New and forthcoming journals from John Wiley & Sons Ltd

CHEMISTRY

Journal of Bioluminescence and Chemiluminescence

Editor-in-Chief: L. C. KRIVKA, Queen Elizabeth Medical Centre, Birmingham, UK

An international journal devoted to fundamental and applied aspects of chemiluminescence and bioluminescence, including their uses as research tools in such diverse fields as chemistry, clinical sciences, environmental monitoring and microbiology.

Volume 1 1987 Quarterly UK £65.00 Elsewhere \$105.00

Journal of Chemometrics

Editor-in-Chief: B.R. KOWALSKI, University of Washington, Seattle, USA

The specific aim of the journal is to publish papers on both fundamental and applied aspects of chemometrics, and to provide a forum for the exchange of information on meetings, etc. for the growing international chemometrics research community.

Volume 1 1987 Quarterly UK £47.50 Elsewhere \$79.00

EARTH SCIENCES

Hydrological Processes

Editor-in-Chief: M.G. ANDERSON, University of Bristol, Bristol, UK

An international journal devoted to the rapid publication of scientific and technical papers on hydrology. The essential thrust of the journal is towards environmental hydrology with emphasis on forecasting and modelling of field processes.

Volume 1 1987 Quarterly UK £65.00 Elsewhere \$110.00

Regulated Rivers: Research and Management

Editor-in-Chief: G.E. PETTS, University of Technology, Loughborough, UK

An international journal dedicated to the promotion of interdisciplinary research concerned directly or indirectly with river management.

Volume 1 1987 Quarterly UK £65.00 Elsewhere \$110.00

MEDICAL SCIENCE

Journal of Chemical Neuroanatomy

Editor: H.W.M. STEINBUSCH, Department of Pharmacology, Vrije University, Amsterdam

This major new publication in the neurosciences will specialise in original research papers specifically relating to transmitter characterised systems in the central and peripheral nervous tissue, with a special emphasis on methodological papers.

Bimonthly - First issue due Autumn 1987 - details t.b.a.

Microbial Ecology in Health and Disease

Editors-in-Chief: S.P. BORIELLO, Clinical Research Centre, Harrow, UK and C. RUSSELL, University of Manchester, UK

This new publication will be of interest to those working on the microbial populations of the mouth and skin, and in the respiratory, gastro-intestinal and genito-urinary tracts.

First issue due Autumn 1987 - details t.b.a.

Neuroscience Research Communications

Editor: W.H. GISPEN, Utrecht, The Netherlands

This new journal will rapidly publish important, original contributions to the neurosciences. It will be international and multidisciplinary and will welcome papers in all areas of the neurosciences.

First issue due Autumn 1987 - details t.b.a.

PSYCHOLOGY

Applied Cognitive Psychology

(formerly Human Learning)

Editor: G. DAVIES, University of Aberdeen, Scotland

This new journal builds on the basis of the former Wiley journal, Human Learning, to report and review a wider range of authoritative and useful research in learning, thinking, memory, language and consciousness.

Volume 1 1987 Quarterly UK £52.00 Elsewhere \$98.00

Journal of Reproductive and Infant Psychology

Joint Editors: S. ELLIOT, National Unit for Psychiatric Research and Development, Lewisham Hospital, UK; P. STRATTON, The University, Leeds, UK Associate North American Editor: M. O'HARA, University of Iowa, USA

The journal reports and reviews outstanding research on psychological, behavioural, medical and social aspects of human reproduction, pregnancy and infancy.

Volume 5 1987 Quarterly UK £45.00 Elsewhere \$85.00

TECHNOLOGY AND COMPUTING

International Journal of Adaptive Control and Signal Processing

Managing Editor: M.J. GRIMBLE, Department of Electronic and Electrical Engineering, University of Strathclyde, Glasgow, UK

The International Journal of Adaptive Control and Signal Processing is concerned with the design, synthesis and application of estimators or controllers for uncertain systems. Papers will cover all aspects of the theory and application of adaptive systems.

Quarterly - First issue due Summer 1987 Details t.b.a.

TSI: Technology and Science of Informatics

Editor-in-Chief: D. POTIER, Thomson CSF LTR, Orsay, France

TSI is an English translation of the established French journal Technique et Science Informatique. Covering computer science at the very highest level, TSI contains significant contributions from data processing specialists in all application areas and professional environments - industry, university, government and research.

Volume 6 1987 Bimonthly UK £120.00 Elsewhere \$225.00

NR: 9 issues will be published in 1987 only

JOURNALS

新出版的苏联英译科技期刊

阿勒顿出版社是专门出版主要的苏联
科技期刊的全英文译本的一所美国公司。

苏联化学工业

Soviet Chemical Industry

An immensely valuable and profitable journal covering all aspects of the organic chemical industry and the heavy inorganic industry. Articles are written by engineers and chemists engaged in actual operational procedures—real solutions to real problems in the chemical industry.

1986 Volume \$395.00 (6 issues)

苏联现代工程力学

Soviet Journal of Contemporary Engineering Mechanics

Covers a wide spectrum of topics in applied mechanics. Subject matter derives from problems of a very practical nature—essential reading for researchers interested in high level engineering applications of mechanics.

Vol. 39 (1986) \$385.00 (6 issues)

苏联能源系统进展

I. 热能与机械

II. 电力发动与分佈

Advances in Soviet Power Systems

Part 1: Thermal and Mechanical

Part 2: Electrical Generation and Distribution

Covers in two parts electrical power engineering in all its practical aspects: applied research, development of equipment, operational experience in thermal, hydroelectric and nuclear power plants; power systems design problems, generating-unit regulation and control, distribution system equipment, instrumentation and power quality.

1986 Volume, Each Part \$385.00 (6 issues)

苏联生物工程

Soviet Biotechnology

The first and main forum on biotechnological processes for manufacture of diagnostic, therapeutic and prophylactic preparations for medical practice; creation of new physiologically active substances and their use in agriculture, animal husbandry veterinary science and other areas of the national economy.

Vol. 2 (1986) \$395.00 (6 issues)

苏联生物化学进展

Soviet Progress in Biochemistry

Provides up-to-the-minute results of Soviet research in biochemistry of the nervous system, muscles, proteins, enzymes, vitamins, hormones, metabolism, and plant and microorganism biochemistry. Contains particularly good state-of-the-art reviews.

Vol. 58 (1986) \$395.00 (6 issues)

分子遗传学，

微细胞生物与病毒学

Molecular Genetics, Microbiology and Virology

Devoted to the newer Soviet developments in recombinant DNA and hybridoma research and directed at both basic and applied problems in molecular genetics and biotechnology. Covers physicochemical and molecular biology, molecular genetics, bioorganic chemistry, genetic engineering and cell biology.

1986 Volume \$425.00 (12 issues)

苏联森林科学

Soviet Forest Sciences

Concerned with problems of increase of forest site productivity and expanded reproduction and protection of forest reserves. Articles on tree species, forest climatology, hydrology, soil science, geobotany, zoology, and micro-ecology.

1986 Volume \$375.00 (6 issues)

Publishers for the International Association on Water Pollution Research and Control and the International Water Supply Association

WATER RESEARCH

The Journal of the International Association on Water Pollution Research and Control

This journal provides an effective medium through which research results in water pollution and its control studies may be communicated at an international level. Subjects covered include research work on technology; chemistry; microbiology; the operation of processes for the treatment of municipal sewage and industrial

waste waters; economic studies on pollution control methods; urban storm drainage; studies on the treatment of sludges; the fate of bacteria and viruses in sewage disposed of into the sea; water pollution problems in developing countries and the pollution of bathing beaches. It is one of the most widely quoted journals in this field.

WATER SCIENCE & TECHNOLOGY

The Journal of the International Association on Water Pollution Research and Control

Published on behalf of the International Association on Water Pollution Research and Control (IAWPRC) this important review journal records the proceedings of IAWPRC biennial conferences, international specialized conferences on topics and developments in all fields of water pollution control of current importance, and seminars devoted to a detailed study of important subjects. The value

of WATER SCIENCE & TECHNOLOGY lies in the rapid publication of these proceedings in journal form, ensuring rapid dissemination of information on research, development and application of new techniques. Engineers, consultants, technologists and research workers unable to attend conferences, or who lack time to keep up with the continually growing literature, will find this journal essential as a permanent record of progress. Papers are selected by a rigorous review procedure and are published together with posters presented at the conference.

Introducing the First Publication
Devoted to the Examination and
Implications of Failure

FORENSIC ENGINEERING

The International Journal

Structures, Foundations, Materials, Construction, Machinery and Policy

Editor-in-Chief

BRUCE A. SUPRENANT,
University of South Florida
Tampa, Florida

Co-Editors

ROBERT E. GARRETT,
Garrett Engineers Inc.
Los Angeles, California

H.P. ROSSMANITH,
Institute of Mechanics
Technical University of Vienna
Vienna, Austria

ANDREW SCANLON,
University of Alberta
Edmonton, Canada

Aims And Scope

Forensic Engineering, a new international quarterly publication, will provide an avenue of publishing international, previously unpublished material on the evaluation and analysis of investigation presentation and history of structural failures. Failure is defined as the non-performance, omission or condition of failure during the design period. Therefore, the objective of this journal is to disseminate technical information to the professional community, thus providing the opportunity to learn from failures.

Call For Papers

The journal of Forensic Engineering normally publishes papers on the design, construction and economic aspects of failure. Only original material not previously published in any other publication by another publisher will be reviewed for possible inclusion. When possible, authors should submit the same journal articles as available from the Editor and will be sent out in triplicate. Manuscripts should be submitted in triplicate to:

Bruce A. Suprenant,
Department of Civil Engineering
& Mechanics, University of South
Florida, Tampa, Florida 33620

**Journal of
Southeast
Asian
Earth
Sciences**

JOURNAL OF SOUTHEAST ASIAN EARTH SCIENCES

BOARD OF EDITORS

Editor-in-Chief: B K TAN and
Deputy Editor-in-Chief: T T KHOO,
both of *Department of Geology,
University of Malaya, 59100 Kuala
Lumpur, Malaysia*
Editors: K F G HOSKING, *UK*,
J LOVERING, *Australia*, and
A A MEYERHOFF, *USA*

The *Journal of Southeast Asian Earth Sciences* is devoted to all aspects of research in the earth sciences in Southeast Asia. Papers will cover regional geology, economic geology, geochemistry, petroleum geology, petrology, palaeontology, geophysics (seismology, magnetic, electrical and gravity), structure, tectonics, geomorphology, engineering geology, Quaternary geology and analysis of sedimentary basins. The geographical area covered includes Burma, Thailand, Malaysia, Vietnam, Kampuchea, Laos, southern China, Hong Kong, Singapore, Indonesia, Papua New Guinea and The Philippines. Papers on Japan, Korea and India where the subject matter is related to other parts of the region will be included.

The journal will be primarily devoted to research papers but short communications relating to new developments of broad interest, book reviews and technical reports of meetings will also be included. Reviews and bibliographies abstracts of important communications written originally in local SE Asian languages will be welcome.

A selection of forthcoming papers

Cenozoic evolution of the Philippine archipelago, A H G MITCHELL
Paleomagnetism of Khorat group, Mesozoic, Northeast Thailand, S MARANATE & P VELLA.
Tectonics development of East Indonesia, S NISHIMURA & S SUPARKA.
A geologic and mineral resource assessment of Indonesia, A C CLARK.
Conference report -- International symposium of geology of tin deposits: Review of the progress in the geological study of tin deposits, CHENG YUQI.
The Baling Group/Bannang Sata Group of the Malay Thai peninsula, C K BURTON.
Breccias related to explosive volcanism, J A WOLFE.
Neo-tectonics of the Strait of Sunda, Indonesia, S NISHIMURA.
Transmission Electron microscopy used in the study of a New Ireland coal and associated sediments: Hydrocarbon generation from pollen exines at low maturation, M GLIKSON *et al.*
A brief on Peri-Pacific tectonic-magmatic domain of Asia continent and its evolution, LI TINGDONG.

Published quarterly (Volume 2 - 1987)
Annual subscription (1987): US \$ 95.00
Two-year rate (1987-88): US \$ 185.00

TUNNELLING AND UNDERGROUND SPACE TECHNOLOGY

An International Journal

Senior Editors: E. BROCH, *Department of Geology, The Norwegian Institute of Technology, N-7034 Trondheim, Norway* and C. FAIRHURST, *Department of Civil and Mineral Engineering, University of Minnesota, Minneapolis, MN 55455, USA*

Aims and Scope

Tunnelling and Underground Space Technology is an international journal which publishes authoritative articles encompassing the development of innovative uses of underground space and the results of quality research into improved, more cost-effective techniques for the planning, geo-investigation, design, construction, operation and maintenance of underground and earth-sheltered structures.

The journal provides an effective vehicle for the improved worldwide exchange of information on developments in underground technology — and the experience gained from its use — and is strongly committed to publishing papers on the interdisciplinary aspects of creating, planning, and regulating underground space. Towards this end, up-to-date reports of the International Tunnelling Association (ITA) working groups and important papers from major conferences sponsored by the ITA and other bodies are a regular feature of the journal.

Some forthcoming and recently published papers:

- The development and utilization of subsurface space, S M BERGMAN
Toronto's underground pedestrian system, M B BARKER
An evaluation of a sanitary sewer system using a computer model, C B BURKE *et al.*
Waterproofing and dampproofing of cave dwellings in China, W ZUOYUAN & T LINXU
The future of earth-sheltered architecture in China's farming villages, Y HAYASHI
The effects of cave dwelling on human health, H YAN
An earth-air tunnel system for cooling buildings, N K BANSAL & M S SODHA
The role and economics of different types of energy storage, P MARGEN
Fracturing of a pilot plant for borehole heat storage in rock, B NORDELL *et al.*
Underground urban transportation systems — a way to improve our cities, F BLENNEMANN
Planning and Development. Examples of benefits of underground urban public transportation systems, ITA working group on costs-benefits of underground urban public transportation.
The first metro line in Warsaw, T ROMANOWSKI
Earth shelter: architecture. Design strategies to alleviate negative psychological and physiological effects in underground space, J C CARMODY & R L STERLING
The use of simulated natural light in the design of the earth-sheltered environment, P C HUGHES
An earth-integrated education center in the Israeli desert, A RAHAMIMOFF *et al.*
Tunnel waterproofing using polymeric membranes, M CAPUTO & H-P HUEZ

ANNOUNCING A NEW JOURNAL

MINERALS ENGINEERING

An International Journal devoted to innovation and developments in mineral processing and extractive metallurgy

*Editor-in-Chief: B A WILLS, Camborne School of Mines, Pool, Redruth, Cornwall
TR15 3SE, UK*

Advisory Board

F CONCHA A, Universidad de Concepcion, Chile
D J McKEE, University of Queensland, Australia
J RALSTON, The S. Australian Inst. of Tech., Australia
B DOBIAS, Universitat Regensburg, W. Germany
F D POOLEY, University College Cardiff, Wales

R H PARKER, Camborne School of Mines, England
S T HALL, Camborne School of Mines, England
G OZBAYOGLU, Middle East Technical University, Turkey
D G OSBORNE, Kilborn Engineering (BC) Ltd., Canada
L A ADORJAN, Technical University of Nova Scotia, Canada

Aims and Scope

The purpose of the Journal is to provide for the rapid publication of topical papers featuring practical developments in the allied fields of mineral processing and extractive metallurgy. Its wide ranging coverage of research and practical (operating) topics will include physical separation methods, such as comminution, flotation concentration and dewatering, chemical methods such as pyro-, hydro- and electro-metallurgy, analytical techniques and mineralogical aspects of processing. All aspects of the processing of ferrous and non-ferrous metals, non-metallic minerals and coal will be authoritatively featured. Papers accepted will be those of strong practical content dealing with research and development in these fields, and short technical notes will be especially favoured. Reviews of specific subject areas and papers describing developments in operating processing plants are also actively sought.

Regular features will include:

- Current state-of-the-art review papers
- Applied research papers
- Case studies
- Innovative technology, equipment and processes
- Short communications/Technical notes
- Book reviews/Conference reports/Software reviews
- Calendar of important events
- New literature
- and other current awareness services.

Particular emphasis will be placed on the area of continuing professional education directed towards meeting the information needs of processing engineers working in production, plant design and other operational functions.

Correspondence and written discussion of published articles will be especially encouraged.

SUBSCRIPTION INFORMATION

The first issue of MINERALS ENGINEERING is scheduled for publication in the Fall, 1987. There will be four issues per annum.

Individual subscription price US\$40 (available to individuals whose library subscribes at the full rate)

Institution subscription price (1988) US\$95

*Announcing an Important New Journal in
the Earth Sciences*

NUCLEAR GEOPHYSICS

International Journal of Radiation Applications
and Instrumentation, Part E

Editor-in-Chief: Colin Clayton, Atomic Energy Research
Establishment, Harwell, UK

This new journal is the first-ever English Language vehicle for the publication of substantial, original scientific and technological papers, review articles, notes and letters on the application of nuclear techniques to the geosciences and related economic fields.

It is essential reading for all those involved in the study of the Earth's crust, atmospheric movement and deposition of radioisotopes and the exploration for water, oil, gas, metalliferous, non-metalliferous and industrial minerals, as well as those who extract, transport, prepare and use these materials.

A selection of the first year's contents:

Online measurement of the stone content of stone/coal loads using an X-ray source, J S SYKES et al.
Dynamic trial of an iron ore analyser based on pair production, J AXIMER et al.
Prototype bauxite analyser based on fast neutron activation analysis, J J THOMES et al.
Simulation of geological profiles and gamma-ray logs, J CZUBEK.
New evidence on the composition of native gold, C S ERASMUS et al.
Fast neutron and gamma-ray transmission technique for the on-line determination of moisture in coal and coke, R D SOWERBY et al.
Prospects for accelerator neutron sources for large volume mineral analysis, C CLAYTON & R SPACKMAN.
Estimation of underground production of some radioisotopes in geological formations, T FLORKOWSKI & K ROZANSKI.
Analysis of river sediments by prompt gamma-ray neutron activation analysis, J MICHAELIS et al.
Quantitative spectrometric borehole logging techniques for coal mining, J MISLER et al.

New

Announcing the first journal to provide up-to-date, critical reviews in the field of Electron Microscopy devoted to Subcellular and Biomolecular Structure

ELECTRON MICROSCOPY REVIEWS

Subcellular and Biomolecular Structure

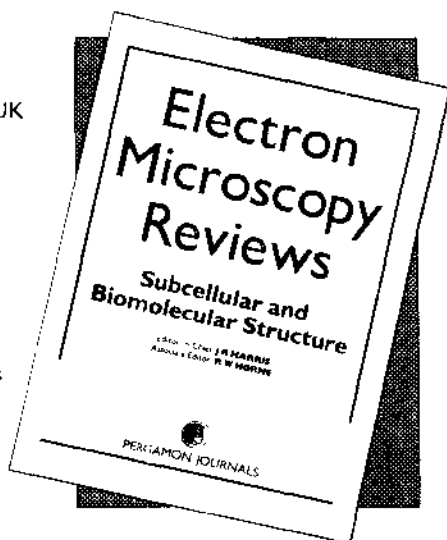

Editor-in-Chief: **J R HARRIS**, North East Thames Regional Transfusion Centre, Crescent Drive, Brentwood, Essex CM15 8DP, UK

Associate Editor: **R W HORNE**, School of Biological Sciences, University of East Anglia, Norwich NR4 7TJ, UK

UNIQUE EDITORIAL COVERAGE

Electron Microscopy Reviews will provide critical, up-to-date reviews of new developments in the field of transmission and scanning transmission electron microscopy of subcellular organelles, membrane fractions, macromolecules and macromolecular assemblies from animal, plant, fungal and bacterial cells. Also included will be extracellular proteins and supportive structures, together with viral particles and their components. Emphasis is to be placed upon results and applications together with methodology. Reviews which include high resolution studies leading to two- and three-dimensional image analysis and reconstruction are particularly welcomed. The correlation of biophysical, biochemical, immunological and other data of a structural and functional nature with that derived from electron microscopy is encouraged.

The journal will publish material of the highest quality which has undergone strict editorial control. The production of all electron micrographs will be of a consistent high standard.

AN INVITATION TO CONTRIBUTE

The Editors welcome the submission of reviews for consideration. Text should be in English and between 5,000 and 20,000 words in length. Manuscripts should be typewritten, in double spacing throughout. Two copies of the entire paper should be sent to the Editor-in-Chief at the address above. Authors will be allowed a generous number of half tone figures in their articles. Reviews will be published in the shortest possible time, whilst maintaining a high standard of refereeing and quality of production.

预 告

鉴于各界读者亟需供选订外国报刊参考使用的新版目录,我公司报刊部预定于1988年 5月出版第七版《外国报刊目录》和《外国报刊目录索引》各一册。《目录》预计收录各国报刊27,000种左右,约2200页。《索引》预计约 300页。

为了便于安排印数,特由我公司报刊部另发第七版《外国报刊目录》和《外国报刊目录索引》预订单,办理预订。预订期为1987年 6月至 8月底,欢迎各界读者及时预订,逾期不再保证供应。如在1987年 6月底以前尚未收到上述预订单,请向中国图书进出口总公司报刊收订科索取。地址:北京朝内大街137号,电话 44.0726。

中国图书进出口总公司报刊部

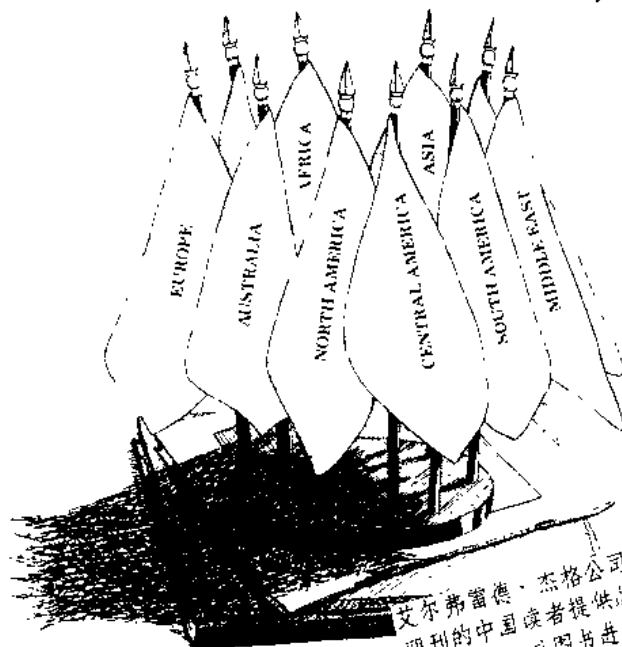

说 明

这版《补充本》采用了计算机排版。为适应计算机数据处理的需要,对原刊号结构、币制符号做了些变动。凡国家或地区代号原以一位字符表示的,现统一在国别字符后加“0”;刊号的顺序号(即流水号)一律采用三位数,不足者加“0”。例如,原300B04, 540HA54, 分别改为300B0004, 540HA054。货币符号则采用国际标准化组织制定的货币符号,一律三位字符。请读者注意。

Jaeger is your direct source worldwide.

We've been supplying back volumes and up-to-date issues directly from our U.S. based warehouse to libraries around the world for over 25 years.

Relying on the secondhand market for our extensive inventory, we can supply out-of-print Health Science, Humanities, Social Science and other scholarly related titles normally unavailable from American publishers.

Our customer service staff will process your written requests promptly, and you can even Telex us at (230) 968-189. We can also be accessed electronically through the Faxon "Link" network at the mailbox *Jaeger*. We'll deliver what you need, when you need it, anywhere in the world.

Contact us for a copy of our current catalog and brochure. Or send us the completed coupon.
