Table of contents

Preface	31
Part 1. Nutrition and mitochondrial functions	
On-going and prospective research on nutrition and mitochondrial functions <i>M.P. Mollica, L. Lionetti, A. Lombardi, E. Silvestri, F. Goglia and A. Barletta</i>	37
Insulin modulates the decrease of oxidative phosphorylation induced by ingested butyrate. NMR study on the isolated and perfused rat liver <i>M.-C. Beauvieux, H. Roumes, V. Rigalleau, H. Gin and J.-L. Gallis</i>	51
Effects of a diet enriched in <i>trans</i> fatty acids (<i>trans</i> MUFA) on muscle mitochondrial functions and development of insulin resistance in rodents <i>A.-L. Tardy, P. Rousset, C. Giraudet, J.M. Chardigny and B. Morio</i>	53
Up-regulation or activation of avian UCP attenuates mitochondrial ROS production and oxidative damage in broiler chickens exposed to acute heat stress <i>A. Mujahid, Y. Akiba, M. Kikusato and M. Toyomizu</i>	55
Relationships between hepatic mitochondrial function and residual feed intake in growing beef calves <i>P.A. Lancaster, G.E. Carstens, J. Michal, K.M. Brennan, K.A. Johnson, L.J. Slay, L.O. Tedeschi and M.E. Davis</i>	57
Interaction between adipose tissue and skeletal muscle in the control of muscle mitochondrial functions <i>E. Chanséaume, P. Rousset, C. Gryson, S. Walrand, Y. Boirie and B. Morio</i>	59
Influence of protein-free diet on morphology of rat hepatocytes' mitochondrium <i>E. Sawosz, A. Chwalibog, M. Grodzik, T. Niemiec, J. Skomial and I. Kosieradzka</i>	61
Expression of uncoupling proteins and mitochondrial activity are dependent on muscular fibre type in rabbits and chickens <i>R. Joubert, A. Collin, C. Berri, L. Lefaucheur, A. Vincent, M. Fillaut, P. Ecolan, L. Mur, E. Godet, S. Crochet, T. Bordeau, S. Skiba-Cassy, S. Tesseraud, P. Herpin and M. Damon</i>	63
Regulation of mitochondrial and tissue oxidations by thyroid hormones in chicken muscle <i>A. Collin, Q. Swennen, S. Métayer Coustard, S. Skiba-Cassy, R. Joubert, G. Briclot, S. Crochet, E. Decuyper, J. Buyse and S. Tesseraud</i>	65
Variation in animal energy expenditure and mitochondrial function and protein expression <i>J. Michal, K. Brennan, K. Ross and K.A. Johnson</i>	67
Cardiac muscle UCP-3 expression in relation to nutrient intake and beef cattle metabolism <i>G.K. Murdoch, W.T. Dixon, J. Moibi, B.T. Li, M. Vinsky and R.J. Christopherson</i>	69
Inter-muscular variability of metabolic properties of bovine muscle fibres <i>M.P. Oury, C. Jurie, J.F. Hocquette and B. Picard</i>	71

Part 2. Regulation of body composition and/or product quality by tissue metabolism

2. Body composition and/or product quality

Regulation of marbling and body composition - growth and development, gene markers and nutritional biochemistry <i>D.W. Pethick, W. Barendse, J.F. Hocquette, J.M. Thompson and Y.H. Wang</i>	75
Protein and selected mineral deposition in the body of pigs during compensatory growth <i>D. Weremko, G. Skiba, S. Raj and H. Fandrejowski</i>	89
Meal feeding regulates S6K1 phosphorylation but not that of 4E-BP1 in rainbow trout (<i>Oncorhynchus mykiss</i>) muscle <i>I. Seilliez, J.C. Gabillard, S. Panserat, S. Cassy, J. Gutiérrez, S. Kaushik and S. Tesseraud</i>	91
Dietary methionine supply affects the amino acid composition of body proteins <i>J. van Milgen, L. Brossard, N. Le Floc'h and M. Rademacher</i>	93
Does a time interval for methionine supplementation favour weight gain and body composition? A model study with growing rats <i>M. Gas, J. Bujko, E. Chudobinska, M.W.A. Verstegen, R.E. Koopmanschap and V.V.A.M. Schreurs</i>	95
Effects of dietary protein level and feed intake on amino-acid gain and composition in growing and fattening Iberian pigs <i>R. Nieto, R. Barea, I. Fernández-Fígares and J.F. Aguilera</i>	97
Study, in model system, of the effect of oxidation on myofibrillar protein digestibility <i>L. Aubry, Ph. Gatellier, A. Vivion and V. Santé-Lhoutellier</i>	99
Effects of maternal nutrition on birth weight and postnatal nutrient metabolism <i>J. Caton, K. Vonnahme, J. Reed, T. Neville, C. Effertz, C. Hammer, J. Luther, J. Taylor, D. Redmer and L. Reynolds</i>	101
Glucose metabolism and its relation to milk production in F ₂ offspring of Charolais × Holstein crosses <i>H.M. Hammon, P. Junghans, O. Bellmann, F. Schneider, R. Weikard and C. Kühn</i>	103
Expression of beta-adrenergic receptors during lactation in Holstein dairy cattle <i>J.M. Sumner and J.P. McNamara</i>	105
Investigations on the storage of ω -3 and ω -6 fatty acids in the dry period and their transfer into milk fat in early lactation <i>H.-R. Wettstein, R.E. Hochstrasser, C. Elia, H. Leuenberger, M. Wanner and M. Kreuzer</i>	107
Live weight, body size, fatness and carcass characteristics of young bulls of fifteen European breeds <i>P. Albertí, B. Panea, C. Sañudo, J.L. Olleta, G. Ripoll, P. Ertbjerg, M. Christensen, S. Gigli, S. Failla, A. Gaddini, J.F. Hocquette, R. Jailler, S. Rudel, G. Renand, G.R. Nute, R.I. Richardson and J.L. Williams</i>	109

Metabolic and contractile characteristics of <i>Longissimus thoracis</i> muscle of young bulls from 15 European breeds in relationship with body composition <i>J.F. Hocquette, C. Jurie, B. Picard, P. Alberti, B. Panea, M. Christensen, S. Failla, S. Gigli, H. Levéziel, J.L. Olleta, C. Sañudo, P. Erbjerg, G.R. Nute and J.L. Williams</i>	111
Deposition of protein, fat and energy in lambs of the breed German Merino Landsheep <i>G. Bellof and J. Pallauf</i>	113
Impact of vitamin D ₃ and vitamin E by feeding on meat quality parameters of beef and pork <i>R. Lahucky, I. Bahelka, U. Küchenmeister, K. Vasickova, G. Nürnberg and K. Ender</i>	115
Influence of various Iodine supply on growing-finishing performance and on Iodine status of pigs <i>A. Berk, K. Franke, F. Schöne and G. Flachowsky</i>	117
2A. Regulation of lipid deposition and intramuscular lipids	
Intramyocellular lipid accumulation and insulin resistance development <i>C. Aguer, J. Mercier, C. Yong Wai Man, S. Bordenave, L. Metz and M. Kitzmann</i>	121
Regional specificities in transcriptomic profiles of adipocytes isolated from skeletal muscle or adipose tissues in growing pigs <i>I. Louveau, M. Damon and F. Gondret</i>	123
Effect of a reduced protein diet on expression of lipogenic enzymes in relation to intramuscular fat formation in the pig <i>O. Doran, F.M. Whittington, K.G. Hallett and J.D. Wood</i>	125
Changes in liver metabolic pathways induced by dietary energy and selection for muscle fat content in rainbow trout <i>C. Kolditz, M. Borthaire, F. Lefèvre, E. Quillet and F. Médale</i>	127
Reduced intake of dietary amino acid promotes accumulation of intramuscular fat in the <i>Longissimus dorsi</i> muscle of finishing pigs <i>M. Katsumata, M. Matsumoto, S. Ieiri and Y. Kaji</i>	129
Triacylglycerol synthesis and secretion in <i>Atlantic salmon</i> hepatocytes: effect of dietary lipids <i>M.A. Kjær, A. Vegusdal, M. Todorčević, T. Gjøen, A.C. Rustan, B. Torstensen and B. Ruyter</i>	131
Effect of fish and plant oils on lipid composition and fatty acid β -oxidation in adipose tissue of <i>Atlantic salmon</i> <i>M. Todorčević, A. Vegusdal, N. Djaković, M.A. Kjær, B. Torstensen and B. Ruyter</i>	133
Performance, blood lipids and fatty acid composition of tissues of rabbits fed diets supplemented with conjugated linoleic acid <i>M. Marounek, E. Skřivanová and A. Dokoupilová</i>	135
Synthesis and desaturation of <i>cis</i> 9, <i>trans</i> 11 CLA in adipose tissue of Charolais steers and cull cows <i>D. Gruffat, C. Rémond, D. Durand, O. Loreau and D. Bauchart</i>	137

Inclusion of rapeseed oil in the diet to improve the performance of silage-fed fattening cattle	139
<i>J. Jatkauskas and V. Vrotniakienė</i>	

2B. Regulation of milk production and composition

The regulation of amino acid utilisation by insulin in the lactating ewe mammary gland	143
<i>B. Sinclair, P. Back, P. Harris, S. Davis, D. Mackenzie, M. Tavendale, W.C. McNabb, N. Roy and J. Lee</i>	
Does a dietary arginine deficiency limit milk protein yield?	145
<i>T. Whyte, A. Hayirli, H. Lapierre and L. Doepel</i>	
Feeding measures to improve nitrogen efficiency in dairy cattle	147
<i>S.M. van Zijderveld and W.M. van Straalen</i>	
Constraints in estimating N-excretion from the milk urea content in dairy cows	149
<i>S. De Campeneere, D.L. De Brabander and J. Vanacker</i>	
Estimation of the intra-mammary metabolic fate of glucose and acetate in response to longer milking intervals in dairy cows	151
<i>J. Guinard-Flament, S. Lemosquet and E. Delamairie</i>	
Dietary and mammary components of milk fat depression: insights from a meta-analysis of literature data	153
<i>F. Glasser and Y. Chilliard</i>	
Effect of rumen-protected conjugated linoleic acid in combination with propylene glycol or rumen protected fat on performance and metabolic parameters of early lactation dairy cows	155
<i>F.J. Schwarz, T. Liermann and A.M. Pfeiffer</i>	
Effect of dietary conjugated linoleic acid (CLA) on milk composition of dairy cows	157
<i>U. Meyer, C. Brömmel, G. Flachowsky and G. Jahreis</i>	
Effect of flaxseed and rapeseed supplementation during the last trimester of pregnancy and lactation in sows on fatty acid composition in their milk	159
<i>B. Bałasińska, R. Zabielski, P. Ostaszewski and G. Kulasek</i>	
Variations in mammary extraction of nutrients under the effect of a 36-h milk accumulation into the udder in dairy cows	161
<i>J. Guinard-Flament, D. Causeur and E. Delamairie</i>	
Response to diet quality of two cattle genotypes at 200 and 3600 m altitude in milk yield and composition and nitrogen and energy utilization	163
<i>K. Bartl, C.A. Gomez, M. Kreuzer, H.D. Hess and H.-R. Wettstein</i>	
Milk production as a function of energy and protein source supplementation follows the saturation kinetics typical of enzyme systems	165
<i>R.P. Lana, D.C. Abreu, P.F.C. Castro and B. Zamperline</i>	

2C. Regulation of muscle protein deposition and loss

Development of low grade inflammation during aging impaired postprandial muscle protein synthesis in rat skeletal muscle	169
<i>I. Rieu, G. Mayot, C. Sornet, E. Pujos, M. Balage, I. Papet and D. Dardevet</i>	
Effect of immune system stimulation and dietary methionine plus cysteine intake on protein deposition and digestibility in growing pigs	171
<i>A. Rakhshandeh, M. Rademacher and C.F.M. de Lange</i>	
The ubiquitin and caspase systems are sequentially regulated in the rat <i>gastrocnemius</i> muscle during casting immobilisation and recovery	173
<i>E. Vazeille, A. Claustre, A. Codran, S. Ventadour, D. Taillandier, D. Béchet, D. Attaix, D. Dardevet and L. Combaret</i>	
Relation between protein degradation and oxidative stress during aging in rat muscle	175
<i>L. Mosoni, L. Combaret, C. Sornet and D. Dardevet</i>	
Changes in the expression of selected proteins elucidate skeletal muscle type-specific resistance to glucocorticoid-induced muscle cachexia	177
<i>P. Pawlikowska, M. Lokociejewska, J.F. Hocquette and A. Orzechowski</i>	
Amino acid signalling: methionine regulates the S6K1 pathway and protein synthesis in avian QM7 myoblasts	179
<i>S. Métayer Coustard, S. Crochet, E. Audouin, M. Derouet, Y. Mercier, P.A. Geraert and S. Tesseraud</i>	
AMPK regulates the S6K1 pathway and protein synthesis in avian QM7 myoblasts	181
<i>S. Métayer Coustard, A. Collin, E. Audouin, S. Crochet, J. Dupont and S. Tesseraud</i>	
Decreased nutritional responsiveness of S6K1 in the breast muscle of genetically fat chickens	183
<i>S. Duchene, M. Abbas, I. Seiliez, E. Audouin, S. Crochet, S. Métayer Coustard and S. Tesseraud</i>	
Leucine suppresses myofibrillar proteolysis by down-regulating ubiquitin-proteasome pathway in chick skeletal muscles	185
<i>K. Nakashima, A. Ishida, M. Yamazaki and H. Abe</i>	
Skeletal muscle response to an endotoxin injection followed by malnutrition is similar in low-grade inflamed and non-inflamed old rats	187
<i>G. Mayot, K. Vidal, L. Combaret, D. Breuillé, S. Blum, C. Obled and I. Papet</i>	
Estrogenic and isoflavonic actions on differentiation and protein metabolism in porcine muscle satellite cell cultures	189
<i>M. Mau and C. Rehfeldt</i>	
Protein deposition in the body, content of nucleic acids in the <i>mld</i> muscle of pigs as affected by limitation of protein during growing period	191
<i>G. Skiba, S. Raj, D. Weremko and H. Fandrejewski</i>	

2D. Perinatal metabolic programming

- Temporary consumption of a soy-based diet induces persisting alterations in protein metabolism and oxidative stress responsiveness in juvenile pigs 195
P. Junghans, M. Beyer, M. Derno, K.J. Petzke, U. Küchenmeister, U. Hennig, W. Jentsch and M. Schwerin
- Influence of metabolic imprinting during early growth period on muscle development and intramuscular adipogenesis in Japanese Black steers 197
T. Gotoh, T. Fumita, T. Etoh, K. Hayashi, Y. Nakamura, J. Wegner and H. Iwamoto
- Growth and differentiation of the chicken *Pectoralis major* muscle: effect of genotype and early nutrition 199
C. Berri, E. Godet, T. Bordeau, N. Haj Hattab, S. Tesseraud and M.J. Duclos
- Effect of *in utero* metabolic programming on postnatal growth of mink kits 201
C.F. Matthiesen, D. Blache and A.-H. Tauson
- Glucose tolerance in pregnant sows and liver glycogen in neonatal piglets is influenced by diet composition in gestation 203
P. Bikker, J. Fledderus, J. Kluess and M.J.H. Geelen
- Heat production in chicken embryos 205
A. Chwalibog, A.-H. Tauson and G. Thorbek
- Nutritional programming due to maternal high protein diet reduces offspring birth weight and body weight and is genotype dependent in mice 207
M. Kucia, M. Langhammer, N. Dietrich, M. Derno, U. Renne, G. Nürnberg, U. Hennig and C.C. Metges

2E. Novel techniques for novel results in energy expenditure and body composition

- Comparing techniques to estimate energy expenditure on physical activity in individually housed dairy cows 211
M.J.W. Heetkamp, W.J.J. Gerrits, A.T.M. van Knegsel and H. van den Brand
- Quantitative partitioning of energy expenditure in pregnant ewes 213
A. Kiani, M.O. Nielsen and A. Chwalibog
- A calorimetry system for metabolism trials 215
N.M. Rodríguez, W.E. Campos and M. Lachica
- Inter-laboratory test for gas concentration measurements of the R3C network calorimetric chambers 217
C. Montaurier, P. Even, C. Couet and S. Dubois
- Determining cattle production efficiency without measuring the intake 219
A. Brosh, A. Shabtay, J. Miron, G. Adin and Y. Aharoni

Use of the heart rate method and GPS for direct field estimation of the energy cost of cow grazing activity: effects of season and plot size	221
<i>A. Brosh, Z. Henkin, E.D. Ungar, A. Dolev, A. Orlov, A. Shabtay and Y. Aharoni</i>	
Heart rate measurements as an index of energy expenditure and energy balance in ruminants: a review	223
<i>A. Brosh</i>	
Adaptation of night median heart rate in calorimetric chambers versus in free living conditions: a critical evaluation	225
<i>C. Montaurier, M. Vermorel, P. Ritz, A. Chamoux, Y. Boirie and B. Morio</i>	
Effect of cold exposure on natural abundance of ^{13}C and heat production in Spanish goats by the CO_2 entry rate technique	227
<i>M. Lachica, A.L. Goetsch and T. Sahlu</i>	
Characterisation of lipid distribution in rainbow trout by magnetic resonance, colour vision and histology imaging techniques	229
<i>A. Davenel, J. Bugeon, G. Collewet, E. Quillet and F. Médale</i>	
2F. Novel techniques for novel results in organ balance, <i>in vitro</i> tissue metabolism and nutrient 'tracing' studies	
Metabolic fate of carbohydrates from milk replacer in heavy milk-fed calves	233
<i>J.J.G.C. van den Borne, G.E. Lobley, J.W. Blum and W.J.J. Gerrits</i>	
Measurement of fatty acid oxidation in swine using ^{13}C labeled fatty acids	235
<i>E. van Heugten, J.J.G.C. van den Borne, M.W.A. Verstegen, J. van Milgen and W.J.J. Gerrits</i>	
Mathematical analysis of human $^{13}\text{CO}_2$ -breath test results: post prandial fate of amino acids is related to their dietary form	237
<i>V.V.A.M. Schreurs, J.A. Nolles, K. Krawielitzki and J. Bujko</i>	
Effect of graded dietary tryptophan levels on $[1-^{13}\text{C}]$ leucine oxidation and nitrogen deposition in growing pigs	239
<i>U. Hennig, P. Junghans, J. Bartelt, C. Relandeau, A. Tuchscherer and C.C. Metges</i>	
Endogenous nitrogen flows in the digestive tract of lactating dairy cows: comparison between estimations using total ^{15}N versus ^{15}N -amino acid isotope dilution	241
<i>D.R. Ouellet, R. Berthiaume, R. Martineau and H. Lapierre</i>	
A multi-isotope approach to studying arginine metabolism in neonatal piglets	243
<i>K.L. Urschel, M. Rafii, P.B. Pencharz and R.O. Ball</i>	
Mutations in metabolic pathways, what role does genetic background play?	245
<i>J. Marini, A. Erez and B. Lee</i>	
Gut function of pigs in relation to weaning	247
<i>P.J.A. Wijtten, H. Bouritius, P.R.T. Bonekamp, G.J. Witte, J.J. Verstijnen and T.A.T.G. van Kempen</i>	

Combination of two approaches to study the mammary use of glucose for lactose synthesis in dairy cows: net mammary balance and RNA levels <i>M. Boutinaud, M.H. Ben Chedly, E. Delamaire and J. Guinard-Flament</i>	249
Molecular markers for a delicate balance between protein and lipid metabolism in subcutaneous fat tissue of beef cow <i>A. Shabtay, H. Eitam, A. Orlov, Y. Aharoni, I. Izhaki and A. Brosh</i>	251
Part 3. 'Omics' in metabolism and nutrition studies	
Lexic of the 'Omics' <i>J.F. Hocquette</i>	255
Nutrigenomics: techniques and applications <i>A. Scalbert, D. Milenkovic, R. Llorach, C. Manach and C. Leroux</i>	259
Hepatic gene expression of gluconeogenic and glycolytic enzymes as indicators of the activity of carbohydrate metabolism in mink <i>C.F. Matthiesen, P.D. Thomsen and A.-H. Tauson</i>	277
Dietary polyunsaturated fatty acids reduce expression of colonic inflammatory genes in interleukin-10 knockout mice <i>B. Knoch, M.P.G. Barnett, W.C. McNabb, Y.E.M. Dommels, Z.T. Zhu, S.O. Knowles and N.C. Roy</i>	279
Skatole increases expression of detoxification genes in the ovine liver <i>M.H. Deighton, W.C. McNabb, D. Pacheco, M.H. Tavendale, Z.A. Park and N.C. Roy</i>	281
Gene expression in adipose tissue of dairy cattle changes in early lactation or with supplemental chromium, integrating expression into metabolic models <i>J.P. McNamara, J.M. Sumner, J. Vierck and A. Jourdan</i>	283
Transcriptomic profile in mammary gland is modified by nutrition in lactating goats <i>C. Leroux, S. Ollier, S. Bes, M. Goutte, L. Bernard and Y. Chilliard</i>	285
Effect of fasting on the thalamus/hypothalamus in cows - a proteomics analysis <i>B. Kuhla, S. Kuhla, P.E. Rudolph, D. Albrecht and C.C. Metges</i>	287
Comparative transcriptomic and proteomic analyses of pig <i>longissimus</i> muscles differing in intramuscular fat content <i>J. Liu, M. Damon, P. Ecolan, I. Guisde, N. Guitton, P. Cherel and F. Gondret</i>	289
Bovine <i>PRKAG3</i> gene expression and association with glycogen content <i>M. Roux, E. Ciani, D. Petit, A. Ouali, H. Levéziel and V. Amarger</i>	291
Intestinal and ruminal epithelial and hepatic metabolism regulatory gene expression as affected by forage to concentrate ratio in bulls <i>R.L. Baldwin VI, S.W. El-Kadi, K.R. McLeod, E.E. Connor and B.J. Bequette</i>	293
Genomic tools to analyse bovine muscle and adipose tissues transcriptomes <i>A.K. Kadanga, C. Leroux, M. Bonnet, I. Cassar-Malek and J.F. Hocquette</i>	295

Effect of inoculation with intestinal bacteria on interleukin-10 knockout mouse	297
<i>M.P.G. Barnett, S.-T. Zhu, A.L. Cookson, R. Brogan and N.C. Roy</i>	
Modification of gene expression involved in muscle growth and energy metabolism according to growth capacity in young Charolais bulls	299
<i>C. Bernard, I. Cassar-Malek, G. Renand and J.F. Hocquette</i>	
The myogenic influence of triiodothyronine nuclear and mitochondrial pathways explored by transcriptome analysis	301
<i>O. Baris, P. Seyer, M. Busson, S. Grandemange, C. Gouarné, L. Pessemesse, F. Casas, C. Wrutniak-Cabello and G. Cabello</i>	
Functional genomics of rat skeletal muscle during aging	303
<i>A. Listrat, I. Piec, J. Alliot, R.G. Taylor and D. Béchet</i>	
Intestinal mucosa proteome analysis in goat kids fed milk or soy protein based diets	305
<i>S. Kuhla, P.E. Rudolph, D. Albrecht, U. Schönhusen, R. Zitnan, W. Tomek, K. Huber, J. Voigt and C.C. Metges</i>	
Influence of catechin on urinary metabolic profiles and antioxidant status in hyperlipidic diets-fed rats by using a LC-Qtof-based metabonomic approach	307
<i>A. Fardet, R. Llorach, J.-F. Martin, C. Besson, E. Pujos, C. Obled and A. Scalbert</i>	
Impact of the ingestion of polyphenols and fruits rich in polyphenols on atherosclerosis studied on apoE deficient mice by a transcriptomic approach	309
<i>D. Milenkovic, S. Auclair, C. Besson, A. Mazur and A. Scalbert</i>	
AGENAE – GENANIMAL: the French research program in animal genomics	311
<i>C. Chevalet, J.F. Hocquette, P. Sellier and P. Monget</i>	
FUGATO - Functional genome analysis in animal organisms	313
<i>K. Sanders and G. Ostermann</i>	
Nutrigenomics New Zealand – tailoring New Zealand foods to match people's genes; a case study	315
<i>N.C. Roy, M.P.G. Barnett and W.C. McNabb</i>	

Part 4. Coordination between tissues for the metabolic utilisation of nutrients

4. Splanchnic metabolism and interorgan exchanges of nutrients

Interorgan exchange of amino acids: what is the driving force?	319
<i>Y.C. Luiking and N.E.P. Deutz</i>	
Intake of fermentable fiber stimulates mucin and mucosal protein synthesis in the pig colon	329
<i>A.J. Libao-Mercado, C.L. Zhu and C.F.M. de Lange</i>	

Impact of a low dietary threonine supply on protein synthesis, amino acid deposition and composition of the intestine and the carcass of piglets <i>A. Hamard, B. Sève, D. Melchior and N. Le Floch</i>	331
Intestinal valine irreversible loss rate during an established <i>Trichostrongylus colubriformis</i> infection in lambs <i>E.N. Bermingham, W.C. McNabb, B.R. Sinclair, M. Tavendale, B.P. Treloar and N.C. Roy</i>	333
Contribution of the digestive tract and the liver to the whole body metabolism of phenylalanine and leucine in growing lambs <i>I. Savary-Auzeloux, G. Kraft and I. Ortigues-Marty</i>	335
Net flux of amino acids across splanchnic tissues of ewes during abomasal protein and glucose infusion <i>H. Freetly, C. Ferrell and S. Archibeque</i>	337
Effect of abomasal glucose infusion on splanchnic glucose metabolism in freshening dairy cows <i>M. Larsen and N.B. Kristensen</i>	339
Portal recovery of glucose infused into the abomasum of lactating dairy cows <i>M. Larsen and N.B. Kristensen</i>	341
Amino acid and energy metabolism by the portal-drained viscera of beef steers: quantitative relationships with metabolizable energy intake <i>K.R. McLeod, S.W. El-Kadi, D.L. Harmon and E.S. Vanzant</i>	343
Effect of polyethylene glycol on the net flux of amino acids in the mesenteric- and portal-drained viscera in lactating ewes fed Sulla, a condensed tannin forage <i>D.L. Deighton, W.C. McNabb, B.R. Sinclair, B.P. Treloar and N.C. Roy</i>	345
Splanchnic net release and body retention of nitrogen in growing lambs fed diets unbalanced for energy and protein <i>G. Kraft, I. Ortigues-Marty and I. Savary-Auzeloux</i>	347
Partitioning of nitrogen net fluxes across the portal-drained viscera in sheep: effect of dietary protein rumen degradability <i>D. Rémond and C. Poncet</i>	349
Can liver protein synthesis be affected by an imbalanced dietary supply of energy or nitrogen in growing lambs? <i>I. Savary-Auzeloux, G. Kraft and I. Ortigues-Marty</i>	351
A stimulation of protein metabolism in the whole intestine is the main cause of the decreased nutritional value of a pectin supplemented diet <i>T. Pirman, M.C. Ribeyre, D. Rémond, L. Mosoni, C. Buffière, A. Lavrenčič, A. Pogačnik, M. Vrecl, J. Salobir and P. Patureau Mirand</i>	353
Ruminal fermentation, portal absorption and hepatic metabolism of glycerol infused into the rumen of lactating dairy cows <i>N.B. Kristensen and B.M.L. Raun</i>	355

Identification of a vacuolar H ⁺ -ATPase as a new energy consuming mechanism in rumen epithelium of sheep and cattle	357
<i>M. Schweigel, K.S. Heipertz, M. Kolisek, W. Jähme, E. Albrecht and R. Zitnan</i>	
4A. Regulations by nutrients, hormones and nervous system	
Reduced insulin responses by asynchronous protein and lactose intake in veal calves despite high plasma glucose levels	361
<i>T. Vicari, J.J.G.C. van den Borne, W.J.J. Gerrits, Y. Zbinden and J.W. Blum</i>	
Modulation of adipose tissue metabolism in periparturient dairy cattle through <i>pre partum</i> administration of thiazolidinediones	363
<i>T.R. Overton and K.L. Smith</i>	
Glucagon-like peptide 2 inhibits intestinal lysosomal proteolysis and improves small intestinal recovery in refed starved rats	365
<i>A. Codran, S.E. Samuels, S. Ventadour, A. Claustre, M.-P. Roux, D. Taillandier, D. Béchet, D. Attaix and L. Combaret</i>	
Postprandial blood hormone and metabolite responses influenced by feeding frequency and feeding level in heavy veal calves	367
<i>T. Vicari, J.J.G.C. van den Borne, W.J.J. Gerrits, Y. Zbinden and J.W. Blum</i>	
The role of feeding regimens in regulating metabolism of broiler breeders: hepatic lipid metabolism, plasma hormones and metabolites	369
<i>M. de Beer, R.W. Rosebrough, B.A. Russell, S.M. Poch, M.P. Richards, J.P. McMurtry, D.M. Brocht and C.N. Coon</i>	
The relation between circulating ghrelin and vitamin A during the fattening period in Japanese Black steers	371
<i>M. Hayashi, K. Kido and K. Hodate</i>	
Effects of rumen protected choline on selected metabolites and liver constituents in dairy goats within the first month of lactation	373
<i>L. Pinotti, A. Campagnoli, F. D'Ambrosio, C. Pecorini, R. Rebucci, D. Magistrelli, V. Dell'Orto and A. Baldi</i>	
Rare earth elements (REE) in piglets feeding – performance and thyroid hormone status	375
<i>D. Förster, A. Berk, H.-O. Hoppen and G. Flachowsky</i>	
Role of the 5'AMP-activated protein kinase in reproduction: a possible involvement in the central regulation	377
<i>L. Tosca, G. Ferreira, E. Jeanpierre, S. Coyral-Castel, A. Caraty, D. Lomet, C. Chabrolle and J. Dupont</i>	
Chicken liver glucokinase is activated by a glucokinase activator	379
<i>N. Rideau, A. Picard and J. Grimsby</i>	
Effects of <i>in ovo</i> amino acids or glucose administration on hexokinase activity in hatching muscle of broiler embryos	381
<i>Y. Ohta, Y. Furuya, I. Yoshimura, H. Furuta and M. Sugawara</i>	

Effect of conjugated linoleic acid on gluconeogenesis, glycogen turnover and IGF-1 synthesis in primary culture of porcine hepatocytes <i>I. Fernández-Figares, J.A. Conde-Aguilera, M. Lachica, R. Nieto and J.F. Aguilera</i>	383
Serum profile of metabolites and hormones of growing Iberian gilts fed diets supplemented with betaine, conjugated linoleic acid or both <i>I. Fernández-Figares, M. Lachica, R. Nieto and J.F. Aguilera</i>	385
4B. Health and metabolism	
Association of plant extracts rich in polyphenols and vitamin E efficiently prevents lipoperoxidation in plasma of sheep fed a n-3 PUFA rich diet <i>C. Gladine, E. Rock, C. Morand, D. Gruffat, D. Bauchart and D. Durand</i>	389
Cardiac oxidative stress in high fat/high sucrose fed rats is mainly due to NADPH oxidase overexpression. Protective effects of polyphenols <i>T. Sutra, C. Feillet-Coudray, G. Fouret, G. Cabello, J.-P. Cristol and C. Coudray</i>	391
The effect of sodium ascorbate, trolox and 3-hydroxy-3-methylbutyrate on apoptosis induced by oxidative stress in C2C12 cells without dystrophin <i>S.J. Berwid and P. Ostaszewski</i>	393
Effects of inflammation in <i>peripartum</i> dairy cows on milk yield, energy balance and efficiency <i>E. Trevisi, A. Gubbiotti and G. Bertoni</i>	395
Dietary L-carnitine enhances the acute phase response in chickens <i>J. Buyse, Q. Swennen, T.A. Niewold, K.C. Klasing, G.P.J. Janssens, M. Baumgartner and B.M. Goddeeris</i>	397
Dietary β -hydroxy- β -methylbutyrate supplementation influences performance differently after immunisation in broiler chickens <i>J. Buyse, Q. Swennen, B.M. Goddeeris, F. Vandemaele, K.C. Klasing, M. Baumgartner and T.A. Niewold</i>	399
The comparative study of effects of Immunowall® (prebiotics) and Avilamycin on amounts of humoral immunity of broiler chickens <i>A. Zakeri, M. Fadaei, S. Charkhkar and S. Zakeri</i>	401
Non-specific resistance state in rats fed a protein free diet <i>E. Sawosz, A. Chwalibog I. Kosieradzka, M. Grodzik, T. Niemiec and J. Skomial</i>	403
Feeding a lower-protein, amino-acid supplemented diet has no effect on growth performance but reduces post-weaning diarrhoea in pigs <i>J.M. Heo, J.C. Kim, B.P. Mullan, D.J. Hampson, R.H. Wilson, J. Callesen, C.F. Hansen and J.R. Pluske</i>	405
Protein balance of lambs infected with <i>Haemonchus contortus</i> and fed tanniniferous sainfoin (<i>Onobrychis viciifolia</i>) <i>A. Scharenberg, Y. Arrigo, F. Heckendorn, H. Hertzberg, A. Gutzwiller, H.D. Hess, M. Kreuzer and F. Dohme</i>	407

Venous blood gas in Holstein steers fed diets with different concentrate to alfalfa hay ratios 409
A.R. Vakili, M. Danesh Mesgaran, A.R. Heravi Mousavi and S. Danesh Mesgaran

Long-term physical activity does not influence the glycemic index in women 411
S. Mettler, P. Vaucher, P.M. Weingartner, C. Wenk and P.C. Colombani

4C. Nitrogen digestion and recycling

Source of nitrogen for pig gut microbes: effect of feeding fermentable fiber 415
A.J. Libao-Mercado, C.L. Zhu, J.P. Cant, H.N. Lapierre, J.N. Thibault, B. Sève, M.F. Fuller and C.F.M. de Lange

Effects of metabolizable protein supply on nitrogen metabolism and recycling in lactating dairy cows 417
D. Valkeners, H. Lapierre, J. Marini and D.R. Ouellet

Effect of ruminal degradable nitrogen deficit on nitrogen metabolism in growing double-muscle Belgian Blue bulls fed beet pulp silage based diet 419
D. Valkeners, Y. Beckers, A. Lindebrings and A. Théwis

Methodological considerations for the determination of standardised ileal digestibilities of amino acids in newly weaned pigs 421
M. Eklund, H.P. Piepho, M. Rademacher and R. Mosenthin

Effects of feeding duration and ruminal nitrogen and energy release rates on nitrogen balance and microbial synthesis in sheep 423
T. Ichinohe and T. Fujihara

Timing of herbage and fasting allocation alters nutrient supply in grazing cattle 425
P. Gregorini, S.A. Gunter and P.A. Beck

Effect of water-soluble carbohydrate on rumen nitrogen kinetics of steers given perennial ryegrass silage measured by ^{15}N -tracer methodology 427
E.J. Kim, N.D. Scollan and J.V. Nolan

Effect of toasting organic field beans on starch and NDF digestibility and rumen microbial protein synthesis in dairy cows 429
P. Lund, M.R. Weisbjerg, T. Hvelplund, M. Larsen and T. Kristensen

Pattern and rate of urea infusion into the rumen alter N balance and plasma NH_4^+ in wethers 431
M.I. Recavarren and G.D. Milano

Effects of dietary crude protein and ruminally-degradable protein on urea recycling and microbial protein production in beef heifers 433
K. Baker, T. Mutsaers, J.J. McKinnon, G. Gozho and T.A. McAllister

Effect of potato pulp as a dietary carbohydrate source on nitrogen excretion and urea metabolism in sheep 435
T. Obitsu, M. Tsunemine, K. Han, T. Sugino and K. Taniguchi

The effect of dietary pectin on concentration of free amino acids and urea in blood plasma of young pigs <i>E. Świąch, M. Taciak, A. Tuśnio and L. Buraczewska</i>	437
Effect of different energy supply on microbial protein synthesis and renal urea handling in Corriedale sheep consuming temperate fresh forages <i>I. Tebot, C. Echaidès, A. Secchi and A. Cirio</i>	439
The effect of potato protein and potato fibre on amino acid digestibility, small intestinal structure and on N-balance and performance of young pigs <i>A. Tuśnio, B. Pastuszewska, E. Świąch and L. Buraczewska</i>	441
Part 5. From the parts to the whole of how to use detailed information to answer applied questions	
5. Protein-energy interactions	
Protein-energy interactions: horizontal aspects <i>G.E. Lobley</i>	445
Vertical integration from 'omics' to the whole organism <i>A. Cornish-Bowden and M.L. Cárdenas</i>	463
Intravenous administration of lysine and threonine to a deficient diet results in low nitrogen utilization in preruminant calves <i>S.J.J. Alferink, J.J.G.C. van den Borne, A. Habets, A.A. Jacobs and W.J.J. Gerrits</i>	473
The use of glutamine and glutamate for gluconeogenesis and non-essential amino acid synthesis in late term chicken embryos <i>N.E. Sunny, J. Adamany, S.L. Owens and B.J. Bequette</i>	475
Metabolic flexibility of lactating mink (<i>Mustela vison</i>) is not reflected at transcriptional level but by changes in functional liver mass <i>R. Fink, P.D. Thomsen and A.-H. Tauson</i>	477
Heat production in broilers is not affected by dietary crude protein <i>J. Noblet, S. Dubois, J. van Milgen, M. Warpechowski and B. Carré</i>	479
Diet-induced thermogenesis and feed intake regulation in the chicken: effect of diet and genotype <i>Q. Swennen, A. Collin, G.P.J. Janssens, E. Le Bihan-Duval, A. Bordas, E. Decuyper and J. Buyse</i>	481
Protein intake but not feed intake may affect dietary net energy for finishing pigs <i>S. Moehn and R.O. Ball</i>	483
Influence of dietary protein/energy ratio on growth, body composition, protein, lipid and energy retentions as well as amino acid metabolism of Nile tilapia <i>J. Gaye-Siessegger, S.M. Mamun and U. Focken</i>	485
