FOREWORD

Welcome to the seventeenth edition of *Physicians' Desk Reference For Nonprescription Drugs*. This companion volume to the main edition of PDR provides detailed information on 700 over-the-counter remedies, as well as a number of home diagnostic tests and other medical aids for consumers.

Once again we're pleased to present an up-to-the-minute status report on the burgeoning use of over-the-counter drugs and their growing impact on health-care. The popularity of the self-care movement among consumers, increasing cost pressures throughout the healthcare system, and the expanding number of Rx-to-OTC conversions have all conspired to make nonprescription drugs an ever more significant factor in the healthcare equation. Our detailed analysis, which can be found in Section 5, spells out the changes and examines their effect on medical therapy.

As the role of over-the-counter drugs continues to expand, we feel certain that you'll find *PDR For Nonprescription Drugs* to be an increasingly important part of your working reference library. In conjunction with *Physicians' Desk Reference*® and *PDR For Ophthalmology*®, it supplies you with America's most authoritative, comprehensive, and reliable database of product-specific drug information. In turn, this core database is fully indexed in the 1,500 page *PDR Guide to Drug Interactions • Side Effects • Indications*™. An invaluable addition to the PDR library of drug references, the *PDR Guide* permits fast, easy identification of an adverse reaction's probable source — and the approved alternatives for the problem medication.

All of these volumes are now available in electronic form as part of the remarkable new *PDR® Electronic Library*™ on CD-ROM, released this year in commemoration of PDR's fiftieth anniversary. This Windows-compatible disc provides users with a complete database of PDR prescribing information, electronically searchable for instant retrieval. A standard subscription includes PDR's sophisticated prescription-screening program and an exhaustive file of chemical structures, illustrations, and full-color product photographs. Optional enhancements include the complete contents of *The Merck Manual* and *Stedman's Medical Dictionary*, as well as a handy file of patient handouts drawn from PDR's consumer handbook, *The PDR® Family Guide to Prescription Drugs*®. The disc is available for use on individual PCs and PC networks.

For facilities with large, mainframe-based information systems, PDR information is also available as a preformatted text file on magnetic tape. For practitioners who seek drug interaction information drawn from the peer-reviewed clinical literature, there's the new *PDR® DrugREAX*™ system, available for Windows-based PCs. And for personal use—on rounds or on the go—there's *Pocket PDR*®, a unique handheld electronic database of prescribing information that literally fits in your pocket.

In the current cost-conscious healthcare environment, you should also be aware of another of the newest members of the PDR family of references. Entitled *PDR® Generics*™, this exhaustive pharmaceutical compendium includes generic monographs covering virtually all prescription drugs—plus brand/generic unit cost comparisons, average generic prices by package size for all therapeutically equivalent products, and average wholesale prices of all available supplies. Drugs in this volume are indexed by brand and generic name, international trade name, therapeutic category, and indication. Off-label indications are included, and the volume boasts a unique cost-of-therapy section comparing the daily cost of the major pharmaceutical alternatives for a variety of common indications.

Also new and noteworthy is the *PDR® Medical Dictionary*, an authoritative reference that combines a complete medical lexicon with PDR's unparalleled database of brand and generic drug names, and the brand new *PDR® Nurse's Handbook*™, with over 1,400 pages of specially tailored drug information, including full details of the nursing considerations associated with each product.

For more information on any of these important references, please call, toll-free, 1-800-232-7379 or fax 201-573-4956.

Physicians' Desk Reference For Nonprescription Drugs is published annually by Medical Economics Company in cooperation with participating manufacturers. The function of the publisher is the compilation, organization, and distribution of product information obtained from manufacturers. Each product description has been prepared by the manufacturer, and edited and approved by the manufacturer's medical department, medical director, and/or medical consultant. During compilation of this information, the publisher has emphasized the necessity of describing products comprehensively, in order to provide all the facts necessary for sound and intelligent decision making. The descriptions seen here include all information made available by the manufacturer.

In organizing and presenting this material in *Physicians' Desk Reference For Nonprescription Drugs*, the publisher does not warrant or guarantee any of the products described, or perform any independent analysis in connection with any of the product information contained herein. *Physicians' Desk Reference For Nonprescription Drugs* does not assume, and expressly disclaims, any obligation to obtain and include any information other than that provided to it by the manufacturer. It should be understood that by making this material available the publisher is not advocating the use of any product described herein, nor is the publisher responsible for misuse of a product due to typographical error. Additional information on any product may be obtained from the manufacturer.

CONTENTS

Manufacturers' Index (White Pages)	1
---	----------

Section 1

Lists all participating pharmaceutical manufacturers. Includes addresses, phone numbers, and emergency contacts. Shows each manufacturer's products and the page number of the company's entries in the "Product Information" section.

Product Name Index (Pink Pages)	101
--	------------

Section 2

Gives the page number of each product description in the "Product Information" section. Products are listed alphabetically by brand name.

Product Category Index (Blue Pages)	201
--	------------

Section 3

Lists by prescribing category all products in the "Product Information" section.

Active Ingredients Index (Yellow Pages)	301
--	------------

Section 4

A cross-reference by generic ingredient of all products appearing in the "Product Information" section.

Nonprescription Drugs in 1996: Their Impact and Use (White Pages)	401
--	------------

Section 5

Latest information on the over-the-counter drug market and its growing impact on healthcare.

Product Identification Guide (Gray Pages)	501
--	------------

Section 6

Presents full-color, actual-size photos of tablets and capsules, plus pictures of a variety of other dosage forms and packages. Arranged alphabetically by manufacturer.

Product Information (White Pages)	601
--	------------

Section 7

The main section of the book. Provides information on nearly 700 over-the-counter medications and home testing products. Entries are arranged alphabetically by manufacturer.

U.S. Food and Drug Administration Telephone Directory	423
--	------------

For frequently requested information.

Drug Information Centers	425
---------------------------------	------------

A directory of facilities throughout the nation.

State Boards of Pharmacy	857
---------------------------------	------------

Lists contact information for all state boards.

Poison Control Centers	859
-------------------------------	------------

A directory of centers throughout the nation.

SECTION 1

MANUFACTURERS' INDEX

Listed in this index are all manufacturers that have supplied information in this edition. Each company's entry includes the address, phone, and fax number of its headquarters and regional offices, as well as contacts for inquiries, orders, and emergency information. A list of the company's major over-the-counter products is also included.

The ♦ symbol marks drugs shown in the Product Identification Guide. If a company has two page numbers, the first refers to its photographs in the "Product Identification Guide," the second to its prescribing information.

SECTION 2

PRODUCT NAME INDEX

This index includes all entries in the "Product Information" section. Products are listed alphabetically by brand name.

If two page numbers appear, the first refers to the product's photograph, the second to its prescribing information.

• **Bold page numbers** indicate full prescribing information.

• *Italic page numbers* signify partial information.
