原版影印说明

《材料手册》(8册)是 Springer *Materials Handbook A Concise Desktop Reference* (2nd Edition) 的影印版。为使用方便,由原版1卷分为8册:

- 1 材料的性能
- 2 常用的有色金属及其合金
- 3 不常用的有色金属
- 4 半导体 超导体 磁性材料 绝缘体 电介质 其他电气材料
- 5 陶瓷 耐火材料 玻璃 聚合物 弹性体
- 6 矿物 矿石 宝石 岩石 陨石
- 7 土壤 肥料 水泥 混凝土 石材 结构材料
林木 燃料 推进剂 炸药 复合材料
- 8 气体 液体

本手册提供各种材料的物理和化学性质,是一本简洁的手边工具书。第二版与第一版的差别是扩充了新的家用材料,但重点是每一类常见的工业材料。

François Cardarelli

Materials Handbook

A Concise Desktop Reference

2nd Edition

 Springer

Dedication for the First Edition

The *Materials Handbook: A Concise Desktop Reference* is dedicated to my father, Antonio, and my mother, Claudine, to my sister, Elsa, and to my spouse Louise Saint-Amour for their love and support. I want also to express my thanks to my two parents and my uncle Consalvo Cardarelli, which in close collaboration have provided valuable financial support when I was a teenager to contribute to my first fully equipped geological and chemical laboratory and to my personal comprehensive scientific library. This was the starting point of my strong and extensive interest in both science and technology, and excessive consumption of scientific and technical literature.

François Cardarelli

Dedication for the Second Edition

The *Materials Handbook: A Concise Desktop Reference* is dedicated to my father, Antonio, and my mother, Claudine, to my sister, Elsa, and to my wife Elizabeth I.R. Cardarelli for their love and support. I want also to express my thanks to my two parents and my uncle Consalvo Cardarelli, which in close collaboration have provided valuable financial support when I was a teenager to contribute to my first fully equipped geological and chemical laboratory and to my personal comprehensive scientific library. This was the starting point of my strong and extensive interest in both science and technology, and excessive consumption of scientific and technical literature.

François Cardarelli

Acknowledgements for the First Edition

Mr. Nicholas Pinfield (engineering editor, London), Mr. Jean-Étienne Mittelmann (editor, Paris), Mrs. Alison Jackson (editorial assistant, London), and Mr. Nicolas Wilson (senior production controller, London) are gratefully acknowledged for their valued assistance, patience, and advice.

Acknowledgements for the Second Edition

Mr. Anthony Doyle (senior engineering editor), Mr. Oliver Jackson (associate engineering editor), and Mr. Nicolas Wilson (editorial coordinator) are gratefully acknowledged for their valued assistance, patience, and advice.

Units Policy

In this book the only units of measure used for describing physical quantities and properties of materials are those recommended by the *Système International d'Unités* (SI). For accurate conversion factors between these units and the other non-SI units (e.g., cgs, fps, Imperial, and US customary), please refer to the reference book by the same author:

Cardarelli, F. (2005) *Encyclopaedia of Scientific Units, Weights, and Measures. Their SI Equivalences and Origins*. Springer, London New York. ISBN 978-1-85233-682-1.

Author Biography

Dr. François Cardarelli (Ph.D.)
Born in Paris (France) February 17, 1966
Canadian citizen

Academic Background

- Ph.D., chemical engineering (Université Paul Sabatier, Toulouse, France, 1996)
- Postgraduate degree (DEA) in electrochemistry (Université Pierre et Marie Curie, Paris, 1992)
- M.Sc. (Maîtrise), physical chemistry (Université Pierre et Marie Curie, Paris, 1991)
- B.Sc. (Licence), physical chemistry (Université Pierre et Marie Curie, Paris, 1990)
- DEST credits in nuclear sciences and technologies (Conservatoire National des Arts et Métiers, Paris, 1988)

- Associate degree (DEUG B) in geophysics and geology (Université Pierre et Marie Curie, Paris, 1987)
- Baccalaureate C (mathematics, physics, and chemistry) (CNED, Versailles, France, 1985)

Fields of Professional Activity

The author has worked in the following areas (in chronological order) since 1990.

- (1) Research scientist at the Laboratory of Electrochemistry (Université Pierre & Marie Curie, Paris, France) for the development of a nuclear detector device for electrochemical experiments involving radiolabeled compounds;
- (2) research scientist at the Institute of Marine Biogeochemistry (CNRS & École Normale Supérieure, Paris, France) for the environmental monitoring of heavy-metal pollution by electroanalytical techniques;
- (3) research scientist for the preparation by electrochemistry in molten salts of tantalum protective thin coatings for the chemical-process industries (sponsored by Electricité de France);
- (4) research scientist for the preparation and characterization of iridium-based industrial electrodes for oxygen evolution in acidic media at the Laboratory of Electrochemical Engineering (Université Paul Sabatier, Toulouse, France);
- (5) registered consultant in chemical and electrochemical engineering (Toulouse, France);
- (6) battery product leader in the technology department of ARGOTECH Productions, Boucherville (Québec), Canada, in charge of electric-vehicle, stationary, and oil-drilling applications of lithium polymer batteries;
- (7) materials expert and industrial electrochemist in the lithium department of ARGOTECH Productions, involved in both the metallurgy and processing of lithium metal anodes and the recycling of spent lithium polymer batteries;
- (8) materials expert and industrial electrochemist in the technology department of AVESTOR, Boucherville (Quebec), Canada, in charge of all strategic raw materials entering into the fabrication of lithium polymer batteries, as well as being in charge of the recycling process of spent lithium batteries;
- (9) principal chemist, materials, in the technology department of RIO TINTO Iron and Titanium, Sorel-Tracy (Québec), Canada working on the electrowinning of titanium metal from titania-rich slags and on other novel electrochemical processes;
- (10) principal electrochemist at Materials and Electrochemical Research (MER) Corp., Tuscon (Arizona, USA) working on the electrowinning of titanium metal powder from composite anodes and other materials related projects.

Introduction

Despite the wide availability of several comprehensive series in materials sciences and metallurgy, it is difficult to find grouped properties either on metals and alloys, traditional and advanced ceramics, refractories, polymers and elastomers, composites, minerals and rocks, soils, woods, cement, and building materials in a single-volume source book.

Actually, the purpose of this practical and concise reference book is to provide key scientific and technical materials properties and data to materials scientists, metallurgists, engineers, chemists, and physicists as well as to professors, technicians, and students working in a broad range of scientific and technical fields.

The classes of materials described in this handbook are as follows:

- (i) metals and their alloys;
- (ii) semiconductors;
- (iii) superconductors;
- (iv) magnetic materials;
- (v) dielectrics and insulators;
- (vi) miscellaneous electrical materials (e.g., resistors, thermocouples, and industrial electrode materials);
- (vii) ceramics, refractories, and glasses;
- (viii) polymers and elastomers;
- (ix) minerals, ores, and gemstones;
- (x) rocks and meteorites;
- (xi) soils and fertilizers;
- (xii) timbers and woods;
- (xiii) cement and concrete;
- (xiv) building materials;
- (xv) fuels, propellants, and explosives;

- (xvi) composites;
- (xvii) gases;
- (xviii) liquids.

Particular emphasis is placed on the properties of the most common industrial materials in each class. The physical and chemical properties usually listed for each material are as follows:

- (i) physical (e.g., density, viscosity, surface tension);
- (ii) mechanical (e.g., elastic moduli, Poisson's ratio, yield and tensile strength, hardness, fracture toughness);
- (iii) thermal (e.g., melting and boiling point, thermal conductivity, specific heat capacity, coefficients of thermal expansion, spectral emissivities);
- (iv) electrical (e.g., resistivity, relative permittivity, loss tangent factor);
- (v) magnetic (e.g., magnetization, permeability, retentivity, coercivity, Hall constant);
- (vi) optical (e.g., refractive indices, reflective index, dispersion, transmittance);
- (vii) electrochemical (e.g., Nernst standard electrode potential, Tafel slopes, specific capacity, overpotential);
- (viii) miscellaneous (e.g., relative abundances, electron work function, thermal neutron cross section, Richardson constant, activity, corrosion rate, flammability limits).

Finally, detailed appendices provide additional information (e.g., properties of the pure chemical elements, thermochemical data, crystallographic calculations, radioactivity calculations, prices of metals, industrial minerals and commodities), and an extensive bibliography completes this comprehensive guide. The comprehensive index and handy format of the book enable the reader to locate and extract the relevant information quickly and easily. Charts and tables are all referenced, and tabs are used to denote the different sections of the book. It must be emphasized that the information presented here is taken from several scientific and technical sources and has been meticulously checked and every care has been taken to select the most reliable data.

Contents

Introduction.....	13
12 Minerals, Ores and Gemstones	751
12.1 Definitions	751
12.2 Mineralogical, Physical and Chemical Properties	756
12.2.1 Mineral Names.....	756
12.2.2 Chemical Formula and Theoretical Chemical Composition	757
12.2.3 Crystallographic Properties.....	757
12.2.4 Habit or Crystal Form	758
12.2.5 Color	759
12.2.6 Diaphaneity or Transmission of Light.....	760
12.2.7 Luster	760
12.2.8 Cleavage and Parting.....	760
12.2.9 Fracture	761
12.2.10 Streak	761
12.2.11 Tenacity	761
12.2.12 Density and Specific Gravity	762
12.2.13 Mohs Hardness	762
12.2.14 Optical Properties.....	765
12.2.15 Static Electricity and Magnetism.....	766
12.2.16 Luminescence.....	766
12.2.17 Piezoelectricity and Pyroelectricity	766
12.2.18 Play of Colors and Chatoyancy	767
12.2.19 Radioactivity	767
12.2.20 Miscellaneous Properties	767
12.2.21 Chemical Reactivity.....	767
12.2.22 Pyrognostic Tests or Fire Assays.....	768
12.2.22.1 The Flame Test.....	768
12.2.22.2 The Fusibility Test.....	770
12.2.22.3 The Reduction on Charcoal.....	771

	12.2.22.4	Tests with Cobalt Nitrate and Sulfur Iodide	771
	12.2.22.5	The Closed Tube Test	772
	12.2.22.6	The Open Tube Test	774
	12.2.22.7	The Bead Tests	775
	12.2.23	Heavy-Media or Sink-float Separations in Mineralogy	776
	12.2.23.1	Selection of Dense Media	777
	12.2.23.2	Common Heavy Liquids Used in Mineralogy	777
12.3		Strunz Classification of Minerals	777
12.4		Dana's Classification of Minerals	779
12.5		Gemstones	781
	12.5.1	Diamond	783
	12.5.1.1	Introduction	783
	12.5.1.2	Diamond Types	784
	12.5.1.3	Diamond Physical and Chemical Properties	784
	12.5.1.4	Diamond: Origins and Occurrence	786
	12.5.1.5	Industrial Applications	787
	12.5.1.6	Diamond Prices	788
	12.5.1.7	Treatments	788
	12.5.1.8	Diamond Shaping and Valuation	788
	12.5.2	Beryl Gem Varieties	789
	12.5.2.1	Emerald	790
	12.5.2.2	Aquamarine	791
	12.5.2.3	Morganite	792
	12.5.2.4	Heliodor	792
	12.5.2.5	Goshenite	792
	12.5.3	Corundum Gem Varieties	792
	12.5.3.1	Ruby	794
	12.5.3.2	Sapphire	794
	12.5.4	Synthetic Gemstones	795
	12.5.4.1	Synthesis from Melts	795
	12.5.4.2	Synthesis from Solutions	796
	12.5.4.3	Diamond Synthesis	797
12.6		IMA Acronyms of Rock-forming Minerals	798
12.7		Mineral and Gemstone Properties Table	800
12.8		Mineral Synonyms	868
12.9		Further Reading	878
	12.9.1	Crystallography	878
	12.9.2	Optical Mineralogy	879
	12.9.3	Mineralogy	880
	12.9.4	Industrial Minerals	881
	12.9.5	Ores	881
	12.9.6	Gemstones	882
	12.9.7	Heavy Liquids and Mineral Dressing	883
13		Rocks and Meteorites	885
	13.1	Introduction	885
	13.2	Structure of the Earth's Interior	886
	13.3	Different Type of Rocks	889
	13.4	Igneous Rocks	890
	13.4.1	Classification of Igneous Rocks	891
	13.4.1.1	Crystals Morphology and Dimensions	892

	13.4.1.2	Mineralogy.....	892
	13.4.1.3	Coloration.....	894
	13.4.2	Texture of Igneous Rocks.....	895
	13.4.3	Chemistry of Igneous Rocks	896
	13.4.4	General Classification of Igneous Rocks	899
	13.4.5	Vesicular and Pyroclastic Igneous Rocks	904
13.5		Sedimentary Rocks	904
	13.5.1	Sediments	906
	13.5.2	Residual Sedimentary Rocks.....	906
	13.5.3	Detritic or Clastic Sedimentary Rocks	907
	13.5.4	Chemical Sedimentary Rocks	908
	13.5.5	Biogenic Sedimentary Rocks	909
	13.5.6	Chemical Composition.....	910
13.6		Metamorphic Rocks	910
	13.6.1	Classification of Metamorphic Rocks	911
	13.6.2	Metamorphic Grade	911
	13.6.3	Metamorphic Facies	912
13.7		Ice	912
13.8		Meteorites	914
	13.8.1	Definitions.....	914
	13.8.2	Modern Classification of Meteorites.....	914
	13.8.3	Tektites, Impactites, and Fulgurites	920
13.9		Properties of Common Rocks.....	921
13.10		Further Reading	925

Index

François Cardarelli
Materials Handbook
A Concise Desktop Reference
Second Edition

The unique and practical *Materials Handbook* (second edition) provides quick and easy access to data on the physical and chemical properties of all classes of materials. The second edition has been much expanded to include whole new families of materials while many of the existing families are broadened and refined with new material and up-to-date information. Particular emphasis is placed on the properties of common industrial materials in each class. After a chapter introducing some general properties of materials, materials are classified as follows:

- ferrous metals and their alloys;
- nonferrous metals;
- semiconductors and superconductors;
- magnetic materials;
- insulators and dielectrics;
- miscellaneous electrical materials;
- ceramics, refractories and glasses;
- polymers and elastomers;
- minerals, ores and gemstones;
- rocks and meteorites;
- soils and fertilizers;
- cements, concrete, building stones and construction materials;
- timbers and woods;
- fuels, propellants and explosives;
- composite materials;
- gases;
- liquids;

Detailed appendices provide additional information on subjects as diverse as crystallography, natural radioactivity and economic data for industrial materials. Specific further reading sections and a general bibliography round out this comprehensive guide. The index and tabular format of the book make light work of extracting what the reader needs to know from the wealth of factual information within these covers.

François Cardarelli is Principal Electrochemist at Materials and Electrochemical Research (MER) Corp. in Tucson, Arizona. He has had wide-ranging commercial and industrial experience of materials, commodities and electrochemical processes: at CNRS in Paris he designed and used electrochemical sensors for pollution control; at the University Paul Sabatier in Toulouse he developed methods of preparation of industrial electrodes; as a registered professional consultant, he solved problems in electrochemical engineering; at the Avestor Corp. in Boucherville, Canada, he worked as an industrial electrochemist and materials expert on the processing of lithium metal anodes, and invented a pyrometallurgical and hydrometallurgical process for recycling spent lithium batteries; at Rio Tinto Iron & Titanium in Canada, he was Principal Chemist dealing with valorization processes for metallurgical wastes and mining residues, the benchmarking of refractories for steelmaking and inventing a process for electrowinning titanium metal from titania slags. Dr. Cardarelli is the author of *Encyclopaedia of Scientific Units, Weights and Measures* (ISBN:978-1-85233-682-0).
