拓墨所遺脆弱易損者數十枚蓋之類
曰政虛書契著華碑共兩編並行與甲
十日上虞羅 拓云書於東山為金之備虛

Fragment of an ancient text, likely a papyrus scroll, featuring several columns of hieroglyphic script. The text is arranged in approximately five vertical columns, reading from right to left. The script is highly stylized and characteristic of ancient Egyptian hieroglyphs. The fragment is irregularly shaped, with significant damage and missing sections, particularly along the left and bottom edges. The background is a light, textured surface, possibly the original papyrus or a restoration material.
