

STRENGTH OF METALS & ALLOYS

Edited by
R. C. GIFKINS

Volume 1

August 16-20, 1982

STRENGTH OF METALS AND ALLOYS

(ICSMA 6)

Proceedings of the 6th International Conference
Melbourne, Australia, 16-20 August 1982

In Three Volumes

Edited by

R C GIFKINS

Department of Materials Engineering, Monash University, Melbourne, Australia

Volume 1

PERGAMON PRESS

OXFORD · NEW YORK · TORONTO · SYDNEY · PARIS · FRANKFURT

U.K.	Pergamon Press Ltd., Headington Hill Hall, Oxford OX3 0BW, England
U.S.A.	Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, New York 10523, U.S.A.
CANADA	Pergamon Press Canada Ltd., Suite 104, 150 Consumers Rd., Willowdale, Ontario M2J 1P9, Canada
AUSTRALIA	Pergamon Press (Aust.) Pty. Ltd., P.O. Box 544, Potts Point, N.S.W. 2011, Australia
FRANCE	Pergamon Press SARL, 24 rue des Ecoles, 75240 Paris, Cedex 05, France

First edition 1983

Library of Congress Cataloging in Publication Data

International Conference on the Strength of Metals and Alloys (6th: 1982: Melbourne, Vic.)

Strength of metals and alloys (ICSMA 6)

(International series on the strength and fracture of materials and structures)

Includes bibliographies and index.

1. Metals—Congresses. 2. Alloys—Congresses.

3. Physical metallurgy—Congresses. I. Gifkins, R. C., 1918- II. Title. III. Series.

TA460.I532 1982 620.1'63 82-9851

British Library Cataloguing in Publication Data

Strength of metals and alloys. — (International series on the strength and fracture of materials and structures)

1. Physical metallurgy

I. Gifkins, R. C. II. Series

620.1'63 TA405

ISBN 0-08-029325-5

In order to make this volume available as economically and as rapidly as possible the author's typescript has been reproduced in its original form. This method unfortunately has its typographical limitations but it is hoped that they in no way distract the reader.

Printed in Great Britain by A. Wheaton & Co. Ltd., Exeter

Contents of Volume 1

FUNDAMENTALS OF STRENGTHENING MECHANISMS

Temperature and strain rate dependence of the flow stress of fatigued niobium single crystals M Anglada and F Guin	3
Fundamental plastic behaviors in high-purity BCC metals (Nb, Mo and Fe) Y Aono, E Kuramoto and K Kitajima	9
The effect of solute clusters on screw dislocations in BCC alloys R J Arsenault and D M Esterling	15
The effect of non-glide stress on the Peierls stress in BCC metals Z S Basinski and M S Duesbery	21
A mechanism for slip transfer across high angle grain boundaries C T Forwood and L M Clarebrough	27
A strain hardening law for FCC and BCC crystals derived from latent hardening and multislip tests P Franciosi	33
Multislip in FCC and BCC crystals: A theoretical approach compared with experimental data P Franciosi and A Zaoui	39
The behaviour of dislocations near a free surface P M Hazzledine and S J Shaibani	45

Cross-slip and work hardening P J Jackson	51
Low temperature plasticity of molybdenum single crystals of high purity H-J Kaufmann	57
Creep of LiF crystals in the temperature range 1.6 - 300 K H-J Kaufmann, S V Lubenets and V V Abraimov	63
Understandings of slip behaviors in BCC metals by computer analyses E Kuramoto, Y Aono and T Tsutsumi	69
The strength of polycrystals T Leffers and O B Pedersen	75
A new way to derive activation enthalpies of serrated flow? E Pink and A Grinberg	83
On the high temperature internal friction background F Povoio and B J Molinas	89
Dislocation motion in FCC metal crystals K Shinohara, S Kitajima and H Kurishita	95
Moving dislocations in aluminium and in aluminium-copper alloys H Tamler, O Kanert and J Th M De Hosson	101
Stoneley waves at grain boundaries in copper and aluminium A R Thölen	107
ALLOY DESIGN FOR STRENGTH	
(A) FERROUS ALLOYS	
Void damage in dual phase steels during plastic deformation P S Baburamani, R A Jago and R M Hobbs	115
The effect of inclusions on the structure and properties of HSLA steel weld metals G S Barritte, R A Ricks and P R Howell	121
Micromechanical concepts for the deformation and fracture behaviour of coarse ferrite-martensite steels J Becker and E Hornbogen	127

Transformation behaviour and mechanical properties of rapidly quenched steels H W Bergmann and B L Mordike	135
Microstructure and fatigue behaviour of nickel-base eutectic composites K Dannemann, T Ishii, D J Duquette and N S Stoloff	141
Thermomechanical treatment of a plain low carbon steel P Deb and M C Chaturvedi	147
Property - structure relations in quenched and tempered 2%Mn steel M E de Morton	153
A study of the effect of low temperatures on the strength and ductility of commercial HSLA steels L R Cutler and M R Krishnadev	161
Internal friction measurements, hardness and tensile tests during the tempering of 1100°C as quenched 17% chromium steels B Dubois, F Hernandez and M Bouhafs	167
Precision measurements of pre-yield microstrain in amorphous alloys T Hashimoto, S Kobayashi, K Maeda and S Takeuchi	173
A thermodynamic model to predict the precipitation behaviour of both titanium nitride and sulfide during steel solidification. Effects of the globularisation of the sulfides on the isotropy of the mechanical properties J-C Herman, P Messien and T Gréday	179
The contribution of cobalt to the tempering resistance and hot hardness of tool steels and cobalt replacement J P Hirth, E J Dulis and V K Chandhok	185
Effects of C _q , Mo and Ti contents on age-hardening in 15%Ni maraging steels K Hosomi, Y Ashida, H Hato and H Nakamura	193
Dynamic strain aging of cast iron D Löhé, O Vöhringer and E Macherauch	199
Athermal, stress and strain induced transformation strengthening in multiphase stainless steels F D S Marques and N N Thadhani	205

Comparison of the efficiency of various rolling schedules to obtain dual-phase steel plates H Mathy and T Greday	211
The influence of plate gauge on the strength and impact properties of steels B Mintz	217
Deformation behaviour of austenite-ferrite structures J Ruzzante, G Carfi, J Tormo and A M Hey	223
The influence of cementite content and cementite shape on the Bauschinger effect of plain carbon steels B Scholtes, O Vöhringer and E Macherauch	229
Ferrite grain refinement in HSLA steels R M Smith, T Chandra and D P Dunne	235
Control of strain age hardening in Ti bearing hot rolled strip steels J G Williams	241
Coated sheet steel viewed as a composite material D J Willis	247

(B) NON-FERROUS ALLOYS

Designing of an optimum aluminium alloy for de-salination applications Z Ahmed	255
Effect of microstructure on the mechanical properties of Transage 134 R W Coade, T W Duerig and G H Gessinger	263
The tensile deformation of aluminium foil I R Dover, J A Eady and R C Gifkins	269
Effect of the phase transformation on the mechanical properties of initially cold-worked cobalt and cobalt alloys G Bouquet and B Dubois	275
Mechanical properties during the tempering of martensitic copper-aluminium alloys B Dubois, G Ocampo, G Demiraj and G Bouquet	281
The influence of post-extrusion thermomechanical treatments on the tensile properties of Zr-2.5 wt% Nb alloy R G Fleck and G K Shek	289

Strengthening mechanisms in dispersion hardened copper polycrystals N Hansen and B Ralph	295
Deformation behaviour of the ordering alloy Cu_2NiZn J Th M De Hosson, G J L Van Der Wegen and P M Bronsveld	301
Analysis of strengthening factors in thermomechanical treatment of an Al-Cu-Mg-Mn alloy T-C Lei and D-Z Wang	307
Dispersion strengthened titanium alloys by rapid solidification processing B C Muddle, D G Konitzer and H L Fraser	313
Alloy softening in molybdenum-carbon single crystals M I Ripley and J W Christian	319
Solution hardening of FCC alloys by the chemical interaction between solute atoms and a dislocation H Suzuki	327
An investigation of mechanical thermal treated Al-Al ₃ Ni eutectic alloy C M Wan, S M Kuo, Y C Chen, T H Wang, M T Jahn, C T Hu and J Heh	333
The flow stress-grain size relationship in a precipitation-hardening Al alloy J Wert	339
(C) CERAMICS AND GLASSES	
The hardening reaction in dental amalgam J R Abbott, D R Miller and D J Netherway	347
Strengthening of alumina by heat treatment D G Brandon, E Y Gutmanas, Z Nissenholz, J Ozeri, D Shechtman, N Travitzki and Y Yeshurun	353
The shear band deformation process in metallic glasses P E Donovan and W M Stobbs	361
Metal glass composites as engineering materials K U Kainer, H W Bergmann and B L Mordike	367
Strength/ductility-microstructure relationships in two-phase materials K Tangri and A H Yegneswaran	373

YIELD, FLOW AND STRENGTH OF POLYCRYSTALLINE MATERIAL

Origin of the recrystallization texture in rolled low zinc brass C Carmichael, A S Malin and M Hatherly	381
Yield of mild steel at very high strain rates N P Fitzpatrick and P L Pratt	387
Luders band fronts in mild steel E O Hall, R J Carter and G Vitullo	393
Microstructures and deformation mechanisms in polycrystalline aluminium N Hansen and B Bay	401
Yield points in micro-alloyed titanium steels R W K Honeycombe and G M Smith	407
Heterogeneous formation of slip bands in neutron-irradiated copper crystals S Kitajima and K Shinohara	413
Plastic instability in an Al-Mg-Si alloy G J Lopriore and P G McCormick	419
Substructure strengthening of cold rolled aluminium alloys E Nes, A L Dons and N Ryum	425
On the nature of the Bauschinger effect in copper and copper aluminium H Ono, D J H Corderoy and H Muir	431
The effect of strain rate and geometry on development of microstructure during the forming of an aluminium-magnesium alloy B A Parker and R G O'Donnell	437
Analysis of local plastic heterogeneities by use of the Kossel technique C Rey, M Berveiller and A Zaoui	443
Control of the anisotropy of mechanical properties in steel plate I D Simpson and G J M MacDonald	449
Role of internal stress for the initial yielding of dual-phase steels T Sakaki, K Sugimoto and T Fukuzato	455
Tensile deformation of a fine-grained Al-alloy H Westengen	461

The effect of penetrator geometry on the deformation of ductile metal targets C J Osborn and R L Woodward	467
HIGH STRAIN AND HIGH STRAIN RATE PROCESSES	
Cyclic cracking and plastic flow in metal cutting under built-up-edge conditions R L Aghan and G R Wilms	475
Plastic stress-strain relationships of some polycrystalline metals tested in biaxial tension to high strain M Atkinson	481
The effect of a dispersed phase upon the deformation structure of rolled copper crystals I Baker and J W Martin	487
The tensile properties of cold twisted steel bars G G Brown and J D Watson	493
Effect of manganese on the dynamic recrystallization behavior of titanium-bearing microalloyed steels T Chandra, M G Akben and J J Jonas	499
Dynamic recovery and recrystallization in a duplex stainless steel T Chandra, D Bendeich and D P Dunne	505
The significance of high strain deformation in machining E D Doyle and D M Turley	511
Dynamic recrystallization of copper observed by SEM channeling contrast H J McQueen	517
Microstructure and texture of rolled CPH metals A S Malin, M Hatherly and V Piegerova	523
Dynamic recrystallization in ferritic stainless steel T Maki, S Okaguchi and I Tamura	529
Microstructure and mechanical properties of heavily deformed copper R B Nethercott, J A Retchford and R A Coyle	535
Microstructure and texture of heavily deformed copper R G Solomon, A S Malin and M Hatherley	541

"Microbands" in cold worked metals F J Torrealdea and J Gil Sevillano	547
Substructural size effect in metal cutting D M Turley and E D Doyle	553
Formability of Ni-Fe alloy sheets Y C Yoo and D N Lee	559

Contents of Volume 2

HIGH TEMPERATURE PROCESSES, CREEP, FATIGUE, SUPERPLASTICITY

Experimental analysis of the relationship between dip test techniques and the plastic equation of state J Birocheau and C Oytana	569
Biaxial dip tests measurements of internal stresses during high temperature plastic flow P Delobelle, A Mermet and C Oytana	575
Verification of a microstructurally-based equation for elevated-temperature transient isotropic hardening M E Kassner, K A Rubin and A K Miller	581
The interpretation of the scaling relationship shown by the $\log \sigma - \log \dot{\epsilon}$ creep and stress-relaxation curves F Povoio and G H Rubiolo	589
Stress and microstructure dependence of the creep resistance of Mo-5% W alloy L Bendersky, A Rosen and A K Mukherjee	595
Stress rupture behaviour of copper-chromium weather resistant steels R H Edwards, T Payne and K W Gunn	601
Multiple strengthening in creep of wrought Ni-Cr-base superalloys F Gabrielli and V Lupinc	607
Anomalous and constant substructure creep transients in pure aluminum J C Gibeling and W D Nix	613
Creep rupture properties of a niobium bearing pressure vessel steel containing small amounts of molybdenum K Gunn and T Payne	619

Inhomogeneous deformation of some aluminium alloys at elevated temperature F J Humphreys	625
Creep and fatigue interactions in a nickel-base superalloy H J Kolkman and R J H Wanhill	631
The influence of grain size on elevated temperature deformation behaviour of a type 316 stainless steel S L Mannan, K G Samuel and P Rodriguez	637
Development of creep resistant magnesium rare earth alloys J E Morgan and B L Mordike	643
The influence of traces of Sb and Zr on creep and creep fracture of Ni-20% Cr J H Schneibel, C L White and R A Padgett	649
The effect of pre-aging on the creep behaviour of type 321 stainless steel K U Snowden, P A Stathers and D S Hughes	655
High temperature creep and fatigue of Cu-Cr alloys N Y Tang, D M R Taplin and G L Dunlop	665
High temperature intergranular fracture enhanced by grain boundary migration in alpha iron-tin alloy T Watanabe, M Obata and S Karashima	671
Small angle neutron scattering study of creep deformation and fracture of type 304 stainless steel M H Yoo, J C Ogle, J H Schneibel and R W Swindeman	677
Cyclic deformation of superplastic zinc-aluminum alloys J W Bowden and B Ramaswami	683
A metallographic study of cavitation during superplastic deformation of CDA 638 alloy W J Clegg, J A Rooum and A K Mukherjee	689
The role of grain boundary dislocations in superplastic flow P R Howell, L K L Falk and G L Dunlop	695
Mechanisms for the low-stress regime I of superplasticity R C Gifkins	701

Strain effect on stress-strain rate relations of superplastic IN744 steel	707
B P Kashyap and A K Mukherjee	
Elevated temperature deformation and fracture of ingot and powder processed aluminum alloys	713
N E Paton, C C Bampton and A K Ghosh	
Anelasticity in superplastic metals	721
S H Vale and P M Hazzledine	
Enhanced superplasticity in modified Ti-6%Al-4%V alloys	727
J A Wert and N E Paton	
STRENGTH OF ROCKS AND MINERALS	
Deformation mechanisms in dunite - the results of high temperature testing	735
J D Fitz Gerald and P N Chopra	
Measurements of strain rate continuity in LiF crystals	741
T H Alden and J C Gibeling	
The deformation of polycrystalline sodium nitrate (calcite structure)	747
P D Tungatt and F J Humphreys	
Recovery and recrystallization in olivine	753
S Karato	
Deformation of olivine, and the application to lunar and planetary interiors	757
T G Langdon, A Dehghan and C G Sammis	
STRENGTH RELATED TO FRACTURE - FRACTURE TOUGHNESS	
Factors influencing the fracture toughness of high strength aluminum alloys	765
K R Brown	
Fracture toughness and critical crack length parameters in fatigue failure	773
G Clark	
The Bauschinger effect	781
R Hsu and R J Arsenault	

The influence of the addition of boron on the grain-boundary segregation of phosphorus and fracture behavior of medium-carbon ultra-high strength steel	T Inoue and Y Namba	787
The effects of thermomechanical treatment on the notch toughness of a 4340 Ni-Cr-Mo alloy steel	M T Jahn, C K Huang and C M Wan	793
The crack-tip ductility of structural steels	J F Knott	799
Deformation and fracture behaviour of single fibre coated with ductile or brittle layer	S Ochiai, Y Murakami and K Osamura	805
A comparison of spall fractures with fractures in tensile tests	J M Yellup	811
CYCLIC DEFORMATION		
Low amplitude fatigue of copper crystals at room temperature	Z S Basinski and S J Basinski	819
Back stress variation along the hysteresis loop	Y S Chung and A Abel	825
Fatigue crack initiation on slip bands	M E Fine	833
Detection of crack propagation in fatigue with acoustic emission	F Hamel and M N Bassim	839
Fatigue crack growth in the near-threshold region	A J McEvily and K Minakawa	845
Fatigue behaviour of nitrided steel	J M Cowling	851
Corrosion fatigue of SiC/Al metal matrix composites in salt laden moist air	C R Crowe and D F Hasson	859

The effect of overloads on fatigue crack propagation in offshore structural steels	867
M Drew, K R L Thompson and L H Keys	
The influence of dispersoids on the low cycle fatigue properties of Al-Mg-Si alloys	873
L Edwards and J W Martin	
The effects of frequency and hold times on fatigue crack propagation rates in a nickel base superalloy	879
S Golwalkar, N S Stoloff and D J Duquette	
Fatigue crack propagation characterization of 18-8 austenitic stainless steel under repeated impact loading	887
J-H Zhu, M-J Tu and H-J Zhou	
The fatigue studies of steel with bainitic structure	895
T F Liu, M H Yang, C M Wan, M T Jahn, C T Hu and J Heh	
High temperature fatigue of an austenitic stainless steel	901
A J Pacey and A Plumtree	
Dislocation structures in fatigued Cu polycrystals	907
R Pascual and L C Rolim	
Influence of cyclic stress on substructure in aluminum and iron	913
A Plumtree and E S Kayali	
Influence of overloads on the subsequent crack growth of a fatigue crack in a E 36 steel	919
C Robin, C Chehimi and G Pluvinage	
The effect of strain rate in air and vacuum on the high-temperature low-cycle fatigue behaviour of cast IN100 alloy	927
D Ranucci, M Marchionni, E Picco, F Gherardi and O Caciorgna	
Fatigue of spinodally decomposing alloys	933
H R Sinning and P Haasen	
PAPERS RECEIVED LATE OR DELAYED BY REVISION	
The work hardening of copper-aluminium alloys	941
D J H Corderoy and N Ono
