To conduct studies on the issues of population and environment and to further sustainable socio-economic development

Head of the Committee for Environment and Resource Protection in National People's Congress,

The European Union attaches great importance in its cooperation with China on the issues of Population, resources and the environment. For this reason the EU has supported the work of the China Population and Environment Society whose present publication provides readers with a good introduction to the scope of their work.

A handwritten signature in black ink, appearing to read 'Endymion Wilkinson', with a stylized, flowing script.

Endymion Wilkinson

欧洲联盟非常重视与中国在人口、资源和环境问题上的合作。正因为如此，欧盟对中国人口与环境研究会的工作给予了支持。该研究会现在这个出版物是对他们工作内容的-一个很好的介绍。

New Functions of Modern Science and Technology in Tapping	
Environmental Resources .....	Cai Shangzhong (173)
Human, Environment and Social Development .....	Yuan Qi (179)

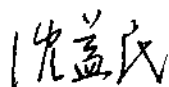

## Acknowledgment

The special series entitled China Population and Environment in English version is a selections of academic studies for exchanges in China Population and Environment Society (CPES). It is also a forum for the members and the board members in CPES to document their academic accomplishments and present their policy suggestions on the issues of population and environment. Since the founding of CPES in June, 1992, there have two highly praised series on the same topic been published successively. It is well acknowledged that the China Population and Environment Society, as a non governmental organization, has had a good start to further the development of the subject of population and environment in-depth and has explored a new way for conducting collaborative studies through publishing such series and organizing both domestic and international seminars which bring the experts and scholars from such fields as Demography, Environment, Statistics, Family Planning, Health, Education, Sociology, Economics, and Science and Technology together to study the problems of population and environment in an interdisciplinary perspective. On the basis of the first and the second series, the English series on the same topic has been compiled by CPES to serve the need for international academic exchanges with overseas scholars and experts involved in population and environment.

The founding of the Society and its various academic activities since then have been concerned and actively supported by some senior leaders from the State Council and the Standing Committee of the National People's Congress. The State Councilors, Song Jian and Peng Peiyun, the Vice-chairpersons of the Standing Committee of the National People's Congress (NPC), Lei Jieqiong and Wang Bingqian, and the Head of the Committee for Environment and Resource Protection in NPC, Qu Geping greatly encouraged the Society through their inscriptions to it. The title of the series in Chinese character was inscribed by the Vice-chairman of the Standing Committee of NPC, Fei Xiaotong. The President of China Sociological Association, Yuanfang also greatly concerns himself with this Society. Moreover, the great helps and supports also come from some international organizations. With respect to the publication of this English series, we are greatly indebted to the UNFPA, the Ford Foundation, and the European Union. Ambassador, the Head of the Delegation of the European Commission in China, Mr. Endymion Wilkinson has contributed his inscription to the series. The Representative of the Ford Foundation in China, Mr. Anthony J. Saich, and Country Director-China, DPRK, Mongolia, UNFPA, Mr. Ian Howie, have kindly written their forwards for this series respectively. In addition, Mr. Zhang Juwei and Mr. Zhao Zhenjia have carefully proofread the English series. On behalf of the China Population and Environment Society, I sincerely appreciate all of

them mentioned above.

Shen Yimin

President of the China Population and Environment Society

September 1995
