A Selection of dictionaries, glossaries and lexica from Elsevier:

OBSTÉTRIQUE ET GYNÉCOLOGIE – Glossarium Interpretum – *French, Latin, English, Russian, German, Spanish, Italian, Greek*

HEMATOLOGY – Glossarium Interpretum – *English, French, Italian, Spanish, German, Russian*

GENETICS – Glossarium Interpretum – *English, French, German, Russian, Italian, Spanish*

QUAESTIONARIUM MEDICUM – *English, French, Italian, Spanish, Portuguese, German, Dutch, Norwegian, Swedish, Finnish, Polish, Russian, Greek, Chinese, Japanese, Malay, Esperanto*

CONFERENCE TERMINOLOGY – Glossarium Interpretum – *English, French, Spanish, Russian, Italian, German*

LEXICON OF PARASITES AND DISEASES OF LIVESTOCK – *Latin, English, French, Italian, Spanish, German*

LEXICON OF INTERNATIONAL AND NATIONAL UNITS – *English/American, German, Spanish, French, Italian, Japanese, Dutch, Portuguese, Polish, Swedish, Russian*

DICTIONARY OF CRIMINAL SCIENCE – *English, French, Italian, Spanish, Portuguese, Dutch, Swedish, German*

DICTIONARY OF WATER AND SEWAGE ENGINEERING – *German, English, French, Italian*

DICTIONARY OF PHOTOGRAPHY – *English, French, German*

Complete catalogue is available on request.

PUBLISHER'S NOTE

The advance of technical sciences has been so revolutionary in the last decade that most existing technical dictionaries are in many respects obsolete. Moreover, science becomes more and more international, so that the need grows for not merely bilingual and trilingual dictionaries but for multilingual ones.

To meet this need, Elsevier has planned a series of multilingual technical dictionaries relating to special fields of science and industry. They are being edited under authoritative auspices and are able to draw upon the rich and extensive sources of knowledge with which the publishers are in touch, both in Europe and America, as well as on their wide experience of the most complicated forms of documentation.

In planning this dictionary the author and publishers have been guided by certain principles proposed by the United Nations Educational, Scientific and Cultural Organization (UNESCO). The aim is to ensure that each dictionary produced according to these principles will fit into place in a pattern which it is hoped, may, with the help also of the nongovernmental organizations specialized in the different fields, progressively extend over all interrelated fields of science and technology and cover all necessary languages.

Extensive typographical experimentation has shown that the system of arranging corresponding words in the several languages horizontally is the most suitable. Languages have been arranged in Anglo-Saxon, Latin and Germanic groups.

There is, for each language, an alphabetical list of words, referring to the corresponding numbers in the basic table. These lists have also been grouped alphabetically, for easy reference.

The system of thumb-indexing adopted enables one to find any language at once, and the ribbon attached is useful for retaining one's place in the most frequently consulted section.

Finally the flexible binding, smooth paper and handy size combine to produce, it is hoped, an enjoyable reference book.

Je dédie cet ouvrage à ma femme

PREFACE

«Un dictionnaire n'est jamais fini...»

Littre

As with all works of this kind, the present dictionary has its shortcomings, medical terminology being much too large to contemplate inclusion of every possible term.

However the author has attempted to develop as full a coverage as possible of anatomical and histological terms, both of which tend to be neglected in other books of this kind. Especially in English, a large number of synonyms is given, as well as those words which, although rather archaic, may be come across in older publications. These, possibly considered as outdated by the younger generation, still often retain their value as basic documents.

Except of course for Latin names, modern spelling has been used in most cases.

As with all of the works in the Elsevier series of Multilingual Dictionaries, the first part comprises the English terms with their equivalents in the other four languages. The second section consists of indexes in the other languages, each referring back to the numbered entries in the first part. In view of the large number of English synonyms, a list of these has been included. *Thus the user requiring the translation of an English word consults the first section, then the list of synonyms.*

Here I would like to thank Dr. M. Antonini (Trieste) and Dr. A. P. Beraza (Geneva), who took the trouble to check the Italian and Spanish columns of the dictionary respectively.

September, 1963

A. SLIOSBERG
