Preface

Operations Management (OM) has seen many innovations in recent years, becoming a topic of critical importance in business today. Demands for business reengineering, quality, time-based competition, value-adding processes, and a global view have demonstrated that superior management of the operations function is vital to the survival of the firm. An understanding of OM strategy and its function is a necessary part of any good business education.

Operations Management should appeal to individuals who want to be directly involved in making products or providing services. The entry-level operations specialist is the person who determines how best to design, supply, and run the processes. Senior operations managers are responsible for setting the strategic direction of the company from an operations standpoint, deciding what technologies should be used, where facilities should be located, and managing the facilities that make the products or provide the services. Operations Management is an interesting mix of managing people and applying sophisticated technology. The goal is to efficiently create wealth by supplying quality goods and services.

The field of operations management ranges from high-tech manufacturing to high-touch services, so we have tried to balance the treatment of the manufacturing and service aspects. Operations management now requires a global perspective for many of the topics. Operations management is best done with significant cross-functional integration. Accounting, finance, marketing, human resources management, purchasing, logistics, and engineering impact how firms are run operationally. To highlight our emphasis on services, globalization, and cross-functional integration, we've used the logos you see here in the text margin next to these discussions. In addition, many references to World Wide Web sites are indicated with this special Internet logo.

Features to aid in your understanding the material include the following:

- Solved problems at the end of chapters to serve as models that can be reviewed prior to attempting problems.
- Checkmarks next to problems that have answers in Appendix H.
- Breakthrough Boxes to demonstrate leading-edge companies or practices that are innovative and trailblazing.
- Excel[®] spreadsheet templates and data sets, which are included on the CD-ROM packaged at the back of each text.

Our aim is to cover the latest and the most important issues facing OM managers, as well as the basic tools and techniques. We supply many examples of leading-edge companies and practices. We have done our best to make the book interesting reading. We hope you enjoy it.

■ ACKNOWLEDGMENTS

It is with a great deal of pleasure that we welcome Bob Jacobs to the authorship team. After seven editions over 25 years you don't make such decisions lightly. We had our own "Star Search" involving discussions with colleagues around the country seeking out the best of potential co-authors. Our criteria were tough. He or she needed to be on top of developments in the field, be a leader in the discipline, and enjoy writing and teaching. Bob filled these criteria to a T. In addition, he has significant business and international experience and teaches at a top-notch university, with a large and highly successful program in operations management. We are confident that his work on this 8th edition will enhance your learning of this fascinating and important subject.

Several very talented scholars have made major contributions to specific chapters in the book. We are pleased to thank the following individuals:

Dan Heiser and Doug Blocher for their help with Quality Management.

Jack Muth for his ideas on Strategic Capacity Management.

Morgan Swink and Vince Mabert for their help with Supply Chain Management.

Joe Moore for his ideas for Aggregate Planning and Operations Strategy.

Chris Albright for the AHP spreadsheet in Chapter 12 on Supply Chain Management.

Ash Soni for the references to SAP R/3.

Jim Patterson for his ideas on Project Management.

Ravi Behara of George Mason University for assistance with Business Process Reengineering, Facility Location, and Strategic Capacity Planning.

Louis R. Chase, editor extraordinaire and Shakespeare expert for ideas on several chapters.

Marilyn Helms of the University of Tennessee at Chattanooga for her help with Operations Strategy and Competitiveness, and Just-in-Time Systems.

Michael J. Maggard of Northeastern University, for his ideas on Service Design.

David O'Donnell of the University of Southern California for his assistance with Project Management.

"Raj" Rajagopalan of the University of Southern California for his input on Operations Consulting.

Alex Zhang of the University of Southern California for his help with Simulation.

Special thanks to Joseph Moore of Indiana University and Phillip Fry of Boise State University who solved all of the examples and problems and checked our answers for accuracy. Special thanks also go out to colleagues at USC: Sriram Dasu, Richard D. McBride, K. Ravi Kumar, Bob Schmidt, Jon Yormark, and Constantin Vaitos.

Joseph Moore also prepared the Test Bank, and Ross L. Fink of Bradley University prepared the Instructor's Solutions Manual. Marilyn Helms of the University of Tennessee at Chattanooga revised the Study Guide. William Youngdahl of Thunderbird American Graduate School of International Management prepared the Power-Point slides. These supplements are a great deal of work to write, and we appreciate their efforts, which make teaching the course easier for everyone who uses the text.

We also thank the following reviewers for their many thoughtful suggestions for this edition: D. Leblanc, *Vanderbilt University*; Gary Scudder, *Vanderbilt University*; David Cabell, *McNeese State University*; Kannan Sethuraman, *University of Michigan*; Dilip Chhajed, *University of Illinois*; S. D. Deshumukh, *Northwestern University*; Dennis Krumwiede, *Kansas State University*; Harry Boer, *University of Twente—Netherlands*; Ashok Rao, *Babson College*; James Lawson, *Mississippi State University*; Constantin Vaitos, *University of Southern California*; Y. L. Helio Yang, *San Diego State University*; Keah-Choon Tan, *Mesa State University*; Emre Veral, *Baruch College*; Peter Kelle, *Louisiana State University*; Joseph Moore, *Indiana University*; Bruce Hartman, *University of Arizona*; and Ross Fink, *Bradley University*.

Participants in two focus groups shared their in-depth ideas about ways to improve teaching the course and what we could do to improve the text. We want to thank: Ann Maruchek, *University of North Carolina at Chapel Hill*; Richard Metters, *Vanderbilt University*; Arthur Smith, *University of Toledo*; Louis A. LeBlanc, *University of Arkansas at Little Rock*; Powell Robinson, *Texas A&M University*; John Wacker, *Iowa State University*; Morgan Swink, *Indiana University*; Ravi Behara, *George Mason University*; M. Zarrugh, *James Madison University*; Diane Parente, *University of Mississippi—Tupelo*; Susan A. Slotnick, *State of New York University at Stony Brook*; Drew Rosen, *University of North Carolina at Wilmington*; Robert J. Vokurka, *Texas A&M University*; and Kenneth Murphy, *Florida International University*. Thanks also to John Bradford of Miami University.

We once again thank those individuals whose input over past editions has helped the book evolve to its present form: Joseph Blackburn, *Vanderbilt University*; James Blocher, *Indiana University*; Jim Browne, *New York University*; Farzaneh Fazel, *Illinois State University*; Lissa Galbraith, *Florida State University*; Dennis Geyer, *Golden Gate University*; Stephen Huxley, *University of San Francisco*; Yunus Kathawala, *Eastern Illinois University*; Doan Modianos, *Bradley University*; Winter Nie, *Colorado State University*; Roderick Reasor, *Virginia Polytechnic Institute and State University*; Powell Robinson, *Texas A&M University*; Jerry Wei, *University of Notre Dame*; Wayne Cunningham, *University of Scranton*; Edward Gillenwater, *University of Mississippi*; Satish Mehra, *Memphis State University*; Graham Morbey, *University of Massachusetts at Amherst*; R. Natarajan, *Tennessee Technological University*; Fred Raafat, *San Diego State University*; Edward Rosenthal, *Temple University*; David Booth, *Kent State University*; Thomas Cywood, *University of Chicago*; Mike Martin, *Dalhousie University*; James Perry, *George Washington University*; Dan Rinks, *Louisiana State University*; Raj Srivastavo, *Marquette University*; Robert Trend, *University of Virginia*; Everette Adam, *University of Missouri—Columbia*; Lawrence Bennigson, *Harvard University*; Amiya K. Chakravarty, *Tulane University*; Joel Corman, *Suffolk University*; Willima A. Fischer, *University of North Carolina*; Dale R. Flowers, *Case Western University*; Carter Franklin III, *Houston Baptist University*; Oliver Galbraith III, *California State University—San Diego*; Stanley J. Garstka, *University of Chicago*; Michael Hottenstein, *Penn State University*; Gordon Johnson, *California State University—Northridge*; Frank L. Kaufman, *California State University—Sacramento*; Lee Krajewski, *University of Notre Dame*; Hugh V. Leach, *Washburn University*; John D. Longhill, *East Carolina University*; John R. Matthews, *University of Wisconsin*; Brooke Saladin, *Wake Forest University*; Ted Stafford, *University of Alabama—Huntsville*; Trevor Sainsbury, *University of Pittsburgh*; Chuck Baron Shook, *University of Hawaii at Manoa*; John E. Stevens, *Lehigh University*; Jesse S. Tarleton, *College of William and Mary*, and Larry Ritzman of Boston College.

We also want to thank former doctoral students who have contributed to the book over the years, including, most recently, Douglas Stewart (*Michigan State University*) and Andreas Soteriou (*University of Cyprus*), and, earlier on, Arvinder Loomba (*University of Northern Iowa*), Deborah Kellogg (*University of Colorado—Denver*), Blair Berkeley (*California State University—Los Angeles*) and the now grizzled veteran Bill Youngdahl (*Thunderbird American Graduate School of International Management*).

Much thanks to Danie Mann, program manager at the center for Service Excellence for her help. Also thanks to Heidi English at Indiana University for her help with the book.

We indeed appreciate the enthusiastic support and innovativeness of Dick Hercher, our long-time editor at Irwin/McGraw-Hill, whose help in coordinating all of the resources behind the scenes has been terrific. And to Gail Korosa (our developmental editor) what can we say? Your dedication (obsession?) to helping us make this our best edition ever cannot be overstated.

Thanks to the Irwin/McGraw-Hill team who make it all possible—Colleen Suljic, marketing manager; Susan Trentacosti, project supervisor; Larry Cope, designer; Heather Burbridge, production supervisor; and Keri Johnson, photo research coordinator.

Last, but certainly not least, we thank our families, who for the eighth time let the life cycle of the book disrupt theirs. And for the new kid on the block, for the first time.

- Review and Discussion Questions 490
- Problems 490
- Case: Thomas Manufacturing Company 492
- Case: Ohio Tool Company (Vendor Selection) 493
- Selected Bibliography 495

I3 Forecasting 496

- Demand Management 498
- Types of Forecasting 500
- Components of Demand 500
- Qualitative Techniques in Forecasting 503
- Grass Roots 503
- Market Research 503
- Panel Consensus 503
- Historical Analogy 504
- Delphi Method 504
- Time Series Analysis 505
- Simple Moving Average 506
- Weighted Moving Average 507
- Exponential Smoothing 509
- Forecast Errors 512
- Sources of Error 513
- Measurement of Error 513
- Linear Regression Analysis 516
- Decomposition of a Time Series 520
- Casual Relationship Forecasting 526
- Multiple Regression Analysis 528
- Choosing a Forecasting Method 529
- Focus Forecasting 530
- Methodology of Focus Forecasting 530
- Developing a Focus Forecasting System 530
- Computer Programs 533
- Conclusion 533
- Formula Review 536
- Solved Problems 537
- Review and Discussion Questions 541
- Problems 542
- Selected Bibliography 549

- 14 Aggregate Planning 550**
 - Overview of Operations Planning Activities 552
 - Hierarchical Production Planning 554
 - Aggregate Production Planning 555
 - Production Planning Environment 556
 - Relevant Costs 558
 - Aggregate Planning Techniques 559
 - A Cut-and-Try Example: The CA&J Company 559
 - Aggregate Planning Applied to Services: Tucson Parks and Recreation Department 564
 - Level Scheduling 568
 - Mathematical Techniques 569
 - Conclusion 572
 - Solved Problem 573
 - Review and Discussion Questions 573
 - Problems 574
 - Case: XYZ Brokerage Firm 578
 - Selected Bibliography 579
- 15 Inventory Systems for Independent Demand 580**
 - Definition of Inventory 582
 - Purposes of Inventory 583
 - Inventory Costs 584
 - Independent versus Dependent Demand 585
 - Inventory Systems 585
 - Classifying Models 586
 - Fixed-Order Quantity Models 587
 - Fixed-Order Quantity Model with Usage During Production Time 590
 - Establishing Safety Stock Levels 591
 - Fixed-Order Quantity Model with Specified Service Level 595
 - Fixed-Time Period Models 599
 - Fixed-Time Period Model with Specified Service Level 599
 - Special-Purpose Models 601
 - Miscellaneous Systems and Issues 605
 - Three Simple Inventory Systems 605
 - ABC Inventory Planning 606
 - Inventory Accuracy and Cycle Counting 608
 - Inventory Control in Services 611
 - Conclusion 613
 - Formula Review 613
 - Solved Problems 614
 - Review and Discussion Questions 614
 - Problems 615
 - Selected Bibliography 623
- 16 Inventory Systems for Dependent Demand MRP-Type Systems 624**
 - Where MRP Can Be Used 627
 - A Simple MRP Example 627
 - Master Production Schedule 629
 - Time Fences 630
 - Material Requirements Planning (MRP) Systems 631
 - Purposes of MRP 631
 - Advantages of MRP 632
 - Disadvantages of MRP 633
 - Material Requirements Planning System Structure 633
 - Demand for Products 634
 - Bill of Materials File 635
 - Inventory Records File 636
 - MRP Computer Program 637
 - Output Reports 638
 - Net Change Systems 639
 - An Example Using MRP 639
 - Forecasting Demand 639
 - Developing a Master Production Schedule 639
 - Bill of Materials (Product Structure) File 640
 - Inventory Records (Item Master) File 641
 - Running the MRP Program 641
 - Improvements in the MRP System 644
 - Computing Work Center Load 644
 - Closed-Loop MRP 645
 - MRP II (Manufacturing Resource Planning) 646
 - Embedding JIT into MRP 647
 - Lot Sizing in MRP Systems 648
 - Lot-for-Lot 650
 - Economic Order Quantity 650
 - Least Total Cost 651
 - Least Unit Cost 652
 - Lot Size Choice 653
 - Choosing the Best Lot Size 653
 - Advanced MRP-Type Systems 653
 - SAP AG's R/3 654
 - Conclusion 655
 - Solved Problems 655
 - Review and Discussion Questions 657
 - Problems 658
 - Case: Nichols Company 665
 - Selected Bibliography 668

Supplement I6 SAP R/3 669

- R/3 History 670
 - R/3 before 1994 670
 - R/3 in 1995 670
 - R/3 in 1996 672
 - R/3 in 1997 672
 - R/3 beyond 1997 672
- Details of the Functional Components 672
 - Financial Accounting 673
 - Human Resources (HR) 673
 - Manufacturing and Logistics 674
 - Sales and Distribution (SD) 674
- Implementing SAP R/3 676
- Review and Discussion Questions 677
- Selected Bibliography 677

17 Operations Scheduling 678

- The Nature and Importance of Work Centers 680
 - Typical Scheduling and Control Functions 682
 - Objectives of Work-Center Scheduling 683
 - Job Sequencing 684
- Priority Rules and Techniques 684
 - Scheduling n Jobs on One Machine 684
 - Comparison of Priority Rules 687
 - Scheduling n Jobs on Two Machines 688
 - Scheduling a Set Number of Jobs on the Same Number of Machines 689
 - Scheduling n Jobs on m Machines 691
- Shop-Floor Control 692
 - Gantt Charts 693
 - Tools of Shop-Floor Control 693
 - Input/Output Control 693
 - Data Integrity 695
- Example of a Shop Floor-Control System 696
 - Principles of Work-Center Scheduling 696
- Improving Shop Performance 697
- Personnel Scheduling in Services 698
 - Scheduling Consecutive Days Off 698
 - Scheduling Daily Work Times 700
 - Scheduling Hourly Work Times 701
- Conclusion 702
- Solved Problem 702
- Review and Discussion Questions 703
- Problems 704
- Case: Keep Patients Waiting? Not in My Office 708
- Case: McCall Diesel Motor Works 710
- Selected Bibliography 712

Supplement I7 Simulation 713

- Definition of Simulation 715
- Simulation Methodology 715

- Problem Definition 716
- Constructing a Simulation Model 716
- Specifying Values of Variables and Parameters 718
- Evaluating Results 719
- Validation 719
- Proposing a New Experiment 720
- Computerization 720
- Simulating Waiting Lines 721
 - Example: A Two-Stage Assembly Line 721
- Spreadsheet Simulation 725
- Simulation Programs and Languages 726
- Desirable Features of Simulation Software 728
- Advantages and Disadvantages of Simulation 730
- Conclusion 730
- Solved Problems 731
- Review and Discussion Questions 732
- Problems 733
- Selected Bibliography 740

Section Five**Revising the System 741****18 Operations Consulting 742**

- What Is Operations Consulting? 744
- The Nature of the Management Consulting Industry 745
 - Economics of Consulting Firms 747
- When Operations Consulting Is Needed 748
 - When Are Operations Consultants Needed? 749
- The Operations Consulting Process 750
- Operations Consulting Tool Kit 752
 - Problem Definition Tools 753
 - Data Gathering 755
 - Data Analysis and Solution Development 756
 - Cost Impact and Payoff Analysis 758
 - Implementation 759
- Conclusion: Example of a Consulting Project—
“Creating a Service Advantage at a Cellular Telephone
Service Provider” 759
- Review and Discussion Questions 765
- Problems 765
- Selected Bibliography 765

19 Business Process Reengineering 766

- The Nature of Business Process Reengineering (BPR) 768
- Principles of Reengineering 768
- The Reengineering Process 771
 - State a Case for Action 772
 - Identify the Process 772
