HUMAN LEARNING

JOURNAL OF
PRACTICAL RESEARCH
AND APPLICATIONS

Editor

Michael J.A. Howe,
Department of Psychology,
University of Exeter, U.K.

Human Learning is a Journal of Practical Research and Applications which reflects diverse circumstances in which learning contributes to human life. It includes areas of learning in which little adequately controlled research has been done up to now, but in which there exists a need for well designed investigations.

Articles are required to demonstrate careful attention to the design of adequately controlled empirical research as well as providing findings of clear practical value. The majority of articles published in *Human Learning: Journal of Practical Research Applications* are largely empirical in content. However, theoretical articles, surveys and reviews that have clear practical implications are also published.

This journal of the Royal Institute of Public Administration reports, reviews and assesses experiments and experience in the practice of public administration where this is directed to development in third world countries. *Public Administration and Development* gives special attention to features which have emphasis and importance beyond a particular government and state, and puts emphasis on the consideration of administration at the local, regional and national levels. Regular book review articles add to the appeal of the journal for students and practitioners of public administration, and those with related interests in social and development studies.
