▶ 序言

这本毕业设计优秀作品集是我们南京航空航天大学机电学院工业设计专业教师 and 首届毕业生教学和学习成果的汇报。也许它还很稚嫩，却饱含着我们的教学热情，闪烁着我们的设计智慧，记载着我们的劳作过程。

这本作品集的内容以产品设计为主，同时涉及环境艺术设计、平面设计等相近的设计领域。我们的设计主题是“新概念、新拓展、新境界”。我们力图运用新奇的设计概念，拓展新颖的设计空间，营造新鲜的设计境界。这是我们对设计现实的挑战和对设计未来的期望。我们的师生在毕业设计过程中，相互切磋、相互讨论、相互帮助，形成了一股凝聚力浓厚的设计氛围。在设计中我们不仅展现了自己的风格，也承接了传统，展望了未来，书写了人类才智的进步、人类精神的风尚和人类团结的韵律。

我们已经跨出了坚实的第一步，然而我们的设计之路还很长……

▶ Preface

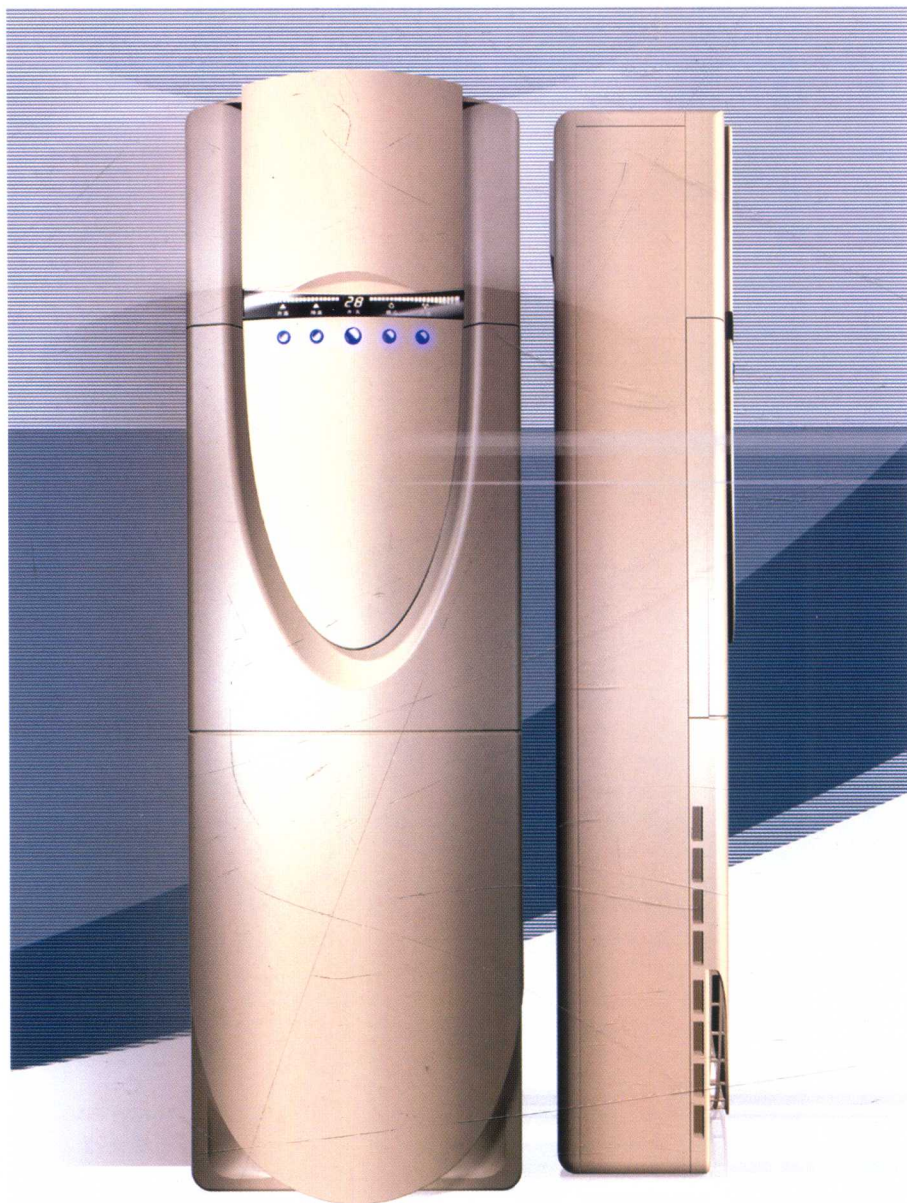

This collection of excellent graduation design works represents the teaching and learning results of the faculty and the first graduates of the Industrial Design Program in the College of Mechanical and Electrical Engineering, Nanjing University of Aeronautics and Astronautics. Although it might look a little young or naive, it is loaded with the enthusiasm of our teaching and learning process, flashing with our wisdom, and recording our working process.

Most of this collection contains product design works. It also covers environmental art designs, plane designs and some other similar kinds of designs in this field. Our subject is “new conception, new development, and new stage”. We are trying to use the new design conceptions, to develop the advanced design spaces, and to attain the modern design stages. These are our challenges and expectations of the reality and future of design.

In the process of finishing these graduation projects, our teachers and students communicated with each other, discussed with each other, and helped each other, which made the design atmosphere filled with strong unity. Our designs not only showed our own style, but also inherited the tradition, and prospected the future. They wrote down the wisdom advancement, spirit style and unity rhythm of the mankind.

Anyhow we have made a first firm step. But there is still a long way to go for us in the process of design...
