PREFACE

This book is designed to introduce students to guidelines, techniques, and principles for planning and implementing end-user and office information systems. The textbook and its accompanying supplemental materials were reviewed and endorsed by the Office Systems Research Association (OSRA) for use in OSRA curriculum courses OS-2 (Office Systems Planning) and OS-3 (Office Systems Implementation).

This book reflects the philosophy and experiences of its authors and also draws upon the experiences of hundreds of other end-user systems (EUS) professionals. The text breaks new ground not only by adapting proven traditional planning and implementation strategies to EUS but also by developing new guidelines, techniques, and principles which can be used in the EUS environment. We share with you some of our philosophy and focus in writing this book.

- We agree with the hundreds of publications during the last few years which emphasized that information systems professionals need to better understand the “business” of the organizations in which they work. Thus, throughout this text, we have included several examples and exercises which require students to think about the “business” to be supported by end-user and office information systems. The comprehensive A&B Manufacturing case study provided within this textbook demands students’ attention to cross-functional and business issues.
- We believe that end-user and office information systems are the “lifelines” of many organizations. Those employed to plan, implement, and support such systems will interact with employees at every level of the organization and with every type of business function and activity. These EUS professionals must develop important skills, abilities, and understandings which go far beyond technical competence. Throughout this book, we emphasize the importance of the following skills:
 - honing interpersonal and communication skills
 - understanding the political aspects of decision making
 - developing a client-oriented approach
 - recognizing and respecting human factors
 - focusing on the “business” of the business
- We believe in linking the guidelines, principles, and strategies presented in the text with real-world practice. Thus, real-world examples

are sprinkled throughout the chapters. In particular, the “EUS in Action” section at the end of each chapter summarizes key ideas from selected publications. You will also find discussions of topics seldom mentioned in other textbooks—such as resolving conflict, working with vendors, and fitting systems to match corporate cultures. The content of every chapter is flavored with reality—the reality of learning about the differences among organizations and how these differences affect the work of EUS professionals.

In summary, we have attempted to provide a textbook and learning activities based on real-world situations. We also believe the EUS professionals of tomorrow will need to be more flexible and versatile than ever. They will need to continue their education and adjust to a rapidly changing environment. Study of this text and completion of the accompanying activities and case study will help prepare students for successful careers in planning and implementing end-user information systems.

ORGANIZATION OF TEXT

This text provides you with 19 chapters, 3 appendices, and a comprehensive case study. The chapters are divided into six major parts.

Part I, “Development of EUS,” traces the development of the concept of EUS and defines and distinguishes among the concepts of office information systems, management information systems, end-user systems, and related information systems. Part I also provides an overview of EUS planning and implementation issues, contrasting traditional data processing planning with EUS planning and presenting the challenges to merging new EUS systems with existing operations. New and emerging careers in EUS are presented as are EUS technology trends and how EUS interacts with business practice, with society, and with business personnel.

Part II, “EUS Culture and Personnel,” discusses organizational changes and issues, the impact of EUS on personnel, and how to integrate personnel into EUS planning and implementation. Part II introduces some of the policy, political, interpersonal, ergonomic, and productivity perspectives which need to be considered when planning and implementing EUS in an organization.

Part III, “Planning Considerations and Approaches,” discusses how to plan the EUS project, document the current system, conduct the feasibility study, use data collection tools and processes, and analyze and report planning results. The A&B case is first referred to in Part III.

Part IV, “Design Requirements,” describes how to define requirements, develop specifications, and incorporate human factors in the design process.

Part V, “OIS Integration Issues,” includes information on how to integrate systems, obtain external assistance, and develop internal supporting services.

Part VI, "Implementation," examines how to coordinate implementation, implement EUS training and development programs and activities, and evaluate, revise, and maintain an EUS system.

The A&B Manufacturing Company case study is placed after Chapter 19 and before the three appendices. The case is introduced at the beginning of Part III and is referred to throughout the rest of the textbook.

The three appendices supplement the chapter material. Appendix A provides a description of and instructions for the 12 decision assistant tools. Appendix B, "Project Management," provides students with information and tools to help them manage projects. Appendix C, "Communications Analysis Tools," provides students with information and tools to help them analyze communication patterns and relationships within organizations.

SPECIAL FEATURES FOR STUDENTS ■■■■■

Within each chapter, students will find the following special features helpful:

- Behavioral objectives at the beginning of each chapter.
- EUS in Action, to blend real-life examples with chapter content.
- Chapter summary.
- Key terms in boldface within the text are defined in the margin and listed at the end of the chapter.
- Review questions.
- Discussion questions.
- Situational Activities or A&B Case Applications.
- Multiple diagrams and illustrations.
- Relevant references.

At the end of the book, students will find the following helpful features:

- Glossary, with key terms defined in more depth than in the margin definitions.
- Comprehensive A&B Manufacturing Company case.
- Decision Assistant Appendix.
- Project Management Tools Appendix.
- Communications Analysis Tools Appendix.

Also packaged with this book you will find the Decision Assistant diskette, which contains 12 software tools to assist students with solving problems related to the A&B Case. The decision tools include:

- Framework for Organizational Change.
- Evaluating Human Resources.
- Organizational Goals Analysis.
- Decision Process Selection.

- Multi-Attribute Scoring.
- Five Core Job Characteristics.
- Cost/Benefit Analysis.
- Evaluation Matrix.
- Project Planning Chart.
- Centralization and Decentralization.
- Pro-Con Choice Analysis.
- Key Actor Analysis.

SPECIAL FEATURES FOR INSTRUCTORS

To assist the instructor, the instructor's manual contains solutions to the review questions, discussion questions, situational activities, and case applications (including decision assistant tools) found at the end of each textbook chapter. In addition, the instructor's manual contains true-false, multiple-choice, and essay test items and answers. These test questions are also available on the computerized test bank.

To help the instructor plan individual classes more efficiently as they relate to specific chapters, we have provided teaching ideas and a teaching outline for each chapter. At least three transparency masters are also included for each chapter.

Additionally, the instructor's manual provides the instructor with suggestions for planning either a one- or two-semester course in EUS planning and implementation. The two-semester plan allows in-depth coverage and use of the A&B case as well as heavy use of other end-of-chapter student activities. We strongly believe that student involvement such as that provided by the A&B case is essential to mastery of the text materials.

ACKNOWLEDGEMENTS

The authors would like to thank those who have had an influence on this text and supplemental material:

- The following reviewers for their many useful comments and suggestions: Ms. Rebecca I. Ford (Atlanta, Georgia); Mr. Cory K. Foster, Miami University (Oxford, Ohio); Ms. Ann Goodine (Redondo Beach, California); Dr. C. Steven Hunt, Western Kentucky University (Bowling Green, Kentucky); Dr. Robert M. Schramm, University of Wisconsin-Whitewater (Whitewater, Wisconsin); Dr. E. Ray Smith, Western Illinois University (Macomb, Illinois); and Dr. Robert D. Spillman, Radford University (Radford, Virginia).
- OSRA, for their endorsement and careful review of this project.
- Connie Pollard, who competently and enthusiastically cowrote part of the instructor's manual and provided many helpful suggestions for the project.

- Our colleagues at the University of North Carolina-Greensboro and the University of Nebraska-Lincoln for their encouragement and valuable advice.
- Our family and friends for their support, love, encouragement, and patience, especially Cherry, Debra, and Michael, and Ryan, Nicole, and Gail.

We want to meet the needs of students and instructors. Please send us your ideas and suggestions for improvements.

Gerald L. Hershey and Donna L. Kizzier

CONTENTS

PART 1

DEVELOPMENT OF OIS AND EUS

CHAPTER 1	DEVELOPMENT OF OFFICE AND END-USER INFORMATION SYSTEMS	3
	Learning Objectives, 3	
	What is OIS/EUS?, 4	
	Contrast of Traditional MIS and OIS/EUS, 9	
	Evolution of OIS/EUS, 13	
	Technology Changes Affecting OIS/EUS, 18	
	Types of Office Work and OIS/EUS, 21	
	The Dispersed Nature of OIS/EUS, 23	
	Assessing OIS/EUS Needs, 26	
	Trend Toward Organization-Wide Computing, 27	
	Organizational Merger of OIS/EUS, MIS, and Telecommunications, 29	
	Coordination, Development, and Control Issues, 32	
	Summary, 35	
	Key Terms in Chapter 1, 37	
	Review Questions, 37	
	Discussion Questions, 38	
	Situational Activities, 39	
	Endnotes for Chapter 1, 40	
CHAPTER 2	AN OVERVIEW OF EUS PLANNING AND IMPLEMENTATION	41
	Learning Objectives, 41	
	An Overview, 41	
	Organizational Planning Processes, 42	
	EUS Planning and Implementation Aspects, 47	
	Differences Between EUS and Traditional DP Planning, 57	
	EUS and the Information Center, 62	
	Challenges of Merging New Systems with Existing Operations, 64	
	EUS Specialist Positions, Roles, and Career Opportunities, 65	
	Summary, 73	
	Key Terms in Chapter 2, 73	
	Review Questions, 74	
	Discussion Questions, 74	
	Situational Activities, 75	
	Endnotes for Chapter 2, 75	

CHAPTER 3	EUS TECHNOLOGY DIRECTIONS	77
	Learning Objectives, 77	
	An Overview, 77	
	EUS Technology Trends, 79	
	Integrating the EUS Technologies, 96	
	The Interaction of EUS with Business Practice, 99	
	The Interaction of EUS with Society, 102	
	The Interaction of EUS with Personnel, 104	
	Summary, 108	
	Key Terms in Chapter 3, 109	
	Review Questions, 110	
	Discussion Questions, 110	
	Situational Activities, 111	
	Endnotes for Chapter 3, 111	

PART 2

OIS/EUS CULTURE AND PERSONNEL

CHAPTER 4	ORGANIZATIONAL CHANGES AND ISSUES	115
	Learning Objectives, 115	
	Forces Affecting Organizations and Employees, 116	
	Changes in Primary Business Functions and Systems, 120	
	Organizational Structures and Practices, 125	
	Impact of Structure on OIS, 133	
	OIS Users and Organizational Considerations, 143	
	Overview of Impact of OIS on Personnel, 147	
	OIS Culture, 150	
	Summary, 154	
	Key Terms in Chapter 4, 155	
	Review Questions, 156	
	Discussion Questions, 156	
	Situational Activities, 157	
	Endnotes for Chapter 4, 158	
CHAPTER 5	IMPACT OF EUS ON PERSONNEL	159
	Learning Objectives, 159	
	The Nature of Office Work (Information Work), 159	
	Support Jobs, Tasks, Relationships, and Groups, 163	
	Managerial and Professional Positions, 170	
	Management Styles and Support Staff, 175	
	Changes in Support Staff Roles, 180	
	EUS/OIS Specialists, 184	
	Summary, 187	
	Key Terms in Chapter 5, 188	
	Review Questions, 189	
	Discussion Questions, 189	
	Situational Activities, 190	
	Endnotes for Chapter 5, 191	

CHAPTER 6	INTEGRATING PERSONNEL INTO EUS PLANNING AND IMPLEMENTATION	192
	Learning Objectives, 192	
	Roles for Personnel, 192	
	Organizational Policies, 199	
	Political and Interpersonal Issues, 202	
	Ergonomic Considerations, 207	
	Productivity Perspectives, 212	
	Summary, 217	
	Key Terms in Chapter 6, 218	
	Review Questions, 218	
	Discussion Questions, 219	
	Situational Activities, 220	
	Endnotes for Chapter 6, 220	
	INTRODUCTION TO CASE STUDY	223

PART 3

PLANNING CONSIDERATIONS AND APPROACHES

CHAPTER 7	PLANNING THE EUS PROJECT	229
	Learning Objectives, 229	
	Introduction to Planning Considerations, 229	
	EUS Assessment Approaches, 232	
	EUS Planning Models, 238	
	EUS Planning Teams and Group Planning, 246	
	Summary, 252	
	Key Terms in Chapter 7, 253	
	Review Questions, 253	
	Discussion Questions, 254	
	Case Applications, 254	
	Endnotes for Chapter 7, 255	
CHAPTER 8	DOCUMENTING THE CURRENT SYSTEM	257
	Learning Objectives, 257	
	Purpose of Documenting the Current System, 258	
	Information Gathering Techniques, 263	
	Documenting Current Systems Costs and Effectiveness, 271	
	Comparison of Traditional and Structured Analysis Tools, 273	
	Purpose of Systems Analysis Tools, 274	
	Input/Output Analysis and Systems Flow Tools, 275	
	Decision Analysis Tools, 290	
	Data Tracking Tools, 296	
	Summary of Systems Analysis Tools, 298	
	Constructing the Project Management Documentation File, 301	

	Summary, 303	
	Key Terms in Chapter 8, 304	
	Review Questions, 305	
	Discussion Questions, 306	
	Case Applications, 307	
	Discussion Questions, 309	
	Endnotes for Chapter 8, 309	
CHAPTER 9	CONDUCTING THE FEASIBILITY STUDY	310
	Learning Objectives, 310	
	Introduction to Feasibility Studies, 310	
	Tests of Feasibility, 314	
	Economic Feasibility, 315	
	Operational Feasibility, 328	
	Technical Feasibility, 331	
	Budgeting Considerations, 332	
	Summary, 334	
	Key Terms in Chapter 9, 335	
	Review Questions, 336	
	Discussion Questions, 336	
	Case Applications, 337	
	Endnotes for Chapter 9, 338	
CHAPTER 10	DATA COLLECTION TOOLS AND PROCESSES	340
	Learning Objectives, 340	
	Introduction to Data Collection, 340	
	Interviews, 347	
	Questionnaires and Surveys, 358	
	Observation, 365	
	Sampling Work and Work Products, 368	
	Other Approaches, 371
