The publication of the physical data of the Sadtler Standard Spectra and the Sadtler Commercial Spectra is intended to be descriptive. The samples of the materials represented have come generally from other sources than our own laboratories and frequently without the donors' knowledge of their part in this publication.

On the other hand every effort is made by Sadtler Research Laboratories, Inc. to assure the reliability of the published spectra. When improved data is available or errors are called to our attention we revise and reissue the proper replacement spectra.

SADTLER RESEARCH LABORATORIES, INC. DOES NOT WARRANT MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE, OR MAKE ANY OTHER WARRANTY OR AGREEMENT EXPRESS OR IMPLIED WITH RESPECT TO THE SPECTRA CONTAINED HEREIN. IF ANY MODEL OR SAMPLE WAS SHOWN TO BUYER, SUCH MODEL OR SAMPLE WAS USED MERELY TO ILLUSTRATE THE ARTICLE AND NOT TO REPRESENT THAT ANY SPECTRA CONTAINED HEREIN WOULD CONFORM TO THE MODEL OR SAMPLE.

INTRODUCTION TO INDEXES

These alphabetical and chemical classification indexes, published with Volume 1 of the collection, contain entries for 300 NMR reference spectra.

In the alphabetical index all products are listed according to trade name with their corresponding reference spectrum number, chemical name cross-references are also included where applicable. The classification index lists the products according to the chemical nature of each material.

In addition to the NMR spectrum number, the corresponding infrared reference spectrum number for the same compound is listed in the column of the index titled GRATING. The numeric code in the column entitled MFG CODE relates to an arbitrarily assigned manufacturers code designated by Sadtler. A complete list of the manufacturers names and corresponding numeric codes is published annually with the Sadtler Composite Commercial Indexes which include entries for all Commercial Spectra publications.
