Our readers tell us why

Certification Insider Press is #1

I used your book *Network+ Exam Prep* to prepare for the exam. I read the book cover to cover. It was the only material I used to study for the exam. I thought it was a great book. I just wanted to let you know that I thought you have an excellent product. I will recommend it to my friends.

—James Wiggers, *American Copy Equipment*

I would just like to say that your book was an enormous help, and I will use other *Exam Cram* titles in the future.

—Steven J. Pocock

I would just like to thank you for publishing such a helpful book! I just passed the NT Server 4 test with an almost perfect score. I read your *Exam Cram* book and visited your Web site for the practice exams, and the test was not difficult. Thank you again, and keep publishing such first-rate material and I will keep buying it for future tests. I plan to stick with the *Exam Cram* series for my entire MCSE certification and beyond. Keep up the great work!

—Bill O'Sullivan

It would have much more difficult for me to pass a test without *Exam Cram*. Thanks for making such an amazing book.

—Muhammad Khan KK, *MCP*

I wanted to quickly provide feedback to you regarding the *Exam Cram* series.... I have found them very helpful in my MCSE training. I've taken five tests so far and have used an *Exam Cram* book for at least four out of the five tests. They provide the perfect supplement to other training materials. Thanks for the excellent work on these books.

—David Frederick, Information Systems Manager, *Wycliffe Associates*

See for yourself why we're #1 and drop us a line at learn@examcram.com.
We look forward to hearing about your testing successes!

Microsoft Exam Objectives

Exam 70-217: Implementing and Administering a Microsoft Windows 2000 Directory Services Infrastructure

Install, Configure, and Troubleshoot Active Directory	See Chapter:
Install Active Directory.	5
Create sites, subnets, site links, site link bridges, connection objects, and Global Catalog Servers	6
Move server objects between sites.	6
Transfer operations master roles.	6
Verify Active Directory installation.	6
Implement an Organizational Unit (OU) structure.	6
Perform an authoritative restore of Active Directory.	9
Recover from a system failure.	9
Install, Configure, Manage, Monitor, and Troubleshoot DNS for Active Directory	See Chapter:
Integrate Active Directory DNS zones with non-Active Directory DNS zones.	4
Configure zones for dynamic updates.	4
Manage replication of DNS data.	4
Install, Configure, Manage, Monitor, Optimize, and Troubleshoot Change and Configuration Management	See Chapter:
Create a Group Policy object (GPO) and then link an existing GPO.	10
Delegate administrative control of Group Policy.	10
Modify Group Policy and Group Policy inheritance.	10
Filter Group Policy settings by associating security groups to GPOs.	10
Control user environments by using administrative templates.	11
Assign script policies to users and computers.	11
Manage network configuration by using Group Policy.	11
Deploy and maintain software by using Group Policy.	11, 12
Configure deployment options, and troubleshoot common problems that occur during software deployment.	12
Install an image on an RIS client computer.	13
Create an RIS boot disk.	13
Troubleshoot RIS problems.	13
Manage images for performing remote installation, and configure remote installation options.	13
Configure RIS security, and prestage RIS client computers for added security and load balancing.	13
Authorize an RIS server.	13
Grant computer account creation rights.	13
Manage, Monitor, and Optimize the Components of Active Directory	See Chapter:
Move Active Directory objects, and locate objects in Active Directory.	7
Publish resources in Active Directory.	7
Create and manage accounts manually or by scripting.	7
Control access to, and delegate administrative control of, Active Directory objects.	7
Monitor, manage, maintain, and troubleshoot domain controller performance and Active Directory components.	8
Manage and troubleshoot Active Directory replication.	14
Manage intersite and intrasite replication.	14
Configure, Manage, Monitor, and Troubleshoot Active Directory Security Solutions	See Chapter:
Monitor and analyze security events.	15
Apply security policies by using Group Policy	15
Create, analyze, and modify security configurations by using Security Configuration and Analysis and Security Templates.	15
Implement an audit policy.	15

Windows 2000 MCSE 考试简介

考试课程

随着 Windows 2000 的推出，微软公司也推出了有关 Windows 2000 的认证考试。根据参加考试人员的不同情况，其有关考试科目并不相同，有关考试科目如下。

Windows 2000 MCSE 考试科目

核心考试	
如果没有通过以下三种 Windows NT 考试	
Exam 70-067	Implementing and Supporting Microsoft Windows NT Server 4.0
Exam 70-068	Implementing and Supporting Microsoft Windows NT Server 4.0 in the Enterprise
Exam 70-073	Microsoft Windows NT Workstation 4.0
则必须参加以下四种考试	
Exam 70-210	Installing, Configuring and Administering Microsoft Windows 2000 Professional
Exam 70-215	Installing, Configuring and Administering Microsoft Windows 2000 Server
Exam 70-216	Implementing and Administering Microsoft Windows 2000 Network Infrastructure
Exam 70-217	Implementing and Administering Microsoft Windows 2000 Directory Services Infrastructure
如果已经通过考试 70-067, 70-068 和 70-073, 则可以参加下面的加速考试	
Exam 70-240	Microsoft Windows 2000 Accelerated Exam for MCPs Certified on Microsoft Windows NT 4.0
可选核心考试	
从下面考试中选择一种	
Exam 70-219*	Designing a Microsoft Windows 2000 Directory Services Infrastructure
Exam 70-220*	Designing Security for a Microsoft Windows 2000 Network
Exam 70-221*	Designing a Microsoft Windows 2000 Network Infrastructure
选修考试	
从下面考试中选择两种	
Exam 70-019	Designing and Implementing Data Warehouse with Microsoft SQL Server 7.0
Exam 70-219*	Designing a Microsoft Windows 2000 Directory Services Infrastructure
Exam 70-220*	Designing Security for a Microsoft Windows 2000 Network
Exam 70-221*	Designing a Microsoft Windows 2000 Network Infrastructure
Exam 70-222	Migrating from Microsoft Windows NT 4.0 to Microsoft Windows 2000
Exam 70-028	Administering Microsoft SQL Server 7.0
Exam 70-029	Designing and Implementing Databases on Microsoft SQL Server 7.0
Exam 70-080	Implementing and Supporting Microsoft Internet Explorer 5.0 by Using the Internet Explorer Administrating Kit
Exam 70-081	Implementing and Supporting Microsoft Exchange Server 5.5
Exam 70-085	Implementing and Supporting Microsoft SNA Server 4.0
Exam 70-086	Implementing and Supporting Microsoft Systems Management Server 2.0
Exam 70-088	Implementing and Supporting Microsoft Proxy Server 2.0

注：上表并不全面——应试者可以参加有关微软产品早期版本的考试。但是，我们在这里所给出的都是最新版本的考试，这样应试者通过这些考试后拿到的证书有效期能够长久一些。上表并没有列出那些即将撤消的考试。

* 不能同时选择两种。

如何准备考试

考试准备

为完成微软认证考试的复习，我们建议您首先从本书“Self-Assessment”（自我评价测试）开始。这会帮助读者正确评价自己在理想和实际情况下相对 MCSE 要求的知识水平。

我们强烈建议读者对将要参加考试的软件进行反复的练习，诸如安装、配置等方面的学习。因为对于在考试中可能遇到的问题，任何学习方法都不如亲自动手试验有效。书本学习固然重要，但是亲自动手试验是最好的老师。

针对任何有关 Windows 2000 MCSE 的考试，下面的材料将对读者有很大帮助：

<http://www.microsoft.com/trainingandservices/> 上的考试复习资料、实习测试及自我评估考试。

<http://www.examcram.com> 上的复习考试建议、实习测试、每日问题及讨论组等。

微软培训工具包——微软出版社为这些认证考试专门提供的工具包。如果想要更多信息，请访问 http://mspress.microsoft.com/findabook/list/series_ak.htm。在该工具包中读者可以找到自己所需要的考试复习资料。

微软技术资料 CD (Microsoft TechNet CD)——在每月出版的 CD 中包括全部 Windows 2000 网络架构及相关主题的资料。它提供了包括产品详细介绍、技术讲解、相应工具，以及有关如何访问为 Window 2000 网络架构举行的专业研讨会的在线培训资料等在内的大量信息。该 CD 每年预定费 299 美元。考试人员也可以访问 <http://www.microsoft.com/technet> 站点并查找 TechNet 预定菜单，以获得更多的信息。

学习指南——包括本出版社在内的数家出版社提供了有关 Windows 2000 MCSE 方面的图书。其中本社即将陆续出版的图书如下：

《考前冲刺》系列——为考试人员提供了如何通过考试的相关资料。

《考前辅导》系列——提供了比《考前冲刺》更为翔实的资料。

这两套丛书都是从考试的观点出发，目的是教会读者掌握 MCSE 认证考试的所有知识。同时拥有这两套丛书对通过考试来说非常有用。

此外，《考前辅导》还为读者准备了交互式多媒体考试模拟试题光盘，通过交互式多媒体光盘读者可以客观真实地体验 MCSE 考试。

参加认证考试

如果已经完成考试内容的复习，就可以到考试中心进行登记以参加考试。每一上机考试费用为 100 美元。如果考试没有通过，考试人员需要再付 100 美元重新考试。

考试的设计与安排

微软 Windows 2000 考试形式不同于以往的考试。对于设计考试 70-219、70-220 和 70-221，它们由一系列事例研究和六种不同类型的问题组成。对于核心的考试 70-210、70-215、70-216 和 70-217，同样会出现上述六种类型的问题，但是考试人员可能不会再遇到多问题的事例研究。

对于设计考试，每一事例研究提出一个详细的问题，考试人员必须认真阅读并加以分析。每一事例研究的相关问题为六种类型中的一种。认真对待事例中的细节是考试人员取得成功的关键。考试人员需要反复阅读事例研究及对应的试题才能知道如何回答问题。

完成一个事例研究后，可以检查试题及自己的答案。但是，一旦转移到下一个事例研究，就不能回到上一个事例研究，也不能再对答案进行任何改动。

六种试题类型为：（1）单选；（2）多选；（3）建立列表与记录器（排序）；（4）创建树；（5）拖动与连接；（6）选择与放置（拖放）。

试题类型的变动由考试中心进行，读者可以访问 <http://www.examcram.com> 查看试题类型。

考试形式

现在，微软使用四种考试形式：（1）事例研究（case study）；（2）定长测试（fixed length）；（3）适应性测试（adaptive）；（4）简易格式测试（short form）。

微软的设计考试使用事例研究。在这些考试中，考试人员必须认真分析考题中给出的事例，从而回答出与这个事例研究相关的问题。这种考试含有一个或多个事例研究（主题标签），每一个事例研究后面跟有 4 到 10 个问题。对于设计考试和四种核心 Windows 2000 考试，其试题类型分别为选择题、建立列表和重新排序、创建树、拖动与连接，以及选择与放置。不同的考试题目不太相同，有些考试完全是基于事例的，而其它则不是。

其它微软考试将使用具有更高测试性能的考试形式，但这些形式可能不会立即出现。虽然试题类型主要为选择题，但是逻辑性使其比过去的微软考试更加复杂。它使用了一组按固定顺序排列的问题，一般称之为定长测试。一些试题使用一个较为完善的用户界面，微软称之为仿真（simulation）。用于测试考试人员在类似真实操作环境下，对软件和系统知识的掌握。可到 <http://www.microsoft.com/trainingandservices/default.asp?PageID=mcp> 下载仿真练习。

适应性测试用于确定考试人员的知识水平和能力。适应性考试看起来与定长测试相似，但是它们用于发现考生是否能够正确回答试题的难度水平。具有不同知识或能力水平的考试人员会见到不同的试题。知识或能力水平较高的考试人员将会得到一组题量较小而难度较大的试题；相反，知识或能力水平较低的考试人员将会得到一组题量较大而难度较小的试题。两部分考试人员答题的正确率可能相同，但是那些知识或能力水平较高的考试人员将得到较高的分数，因为他回答的问题所值的分数多一些。

同样，那些知识或能力水平较低的考试人员可能回答出比那些知识或能力水平较高的考试人员更多的问题。这就说明了为什么适应性测试采用不同的试题数目和答题时间。

适应性考试是通过评估考试人员最近一次的答题来进行的。一个正确的回答将会给考试人员引出一道较难的问题（同时，测试软件对考试人员的知识和能力水平的评估也有所提高）。这种考试持续进行，直到考查出考试人员的真实能力水平为止。当考试人员答题的正确度达到一个统计意义上的合意值（换句话说，证明自己已经达到考试所要求的知识与能力的水平）时，考试结束。或者，考试人员已经完成所有给出的答题而仍未测试出自己的水平（这种情况下，考试几乎是失败了），考试结束。

微软也为大部分流行考试引入了简易格式测试。这种考试为考试人员提供 25 到 30 道试题及 60 分钟的答题时间。

微软考试可以以任一种考试方式出现。在考试中，无论遇到何种考试方式，都必须按照该方式的要求进行答题，而不能跳过去选择其它考试方式。

注意：适应性测试与定长测试或简易格式测试之间最大的不同是，在定长测试或简易格式测试中，考试人员可以在反复阅读试题后再重新回到这些试题上。而在适应性考试中，考试人员在试题出现以后，就必须进行回答，并且以后不会再有机会重新看到这些试题。

针对不同考试形式的应试策略

选择策略之前，必须知道自己所遇到的考试形式：事例研究测试、定长测试、简易格式测试或适应性测试。

如果参加的考试不是事例研究测试的形式，则考试软件可能会通知考试人员该考试为适应性考试。如果考试的介绍没有提到适应性测试，则可能是一个定长测试（50 到 70 个问题）。如果考试题目的数量在 25 到 30 之间，则是一个简易格式测试。有些考试会通知这次考试由一套适应性测试题开始，接着是一些定长测试题。通过第一道试题应该能够知道所遇到的考试形式。

针对事例研究测试的应试策略

大部分考试人员发现用于设计考试（70-219，70-220，70-221）的事例研究考试类型是最难以掌握的。进行这种类型的考试时，最好的办法就是把每个事例研究都当作一个独立的考试。这类考试中最大的挑战就是考试人员会感到没有足够的时间去完成所有给出的事例。

每一个事例都提供大量的资料。在有效回答问题之前，需要阅读并研究这些资料。参加这类考试的窍门是首先浏览所给的事例以抓住重要部分。考试时必须保证已阅读了整个事例，这样才能理解问题的上下文。然后快速移到问题上面，并进行浏览。

一旦离开事例而移动到下一个事例，则不再允许返回到该事例。

针对定长测试和简易格式测试的应试策略

考试人员在参加定长测试或简易格式测试时，一个众所周知的原则就是首先从头到尾将所有问题浏览一遍，且只回答那些自己有绝对把握能正确回答的问题。随后，自己可以知道有多少问题留下未答，现在可以对这些复杂问题做更深的研究分析。

幸运的是，对于定长测试和简易格式测试，微软考试软件很容易实现多次浏览试题。在每一道试题的左上角有一个复选框，用于考试人员做出标记，以便以后重新浏览这道试题。

针对适应性测试的应试策略

适应性测试的应试原则可概括为“在第一次就答对问题”。考试人员在参加适应性测试中，不能选择跳过当前出现的试题而移动到下一道试题，因为考试软件要依据考试人员对当前试题的回答来选择下一道试题。由于这套考试软件只给考试人员一次答题机会，因此，一旦考试人员转移到下一试题，则无法再回到前面的试题。但是，考试人员可以做笔记，因为有时前面试题中的一些信息可能对后面试题的回答有所启发。

如果在适应性考试中考试人员遇到不能解答的试题，则必须立刻猜测一个答案。由于考试软件工作原理的缘故，如果猜测正确，考试人员将会受到猜测正确的对待。因此，接下来自己将会得到一道稍难一些的试题。

注意：如果考试人员参加的是定长测试或简易格式测试，则应等到最后检查有标记的试题时（正如自己将要用完答题时间，或根本就无法给出答案时），才可以开始对那些剩下的问题进行猜测。同样，在每一次事例研究测试中，考试人员可以采用相同的方法（但是，在这类考试中，一旦考试人员离开这道试题，就不再允许返回）。如果考试人员参加的是一次适应性测试，则应该在使用其它方法无法得到正确答案时，再进行猜测以移到下一道试题。不管怎么讲，猜题是考试人员所能采取的最后答题技巧。

许多试题都假定一个有特殊效用的默认行为在起作用，如果考试人员能够知道这个默认行为，就可以解开考试中的难题。

考试的核心策略

考试的核心是对于知识的掌握。我们应该明白，是知识培养了自信心，是自信心铸造了成功。如果读者能够认真学习本书中的内容，并复习每一章后面的习题，将会知道自己应在哪些方面补充知识和学习。

阅读本书时，应当进行本书及配套光盘上的测试。可以单击光盘上测试引擎中的更新按钮以从 <http://www.examcram.com> 上下载有关试题的更新。

进行模拟考试能够检查出自己的真实水平，并帮助自己知道哪些方面的知识需要进一步学习。

本文摘译自本书英文前言部分，读者应详细阅读本书的文前部分，以得到更详细的考试信息。翻译不妥之处，敬请见谅。

About the Authors

David V. Watts (MCSE, MCSD, CNE, Network +) is currently employed by Hilton Computer Strategies in Houston, TX. David is from Basildon, Essex, in England. He has worked in the United States since 1988, as both a consultant and a project lead on Enterprise-level deployments of Microsoft technologies.

David has been working with Windows 2000 since the first betas. He has specific expertise in Microsoft BackOffice products including Systems Management Server, Microsoft SQL Server, and Microsoft Exchange. David can currently be found teaching these technologies to students at all levels. When he is not teaching, he spends most of his time mentoring fellow professionals in the workplace and online at **www.insideIS.com** and **www.2000tutor.com**. When David is not working on technology, he'll be found listening to music.

Will Willis (MCSE, A+ Certified Technician, Network+ Certified Technician) is an MIS responsible for a switched/routed 10/100MB Ethernet and Frame Relay TCP/IP LAN/WAN that connects multiple sites in Texas. His duties include department management, vendor relations (negotiating and securing goods and services as needed), and administering/managing the entire network. Administration includes responsibility for documentation, establishing corporate standard operating procedures, maintaining disaster recovery preparedness, developing antivirus strategies, maintaining firewalls and network security, ensuring server maintenance and upgrades, and ensuring the reliability and availability of network resources.

Will started out as a help desk technician, providing technical support over the phone for PC hardware and software, and later moved up to a desktop/LAN support specialist position at another company, working on an 8-person team that supported a 3,000+ user multiple-site network. Will then moved to his current position, in which he administers NT 4 servers running BackOffice applications Exchange Server 5.5, IIS 3 and 4, SQL Server 6.5, and SMS 1.2. Will also shares ownership in **InsideIS.com**, a Web site devoted to the IT profession. When not busy being a techie, he enjoys spending time with his family and writing and recording original music.

Tillman Strahan (MCSE, ASE Lan/Wan Specialist) has been responsible for Windows NT-based networks at several Fortune 500 companies. He has designed and implemented nationwide NT domain structures, and he has managed networks consisting of more than 300 NT servers for an international telecommunications firm. Currently, he is a technology consultant and is involved in designing and implementing very high availability NT cluster solutions. Tillman holds a master's degree in Communications from the University of North Texas and is pursuing a doctorate in Information Science.

Acknowledgments

I would like to say thank you to my mother and father for everything they have done for me over the years. Knowing you are there helps me get through the long hours of working on these projects. I love you both. I would also like to tell my wife, Siobhán, that I love her very much, and that I'm going to take a break from all this one day real soon.

To my brother John, I hope the new apartment is working out! I would like to say hello to Zevi Mehlman who often has to put up with me being late calling him back because I'm too busy. Sorry! Also Sam Rao, How you doing buddy? Also hello to Chris Hutchinson—we'll get together over a beer at the Pitsea Working Men's Club one day. Michael Cook—miss you buddy. And to Her Royal Highness, Queen Allison Dollar, I hope Siobhán and I can meet up with you in La-La land soon. I know I can always count on you to steer me towards a decent beer. And to Maureen "Hell-Hag" Callanan, I'm expecting you for the next showing of *Headless Eyes*. Polish your spoon. To Jeff Hilton, Mona Reed, and Michael Stewart—and everyone on the Hilton Computer Strategy team.

To Siobhán's mother, Moira, you have become a first-class Web surfer! Thanks for promoting my work across the Atlantic. And to one of my Irish "fans" —Michael McNamee—I hope you enjoy this volume. Maybe we all can get together one day and trade industry war stories. And to Siobhán's brother, Peter "Chief Justice" Chamberlin: Just remember, "In the criminal justice system, the people are represented by two separate, yet equally important groups: street dudes and office dudes." Congratulations on all your academic success and your developing career as an office dude.

I want to say hello to all those fine people at **www.2000tutor.com**. To Mike DeBussy, Jonathan Brock (enrious), Eric Doan (edoan), Suresh Doss (Suresh), Jason Hayes (jhayess), Olivier Jansen (OJansen), Clark Lebarge (LClark), Jon Leszczynski (DarkHorseSki), William Long (djinn), Mark Lutes (marklutes), Bob Muir (BobMuir), Orin Thomas (Orin), Dick van den Hoven (dvdhoven) and Melissa Wise (melissa). I know I can be a pain to be around, but these good people put up with it. What's more, they are united in their efforts to help others move forward with their IT careers—all on a voluntary basis. It's a pleasure working in cyberspace with you all.

Kudos to the team at Coriolis—excellent (as usual). And to my fellow authors, look at that—it's finished! Finally—welcome to all the Windows 2000 MCSE candidates. I hope you enjoy this book, and I hope it helps open doors for all of you.
—*David V. Watts*

Writing a book is often a strenuous task, particularly when it is in addition to being a fulltime IT professional. The full gamut of emotions come into play; joy, depression, frustration, exhilaration, humility, and pride. I cannot thank my wife, Melissa, enough for her support when it seemed like from one day to the next she'd never know what my mood would be. I can be a big pain in the rear, but she rarely complains. I'd also like to thank my son, Duncan, who even at two years old teaches me that life is usually a lot simpler than we make it out to be. Seeing the world through his eyes helps me not to worry so much about the things I can't control.

I'd like to also thank my dad, Bill Willis. His fun-loving attitude toward life has a way of draining away life's stress when he's around. To my mom, Ann, and my sister, Alexandra, thanks for everything you guys have done for me over the years.

Thanks to Bill and Melba Duncan for being there for us. Your generosity never goes unnoticed or unappreciated. Donna, you're like a sister to me, thanks for being someone I can talk to about practically anything. It means a lot to me.

C.G. Smith and Paulette Deutman, thanks for making work life a little easier and a lot more fun! You two are the best! Thanks to Mark Herrmann and Mark Malott for having such positive influences on my career.

Thanks to the gang at InsideIS.com: Michelle Jones, Scott Kennedy, Smokey Beal, and all of the regulars who take time out of their days to help others on the discussion forums.

Thanks to my lifelong friends: Kim Larsen, Ken Lord, Charles Thompson, Matt Rutherford, Nick Smith, Ian Worcester, Phil Martinelle, Brian Howard, Jimmy Crider, Chad Rolph, Shane Cook, and Matt Bird.

Thanks to Ray Bandy, Brent and Carla Hagar, and everyone at Trinity Southern Baptist Church who have had a positive influence on my life. To the guys who fought hard through sweat and blood on the softball fields, we'll get 'em next year!

Of course I couldn't forget to mention my co-authors, David and Tillman, for making this project what it was. It wasn't always easy, but I think the end result turned out as good as we could have wanted.

I feel like I could fill an entire chapter thanking the people who have meant something to me and who influenced me along the way. To everyone I didn't have room to mention specifically, know that you are in my thoughts and prayers.

—*Will Willis*

I think that any acknowledgments by a writer of any sort must begin with the family. After all, it is the family that forms the core of a writer's support. As always, I would like to thank my wife and soulmate, Tamara, for putting up with me during this process, supporting me when I got bogged down, and providing motivation when I felt like the process would never finish. I would also like to thank my parents, Roger and Paula, for stressing the importance of a good education and for buying that first TI 99/4 way back in the stone ages of home computing. Thanks to David and Vicki and all the various inlaws, outlaws, and friends for their support and encouragement, and also for just getting me out of the house from time to time. You guys are all wonderful, and I simply could not do this without you all.

Some of my co-workers at Insource Technology (www.Insource.com) were aware that I was working on this book at home, and I'd like to thank them for their support and for putting up with me after a few all-nighters. Thanks to the staff and forum contributors at www.InsideIS.com, who are probably the sharpest people I know in this industry—you all helped me retain a sense of balance.

Writing is a grinding process. It can be (and frequently is) quite fun, but the daily reality of deadlines, research, and writer's block can swiftly tilt one's planet. Throw a tornado into the mix, and things get very odd. I'd like to thank David and Will for their tolerance and support during the process, and Sally and Shari Jo for *not* sending out the search hounds. That which does not kill us makes us stronger, and so we all must be much stronger people now.

Lastly, I'd like to thank you, the reader. Without you, this book would never have existed.

—*Tillman Strahan*

Exam Insights

Welcome to *MCSE Windows 2000 Directory Services Exam Prep*! This comprehensive study guide aims to help you get ready to take—and pass—Microsoft certification Exam 70-217, titled “Implementing and Administering a Microsoft Windows 2000 Directory Services Infrastructure.” This Exam Insights section discusses exam preparation resources, the testing situation, Microsoft’s certification programs in general, and how this book can help you prepare for Microsoft’s Windows 2000 certification exams.

Exam Prep study guides help you understand and appreciate the subjects and materials you need to pass Microsoft certification exams. We’ve worked from Microsoft’s curriculum objectives to ensure that all key topics are clearly explained. Our aim is to bring together as much information as possible about Microsoft certification exams.

Nevertheless, to completely prepare yourself for any Microsoft test, we recommend that you begin by taking the Self-Assessment included in this book immediately following this Exam Insights section. This tool will help you evaluate your knowledge base against the requirements for an MCSE under both ideal and real circumstances.

Based on what you learn from that exercise, you might decide to begin your studies with some classroom training or some background reading. You might decide to read The Coriolis Group’s *Exam Prep* book that you have in hand first, or you might decide to start with another study approach. You may also want to refer to one of a number of study guides available from Microsoft or third-party vendors. We also recommend that you supplement your study program with visits to **ExamCram.com** to receive additional practice questions, get advice, and track the Windows 2000 MCSE program.

We also strongly recommend that you install, configure, and fool around with the software that you’ll be tested on, because nothing beats hands-on experience and familiarity when it comes to understanding the questions you’re likely to encounter on a certification test. Book learning is essential, but hands-on experience is the best teacher of all!

How to Prepare for an Exam

Preparing for any Windows 2000 Server-related test (including “Implementing and Administering a Microsoft Windows 2000 Directory Services Infrastructure”) requires that you obtain and study materials designed to provide comprehensive information about the product and its capabilities that will appear on the specific exam for which you are preparing. The following list of materials will help you study and prepare:

- The Windows 2000 Directory Services product CD should be a primary resource when you are preparing for the test.
- The exam preparation materials, practice tests, and self-assessment exams on the Microsoft Training & Services page at **www.microsoft.com/trainingandservices/default.asp?PageID=mcp**. The Testing Innovations link offers samples of the new question types found on the Windows 2000 MCSE exams. Find the materials, download them, and use them!
- The exam preparation advice, practice tests, questions of the day, and discussion groups on the **ExamCram.com** e-learning and certification destination Web site (**www.examcram.com**).

In addition, you’ll probably find any or all of the following materials useful in your quest for Directory Services expertise:

- *Microsoft training kits*—Microsoft Press offers a training kit that specifically targets Exam 70-217. For more information, visit: **<http://mspress.microsoft.com/prod/books>**. This training kit contains information that you will find useful in preparing for the test.
- *Microsoft TechNet CD*—This monthly CD-based publication delivers numerous electronic titles that include coverage of Directory Services Infrastructure and related topics on the Technical Information (TechNet) CD. Its offerings include product facts, technical notes, tools and utilities, and information on how to access the Seminars Online training materials for Directory Services Infrastructure. A subscription to TechNet costs \$299 per year, but it is well worth the price. Visit **www.microsoft.com/technet/** and check out the information under the “TechNet Subscription” menu entry for more details.
- *Study guides*—Several publishers—including The Coriolis Group—offer Windows 2000 titles. The Coriolis Group series includes the following:
 - *The Exam Cram series*—These books give you information about the material you need to know to pass the tests.
 - *The Exam Prep series*—These books provide a greater level of detail than the *Exam Cram* books and are designed to teach you everything you need to

know from an exam perspective. Each book comes with a CD that contains interactive practice exams in a variety of testing formats.

Together, the two series make a perfect pair.

- *Multimedia*—These Coriolis Group materials are designed to support learners of all types—whether you learn best by reading or doing:
 - *The Exam Cram Personal Trainer*—Offers a unique, personalized self-paced training course based on the exam.
 - *The Exam Cram Personal Test Center*—Features multiple test options that simulate the actual exam, including Fixed-Length, Random, Review, and Test All. Explanations of correct and incorrect answers reinforce concepts learned.
- *Classroom training*—CTECs, online partners, and third-party training companies (like Wave Technologies, Learning Tree, Data-Tech, and others) all offer classroom training on TCP/IP. These companies aim to help you prepare to pass the TCP/IP test. Although such training runs upwards of \$350 per day in class, most of the individuals lucky enough to partake (including your humble authors, who've even taught such courses) find them to be quite worthwhile.
- *Other publications*—There's no shortage of materials available about Directory Services Infrastructure. The complete resource section in the back of the book should give you an idea of where we think you should look for further discussion.

By far, this set of required and recommended materials represents a nonpareil collection of sources and resources for Directory Services Infrastructure and related topics. We anticipate that you'll find that this book belongs in this company.

Taking a Certification Exam

Once you've prepared for your exam, you need to register with a testing center. Each computer-based MCP exam costs \$100, and if you don't pass, you may retest for an additional \$100 for each additional try. In the United States and Canada, tests are administered by Prometric (formerly Sylvan Prometric), and by Virtual University Enterprises (VUE). Here's how you can contact them:

- *Prometric*—You can sign up for a test through the company's Web site at **www.prometric.com**. Or, you can register by phone at 800-755-3926 (within the United States or Canada) or at 410-843-8000 (outside the United States and Canada).
- *Virtual University Enterprises*—You can sign up for a test or get the phone numbers for local testing centers through the Web page at **www.vue.com/ms/**.
