Daqing Petroleum Institute, a national key institute which cultivates senior qualified engineering and technical personnel of petroleum specialities, is situated in the beautiful and richly endowed Songliao Plain.

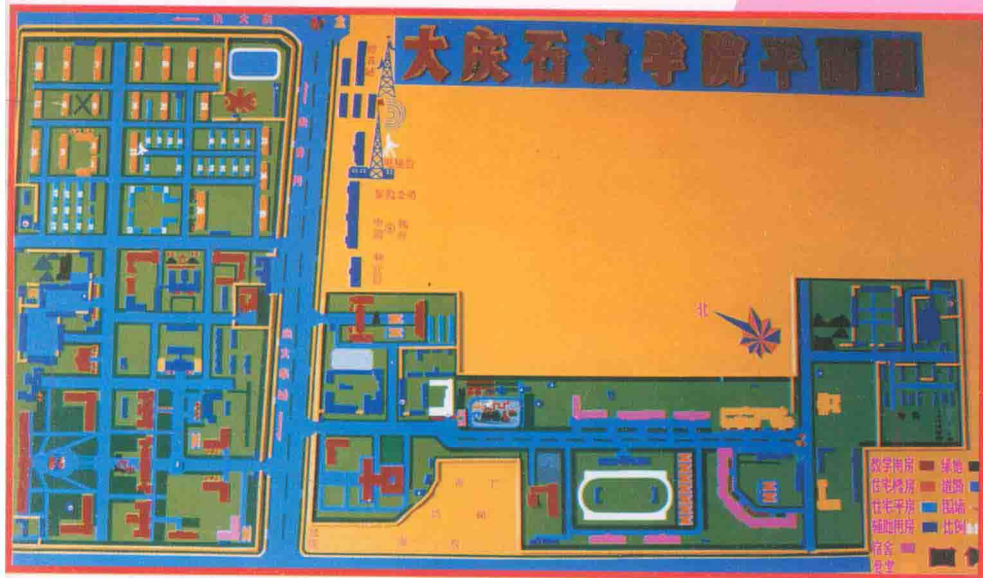

Daqing Petroleum Institute, originally called Northeast Petroleum Institute, was established in the early period of the great battle for oil in Daqing. The establishment of the institute is one of the important successes of the battle. Now there are 1,975 teachers, administrators and workers in the institute; 188 teachers have the senior titles of the technical post and 20 of them are professors. The student body is more than 3,800; besides, over 2,000 students are studying in the speciality certificate courses, the correspondence department and the evening college. The area of the campus buildings is 240 thousand square metres, and the fixed assets are over 137 million yuan. There are 5,700 pieces of equipment for teaching and research, with a worth of 50 million yuan. The library houses more than 600 thousand items.

Under the institute there are 7 teaching departments and 17 spe-

cialities. Postgraduates are enrolled in 9 specialities.

For 30 years, the institute has adhered to the Party's education policy, carried forward the Daqing spirit, and tried to cultivate excellent qualified personnel, and created first-class academic quality all the time. Through the continuous reform and exploration, the teaching style of "one body and two wings, emphasis on basis and attention to skills" has been developed. In the nationwide unified College English Test (Band 4), we climbed three ranks in three years. The results ranked the institute first among the institutions of higher learning in Heilongjiang Province in 1988 and in 1990. Furthermore, our students came in first in China in the nationwide unified college Russian Test (Band 4) in 1990. The institute has paid great attention to scientific research and taken the road of teaching, research and production. In the period of "the Seventh Five Year Plan", 304 scientific research projects were set up; and 85 projects were awarded prizes for their success, including 2 third-place prizes for national progress of science and technology, 2 national prizes, 1 silver

大慶石油學院經過三十年的建設和發展，已經成為一所專業齊全、學科配套的培養高級石油技術人才的基地。已經形成了“嚴謹、樸實、勤奮、創新”的校風，創出了立足於大慶，面向石油工業，與石油企業密切結合的辦學特色。

現在大慶石油學院正勵精圖治，勇於開拓，為實現宏偉的“八·五”藍圖而努力奮鬥。

medal of the International Patent Exhibition, 34 prizes for the progress of science and technology to the Province and the Ministry, and 78 prizes for the success of Daqing. The scientific research of the institute has been greatly advanced, and made great contributions to the development of science and technology and the production of oil industry.

Through the 30-year construction and development, the institute has become a base cultivating senior engineering and technical personnel of petroleum specialities, with comparatively complete specialities and systematic subjects. The institute has formed the academic spirit of "strictness, simplicity, diligence and creativity", and she is establishing herself as an important base which will make greater contributions to oil industry as well as to Daqing Oilfield, and aims at the closer collaboration with the oil enterprises.

Now Daqing Petroleum Institute is rousing herself for vigorous efforts to make the institute prosperous, bold in making innovations and struggling for realizing the magnificent blueprint of "the Eighth Five-Year Plan".
