Notice

Knowledge and best practice in this field are constantly changing. As new research and experience broaden our knowledge, changes in practice, treatment, and drug therapy may become necessary or appropriate. Readers are advised to check the most current information provided (i) on procedures featured or (ii) by the manufacturer of each product to be administered, to verify the recommended dose or formula, the method and duration of administration, and contraindications. It is the responsibility of the practitioner, relying on their own experience and knowledge of the patient, to make diagnoses, to determine dosages and the best treatment for each individual patient, and to take all appropriate safety precautions. To the fullest extent of the law, neither the Publisher nor the Editors assume any liability for any injury and/or damage to persons or property arising out of or related to any use of the material contained in this book.

Comprehensive Vascular and Endovascular Surgery

Second Edition

John W. Hallett Jr, MD, FACS

Medical Director and Vascular Surgeon
Clinical Professor of Surgery
Medical University of South Carolina
Roper St Francis Heart and Vascular Center
Charleston, South Carolina, USA

Joseph L. Mills Sr, MD, FACS

Professor of Surgery
Chief, Division of Vascular and Endovascular Surgery
University of Arizona Health Sciences Center
Tucson, Arizona, USA

Jonathan J. Earnshaw, DM, FRCS

Consultant Surgeon
Department of Vascular Surgery
Gloucestershire Royal Hospital
Gloucestershire, United Kingdom

Jim A. Reekers, MD, PhD

Professor of Interventional Radiology
Department of Radiology
Academic Medical Center
University of Amsterdam
Amsterdam, The Netherlands

Thom W. Rooke, MD

Krehbiel Professor of Vascular Medicine
Department of Cardiovascular Diseases
Gonda Vascular Center
Mayo Clinic
Rochester, Minnesota, USA

Contributors

DONALD T. BARIL, MD

Fellow, Vascular and Endovascular Surgery
Division of Vascular Surgery
Department of Surgery
University of Pittsburgh Medical Center
Pittsburgh, Pennsylvania, USA

GINGER BARTHEL, RN, MA, FACHE

Vice President, Clinical Operations
Advocate Lutheran General Hospital
Park Ridge, Illinois, USA

B. TIMOTHY BAXTER, MD

Professor
Department of Surgery
University of Nebraska
Omaha, Nebraska, USA

JONATHAN D. BEARD, FRCS, ChM, Med

Professor of Surgical Education
University of Sheffield
Consultant Vascular Surgeon
Sheffield Vascular Institute
Northern General Hospital
Sheffield, United Kingdom

JEAN-PIERRE BECQUEMIN, MD, FRCS

Professor of Vascular Surgery
University of Paris XII
Head of the "Pole"
Cardiac Vascular and Thoracic
Henri Mondor Hospital
Creteil, France

MICHAEL BELKIN, MD

Associate Professor of Surgery
Harvard Medical School
Chief, Division of Vascular and Endovascular Surgery
Brigham and Women's Hospital
Boston, Massachusetts, USA

Clinical Lecturer in Surgery
Division of Transplantation
Department of Surgery
University of Michigan Health System
Ann Arbor, Michigan, USA

Preface

Something happens with the first edition of a textbook that leads to a second edition. Something must have succeeded. Someone has to understand the success to ensure that the next edition meets the expectations of the readers. As we planned this new edition of *Comprehensive Vascular and Endovascular Surgery*, the original four editors and our editorial staff discussed that “something” in great detail.

What have we heard about the first edition that sets this textbook apart from others? First, we chose a comprehensive but concise approach to cover all the main topics in vascular disease. Detailed discussions of rare topics were left to other, more encyclopedic, books. In other words, our readers commented that they could read this textbook cover-to-cover in a reasonable period of time. Second, we chose authors who are clinical experts in both open surgical and endovascular techniques. Consequently, the first edition revealed a balance in open and endovascular options for every clinical problem.

Some other features of the first textbook appealed to our readers, too. The consistency in simply designed anatomical drawings and reproductions of vascular imaging was considered a strength. Next, and perhaps as important, the CD-ROM collection of all illustrations and tables helped our readers to quickly assemble PowerPoint presentations for teaching. This innovation with the book may have done more to advance vascular disease education than any other feature of the first edition.

This newest edition of *Comprehensive Vascular and Endovascular Surgery* sustains the features that our readers acknowledged so graciously with the first textbook. With this edition, all of the text, illustrations, and study questions will be available on a special website. In other words, you will have the textbook at your fingertips on the Internet at any location where you may need to refresh your knowledge or prepare a PowerPoint presentation. In addition, we have advanced this new edition with several new features. First, Dr Thom Rooke, an internationally recognized cardiovascular medicine specialist at the Mayo Clinic, joins our editorial team. We recognize that cardiologists and vascular internists are venturing more into medical and interventional management of peripheral vascular disease. Dr Rooke’s input represents their interests. Second, we have updated every chapter and added several new erudite discussions of other topics, such as vascular imaging and radiation safety, vascular infections, and aortic dissections. Finally, we have added a bank of study questions to assist with review and preparation for board examinations.

We hope that this second edition of *Comprehensive Vascular and Endovascular Surgery* provides a practical and user-friendly reference for the care of your patients. Again, we welcome your feedback to improve future editions. Stay in touch. Share your experience and knowledge with us and with your colleagues who are dedicated to vascular care.
