Preface

Chinese medicine is the most representative medical school of traditional east medicine, with long and brilliant history. In thousands years' development, it has accumulated rich experience, and formed its unique theory system of East philosophy with extensive knowledge and profound scholarship. It holds a prominent position among various schools of traditional medicine.

While western medicine, with the origin of ancient Greek medicine, experienced different developing courses of ancient Roman medicine, made rapid development under the impetus of modern industrial revolution, science and technology, and now has been the main trend of modern western medicine.

The medical exchanges of east and west, as one of the important part of culture exchanges of east and west, can be traced back to ancient times. Along with the revolution of modern communication, telemedicine has been quickly established and is in the ascendant. It has provided new chance for exchanges and development of the world medicine. For taking the challenges in the world medical field, and being up to the new expectation of mankind, the world medical pattern is having an essential revolution. Whether East or western medicine, whether traditional medicine or modern medicine, they all need constant exchange and reform so as to be bettered at a high level. The development and cooperation of telemedical techniques, no doubt, will be the booster of this great progress.

For the promotion of East and western medicine, for strengthening international cooperation of telemedicine, for the benefit of the health of mankind, some medical institutions, at home and abroad, have sponsored this International Cooperative Symposium for Global Telemedicine on Management of Hospital and Oriental & Occidental Medicine. Invited by the sponsors, China Association of Health Care Science and Technique and the International Association Center of Telemedicine as well as the American International Institute of Chinese Medicine, working as cooperators, have made great efforts and support to this meeting. This just gives the expression of the purpose of the meeting: Developing East and western medicine and the cause of telemedicine with the charm of traditional Chinese medicine and the essence of western medicine for the establishment of new medical style.

The preparation of this meeting takes one year's time. It has collected over 3000 essays, and 1020 of them have been listed in the Chinese Volume after serious evaluation of the Experts' Committee of the Organization Committee of the meeting. Some of the essays are from the members of International Association Net of Global Telemedicine for exchanges on the line. The book is compiled on this basis, and the explanations are in the following:

1. The book consists three parts. The first part is about clinical medicine including internal medicine, surgery, gynecology, pediatrics, department of five sense organs and acupuncture; the second part is about basic medicine discussed in the chapters of experimental research and academic study; the third part is about medical administration and social behavior medicine, finance and medicine administration, telemedicine and social behavior medicine.
2. As the limit of book, each essay is about 800 - 2000 Chinese characters with no Chinese abstract, nor index and reference.
3. Based on the management of the Organization Committee, English abstract is attached to each essay for the convenience of international exchanges.

During the compiling of this book, the editors have completed a hard job. However, because of the limited time and heavy work load, there may be some regrets, and we hope it will be pointed out and understood by our authors, readers and friends.

中國醫藥學是傳統東方醫學中最具代表性的醫學流派，具有悠久而輝煌的歷史，在數千年的發展過程中，不但積累了豐富的經驗，而且逐漸形成了具有東方哲學色彩的獨特理論體系，內涵博大精深，獨領千年風騷，在衆多傳統醫學流派中占有重要位置。

源于古希臘醫學的西方醫學，歷經古羅馬醫學等不同發展時期，在近代工業革命和科技進步的推動下取得了長足發展，目前已成爲西方現代醫學的主流。

作爲東西方文化交流的重要內容之一，中、西醫學交流源遠流長。伴隨着現代通訊技術的革命，遠程醫療迅速崛起，方興未艾，爲世界醫學的交流與發展提供了新的契機。爲適應當今世界醫學領域諸多方面的挑戰，以及人類對醫學新的希冀，世界醫學模式正發生實質性的變革，無論東方或西方醫學，無論傳統或現代醫學都需要不斷交流更新以便在更高層次上逐步完善，遠程醫療技術的發展與合作，無疑將成爲這一偉大進程的助推劑。

爲促進中西醫藥學的發展，加強國際間的遠程醫療合作，更好地造福人類健康事業，國內外數家醫療機構共同發起了全球遠程醫療國際協作暨醫院管理東西方醫學優秀成果交流研討會，受主辦單位邀請，中國保健科學技術學會遠程醫療國際協作中心和美國國際中醫藥研究院等學術團體作爲協辦單位對此次盛會給予了大力支持。推動東西方醫學及遠程醫療事業之發展，擷歧黃神韻，暢西洋精義，取二者之長，開學術新風，正是這次大會的宗旨。

本次大會籌備歷時一年，共征集推薦論文 3000 余篇，大會組委會組成專家委員會對之進行了認真評審，中國卷共入選論文 1020 篇，其中部分論文爲“全球遠程醫療國際協作網”會員的網上交流論著。本書即在此基礎上編譯而成，茲就編譯體例說明如下：

1、全書分上、中、下三篇，上篇臨床醫學涵內、外、婦、兒、五官諸章；中篇基礎醫學分實驗研究和學術探討二章；下篇醫學管理及社會行爲醫學，融醫學管理、遠程醫療、社會行爲醫學等內容。

2、限于篇幅，每篇論文限中文 800~2000 字，不設中文摘要，不附錄參考文獻。

3、按大會組委會安排，所有入編論文均附英文論文摘要，以利國際交流。

在本書編譯過程中，全體編譯者付出了很艱苦的勞動。然由于時間緊迫，工作量龐大且過于集中，加之水平所限，疏漏之處在所難免，誠望作者、讀者和朋友們給予指正、諒解。
