Dongfeng Motor Wheel Co., Ltd., Leading position in technology: The Company possesses sophisticated process of planking stamping, formed steel wheel molding, contour roll forming wheel molding and flowed forming etc. Some advanced technologies such as CAD, CAPP and 3-D finite element analysis is widely applied to product design. Product inspection and test have reached the internationally advanced level.

Dongfeng Motor Transmission Co., Ltd. is an enterprise producing modern transmission including AMT automatic transmission, A71, A87, A93 and A100 transmission for light vehicle, A121 and A130 transmission for medium vehicle, A148 and A164 transmission for heavy vehicle. The input torques of these transmissions range from 150N.M to 1600N.M. The company has 8 major series and over 400 kinds of products with an annual output capacity of 180,000 sets.

Dongfeng Dana Axle Co., Ltd. established by Dongfeng Motor Co., Ltd. and Dana Holding Corporation, is a commercial vehicle axle joint venture. Its business focuses on machining, as well as some other techniques, such as, heat treatment, induction heat treatment, paint, electroplating, welding, casting and so on. The main components are processed by automatic lines and CNC machining equipment, drive axle gear processing mainly adopt Gleason Cutting equipment, and pusher carburizing furnace chamber from HOLCROFT/LOFTUS Company for heat treatment. The company has its own gear test center, testing capabilities of raw material chemical composition and performance, coordinate measuring machine, dynamic balancing testing machine and other testing equipments. The products cover axles for heavy, medium, light and micro full range of commercial vehicles, including 5 major bridges like steering axle, single-drive axle, link-type drive axle, steering axle, etc, more than 1,700 species and 40 series. The annual production capacity covers 900,000 axle assemblies, and 800,000 sets of the primary driven gear. Some advanced technologies are widely used such as like Disc brake, eddy current retarder, automatic slack adjuster, ABS.

Dongfeng Chaoyang Diesel Co., Ltd has its top measurement equipments, such as CMM(Coordinate Measuring Machine), OSA(optical spectrum analyzers). “CY” (EURO III Legislation) diesel engine produced by its own has 4 series products: 102, 3L, D, Gas, supply for more than 100 companies, such as Dongfeng Motor Co., Ltd, Jianghuai Automobile Co., Ltd.

公司简介

Company Introduction

Shiyan Jiaxin Yuanda Industrial & Trade Co., Ltd. ----the Direct Sales Center of Dongfeng Cummins in Shiyan China

Our main business is to provide Dongfeng Vehicles, Cummins engine assemblies and parts for enterprises in China mainland.

Based on 10 years development, Shiyan Jiaxin Yuanda Industrial & Trade Co., Ltd. has a strong capacity of service for customers all over the world. We can provide:

- Full range of products of Dongfeng Vehicles(0.5T--60T) and parts, such as mini cars, light-duty truck, medium-duty truck and heavy-duty truck, tractor, engineering truck, automotive chassis and special truck. Meanwhile, we can provide light duty cross-country cars similar with Hummer.

- Cummins Engine(120-375HP): ISDE ISLE 4BT 6BT 6CT

- Dongfeng **Dci 11** Engine(260-420HP) based on Renault technology; Dongfeng Chaoyang Engine based on Nissan technology; **EQ4H** Engine series(140-200HP) which has its own intellectual property.

Model	DFL4251A8-T31K-999-012A
Engine	Dongfeng Cummins ISLe375 30
Drive Type	6X4
Wheel Base(mm)	3400+1350
Gear Box	DC12J165TA
Clutch	Φ430 Pulling diaphragm spring clutch
Front Axle	7T front axle
Rear Axle	13T double rear axle
Tire	12.00R20
Frame Maximum section(mm)	Frame longitudinal section 300X90X(8+5)
Cabin	D310 High Roof(Double sleepers)
Conditioner	Yes
Bolster	With 90# Traction Pin

★ CABIN

D310 High Roof twin-full floating Cabin(hydraulic power flip form), channel-type instrument panel, with air conditioning

3943841

3919624

6L8.9 Cylinder Kit

ISLe Series

Adopts Germany Continental Cm 2150 Control Module with increased capability for OBD & UDS/ODX.

Cummins high pressure common rail fuel system with Cummins CCR fuel pump and Bosch Crin3.0 injector. It works at higher pressure and is capable of generating up to 1800 bar injection pressure for better low speed performance, fuel economy, improved cold start.

Excellent Power Output: the engine peak torque up to 1700N.m.

Adopts Cummins integrated Emission Management System using Selective Catalytic Reduction technology.

Driving Comfort: Adopts a number of noise and vibration reduction technology such as double-layer gear cover, viscous vibration damper and isolated valve cover etc.
