Preface

This book is based on several years' teaching experience of the author. It has been taught and revised again and again until it reaches the present level.

The book has benefited from a number of its forerunners. But somehow, it is an improvement on all of them, as it has incorporated a synchronical and diachronical study of English vocabulary and there is no lack of original ideas and conclusions throughout the book.

English lexicology is a branch of linguistic science which deals with English words. The present book traces the origin and development of English words. It analyses their morphology, formation, and motivation. It delves into their semantic features, semantic classification and changes of meanings.

The book is designed to cater to the needs of Chinese students of English. It has anticipated their difficulties and problems so that they will, no doubt, find it easy to read and understand. The book is far from perfect. The author is responsible for the possible errors and omissions and the readers are sincerely invited to point them out to be corrected in further editions.

In trying to cover so wide an area, one is made more than usually aware of one's debt to contemporary and to ear-

lier scholars who have laboured in this field. More personally, I am happy to express my thanks to Professor Zhang Yueguang, Dean of the Foreign Languages Department of Shaanxi Teachers University, who has done the reading and checking of the whole manuscript. And I must also thank Zhong Jialin and Zhong Jiaxun for their painstaking help in typing and proof-reading the text of this book.

SECTION ONE

SOURCES OF ENGLISH WORDS

A DETOUR INTO LANGUAGE HISTORY

Before we can profitably continue along the road to word mastery, we have to make a short detour into language history. From the 16th century on, scholars have pointed to the similarities in languages as apparently unrelated as Persian and German, or Lithuanian and Latin. Only recently, though, have they formulated a sound explanation for the similarities:

(1) The relationship between Lithuanian and Latin, or Persian and German, or Icelandic and Greek, or Sanskrit and Russian is really a family relationship.

(2) These languages, and many others, derived from a single earlier language, which, sometime, someplace, was spoken by some group. (when, where, and which can not be answered with certainty.)

THE INDO-EUROPEAN FAMILY OF LANGUAGES

This family of languages has been variously named the Indo-European (by the French), the Aryan (by the English), and the Indo-Germanic (by the Germans). But

Indo-European is generally accepted to be the most accurate designation, though the family stretches beyond the boundaries indicated. Most people from Central Asia to westernmost Europe speak one or another of the Indo-European languages. The chart below lists **most** of the languages in the family of Indo-European languages.

The Indo-European Family Of Languages

(A) The Asiatic

1. The Indic Branch Of Languages

Sanskrit	India
Hindi	Northern India
Urdu	Pakistan, India
Nepali	Nepal
Sinhalese	Ceylon
Bihari	Bihar
Assamese	Assam
Bengali	Bengal
Oriya	Orissa
Konkani	western India
Marathi	western India
Gujarati	Gujarat
Rajasthani	Rajasthan
Panjabi	Panjab
Sindhi	Sind
Lahnda	western Panjab

2. The Iranian Branch Of Languages

(1) The West Group Of Iranian Languages

Persian	Iran
Kurdish	Persia, Iraq, Turkey
Baluchi	West Pakistan
Tajiki	central Asia

(2) The East Group Of Iranian Languages

Pashto	Afghanistan
Ossetic	Caucasus

3. The Armenian Branch

Armenian	Asia Minor, Caucasus
----------	----------------------

(B) The European

4. The Germanic Branch Of Languages

(1) The East Group

Gothic	Medieval eastern Europe
--------	-------------------------

(2) The North Group

Icelandic	Iceland
Faeroese	Faeroe Islands
Norwegian	Norway
Swedish	Sweden
Danish	Denmark

(3) The West Group

German	Germany, Switzerland, Austria
Yiddish	Germany, eastern Europe
Dutch	Netherlands
Afrikaans	South Africa
Flemish	Belgium

- | | |
|---------|--|
| Frisian | Netherlands, Germany |
| English | England, parts of the world
within the British Empire |
5. The Celtic Branch Of Languages
- | | |
|-----------------|-------------|
| Welsh | Wales |
| Cornish | Cornwall |
| Breton | Brittany |
| Irish Gaelic | Ireland |
| Scottish Gaelic | Scotland |
| Manx | Isle of Man |
6. The Italic Branch Of Languages
- | | |
|----------------|------------------------------|
| Latin | Ancient Rome |
| Neo-Latin | |
| Portuguese | Portugal |
| Spanish | Spain |
| Judeo-Spanish | Mediterranean Lands |
| Catalan | Spain (Catalonia) |
| French | France, Belgium, Switzerland |
| Haitian Creole | Haiti |
| Italian | Italy, Switzerland |
| Romanian | Romania, Balkans |
| Rhaeto-Romanic | Switzerland, Italy |
| Sardinian | Sardinia |
| Dalmatian | Adriatic coast |
7. Albanian Albania, southern Italy
8. Greek Greece, the eastern Mediterranean

9. The Slavic Branch Of Languages

(1) The South Group Of Slavic Languages

Slovene Yugoslavia

Serbian Yugoslavia

Croatian Yugoslavia

Bulgarian Bulgaria

Macedonian Macedonia

(2) The West Group Of Slavic Languages

Czech Czechoslovakia

Slovak Czechoslovakia

Polish Poland

Kashubian Poland

Wendish Germany

Polabian Germany

(3) The East Group Of Slavic Languages

Russian Russia

Ukrainian Ukraine

Belorussian White Russia

10. The Baltic Branch Of Languages

Lithuanian Lithuania, East Prussia

Latvian Latvia

CHARACTERISTICS OF INDO- EUROPEAN LANGUAGES

English differs from Chinese in that English is characterized by its abundant inflections—varied word-forms, and
