2 Organisational structures of transmission and distribution systems	27
1.3 Design of transmission and distribution systems	31
1.3.1 Security of supply	32
1.3.2 Quality of supply	32
1.3.3 Transmission system capability	32
1.4 Operation of transmission and distribution systems	35
1.4.1 Operational planning	36
1.4.2 Extended real-time operational activities	38
1.4.3 Real-time operation	38
1.4.4 Post real-time operational activities	41
1.5 Future developments	44
1.5.1 Organisational developments	44
1.5.2 Technical and technological developments	45
1.6 References	53
 2. Insulation co-ordination for AC transmission and distribution systems	
<i>T. Irwin and H. M. Ryan</i>	55
2.1 Introduction	55

2.2	Classification of dielectric stress	56
2.2.1	Power frequency voltage	56
2.2.2	Temporary overvoltages	56
2.2.3	Switching overvoltages	59
2.2.4	Lightning overvoltages	60
2.3	Voltage-time characteristics	60
2.4	Factors affecting switching overvoltages	62
2.4.1	Source configuration	62
2.4.2	Remanent charge	62
2.4.3	Transmission line length	64
2.4.4	Compensation	64
2.4.5	Circuit-breaker pole scatter	65
2.4.6	Point-on-wave of circuit-breaker closure	65
2.5	Methods of controlling switching surges	66
2.5.1	Circuit-breaker pre-insertion resistors	66
2.5.2	Metal oxide surge arresters	67
2.5.3	Circuit-breaker point-on-wave control	72
2.5.4	Comparison of switching overvoltage control methods	73
2.6	Factors affecting lightning overvoltages entering substations	74
2.6.1	Backflashover	75
2.6.2	Direct strike	80
2.6.3	Attenuation of lightning overvoltage	82
2.7	Methods of controlling lightning overvoltages	82
2.7.1	Location of surge arresters	83
2.8	Conclusions	84
2.9	References	85
3.	Applications of gaseous insulants <i>H. M. Ryan</i>	87
3.1	Introduction	87
3.2	Atmospheric air clearances	89
3.2.1	Test areas	89
3.2.2	Sphere gaps	93
3.2.3	Spark gaps	93
3.2.4	Overhead lines and conductor bundles	96
3.2.5	Guidelines for live working	98
3.3	Other gases	99
3.4	Switchgear and GIS	103
3.4.1	Introduction	103
3.4.2	Arc extinction media	104
3.4.3	General dielectric considerations	108
3.4.4	Performance under contaminated conditions	118
3.4.5	GIS service reliability	119
3.4.6	Vacuum switches	121
3.5	System modelling	121
3.5.1	Field analysis techniques	121
3.5.2	Prediction of breakdown voltages	130
3.6	Summary	133

3.7	Acknowledgments	134
3.8	References	134
4.	HVDC and power electronic systems <i>G. ó hEidhin</i>	137
4.1	Introduction	137
4.2	HVDC transmission—a brief overview	138
4.3	General principles	140
4.4	Main components of HVDC links	140
4.4.1	Thyristor valves	140
4.4.2	Converter transformer	143
4.4.3	Control equipment	147
4.4.4	AC filters and reactive power control	147
4.4.5	Smoothing reactor and DC filter	150
4.4.6	Switchgear	151
4.4.7	Surge arresters	153
4.4.8	Valve cooling	154
4.4.9	Auxiliary supplies	155
4.5	Converter building	155
4.6	Economics	157
4.7	Power electronic support for AC systems	159
4.7.1	Static Var compensators (SVC)	160
4.7.2	STATCOM	161
4.7.3	Series compensators	162
4.7.4	Unified power flow controller (UPFC)	163
4.8	Conclusions	165
4.9	References	165
5.	Overhead lines <i>F.J. Liptrot</i>	167
5.1	Introduction	167
5.2	Towers and supports	169
5.2.1	General	169
5.2.2	Self-supporting single circuit towers	170
5.2.3	Self-supporting double circuit towers	171
5.2.4	Guyed towers	172
5.2.5	Tower design	172
5.3	Conductors	181
5.3.1	Conductor types	181
5.3.2	Clamps and joints	183
5.3.3	Equilibrium of the suspended wire	185
5.3.4	Conductor creep	186
5.3.5	Wind and ice loads on conductor	187
5.3.6	Ampacity	188
5.4	Dampers and spacer dampers	189
5.4.1	Introduction	189
5.4.2	Single conductors	189
5.4.3	Bundled conductors	192
5.5	Foundations	193
5.5.1	General	193
5.5.2	Types of ground	194

5.5.3	Types of foundation	194
5.5.4	Foundation calculations	195
5.6	Insulator design	195
5.6.1	General	195
5.6.2	Pin-type insulators	195
5.6.3	Cap and pin insulators	196
5.6.4	Dielectric materials	197
5.6.5	Long rod insulators	199
5.6.6	Composite insulators	199
5.6.7	Insulator sets	200
5.7	Electrical discharges	202
5.7.1	Radio interference	202
5.7.2	Corona loss	207
5.8	Line construction	207
5.8.1	General	207
5.8.2	Route selection	207
5.8.3	Basic span	208
5.8.4	Line route profile	209
5.9	European standards and their impact	210
5.10	References	211
Appendix 5.1	Conductor sag and tension calculations	212
Appendix 5.2	Change of state equation	214
Appendix 5.3	Ampacity of OHL conductor	215
Appendix 5.4	Foundation calculations	219
Appendix 5.5	Calculation of RIV generated by a typical transmission line	220
Appendix 5.6	Calculation of corona loss dissipated by a typical transmission line	223
6.	High voltage cables <i>M. Simmons</i>	227
6.1	Introduction	227
6.2	The components of an insulated power cable system	228
6.3	Design features	230
6.3.1	Rating and thermal design—mainly referring to super-tension cables	230
6.3.2	Medium voltage distribution cables	231
6.3.3	Conductors	232
6.3.4	Insulation system	235
6.3.5	Containment	242
6.3.6	Protection	244
6.3.7	Thermal and mechanical environment	244
6.4	Manufacturing processes and materials	246
6.4.1	Cables	246
6.4.2	Accessories	250
6.4.3	Environmental issues	256
6.5	Testing	258
6.5.1	Routine	258
6.5.2	Type testing	259
6.5.3	Special testing	260

6.5.4	Site testing	262
6.6	Diagnostics	264
6.6.1	Impregnated paper insulation	265
6.6.2	Polymeric insulation	266
6.7	Case studies	267
6.7.1	Typical	267
6.7.2	Special	269
6.8	References	270
