大庆概况

Daqing is one of the youngest cities of the People's Republic of China. With the development and construction of the Daqing Oil Field, a prosperous beautiful high-tech and modern city has come into being. It is just like a bright pearl that inlays on the Songnen Plain of the western part of Heilongjiang Province. The total area of the City is 21,000 square kilometers with the population of 2.43 million.

Daqing has strong economic power. By the nationwide comparison, Daqing ranks the 18th among the fifty cities of the comprehensive strength, ranks the 10th among the cities with its GDP over 10 billion RMB yuan and ranks the first among the fifty-five cities with its average total output value over 10,000 RMB yuan. The well-known Daqing Oil Field is one of the world's eleven super-large oil fields producing crude oil for over 50 million tons each year. Because of its production scale and its

good economic benefit, Daqing Oil Field takes the first place among the 500 largest enterprises of the whole nation. Daqing is also one of the largest petrochemical production base in China. The Daqing Petrochemical Complex and some other petrochemical plants are capable of processing 15 million tons of crude oil annually. In the recent years, the non-oil sectors have been developed rapidly. With the Daqing New and High-Tech Industrial Development Zone taking the lead, the six pillar industries such as the deep processing of petrochemical products, the deep processing of farm and sideline products, electronics and information, building and building materials, pharmacy and tourist service are being developed. Daqing is also the important production base of commodity grain, aquatic products and animal products in Heilongjiang Province.

Today's Daqing is clean and tidy. It offers broad streets and

clean air with economic prosperity and charming scenery. The tall refining towers, scattered oil wells and tall adjacent buildings present the special beauty of the city. The modern residential areas are well developed and look different from each other. The green trees shade the streets and the environment has been improved greatly. The big department stores, shopping centers and free markets can be found along all the main streets in the whole city. The libraries, museums, cinemas, theatres, night clubs, and large-scale water entertainment facilities enrich the cultural and recreational activities. Memorial Hall of Iron Man Wang Jinxi reveals the heroic spirit and hardship of the Battle for Oil in the 60s and explains the Spirit of Daqing and the Spirit of Iron Man. The Daqing's vast grassland is a rare natural landscape that is scattered with more than 150 lakes and ponds and large pieces of swampy land. There lives more than 30 kinds of birds in the broad areas of water and reeds, among which six kinds of cranes are the best ones. The Daqing's tourism programs include the petroleum culture, wetland sights, city sights, Mongolian folk customs, grassland horse racing, hunting waterfowls, and the appreciation of wild animals, the red-crowned cranes being typical in the protection zone.
