As we step into the 21st century and memories of the 20th begin to recode, we are struck with profound awe as we reminisce over the panorama of events, developments, advancements, movements, moments and forces that shaped the Century and which have all indelibly etched their marks on human civilization. By any account, the 20th century is laden with superlatives; it is unique in the annals of humankind. The potency of political forces that whipped up prejudices and extreme nationalistic fervour that led to the slaughter of millions and brought humanity to the brink of annihilation, later manifest itself in economic forces that wrecked havoc and brought nations to their knees. We witness masses of humanity discarding the yoke of colonialism to form nation states and the ephemeral rise of people's movements toppling repressive regimes overnight like dominoes. The 20th century closed with the amazing phenomenon of the Internet.

What will the Web wrought? Will the next people's "revolution" occur on the Web? The borderless world has become a reality within this so-called virtual world. Its viral fecundity has been amply demonstrated a number of times. It is pervasive and no aspect of human civilisation is unaffected by its tentacular reach. Nevertheless, we are still grappling with the interactivity dimension of the Web. We are still exploring what the Web can be.

Macromedia is in the forefront of this exploration. As a professional Web designer or programmer, you are our partner in this exploration. You are the progenitor of this profound change in human society. You are the exponent of what the Web can be.

IdN and Macromedia have conceived this inaugural WWWhat Awards to recognise and honour the best in the Asia Pacific region. Let me take this opportunity to thank all participants in this contest and to congratulate the winners. I would also like to thank IdN for their meticulous organisation of these Awards and for "capturing" these Awards in print for the benefit of posterity and dissemination to a non-virtual audience. A special vote of thanks must also be extended to our volunteer panel of judges, who must have spent agonising hours of difficult evaluation.

Looking forward to the next exposition of what the Web can be

Sein Chew
Senior Director, Asia Pacific,
Macromedia

WINNERS

April Greiman // Greimanski Labs studio

Head of Greimanski Labs studio

Recognised as one of America's leading designers and a pioneer of technology with graphic, environmental, motion and interactive formats, April has taught and lectured throughout the US and has participated in museum shows around the globe.

Dave Taylor // The Attik
Managing Director

A studio that really started in an Attic - Yorkshire, England - and whose founders, James Sommerville and Simon Needham, two Batley Art College students, gained their earliest design experience chalking on local walls, but which now boasts offices in London, New York, San Francisco and Sydney and specialises in "telling a story without telling a story".

Greg Rewis // Macromedia
Senior Internet Evangelist

A pioneer of desktop publishing, Rewis now specializes in Dreamweaver, Fireworks and Flash. Drawing upon years of experience and knowledge of Internet issues and technologies to solve sometimes daunting problems, he has consulted on many large web projects with companies such as Fox Sports, Cartoon Networks, American Express, JP Morgan and Disney.

Harry Saddler // MetaDesign

Information and interaction designer, research and commercial development

MetaDesign is a multidisciplinary design firm - founded in 1979 by typographer Erik Spiekermann - with offices in San Francisco and Berlin and a combined staff of more than 200 designers, technologists, planners and implementation specialists. Specializing in corporate identity and systems design, it counts some of Silicon Valley's biggest hi-tech names among its clients.

Before joining MetaDesign, Harry Sadler researched new document genres with Xerox PARC and designed prototypes of computing systems modeled on human activity with Apple Computer's Advanced Technology Group.

IdN's Creative Team

Needless to say, the region's premier digital-design magazine is itself produced by some of the most creative people in the business, whose challenge is to showcase some of the world's most interesting and innovative designers in an environment conducive to getting their message across to thousands of eager readers.

comment // IdN believes that Macromedia wwwhat? awards is one of the most successful web design contest of the Year 2000. We are excited to see the very encouraging feedback from both the entrants and the voters in the People's choice awards, reaching almost 1,000 entries and more than 140,000 voters participated. Because of the superior quality in many of the entries, we have experienced a hard time yet overwhelmed when selecting the 105 finalists. IdN is looking forward to next time exploration to wwwhat the web can be*.

Joe McCambley // Modem Media

Vice-President, Worldwide Creative Director

McCambley is responsible for the creative quality of all of Modem Media work globally. Having overseen the creation of thousands of web initiatives and millions of brand/customer interactions, Joe and his talented team of creative directors may have more insight into what motivates behavior on the web than any team at any interactive agency in the world. A student of consumer behavior and industry trends, he has a special interest in reconciling client goals with the often conflicting goals of consumers.

John Warwicker // Tomato

Co-founder

The London-based design firm Tomato, is famous for its title sequence for the movie *Trainspotting* and its innovative approach to typography. A prolific writer and design "guru", he has contributed to numerous magazines, as well as co-authoring a book (mmm... skyscraper, i love you). Warwicker was the media architect for Federation Square, Melbourne - new cultural centre.

Jonathan Wan // Sina.com.hk

UI Design Manager

Jonathan Wan started out as a graphic designer for an internet start-up company in Santa Clara, CA in early 1996, designing web sites for clients such as Acer, AT&T, and Charles Schwab, among others. In 1997, he served as an art director at APIdigital.com to set up web design department, and then joined Charles Schwab, as a project manager to implement both Chinese and Spanish web trading sites in San Francisco throughout 1999. Now at Sina.com, Jonathan is an UI design manager to design and develop leading Internet portal in Hong Kong.

comment // "what the web can be* macromedia wwwhat? awards 2000 = B2D2E25212G2N : Business to Design to Education to Synergy to Innovation to Government to Network.

Lynne Spender // AIMIA

Executive Director

Having worked in publishing and the law for several years, Lynne Spender became Executive Director of the Australian Society of Authors in 1992 and remained in that position for 5 years. In 1998 she became Executive Director of the Australian Interactive Multimedia Industry Association, a national industry association for the Australian producers and creators of digital content. She has written several books including "Electronic Rights for Authors".

www

what?

R: 181 | G: 218 | B: 017

Rick Bennett // University of NSW

Lecturer

Englishman Rick, a veteran of the TV commercial and music-video promo worlds, is now an Australian citizen and is currently engaged in significant research into how the advances in digital technology can be best suited to the requirements of contemporary students in relation both to their own needs and those of today's design professions.

comment // The macromedia wwwwhat? awards 2000 was a great place for flash designers to come together and view each others work. Whether you are a 'first time tryer' or one of the leading interactive media agencies around, it is vital to see what others are doing with the medium. Of course the same old problems still exist like download time and browser compatibility but events like these awards and the community IdN helped provide go a long way to allowing designers to see how others cope with the restrictions. It is reassuring to view a place where people are pushing the software and not designing to what it seems to allow them to do ... the web is full of spinning fonts, expanding rectangles and dramatic industrial noises, so visiting the wwwwhat? awards submissions was a breath of fresh air ...

I was a pleasure to view and judge submissions and I congratulate all who took part and of course to the winners - "way hay!"

Shin Sasaki // Extra Designs

Creative Director

This Japan-based web-design studio does a wide range of graphic work, from printing to the website. Many of its works can be seen on its website www.extra.jp.org. Extra has collaborated with some foreign designers such as Fountain www.fountain.nu and a Danish magazine, Virus.

comment // When I received an email that invited me as one of the judge, I did not know how big the contest could be. Then at the end of 2000, I heard that there was almost 1,000 entries! This is much more than I expected.

This wwwwhat? awards 2000 was a good opportunity for me to know what is going on in Asian and Pacific. Because of the language barrier, I had not visited Asian web site often, honestly.

What the web can be anyway?

Simon Waterfall // Deepgroup

Creative Director

Simon co-founded this burgeoning design company with Gary Lockton in 1994 and in 1996 he gained a Masters degree in Industrial Design from the Royal College of Art. Last year he was on the panel of judges for the British Design and Art Direction Awards, the Royal Society of Arts Student Design Awards and the Design Week Awards.

Yat Siu // Outblaze

Chief Executive Officer and Founder

Outblaze is the first company to recognize and anticipate the massive market demand for community-oriented portal services and solutions.
