Introduction	V
The Editors, Christos S. ZEREFOS, Anver GHAZI	
Presidential address	3
C.L. MATEER	
Sir Charles Normad - In Memoriam	9
C.D. WALSHAW, Department of Atmospheric Physics, Clarendon Laboratory, Oxford, UK	
Implementation of the WMO ozone project (1980-84)	11
R.D. BOJKOV, Member of the Ozone Commission- liaison with WMO	

C H A P T E R I : C H E M I C A L - R A D I A T I V E - D Y N A M I C A L M O D E L C A L C U L A T I O N S

Simulation of O_3 distribution using a two-dimensional zonal-mean model in isentropic coordinate	19
M. KO, D. WEISENSTEIN and NIEN DAK SZE Atmospheric and Environmental Research Inc.; Massachusetts, USA, KA-KIT TUNG, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, USA	
A GCM study of the transport of heat, momentum and ozone in the stratosphere	24
D. CARIOLLE and M. DEQUE, Centre National de Recherches Météorologiques, EERM, Toulouse, France	
Ozone during sudden stratospheric warming : a three- dimensional simulation	28
K. ROSE, Institut für Meteorologie Freie Universität Berlin - FRG; G. BRASSEUR, Institut d'Aéronomie Spatiale, Brussels, Belgium	
A matrix method for calculating photochemical acceleration	33
J.D. HAIGH, Centre for Remote Sensing, Imperial College of Science and Technology, London, UK	
Photochemical acceleration	38
C. GAY, Centro de Ciencias de la Atmosfera; J.L. BRAVO, Instituto de Geofísica, U.N.A.M., Ciudad Universitaria, Mexico	

Budgets of stratospheric trace gases from 2-D-Model calculations and satellite observations	43
U. SCHMAILZL and P.J. CRUTZEN, Air Chemistry Division, Max-Planck-Institute for Chemistry F.R. Germany	
Study of the ozone photochemistry in the upper stratosphere using lims data	48
M. NATARAJAN, Systems & Applied Sciences Corporation, Hampton, Virginia, USA; L.B. CALLIS, J.M. RUSSELL III, and R.E. BOUGHNER, NASA Langley Research Center, Hampton, Virginia, USA	
Theoretical study of the quasi-biennial oscillation in the tropical stratosphere	53
X. LING and J. LONDON, Department of Astrophysical Planetary and Atmospheric Sciences, University of Colorado, USA	
Study of the effect of El Chichon Volcanic Cloud on the stratospheric temperature structure and ozone distribution in a 2-D-Model	59
R.K.R. VUPPUTURI, Canadian Climate Centre, Downsview, Ontario, Canada	
Spects of the comparison of stratospheric trace species measurements with photochemical models	61
P.S. CONNELL and D.J. WUEBBLES, University of California, Lawrence Livermore National Laboratory, Livermore, California, USA	
Derivation of OH concentrations from lims measurements	66
J.A. PYLE, A.M. ZAVODY, J.E. HARRIES, P.H. MOFFAT Rutherford Appleton Laboratory, Chilton, Didcot, Oxfordshire, UK	
Lims data : Inferred stratospheric distribution of NO _x and O _x trace constituents and the calculated odd nitrogen budget	72
L.B. CALLIS, J.M. RUSSELL and R.E. BOUGHNER, NASA Langley Research Center, Atmospheric Sciences Division; M. NATARAJAN, Systems and Applied Science Corporation, Hampton, Virginia, USA	
The distribution of ozone and active stratospheric species: results of a two-dimensional atmospheric model	77
D. CARIOLLE, Centre National de la Recherche Météorologique, Toulouse, France; D. BRARD, Office National d'Etudes et de Recherches Aérospatiales, Chatillon, France	

Multiple scenario ozone change calculations: The subtractive perturbation approach	82
A.J. OWENS, C.H. HALES, D.L. FILKIN, C. MILLER and M. McFARLAND, Experimental Station, E.I. du Pont de Nemours & Co., Inc., Wilmington, Denver, USA	
Trends in ozone and temperature structure: Comparison of theory and measurements	87
D.J. WUEBBLES, Lawrence Livermore National Laboratory, University of California, Livermore, California, USA	
Ozone in the 21st century: increase or decrease?	92
A. DE RUDDER and G. BRASSEUR, Institut d'Aéronomie Spatiale de Belgique, Brussels, Belgium	

C H A P T E R I I : OZONE-CLIMATE INTERACTION

Climatological effects of atmospheric ozone: a review	98
WEI-CHYUNG WANG, Atmospheric and Environmental Research, Inc. Cambridge, Massachusetts, USA	
The climatic effects of ozone and trace gases	103
J.T. KIEHL, National Center for Atmospheric Research Boulder, Colorado, USA	
The effect of ozone photochemistry on atmospheric and surface temperature changes due to increased CO ₂ , N ₂ O, CH ₄ and volcanic aerosols in the atmosphere	104
R.K.R. VUPPUTURI, Canadian Climate Centre, Downsview, Ontario, Canada	

C H A P T E R I I I : OBSERVATIONS OF RELEVANT TRACE CONSTITUENTS AND THEIR BUDGETS

Map-Globus in 1983	115
W.A. MATTHEWS, Service d'Aéronomie du CNRS, Verrieres le Buisson, France	
Vertical profiles of chlorinated source gases in the midlatitude stratosphere	117
D. KNAPSKA, U. SCHMIDT, C. JEBSEN, G. KULESSA and J. RUDOLPH, Institut für Chemie 3: Atmosphärische Chemie der Kernforschungsanlage Jülich GmbH, Jülich, F.R. Germany; S.A. PENKETT, Environmental and Medical Sciences Division, AERE Harwell, Oxon, UK	

A laboratory test of cryogenic sampling of longlived trace gases under simulated stratospheric conditions	122
D. KNAPSKA, U. SCHMIDT, C. JEBSEN, F.J. JOHNNEN, A. KHEDIM and G. KULESSA, Institut für Chemie 3; Atmosphärische Chemie der Kernforschungsanlage Jülich GmbH, Jülich, F.R. Germany	
The vertical distribution of halocarbons in the stratosphere	129
P. FABIAN, R. BORCHERS, D. GOEMER, B.C. KRUEGER and S. LAL, Max-Planck-Institut für Aeronomie (MPAE), Katlenburg-Lindau, F.R. Germany; S.A. PENKETT, Environmental & Med.Sci.Div. AERE Harwell, UK	
Structures in the vertical profile of nitrous oxide measured over a mid latitude station	134
S. LAL, R. BORCHERS, P. FABIAN, Max-Planck-Institut für Aeronomie (MPAE), Katlenburg-Lindau, F.R. Germany	
Global lower mesospheric water vapor revealed by lims observations	139
L.L. GORDLEY, Systems and Applied Sciences Corporation, Hampton, Virginia, USA; J.M. RUSSELL III and E.E. REMSBERG, National Aeronautics and Space Administration, Langley Research Center, Hampton, Virginia, USA	
Intercomparison of stratospheric water vapor profiles obtained during the balloon intercomparison campaign	144
D.G. MURCRAY, A. GOLDMAN and J. KOSTERS (DU), Physics Department, University of Denver, USA; R. ZANDER (ULG), Institut d'Astrophysique, University of Liège, Belgium; W. EVANS (AES), Atmospheric Environment Service, Canada; N. LOUISNARD and C. ALAMICHEL (ONERA), Office National d'Etudes et de Recherches Aérospatiales, France; M. BANGHAM and S. POLLITT (NPL), Laboratoire de Photophysique Moléculaire, CNRS, France; B. CARLI, B. DINELLI, S. PICCIOLI, National Physical Laboratory, UK; A. VOLBONI (IROE), Istituto di Ricerca sulle Onde Elettromagnetiche del CNR, Italy; W. TRAUB and K. CHANCE (SAO), Smithsonian Astrophysical Observatory, USA	
Intercomparison of stratospheric measurements of NO and NO ₂	149
H.K. ROSCOE, B.J. KERRIDGE, Dept. of Atmospheric Physics, Oxford University, UK; S. POLLITT, M. BANGHAM, National Physical Laboratory, UK; M. LOUISNARD, ONERA, C. ALAMICHEL, CNRS, France; J.-P. POMMEREAU, CNRS, France; T. OGAWA, N. IWAGAMI, Geophys. Research Lab., Univ. of Tokyo, Japan; M.T. COFFEY, W. MANKIN, NCAR, Boulder, USA; J.M. FLAUD, C. CAMAY-PERET, CNRS, France; F.J. MURCRAY, A. GOLDMAN, Dept. of Physics, Univ. of Denver, USA; W.F.J. EVANS, T. McELROY, A.E.S., Toronto, Canada	

Intercomparative Measurements of Stratospheric Nitric Acid	151
S. POLLITT, National Physical Laboratory, Teddington, UK; M. COFFEY, W.G. MANKIN, National Center for Atmospheric Research, Boulder, Colorado, USA; W.F.J. EVANS, Atmos- pheric Environment Service, Downsview, Ontario, Canada; A. GOLDMAN, J.J. KOSTERS, D.G. MURCRAY, W.J. WILLIAMS, University of Denver, Denver, Colorado, USA; N. LOUISNARD, Office National d'Etudes et de Recherches Aérospatiales, Chatillon, France	
Spatial and temporal variability of the NO ₂ total content based on annual observation data	157
N.F. ELANSKY, A. Ya. ARABOV, A.S. ELOKHOV and I.A. SENIK, Institute of Atmospheric Physics, Academy of Sciences of the USSR	
Southern hemisphere nitrogen dioxide	163
R.L. MCKENZIE and P.V. JOHNSTON, PEL Atmospheric Station, DSIR, Otago, Central Otago, New Zealand	
The climatology of upper atmosphere nitrogen dioxide revealed by lims observations	168
J.M. RUSSELL, NASA Langley Research Center, Atmospheric Sciences Division, Hampton, Virginia, USA; E.E. REMSBERG, L.L. GORDLEY, Systems and Applied Science Corporation, Hampton, Virginia, USA; J.C. GILLE, National Center for Atmospheric Research, Boulder, Colorado, USA	
Comparisons of measured and predicted diurnal changes in stratospheric NO and NO ₂	173
H.K. ROSCOE, B.J. KERRIDGE, L.J. GRAY, R.J. WELLS, Department of Atmospheric Physics, Clarendon Laboratory, Oxford University, UK; J.A. PYLE, Rutherford Appleton Laboratory, UK	
Nitric oxide profile from 7 to 32 KM	175
W.A. MATTHEWS, PEL Atmospheric Station, DSIR, Lauder, Central Otago, New Zealand; Y. KONDO, M. TAKAGI and A. IWATA, Research Institute of Atmospherics, Nagoya University, Toyokawa, Japan	
Measurement of oxides of nitrogen in the free troposphere over Japan	180
Y. KONDO, A. IWATA, Y. MORITA and M. TAKAGI, Research Institute of Atmospherics, Nagoya University, Toyokawa, Japan; W.A. MATTHEWS, PEL Atmospheric Station, DSIR, Lauder, Central Otago, New Zealand	
Measurements of atmospheric nitric oxide from nimbus 7 SBUV ultraviolet spectral scan data	184
R.D. MCPETERS, Laboratory for Atmospheres NASA, Goddard Space Flight Center, Greenbelt, Maryland, USA	

Evidence for a thermospheric source of stratospheric NOX	188
A.J. KRUEGER, Planetary Atmospheres Branch, Goddard Space Flight Center, Greenbelt, Maryland, USA	
Measurements of nighttime NO ₂ and NO ₂ in the stratosphere by matrixisolation and ESR spectroscopy	196
M. HELTEN, W. PAETZ, Institut für Chemie 2: Chemie der belasteten Atmosphäre; D.H. EHHALT, Institut für atmosphärische Chemie 3: Atmosphärische Chemie der Kernforschungsanlage Jülich GmbH, Jülich, F.R. Germany; E.P. ROETH, Gesamthochschule Essen, F.R. Germany	
Variabilité temporelle du NO ₃ stratosphérique	201
J.P. NAUDET, P. RIGAUD, Laboratoire de Physique et Chimie de l'Environnement, Orléans, France; D. HUGUENIN, Observatoire de Genève, Sauverny, Switzerland	
Quantitative observations of stratospheric chlorine monoxide as a function of latitude and season during the period 1980 - 1983	206
R.L. DE ZAFRA, A. PARRISH, P.M. SOLOMON and J.W. BARRETT, State University of New York, Stony Brook, New York, USA	
Trace species in the stratosphere precision and variability	210
C. ALAMICHEL, Laboratoire de Photophysique moléculaire, Université de Paris-Sud, France; N. LOUISNARD, Office National d'Etudes et de Recherches Aérospatiales, Chatillon, France	
Trace constituents measurements deduced from spectrometric observations onboard spacelab	212
J. LAURENT, M.P. LEMAITRE, J. BESSON, A. GIRARD, Office National d'Etudes et de Recherches Aérospatiales, Châtillon, France; C. LIPPENS, C. MULLER, J. VERCHEVAL, M. ACKERMAN, Belgium Institute for Space Aeronomy, Brussels, Belgium	
Simultaneous measurements of stratospheric trace gases as deduced from air-borne infra-red spectrometry	216
M. AMODEI, B. DUFOUR, G. FROMENT, F. KARCHER, J.P. MEYER, Centre National de Recherches Météorologiques, Toulouse, France; J. MARCAULT, Office National d'Etudes et de Recherches Aérospatiales, Chatillon, France	
The determination of stratospheric nitrogen dioxide concentrations from limb brightness measurements	222
C.T. McELROY, Atmospheric Environment Service, Downsview, Ontario, Canada	

C H A P T E R I V : A N A L Y S I S O F O Z O N E O B S E R V A T I O N S

Backscattered ultraviolet measurements of ozone 1970-2000 an overview	229
A.J. FLEIG, Laboratory for Atmospheric Science Goddard Space Flight Center, Greenbelt, Maryland, USA; W.G. PLANET, National Environment Satellite, Data and Information Service NOAA/NESS, Suitland, Maryland, USA; P.K. BHARTIA, Systems and Applied Sciences Corporation, Hyattsville, Maryland, USA	
Global total ozone from TIROS measurements : 1979-1983	234
W.G. PLANET, J.H. LIENESCH and M.L. HILL, National Environmental Satellite, Data, and Information Service, National Oceanic and Atmospheric Administration Washington, USA	
The observation of atmospheric structure with Toms and some potential advancements	239
A.J. KRUEGER, Planetary Atmospheres Branch, Goddard Space Flight Center, Greenbelt, Maryland, USA	
Standard profiles of ozone from ground to 60 km obtained by combining satellite and ground based measurements	243
P.K. BHARTIA, D. SILBERSTEIN and B. MONOSMITH, Systems and Applied Sciences Corporation, Hyattsville, Maryland, USA; A.J. FLEIG, Laboratory for Atmospheric Sciences, NASA, Goddard Space Flight Center, Greenbelt, Maryland, USA	
Annual and semiannual oscillations of stratospheric ozone	248
K. MAEDA, Laboratory for Planetary Atmospheres NASA/Goddard Space Flight Center, Greenbelt, Maryland, USA	
An evaluation of the performance of umkehr stations by solar backscattered ultraviolet (SBUV) experiment	253
P.K. BHARTIA, C.K. WONG, Systems and Applied Sciences Corporation, Hyattsville, Maryland, USA; A.J. FLEIG, Laboratory for Atmospheric Sciences, NASA, Goddard Space Flight Center, Greenbelt, Maryland, USA	
Intercomparison of satellite ozone profile measurements	258
A.J. FLEIG, Laboratory for Atmospheric Sciences, NASA, Goddard Space Flight Center, Greenbelt, Maryland, USA; J.C. GILLE, National Center for Atmospheric Research; M.P. McCORMICK, NASA Langley Research Center; D.W. RUSCH, University of Colorado; J.M. RUSSELL III, NASA Langley Research Center; J.M. LINDSAY, Systems and Applied Sciences Corporation	
Total ozone trend in the light of ozone soundings, the impact of El Chichon	263
H.U. DUETSCH, Atmospheric Physics ETH, Zürich, Switzerland	

Variability of the vertical ozone distribution	269
C.S. ZEREFOS, J.C. ZIOMAS, A.F. BAIS, Physics Dept., Lab. of Atmospheric Physics, University of Thessaloniki, Thessaloniki, Greece	
An ozone soundings program at the eastern equator: preliminary results	274
M. ILYAS, School of Physics, University of Science of Malaysia, Penang, Malaysia	
Mean vertical distribution of atmospheric ozone over Cagliari-Elmas (39°15'N - 09°03'E)	279
G. PIBIRI, P. RANDACCIO, A. SERRA, A. SOLLAI Istituto Fisica Medica - Università Cagliari, Italy	
A special ozone observation at Syowa station, Antarctica from February 1982 to January 1983	285
S. CHUBACHI, Meteorological Research Institute Yatabe, Tukuba-Gun, 305 Ibaraki, Japan	
A comparison of ozone profiles derived from standard umkehr and short umkehr measurements from fifteen stations	290
C.L. MATEER, Atmospheric Environment Service, Downsview, Ontario, Canada; J.J. DELUISI, Geophysical Monitoring for Climatic Change NOAA/ERL, Air Resources Laboratory, Boulder, Colorado, USA	
Rocket measurements of the vertical structure of the ozone field in the tropics	295
B.H. SUBBARAYA, A. JAYARAMAN and SHYAM LAL, Physical Research Laboratory, Ahmedabad, India	
Time-periodic variations in ozone and temperature	300
A.D. BELMONT, Control Data, P.O.Box 1249, Minneapolis, Minneapolis, USA	
Results of umkehr, ozonesonde, total ozone, and sulfur dioxide observations in Hawaii following the eruption of El Chichon volcano in 1982	305
W.D. KOMHYR and S.J. OLTMANS, NOAA Air Resources Laboratory, Boulder, Colorado, USA; A.N. CHOPRA and R.K. LEONARD, Cooperative Institute for Research in Environmental Sciences, University of Colorado, Boulder, Colorado, USA; T.E. GARCIA and C. McFEE, NOAA, Mauna Loa Observatory, Hilo, Hawaii, USA	

On the correspondence between standard umkehr, short umkehr and SBUV vertical ozone profiles	311
J.J. DELUISI, Geophysical Monitoring for Climatic Change NOAA/ERL, Air Resources Laboratory, Boulder, Colorado, USA; C.L. MATEER, Atmospheric Environment Service, Downsview, Ontario, Canada; P.K. BHARTIA, Systems and Applied Sciences Corporation, Hyattsville, Maryland, USA	
Effects of the El Chichon stratospheric aerosol cloud on umkehr measurements at Mauna Loa, Hawaii	316
J.J. DELUISI, Geophysical Monitoring for Climatic Change NOAA/ERL, Air Resources Laboratory, Boulder, Colorado, USA; C.L. MATEER, Atmospheric Environment Service, Downsview, Ontario, Canada; W.D. KOMHYR, Geophysical Monitoring for Climatic Change NOAA, ERL, Air Resources Laboratory, Boulder, Colorado, USA	
Ozone-temperature relationships in the stratosphere	321
A.J. MILLER, R.M. NAGATANI, NOAA/NMC/Climate Analysis Center; J.E. FREDERICK, NASA/Goddard Space Flight Center, USA	
Lidar ozone measurements in the troposphere and stratosphere at the observatoire de Haute Provence	325
J. PELON and G. MEGIE, Service d'Aéronomie du C.N.R.S. France	
Vertical ozone distribution over Uccle (Belgium) after correction for systematic distortion of the ozone profiles	330
D. DE MUER, Meteorological Institute of Belgium	
On the relative quality and performance of G.O ₃ O.S. - total ozone measurements	335
R.D. BOJKOV and C.L. MATEER, Atmospheric Environment, Service of Environment, Canada	
Atmospheric ozone in map-globus	341
W.A. MATTHEWS, Service d'Aéronomie du CNRS, Verrieres le Buisson, France	
One year European total ozone daily maps from Nimbus 7 and Dobson data	344
J.I. CACHO, M. GIL, M.J. SAINZ DE AJA, Comision Nacional de Investigacion del Espacio. Grupos Cientificos. Madrid, Spain	
Une appellation commune du nom des grandeurs utilisées pour désigner les quantités d'ozone dans l'air : l'ozonité	349
P. AIMEDIEU, Service d'Aéronomie du CNRS, Verrières le Buisson, France	

Decreases in the ozone and the SO ₂ columns following the appearance of the El Chichon aerosol cloud at midlatitude	353
A.F. BAIS, C.S. ZEREFOS, I.C. ZIOMAS, N. ZOUMAKIS Physics Dept., Lab. of Atmospheric Physics, Univ. of Thessaloniki, Greece; H.T. MANTIS, School of Physics and Astronomy, Univ. of Minnesota, USA; D.J. HOFMANN, Department of Physics and Astronomy, Univ. of Wyoming, USA; G. FIOCCO, Istituto di Fisica-Università di Roma, Italy	
Correlative studies of total ozone content with tropospheric properties - results from Indian stations	357
D.K. CHAKRABARTY, P. CHAKRABARTY and G. BEIG, Physical Research Laboratory, Ahmedabad, India	
A global climatology of total ozone from the Nimbus-7 total ozone mapping spectrometer	363
K.P. BOWMAN, Laboratory for Atmospheres, Code 613, Goddard Space Flight Center, Greenbelt, Maryland, USA	

C H A P T E R V : RECENT DEVELOPMENTS IN OBSERVATIONAL TECHNIQUES

Umkehr observations with automated Dobson spectrophotometers	371
W.D. KOMHYR and R.D. GRASS, NOAA, Air Resources Laboratory, Boulder, Colorado, USA; R.D. EVANS and R.K. LEONARD, Cooperative Institute for Research in Environmental Sciences, University of Colorado, Boulder, Colorado, USA; G.M. SEMENIUK, U.S. Environmental Protection Agency, Washington, USA	
Traveling standard lamp calibration checks on Dobson ozone spectrophotometers during 1981-1983	376
R.D. GRASS and W.D. KOMHYR, National Oceanic and Atmospheric Administration, Air Resources Laboratory, Boulder, Colorado, USA	
Recalibration of Dobson Field Spectrophotometers with a travelling Brewer spectrophotometer standard	381
J.B. KERR, W.F.J. EVANS and I.A. ASBRIDGE, Atmospheric Environment Service, Downsview, Ontario, Canada	
Review of the Dobson spectrophotometer and its accuracy	387
R.E. BASHER, New Zealand Meteorological Service	

A study of scattered light from zenith at low sun in the near UV region where the ozone absorption changes rapidly	392
S.H.H. LARSEN, Institute of Physics, University of Oslo Norway	
The automated Brewer spectrophotometer	396
J.B. KERR, C.T. McELROY, D.I. WARDLE, R.A. OLAFSON and W.F.J. EVANS, Atmospheric Environment Service Downsview, Ontario, Canada	
Experiences with a Brewer spectrophotometer and intercomparison measurements with a Dobson spectrophotometer	402
U. KOEHLER, R. HARTMANNSGRUBER and W. ATTMANNSPACHER DWD Meteorologisches Observatorium Hohenpeissenberg Hohenpeissenberg, F. R. Germany	
Ozone profiles derived from umkehr observations obtained with the Brewer ozone spectrophotometer	407
C.L. MATEER, J.B. KERR and W.F.J. EVANS, Atmospheric Environment Service, Downsview, Canada	
Nimbus 7 SBUV/TOMS calibration for the ozone measurement	412
H. PARK, Systems and Applied Sciences Corporation, Hyattsville, Maryland, USA; D.F. HEATH, Laboratory for Planetary Atmosphere, NASA/Goddard Space Flight Center, Greenbelt, Maryland, USA	
Ground-based microwave observations of mesospheric ozone at the Bordeaux observatory	417
J. DE LA NOE, C. TURATI, A. BAUDRY, Observatoire de Bordeaux, France; N. MONNANTEUIL, J.M. COLMONT, Laboratoire d'Optique Ultra-Hertzienne, Université de Lille, France; P. DIERICH, Observatoire de Paris-Meudon, France	
Ozone and water vapor in the middle atmosphere measured with an airborne microwave radiometer	423
R. GYGER, K.F. KUENZI, Institute of Applied Physics, University of Berne, Switzerland; G.K. HARTMANN, Max-Planck-Institute for Aeronomy, Lindau (Harz), F.R. Germany	
Vertical profiles and column density measurements of ozone from ground-based MM-wave spectroscopy at Mauna Kea, Hawaii : a demonstration of capabilities	428
J. BARRETT, A. PARRISH, R.L. DE ZAFRA and P. SOLOMON, State University of New York, Stony Brook, New York, USA	

- Validation of a fast line-by-line transmittance/radiance algorithm against TIROS-N series channel 9 (ozone) 432
 N.A. SCOTT, A. CHEDIN and N. HUSSON, Laboratoire de Météorologie Dynamique du CNRS, Ecole Polytechnique, Palaiseau, France
- Information contained in satellite meteor spectra on the vertical ozone distribution 438
 U. FEISTER, Meteorological Service of the GDR, Main Meteorological Observatory, Telegrafenberg, Potsdam, G.D.R.
- High resolution infrared spectroscopic studies of atmospheric ozone and related trace constituents 442
 A. GOLDMAN, D.G. MURCRAY and F.J. MURCRAY, Department of Physics, University of Denver, Denver, Colorado, USA; A. BARBE and C. SECROUN, Laboratoire de Physique Moléculaire, Equipe de Recherche Associée au CNRS, Faculté des Sciences, Reims, France
- Measurements of the ozone profile up to 50 km altitude by differential absorption laser radar 446
 J. WERNER, K.W. ROTHE, Sektion Physik der Universität München, Garching, F. R. Germany; H. WALTHER, Max-Planck-Institut für Quantenoptik, Garching, F.R. Germany
- Intercomparison of ozone profiles obtained by Brewer/Mast sondes and differential absorption laser radar 450
 W. ATTMANNSPACHER, R. HARTMANNSGRUBER, Meteorologisches Observatorium Hohenpeissenberg des Deutschen Wetterdienstes, Hohenpeissenberg, F.R. Germany; J. WERNER, K.W. ROTHE, Sektion Physik der Universität München, Garching, F. R. Germany; H. WALTHER, Max-Planck-Institut für Quantenoptik, Garching, F.R. Germany
- Results from the balloon ozone intercomparison campaign (BOIC) 454
 E. HILSENATH, NASA/Goddard Space Flight Center, Greenbelt, Maryland, USA; J. AINSWORTH, A. HOLLAND, J. MENTALL, A. TORRES, NASA/Goddard Space Flight Center, USA; W. ATTMANNSPACHER, Hohenpeissenberg Observatory, F.R. Germany; A. BASS, National Bureau of Standards; W. EVANS, Canada/Atmospheric Environment Service, W. KOMHYR, NOAA/Geophysical Monitoring for Climatic Change; K. MAUERSBERGER, University of Minnesota, USA; A.J. MILLER, NOAA/National Meteorological Center, USA; M. PROFFITT, NOAA/Aeronomy Laboratory, USA; D. ROBBINS, NASA/Johnson Space Center; S. TAYLOR, Systems and Applied Sciences Corporation; E. WEINSTOCK, Harvard University, USA

Balloon in-situ measurements of ozone with the NASA-JSC UV photometer	460
D.E. ROBBINS, NASA-Johnson Space Center, Houston, Texas, USA	
Ozone intercomparisons from the balloon intercomparison campaign	465
D. ROBBINS, NASA-Johnson Space Center, Houston, Texas USA; W. EVANS, Atmospheric Environmental Services, Canada; N. LOUISNARD, ONERA, France; S. POLLITT, National Physical Laboratory, UK; W. TRAUB, Smithsonian Astrophysical Observatory, USA; J. WATERS, Jet Propulsion Laboratory, USA	
Ozone measurement from a balloon payload using a new fast-response UV-absorption photometer	470
M.H. PROFFITT, Aeronomy Laboratory, National Oceanic and Atmospheric Administration, and Cooperative Institute for Research in Environmental Sciences (CIRES), University of Colorado, Boulder, USA	
An in-situ multipass UV-absorption ozone sensor designed for stratospheric applications	475
E.M. WEINSTOCK, C.M. SCHILLER and J.G. ANDERSON, Center for Earth and Planetary Physics and Department of Chemistry, Harvard University, Cambridge, Massachusetts USA	
Measurement of the vertical profile of ozone from the ascent of a balloon borne ultraviolet spectrophotometer	481
J.B. KERR and W.F.J. EVANS, Atmospheric Environment Service, Downsview, Ontario, Canada	
Spectrum measurement techniques for rocket, balloon and satellite experiments	486
A. MATSUZAKI, Y. NAKAMURA, and T. ITOH, The Institute of Space and Astronautical Science, Tokyo, Japan	
Precise ozone measurements using a mass spectrometer beam system	493
K. MAUERSBERGER, S. ANDERSON, D. MURPHY and J. MORTON School of Physics and Astronomy, University of Minnesota Minneapolis, Minnesota, USA	
Performance characteristics of high-altitude ECC ozonesondes	499
W.D. KOMHYR, S.J. OLTMANS, NOAA Air Resources Laboratory, Boulder, Colorado, USA; A.N. CHOPRA, P.R. FRANCHOIS, Cooperative Institute for Research in Environmental Sciences, University of Colorado, Boulder, Colorado, USA	

Error performance of electrochemical ozone sondes OSR	504
U. FEISTER, P. PLESSING, K.-H. GRASNICK, Meteorological Service of the GDR, Main Meteorological Observatory, Telegrafenberg, G.D.R.	
G. PETERS, Meteorological Service of the GDR, Aerological Observatory, Lindenberg, G.D.R.	
Mesure de la répartition verticale de l'ozone atmosphérique par spectrophotométrie d'absorption dans le visible	509
P. RIGAUD, J.P. NAUDET, Laboratoire de Physique et Chimie de l'Environnement, Orléans, France	
D. HUGUENIN, Observatoire de Genève, Saclay, Switzerland	
Un catalogue de précautions instrumentales à prendre pour faire l'étude in situ de la variation crépusculaire ou diurne d'une espèce stratosphérique, présentation d'un cas particulier, l'ozone	514
P. AIMEDIEU, Service d'Aéronomie du CNRS, Verrières le Buisson, France; P. RIGAUD, Laboratoire de Physique et Chimie de l'Environnement, Orléans, France; A. MATTHEWS, Département of Scientific and Industrial Research, P.E.L. Atmospheric Station, Omakau, Central Otago, Nouvelle Zélande	
Measurements of the stratospheric ozone by indigo decoloration	519
J.M. CISNEROS, CONIE, Madrid, Spain	
Satellite measurement of mesospheric ozone from the 1.27 μ m Airglow emission	522
H. YAMAMOTO, T. MAKINO, H. SEKIGUCHI and I. NAITO Department of Physics, Rikkyo University Toshima-ku, Tokyo, Japan	
A rocket gas-gas chemiluminescent technique for measurement of atomic oxygen and ozone concentrations in the 15-95 km region	527
S.P. PEROV and S.V. TISHIN, Central Aerological Observatory, USSR State Committee for Hydrometeorology and Control of Natural Environment, Moscow, USSR	
Constructing empirical zenith ozone charts and tables using the multiple linear regression technique	532
G.K.Y. HASSAN, Meteorological Authority, Cairo, Egypt	
Total-ozone measuring instruments used at the USSR station network	543
G.P. GUSHCHIN, S.A. SOKOLENKO, V.A. KOVALYOV, Main Geophysical Observatory, Leningrad, USSR	

CHAPTER VI : INTERACTION OF OZONE AND CIRCULATION

- Simultaneous measurements of carbon monoxide and ozone in the
NASA global atmospheric sampling program (GASP) 548
R.E. NEWELL, Department of Earth, Atmospheric and
Planetary Sciences, Institute of Technology,
Cambridge, Massachusetts, USA; MAO-FOU WU, Atmospheric
Chemistry Branch, Goddard Space, Flight Center, Greenbelt,
Maryland USA
- The interannual variations of the global total ozone as a
reflection of the general circulation changes in the stratosphere 553
F. HASEBE, Laboratory for Climatic Change Research
Geophysical Institute, Kyoto University, Kitashirakawa,
Japan
- Dependency of ozone transport on the vertical structures
of planetary waves 558
K. KAWAHIRA, Geophysical Institute of Kyoto University,
Japan
- Ozone concentration data applied for studying mesoscale wave
processes in the atmosphere 563
A.N. GRUZDEV and N.F. ELANSKY, Institute of Atmospheric
Physics, Academy of Sciences of the USSR
- The effect of temperature waves on the zonal mean ozone content 568
K. KAWAHIRA, Geophysical Institute of Kyoto University,
Japan
- Aircraft measurements near jet streams 572
G. VAUGHAN, A.F. TUCK, Meteorological Office, Bracknell,
Berkshire, UK
- Wavenumber spectra of ozone from GASP aircraft measurements 580
G.D. NASTROM, W.H. JASPERSON, Control Data Corporation,
Minneapolis, Minnesota, USA; K.S. GAGE, Aeronomy
Laboratory, NOAA, Boulder, Colorado, USA
- Measures of stratospheric displacements from satellite data 585
S. MULLER, F.R. CAYLA and J.P. JULLIER, Etablissement
d'Etudes et de Recherches Météorologiques, Toulouse,
France
