# Welcome Message

# Welcome Message

The 6th BIMFC sponsored by China National Textile Council and organized by the International Cooperation Department of China National Textile Council, the Chemical Fibre Office of China National Textile Council, China National Man-Made Fibre Association and China Textile International Exchange Center, will be commenced as scheduled at Beijing International Convention Center from May 13-16, 1996

The biennial BIMFC is a high-level and high standard event embracing the celebrities and signatories in the global man-made fibre industries, and it is the most sizable and influential international convention as compared with the similar events in the world. All the staff in the Organizing Committee of the 6th BIMFC'1996 extend our warm welcome to all the attendants for your cordial presence.

There are 29 academic theses collected for the Conference, and more than 700 domestic and overseas representatives from different countries and regions gather here for the significant event to discuss the challenges and opportunities that face the global chemical fibre industries and to exchange viewpoints on the development trends.

The 1996 is the first year of the 9th-five-year plan period, and it is of far-reaching significance for the 6th BIMFC to be convened coincidentally. On account of the growing population, increased national living standards, elevation for textiles & garments export and the expanded application of the fibres & textile goods and chalk up of the fibre consumption per capita on the average as well as the other contributing factors, the chemical fibre industry in China will be greatly developed on a substantial basis in the 9th five-year-plan period, and till the year of 2010. These foreseeable potentials, we hope, will

provide you with a historic opportunity to expand your business operations in various forms of technical and economic cooperations to be pursued on mutually-beneficial terms in an effort to live up to the increasing demands both in China and in the world as well.

We sincerely wish the 6th BIMFC a complete success, coupled with our seasonal greetings to our dear guests.

For a most pleasant stay in Beijing and good health to you all!

The organizing Committee of  
the 6th Beijing International Conference on  
Man-Made Fibres      May, 1996
