内 容 简 介

作为世界第一大能源消费国和第二大石油进口国,自2009年开始,我国各种化石能源全面出现净进口,能源对外依存度逐年攀升,局部地区“油荒”、“煤荒”、“电荒”时有发生,能源安全问题愈加凸显。本报告从世界能源地缘政治和我国能源安全的历史着手,针对国际能源市场的复杂性、我国能源进口贸易风险、战略能源储备策略、能源危机对我国经济的影响、能源贫困与可再生能源、能源消费的环境健康效应、重点节能行业和地区节能潜力、能源供应预警与应急预案,以及能源安全的国际比较等科学问题,开展了系统研究,以期为国家相关决策部门提供决策参考和信息支持。

目 录

前言

缩写和缩略语

第 1 章 世界能源形势与中国能源安全的回顾	1
1.1 世界能源发展回顾.....	2
1.1.1 全球化石能源储量仍较丰富但分布不均	2
1.1.2 全球一次能源消费创历史新高	5
1.1.3 全球可再生能源生产与消费稳步增长	7
1.1.4 中东北非动荡与欧债危机致国际原油价格大幅波动.....	8
1.2 世界能源发展新趋势.....	9
1.2.1 未来世界能源需求量仍将继续增加.....	9
1.2.2 全球金融危机给清洁可再生能源发展提供了新契机.....	9
1.2.3 福岛核事故改变世界核能发展规划	11
1.2.4 页岩气撼动全球天然气格局	13
1.2.5 世界能源消费结构呈现清洁低碳化趋势	14
1.2.6 世界各国一次能源消费结构存在较大差异.....	16
1.3 世界能源贸易特征分析	18
1.3.1 世界石油贸易特点	18
1.3.2 世界天然气贸易特点	19
1.3.3 世界煤炭贸易特点	20
1.4 中国能源消费特点与中国能源安全	20
1.4.1 中国能源消费的特点	20
1.4.2 中国能源安全的历史	25
1.4.3 中国能源安全的现状	27
1.5 能源安全的解读与认识	28
1.5.1 能源安全的定义	28
1.5.2 能源安全的内涵及演变	29
1.6 本章小结	31
第 2 章 世界能源地缘政治发展与中国能源外交	32
2.1 世界能源地缘政治关系演进	33
2.1.1 英美争霸中东	33
2.1.2 IEA 与 OPEC 的对抗	36
2.2 世界能源地缘政治新格局	38
2.2.1 寻求石油霸权的美国	39
2.2.2 擅打“能源牌”的俄罗斯.....	39

2.2.3	矛盾中的欧盟和日本	40
2.2.4	不断崛起的新兴国家	40
2.2.5	持续遭受冲击的 OPEC	41
2.3	五大产油区的地缘政治格局	41
2.3.1	中亚俄罗斯地区的地缘政治格局	41
2.3.2	中东地区的地缘政治格局	43
2.3.3	非洲地区的地缘政治格局	44
2.3.4	拉美地区的地缘政治格局	46
2.3.5	亚太地区的地缘政治格局	47
2.4	中国能源角色的转变	48
2.4.1	由贫油国向石油出口国的转变	48
2.4.2	由石油出口国向石油进口国的转变	49
2.5	中国的能源外交	49
2.5.1	中国在中亚俄罗斯地区的能源外交	50
2.5.2	中国在中东地区的能源外交	51
2.5.3	中国在非洲地区的能源外交	52
2.5.4	中国在拉美地区的能源外交	53
2.5.5	中国在亚太地区的能源外交	53
2.6	本章小结	55
第 3 章	石油价格与能源安全	56
3.1	世界石油价格体系及其演变	57
3.1.1	世界石油价格体系的构成	57
3.1.2	石油价格体系的演变	57
3.2	国际油价波动特征及其影响分析	60
3.2.1	油价波动特征	60
3.2.2	油价波动主要影响因素	64
3.2.3	油价波动对经济与金融的影响	65
3.3	石油金融化发展及其风险分析	75
3.3.1	石油金融化发展的意义	75
3.3.2	石油金融化发展蕴含的风险	77
3.3.3	石油期货市场投机与价格波动	78
3.4	石油价格与中国的能源安全	79
3.4.1	石油定价机制与中国能源安全	79
3.4.2	油价引发的能源安全与粮食安全矛盾	82
3.4.3	未来油价走势与中国能源安全	84
3.5	本章小结	87
第 4 章	中国能源进口与运输风险评价	88
4.1	中国主要能源贸易通道的运输风险分析	89

4.1.1	中国能源贸易的主要运输通道	89
4.1.2	石油海洋运输面临的主要风险分析	92
4.1.3	中国降低能源贸易运输风险的策略	94
4.2	中国石油进口综合风险的比较分析	96
4.2.1	中国原油和成品油贸易差异	96
4.2.2	石油进口的投资组合风险评价模型	98
4.2.3	中国原油和成品油进口的特定风险比较	99
4.2.4	中国石油进口的系统风险比较	102
4.2.5	主要结论	106
4.3	中美原油进口风险的比较分析	106
4.3.1	中美原油进口现状及对外依存度	106
4.3.2	中美原油进口来源和多元化差异	107
4.3.3	中美原油进口的策略差异	110
4.3.4	中美原油进口策略的比较	114
4.3.5	主要结论	115
4.4	中国煤炭贸易及运输风险分析	115
4.4.1	煤炭贸易的历史与现状	115
4.4.2	煤炭贸易与运输风险分析	116
4.5	中国天然气贸易与运输风险分析	118
4.5.1	天然气供需现状分析	118
4.5.2	天然气贸易与运输风险	119
4.6	本章小结	122
第5章	中国能源储备策略研究	123
5.1	全球能源储备现状及特点	124
5.1.1	全球能源储备历史与现状	124
5.1.2	美国战略石油储备特点及策略	126
5.2	中国战略石油储备的最佳补仓时机和补仓策略	128
5.2.1	我国战略石油储备规划	128
5.2.2	我国战略石油储备的不确定动态规划模型	130
5.2.3	我国战略石油储备的最佳补仓时机和策略	132
5.3	突发事件下我国战略石油储备的最优释放策略	136
5.3.1	战略石油储备策略的动态规划模型	136
5.3.2	不同突发事件对国际油价的冲击	140
5.3.3	不同突发事件情景下我国战略石油储备的最优策略	142
5.3.4	我国战略石油储备补仓和释放对国际油价的影响	144
5.3.5	我国成品油储备策略	145
5.4	中国天然气储备策略	147
5.4.1	世界典型国家的天然气储备模式及特点	147

5.4.2	我国天然气储备的现状 & 策略	148
5.5	中国煤炭储备策略	150
5.5.1	煤炭储备的现状	150
5.5.2	煤炭储备策略建议	152
5.6	本章小结	152
第 6 章	保障能源安全下的重点节能行业和地区	154
6.1	引言	155
6.2	研究思路和数据说明	156
6.3	重点节能行业和地区	159
6.3.1	农业重点节能地区	159
6.3.2	工业重点节能行业和地区	159
6.3.3	建筑业用能	161
6.3.4	第三产业重点节能行业和地区	161
6.3.5	居民生活用能	163
6.4	结论与政策启示	164
第 7 章	清洁和可再生能源对国家能源安全的作用	166
7.1	世界清洁和可再生能源对化石能源的替代作用	167
7.1.1	清洁和可再生能源增长迅速	167
7.1.2	未来清洁和可再生能源比重将继续增加	170
7.2	中国清洁和可再生能源对化石能源的替代作用	170
7.2.1	中国清洁和可再生能源发展迅速	170
7.2.2	中国水能资源丰富	172
7.2.3	中国核电 2020 年有望占电力总装机的 4%~5%	172
7.2.4	中国风电发展迅速	173
7.2.5	中国太阳能利用前景广阔	174
7.2.6	生物质能发展现状与潜力	175
7.3	清洁和可再生能源发展政策的国际比较	176
7.3.1	目标引导	176
7.3.2	政策激励	176
7.3.3	产业扶持	177
7.3.4	资金支持	177
7.4	本章小结	178
第 8 章	能源贫困与能源使用安全	179
8.1	能源贫困与能源使用安全的关系	180
8.1.1	能源贫困及其国际现状	180
8.1.2	我国能源贫困现状	181
8.2	能源贫困的主要影响因素研究	186

8.2.1	影响因素分析	186
8.2.2	方法介绍	190
8.2.3	模型结果与分析	191
8.3	中国区域能源贫困评估	192
8.3.1	发展中国家能源发展指数	192
8.3.2	中国区域能源贫困指数	193
8.3.3	主要结论	196
8.4	本章小结	197
第9章	中国能源消费与公众健康	198
9.1	能源消费对环境和公众健康的影响综述	199
9.1.1	能源消费对环境影响综述	199
9.1.2	环境污染造成公众健康效应研究综述	200
9.1.3	区域污染与行业排放造成公众健康效应综述	200
9.2	城市大气污染与公众健康效应的经济评估	201
9.2.1	研究背景	201
9.2.2	健康效应经济评估方法及数据来源	202
9.2.3	城市大气污染物健康效应及其经济损失	204
9.2.4	情景分析	207
9.3	部门污染物排放对公众健康效应的经济评估	208
9.3.1	部门污染物排放对公众健康评估方法及数据来源	208
9.3.2	部门排放的健康效应和经济损失评估	212
9.3.3	部门边际健康效应的经济损失评估	214
9.3.4	能源边际健康效应的经济损失评估	216
9.3.5	情景分析	216
9.4	主要结论与建议	218
第10章	能源供应危机与经济安全研究	220
10.1	世界能源危机的历史及影响分析	221
10.1.1	世界能源危机历史回顾	221
10.1.2	石油危机对世界宏观经济的影响分析	222
10.2	中国能源供应短缺事件分析	226
10.2.1	近年来中国能源供应短缺的典型事件	226
10.2.2	中国能源供应短缺的影响因素分析	227
10.3	原油供应中断的社会经济影响研究	229
10.3.1	原油供应中断情景设置	229
10.3.2	原油供应中断对中国的社会经济影响	229
10.4	国际原油价格上涨的社会经济影响研究	234
10.4.1	国际原油价格上涨情景设置	234
10.4.2	国际原油价格上涨对中国的社会经济影响	234

10.5	成品油供应短缺的应急预案研究	240
10.5.1	我国成品油供应体系	240
10.5.2	模型设置	244
10.5.3	应对成品油供应短缺的不同应急预案效果比较	246
10.6	本章小结	247
第11章	国家能源安全的综合评价	249
11.1	典型国家能源安全政策比较	250
11.1.1	增加能源科技投入,千方百计实现能源技术突破	251
11.1.2	实施能源进口贸易的多元化策略,分散能源进口风险	252
11.1.3	各能源进口国大力发展战略储备,提高能源应急能力	253
11.1.4	优化能源消费结构,鼓励发展清洁可再生能源	254
11.1.5	重视能源地缘政治,开展多元化的能源外交与合作	256
11.1.6	建立高效的能源安全管理机构,制定能源应急法律法规	257
11.2	能源安全综合评价体系与方法	258
11.2.1	能源安全综合评价指标体系	258
11.2.2	能源安全综合评价模型	259
11.3	典型国家能源供应安全的比较	261
11.3.1	典型发达国家能源供应安全指数总体呈波动上升趋势	261
11.3.2	典型发展中国家能源供应安全指数总体呈下降趋势	265
11.3.3	2008年全球金融危机后,多数国家能源供应安全指数大幅提高	267
11.3.4	主要结论	267
11.4	气候变化背景下中国能源安全的综合评价	268
11.4.1	气候变化对我国能源安全政策的影响	268
11.4.2	数据来源及预处理	269
11.4.3	我国能源供应安全指数呈先升后降的趋势	270
11.4.4	我国能源使用安全指数呈波动上升的趋势	272
11.4.5	气候保护与我国能源安全	273
11.4.6	主要结论	274
11.5	本章小结	275
第12章	中国能源安全的挑战与展望	276
12.1	中国能源安全面临的挑战	277
12.1.1	能源消费量快速增长的挑战	277
12.1.2	能源安全影响因素多样化的挑战	277
12.1.3	单一安全向多元安全转变的挑战	278
12.1.4	全球气候变化带来的挑战	278
12.1.5	环境治理与保护的挑战	279
12.1.6	能源消费总量控制的挑战	279
12.2	中国能源供需展望(到2020年)	280

12.2.1	能源需求增速逐渐回落,但回落幅度存在较多不确定性	280
12.2.2	煤炭消费比重缓慢下降,天然气和可再生能源比重陆续提高	281
12.2.3	原油煤炭产量增长日趋减缓,清洁低碳能源总体发展较快	281
12.2.4	国内能源生产重心继续西移,大规模、长距离能源调运带来新的安全和管理挑战	282
12.2.5	煤炭、石油、天然气净进口量将持续位居全球首位或者第二位,天然气价改日趋紧迫	282
12.3	中国能源安全展望	283
12.3.1	能源进口量持续增长,能源对外依存度继续攀升	283
12.3.2	能源运输通道实现多元化,运输风险逐步降低	283
12.3.3	国家能源储备规模庞大,能源储备体系相对完善	284
12.3.4	能源市场化改革继续深入,价格体系逐步完善	285
12.3.5	能源贫困人口快速下降,彻底消除能源贫困任重道远	285
12.4	保障我国能源安全的对策建议	286
12.4.1	完善储运-市场-合作体系,构筑国家能源安全框架	286
12.4.2	优化产业结构,实现低碳化发展路径	287
12.4.3	实现能源进口的多元化,降低进口运输风险	287
12.4.4	运用财政税收手段,实现可再生能源产业化	287
12.4.5	加强规划与宏观调控,满足能源投资需求	287
12.4.6	构筑能源安全预警体系,保障能源供应安全	288
参考文献		289

Chapter 1 Review of world energy situation and China's energy security	1
1. 1 Review of world energy development	2
1. 1. 1 Global fossil energy reserves are still rich but unevenly distributed	2
1. 1. 2 Global primary energy consumption hit new heights	5
1. 1. 3 Global renewable energy production and consumption steadily grow	7
1. 1. 4 Crude oil price fluctuate significantly because of Middle East and North Africa turbulence and European debt crisis	8
1. 2 Trends of world energy development	9
1. 2. 1 World energy demand will continue to increase in future	9
1. 2. 2 Global financial crisis promoted the clean and renewable energy	9
1. 2. 3 Fukushima nuclear accident changed the world nuclear energy development	11
1. 2. 4 Shale gas challenges global land scape of natural gas	13
1. 2. 5 The world's energy consumption structure tends to be clean and low-carbon	14
1. 2. 6 Great difference exists in primary energy consumption structure across countries	16
1. 3 Analysis of characteristics of the world energy trade	18
1. 3. 1 Characteristics of the world oil trade	18
1. 3. 2 Characteristics of the world natural gas trade	19
1. 3. 3 Characteristics of the world coal trade	20
1. 4 Characteristics of China's energy consumption and China's energy security	20
1. 4. 1 Characteristics of China's energy consumption	20
1. 4. 2 History of China's energy security	25
1. 4. 3 Current status of China's energy security	27
1. 5 Interpretation and understanding of energy security	28
1. 5. 1 Definition of energy security	28
1. 5. 2 Content of energy security and its evolution	29
1. 6 Chapter summary	31
Chapter 2 Geo-political development of world energy and China's energy diplomacy	32
2. 1 The evolution of the world's energy geo-political relationship	33

2.1.1	Struggling for hegemony in Middle East between the U. S. and the UK	33
2.1.2	Rivalry between IEA and OPEC	36
2.2	New situation of the world's energy geo-political relationship	38
2.2.1	The U. S. searches for oil hegemony	39
2.2.2	Russia performs well in energy diplomacy	39
2.2.3	EU and Japan are still in contradiction	40
2.2.4	Emerging countries continue to grow up	40
2.2.5	OPEC suffers constantly	41
2.3	Geo-political situation of the five major oil-producing regions	41
2.3.1	Geo-political situation of Central Asia and Russia	41
2.3.2	Geo-political situation of Middle East	43
2.3.3	Geo-political situation of Africa	44
2.3.4	Geo-political situation of Latin America	46
2.3.5	Geo-political situation of Asia-Pacific	47
2.4	Changes of China's role in energy	48
2.4.1	From an oil-poor country to an oil-exporting country	48
2.4.2	From an oil-exporting country to an oil-importing country	49
2.5	China's energy diplomacy	49
2.5.1	China's energy diplomacy in Central Asia and Russia	50
2.5.2	China's energy diplomacy in Middle East	51
2.5.3	China's energy diplomacy in Africa	52
2.5.4	China's energy diplomacy in Latin America	53
2.5.5	China's energy diplomacy in Asia-Pacific	53
2.6	Chapter summary	55
Chapter 3	Oil price and energy security	56
3.1	World oil price system and its evolution	57
3.1.1	Composition of the world oil price system	57
3.1.2	Evolution of the world oil price system	57
3.2	Characteristics of world oil price volatility and its impact	60
3.2.1	Characteristics of oil price volatility	60
3.2.2	Main factors impacting oil price volatility	64
3.2.3	Impact of oil price volatility on economy and finance	65
3.3	Oil financialization and its risk analysis	75
3.3.1	The significance of oil financialization	75
3.3.2	Inherent risks of the oil financialization	77
3.3.3	Speculations and price volatility in oil futures markets	78
3.4	Oil price and China's energy security	79
3.4.1	Oil pricing mechanism and China's energy security	79

3. 4. 2	Contradiction between energy security and food security caused by high oil price	82
3. 4. 3	Future trends of oil price and China's energy security	84
3. 5	Chapter summary	87
Chapter 4	China's energy import and its transport risk assessment	88
4. 1	Transportation risk analysis of China's major energy trade channel	89
4. 1. 1	Major transport channels of China's energy trade	89
4. 1. 2	Main risks of oil marine transportation	92
4. 1. 3	Strategy of reducing the transportation risks for China's energy trade	94
4. 2	Comparative analysis of the integrated risk of China's oil imports	96
4. 2. 1	Difference between China's crude oil and refined oil trade	96
4. 2. 2	Oil import portfolio risk evaluation model	98
4. 2. 3	Specific risks comparison of China's crude oil and refined oil imports	99
4. 2. 4	Systemic risks comparison of China's oil imports	102
4. 2. 5	Conclusions	106
4. 3	Risks comparison of crude oil imports between China and U. S.	106
4. 3. 1	Status and dependency in crude oil imports of China and U. S.	106
4. 3. 2	Differences in crude oil importing sources and diversification between China and U. S.	107
4. 3. 3	Difference in crude oil importing strategies between China and U. S.	110
4. 3. 4	Comparison of crude oil importing strategies of China and U. S.	114
4. 3. 5	Conclusions	115
4. 4	China's coal trade and its transportation risk analysis	115
4. 4. 1	History and current situation of China's coal trade	115
4. 4. 2	Coal trade and its transportation risk analysis	116
4. 5	China's natural gas trade and its transportation risk analysis	118
4. 5. 1	Current status of China's natural gas supply and demand	118
4. 5. 2	China's natural gas trade and its transportation risk analysis	119
4. 6	Chapter summary	122
Chapter 5	China's energy reserves strategy	123
5. 1	Status and characteristics of global strategic energy reserves	124
5. 1. 1	History and current situation of global strategic energy reserves	124
5. 1. 2	Characteristics and strategies of the U. S. strategic petroleum reserve	126
5. 2	Optimal opportunity and strategies of stockpile acquisition for China's strategic petroleum reserve	128
5. 2. 1	China's strategic oil reserve plan	128
5. 2. 2	Uncertain dynamic programming model for China's strategic petroleum reserve	130

5. 2. 3	Optimal strategies of stockpile acquisition for China's strategic petroleum reserve	132
5. 3	Optimal drawdown strategy for China's strategic petroleum reserve in emergencies	136
5. 3. 1	Dynamic programming model for China's strategic petroleum reserve	136
5. 3. 2	Impact of different incidents on world oil price	140
5. 3. 3	Optimal strategy for China's strategic petroleum reserve under different emergency scenarios	142
5. 3. 4	Impact of drawdown and stockpile acquisition for China's strategic petroleum reserve on world oil price	144
5. 3. 5	China's refined oil reserve strategy	145
5. 4	China's natural gas reserve strategy	147
5. 4. 1	Patterns and characteristics of natural gas reserve in representative countries	147
5. 4. 2	Status and strategies of China's natural gas reserve	148
5. 5	China's coal reserve strategy	150
5. 5. 1	Status of China's coal reserves	150
5. 5. 2	Strategy recommendations for coal reserve	152
5. 6	Chapter summary	152
Chapter 6	Key energy-saving sectors and regions under condition of energy security	154
6. 1	Introduction	155
6. 2	Research and data explanation	156
6. 3	Key energy-saving sectors and regions	159
6. 3. 1	Key energy-saving regions for Agricultural sector	159
6. 3. 2	Key industrial energy-saving sectors and regions	159
6. 3. 3	Construction energy consumption	161
6. 3. 4	Key Energy-saving sectors and regions for the tertiary industry	161
6. 3. 5	Residential energy consumption	163
6. 4	Conclusions and Policy Implications	164
Chapter 7	Benefits of clean and renewable energy to energy security	166
7. 1	Substitution effect of clean and renewable energy to fossil energy in the world	167
7. 1. 1	Global clean and renewable energy grows rapidly	167
7. 1. 2	The share of clean and renewable energy will continue to increase in future	170
7. 2	Substitution effect of clean and renewable energy to fossil energy in China	170
7. 2. 1	Clean and renewable energy grows rapidly in China	170
7. 2. 2	China's hydropower reserve is still rich	172
7. 2. 3	China's nuclear power in 2020 is expected to account for 4% ~ 5% of the total installed electricity capacity	172

7.2.4	China's wind power develops rapidly	173
7.2.5	Good prospects for China's solar energy utilization	174
7.2.6	Status and potential of China's bio-energy development	175
7.3	International comparison of clean and renewable energy development policies	176
7.3.1	Targets oriented	176
7.3.2	Policy incentives	176
7.3.3	Industrial supporting	177
7.3.4	Financial supports	177
7.4	Chapter summary	178
Chapter 8	Energy poverty and energy use security	179
8.1	The relationship between energy poverty and energy use security	180
8.1.1	Energy poverty and its global status	180
8.1.2	Status of energy poverty in China	181
8.2	Research of main factors influencing energy poverty	186
8.2.1	Influencing factors	186
8.2.2	Methodology	190
8.2.3	Model results and analysis	191
8.3	Regional energy poverty assessment in China	192
8.3.1	Energy development index in developing countries	192
8.3.2	Provincial energy poverty index in China	193
8.3.3	Main conclusions	196
8.4	Chapter summary	197
Chapter 9	China's energy consumption and public health	198
9.1	Review of the impact of energy consumption on the environment and public health	199
9.1.1	Review of the impact of energy consumption on the environment	199
9.1.2	Review of researches about public health effects caused by environmental pollution	200
9.1.3	Review of the public health effects caused by regional pollution and industrial emissions	200
9.2	Economic Assessment of urban air pollution and public health effects	201
9.2.1	Background	201
9.2.2	Economic evaluation methods of environmental health effects and data sources	202
9.2.3	The health effects and economic losses of urban air pollutants	204
9.2.4	Scenario analysis	207
9.3	Economic Assessment of sector pollutants and public health effects	208
9.3.1	Methodology for assessing the effects of sector pollutants on public health and data sources	208

9.3.2	The health effects and economic losses assessment of sector pollutants	212
9.3.3	Economic losses assessment of sector marginal health effects	214
9.3.4	Economic losses assessment of energy marginal health effects	216
9.3.5	Scenario analysis	216
9.4	Main conclusions and recommendations	218
Chapter 10	Energy supply crisis and economy security research	220
10.1	History of global energy crisis and its impact	221
10.1.1	History of global energy crisis	221
10.1.2	Impact of oil crisis on the world macro-economy	222
10.2	Analysis of China's energy supply shortage event	226
10.2.1	China's energy supply shortages events in recent years	226
10.2.2	Influencing factors research of China's energy supply shortage	227
10.3	Socio-economic impact of crude oil supply disruption	229
10.3.1	Scenario settings of crude oil supply disruption	229
10.3.2	Socio-economic impact of crude oil supply disruption in China	229
10.4	Socio-economic impact of oil price rise	234
10.4.1	Scenario settings of oil price rise	234
10.4.2	Socio-economic impact of oil price rise in China	234
10.5	Contingency plan research of refined oil supply shortage	240
10.5.1	China's refined oil supply system	240
10.5.2	Model settings	244
10.5.3	Effects comparison of different refined oil supply shortage contingency plans	246
10.6	Chapter summary	247
Chapter 11	Comprehensive evaluation of the national energy security	249
11.1	Comparison of energy security policy in main countries	250
11.1.1	Increase energy science and technology investment; get energy technology breakthrough by all means	251
11.1.2	Diversify energy imports and decentralize the risk of energy import	252
11.1.3	All energy-importing countries vigorously develop strategic reserves; improve capability of energy emergency response	253
11.1.4	Optimize energy consumption structure; encourage the development of clean and renewable energy	254
11.1.5	Emphasize energy geo-politics; make diversified energy diplomacy and cooperation	256
11.1.6	Establish institutions to efficiently manage energy security; develop energy emergency laws and regulations	257
11.2	Comprehensive evaluation system for energy security and the methodology	258

11. 2. 1	Comprehensive evaluation index of energy security	258
11. 2. 2	Comprehensive evaluation model of energy security	259
11. 3	Comparison of energy supply security in main countries	261
11. 3. 1	Energy supply security index shows fluctuant rise in main developed countries	261
11. 3. 2	Energy supply security index tends to decrease in main developing countries	265
11. 3. 3	Energy supply security index increase substantially in most countries after the 2008 global financial crisis	267
11. 3. 4	Main Conclusions	267
11. 4	Comprehensive assessment of China's energy security in the context of climate change	268
11. 4. 1	The impact of climate change on China's energy security policy	268
11. 4. 2	Data sources and pretreatment	269
11. 4. 3	China's energy supply security index shows a trend of decrease after rise	270
11. 4. 4	China's energy use security index shows a trend of rise with fluctuation	272
11. 4. 5	Climate protection and China's energy security	273
11. 4. 6	Main conclusions	274
11. 5	Chapter summary	275
Chapter 12	Challenges and prospects of China's energy security	276
12. 1	Challenges of China's energy security	277
12. 1. 1	The challenge from energy consumption with rapid growth	277
12. 1. 2	The challenge from energy security impact factors diversification	277
12. 1. 3	The challenge from unitary security turning to diversified security	278
12. 1. 4	The challenge from global climate change	278
12. 1. 5	The challenge from environmental management and protection	279
12. 1. 6	The challenge from total energy consumption control	279
12. 2	Prospects of energy supply and demand in China (till 2020)	280
12. 2. 1	Energy demand growth rate gradually falls, but the rate is quite uncertain	280
12. 2. 2	The proportion of coal consumption slowly declines, but the proportion of natural gas and renewable energy gradually increase	281
12. 2. 3	The production of crude oil and coal increase more and more slowly, but the overall clean and low-carbon energy grow fast	281
12. 2. 4	China's energy production center continue to move towards West, and large-scale, long-distant energy transportation cause new challenges for security and management	282
12. 2. 5	Net imports of coal, oil and natural gas will continue to be the first or second in the world, and the reform of natural gas pricing mechanism becomes urgent ...	282
12. 3	Prospects of China's energy security	283
