## Message from the Party Secretary and the President

At the turn of the new century, mankind has turned a new leaf in history, and Xiamen University has reached its 80th anniversary.

Xiamen University is an institute of higher learning that is the same age as the Communist Party of China. In the past 80 years, it has shared a common fate with the motherland. It not only took an active part in the bitter struggle for national independence and liberation, but also made great contributions to progress in science and technology, economic construction and social development for the country. During the war time, Xiamen University continued its operation in exile, and with great efforts, succeeded in making the university well-known both in China and abroad. In the construction period since 1949, and since the implementation of the policies of reform and opening to the outside world in 1980 in particular, Xiamen University has carried on Tan Kah Kee's patriotic spirit as displayed through his generous donations to education, followed his motto to "Pursue excellence, Strive for perfection," and made outstanding achievements by becoming a "key university that is internationally influential, of high level, with a comprehensive range of disciplines, its own characteristic way of operating the school, and a superior staff in basic research and teaching."

A fairly long history, rich experience thus accumulated, a characteristic way of operating the school, and a fine tradition of teaching and learning are the fruit of hard work and the crystallization of the collective wisdom of the people of Xiamen University. They are the rich and valuable spiritual heritage that will lead us to still greater achievements. On this memorable occasion of its 80th anniversary, we are more proud and confident than ever in looking towards the future.

We firmly believe that at its 100th anniversary 20 years from now, Xiamen University will have become a university of even higher level, greater strength, and more vitality, standing proudly in the East of the world .
