BOOK AID  
International

Sabre Foundation

- John M. Abrams (261)**, Department of Cell Biology, University of Texas Southwestern Medical Center, Dallas, Texas
- Patricia V. Agostino (194)**, Laboratory of Chronobiology, Department of Science and Technology, National University of Quilmes, Buenos Aires, Argentina
- Rexford S. Ahima (332)**, University of Pennsylvania School of Medicine, Department of Medicine, Division of Endocrinology, Diabetes and Metabolism, Philadelphia, Pennsylvania
- Daniel A. Albert (337)**, Dartmouth Medical School and Dartmouth-Hitchcock Medical Center, Lebanon, New Hampshire
- Emil Alexov (2)**, Department of Biochemistry and Molecular Biophysics, Howard Hughes Medical Institute, Columbia University, New York
- Simon Alford (210)**, Department of Biological Sciences, University of Illinois at Chicago, Chicago, Illinois
- Steven C. Almo (10)**, Department of Biochemistry, and Center for Synchrotron Biosciences, Albert Einstein College of Medicine, Bronx, New York, New York
- Géza Ambrus (304)**, Department of Cell Biology, Scripps Research Institute, La Jolla, California
- Sally A. Amundson (257)**, Center for Radiological Research, Columbia University Medical Center, New York
- Carl W. Anderson (264)**, Biology Department, Brookhaven National Laboratory, Upton, New York
- Kenneth C. Anderson (325, 326)**, Department of Medical Oncology, Jerome Lipper Multiple Myeloma Center, Dana-Farber Cancer Institute, Harvard Medical School, Boston, Massachusetts
- Peter Angel (251)**, Deutsches Krebsforschungszentrum, Division of Signal Transduction and Growth Control, Heidelberg, Germany
- Frann Antignano (134)**, The Terry Fox Laboratory, BC Cancer Agency, Vancouver, BC, Canada
- Marc Antonyak (219)**, Department of Molecular Medicine, Department of Chemistry and Chemical Biology, Cornell University, Ithaca, New York
- Ettore Appella (264)**, Laboratory of Cell Biology, National Cancer Institute, National Institutes of Health, Bethesda, Maryland
- William J. Arendshorst (318)**, Department of Cell and Molecular Physiology, University of North Carolina at Chapel Hill, Chapel Hill, North Carolina
- Liliana Attisano (70)**, Institute of Medical Sciences and Department of Biochemistry, University of Toronto, and Donnelly Centre for Cellular and Biomolecular Research, University of Toronto, Toronto, Ontario, Canada
- Anjon Audhya (138)**, Weill Institute for Cell and Molecular Biology, Department of Molecular Biology and Genetics, Cornell University, Ithaca, New York
- Manfred Auer (47)**, Novartis Institutes for BioMedical Research – Vienna, Innovative Screening Technologies Unit, Vienna, Austria
- Juan Ausió (289)**, Department of Biochemistry and Microbiology, University of Victoria, Victoria, British Columbia, Canada
- Brandon J. Baird (273)**, Laboratory of Molecular Pharmacology, Center for Cancer Research, National Cancer Institute, National Institutes of Health, Bethesda, Maryland
- Jesús Balsinde (149)**, Institute of Molecular Biology and Genetics, Spanish National Research Council (CSIC) and University of Valladolid School of Medicine, Valladolid, Spain
- Dwayne L. Barber (63)**, Division of Stem Cells and Developmental Biology, Faculty of Medicine, University of Toronto, Toronto, Ontario, Canada
- David Barford (86)**, Section of Structural Biology, Institute of Cancer Research, Chester Beatty Laboratories, London, England, UK
- Alastair J. Barr (107)**, Structural Genomics Consortium, Botnar Research Centre, University of Oxford, Oxford, England, UK
- Dafna Bar-Sagi (217)**, Department of Molecular Genetics and Microbiology, State University of New York at Stony Brook, Stony Brook, New York

- Blaine Bartholomew (282)**, Department of Biochemistry and Molecular Biology, Southern Illinois University School of Medicine, Springfield, Illinois
- H. Batiaens (155)**, Cell Biology and Cell Biophysics Program, European Molecular Biology Laboratory, Heidelberg, Germany
- Anthony J. Baucum II (167)**, Department of Molecular Physiology and Biophysics, Center for Molecular Neuroscience, Vanderbilt-Kennedy Center for Research on Human Development, Vanderbilt University School of Medicine, Nashville, Tennessee
- J. Fernando Bazan (41)**, Department of Protein Engineering, Mail Stop 27, Genentech, South San Francisco, California
- Joshua M. Beatty (248)**, Center for Biotechnology, Genomics, and Health Research, University of North Carolina at Greensboro, Greensboro, North Carolina
- Joseph A. Beavo (173, 187)**, Department of Pharmacology, University of Washington School of Medicine, Seattle, Washington
- Elsa Bello-Reuss (318)**, Department of Internal Medicine, Division of Nephrology and Department of Cell Physiology and Molecular Biophysics, Texas Tech University Health Science Center Lubbock, Texas
- Anton M. Bennett (92)**, Department of Pharmacology, Yale University School of Medicine, New Haven, Connecticut
- Craig B. Bennett (260)**, Duke University Medical Center, Department of Surgical Sciences, Durham, North Carolina
- Penny J. Beuning (258)**, Department of Chemistry and Chemical Biology, Northeastern University, Boston, Massachusetts
- Ramji K. Bhandari (314)**, Center for Reproductive Biology, School of Molecular Biosciences, Washington State University, Pullman, Washington
- Alicia A. Bicknell (299)**, University of California San Diego, Division of Biological Sciences, La Jolla, California
- Martin Biel (185)**, Munich Center for Integrated Protein Science CIPSM and Department of Pharmacy, Center for Drug Research, Ludwig-Maximilians-Universität München, Munich, Germany
- Vincent A. Bielinski (168)**, Department of Pharmacology, University of Texas Southwestern Medical Center, Dallas, Texas
- Lutz Birnbaumer (197)**, Laboratory of Neurobiology, National Institute of Environmental Health Sciences, Research Triangle Park, North Carolina
- Gail A. Bishop (50)**, Departments of Microbiology and Internal Medicine, The University of Iowa, and the VA Medical Center, Iowa City, Iowa
- Trillium Blackmer (210)**, Department of Biological Sciences, University of Illinois at Chicago, Chicago, Illinois
- Mordecai P. Blaustein (119)**, Departments of Physiology and Medicine, University of Maryland School of Medicine, Baltimore, Maryland
- Wojciech C. Blonski (338)**, Division of Gastroenterology, University of Pennsylvania, Philadelphia, Pennsylvania, and Department of Gastroenterology and Hepatology, Wrocław Medical University, Wrocław, Poland
- Naomi Bogenschutz (283)**, Molecular and Cellular Biology Program, University of Washington and Fred Hutchinson Cancer Research Center, Seattle, Washington
- Frank-D. Böhmer (267)**, Leibniz Institute for Age Research, Fritz Lipmann Institute, Jena, Germany, and Institute of Molecular Cell Biology, CMB-Center for Molecular Biomedicine, Jena, Germany
- Gary M. Bokoch (106, 216)**, Departments of Immunology and Cell Biology, The Scripps Research Institute, La Jolla, California
- Kent Bondensgaard (46)**, Biopharmaceuticals Research Unit, Novo Nordisk A/S, Måløv, Denmark
- Lynda. F. Bonewald (313)**, Bone Biology Program, University of Missouri-Kansas City, Kansas City, Missouri
- William M. Bonner (273)**, Laboratory of Molecular Pharmacology, Center for Cancer Research, National Cancer Institute, National Institutes of Health, Bethesda, Maryland
- Martin D. Bootman (109, 117)**, Calcium Group, Laboratory of Molecular Signalling, The Babraham Institute, Babraham, Cambridge, England, UK
- Johannes L. Bos (186)**, Department of Physiological Chemistry and Centre for Biomedical Genetics, University Medical Centre Utrecht, Utrecht, The Netherlands
- Rohit Bose (70)**, Department of Molecular Genetics, University of Toronto, and Program in Molecular Biology and Cancer, Samuel Lunenfeld Research Institute, Mt Sinai Hospital, Toronto, Ontario, Canada
- Istvan Botos (21)**, Laboratory of Molecular Biology, National Institute of Diabetes and Digestive and Kidney Diseases, National Institutes of Health, Bethesda, Maryland
- Kanika A. Bowen (311)**, Department of Surgery, The University of Texas Medical Branch, Galveston, Texas

- Ralph A. Bradshaw (1, 55, 307)**, Department of Pharmaceutical Chemistry, University of California San Francisco, San Francisco, California; and Department of Physiology and Biophysics & Department of Anatomy and Neurobiology, University of California, Irvine, California
- Patrick Bregy (189)**, Institute of Cell Biology, University of Bern, Bern, Switzerland
- Anne R. Bresnick (10)**, Department of Biochemistry, Albert Einstein College of Medicine, Bronx, New York, New York
- Paul K. Brindle (253)**, Department of Biochemistry, St. Jude Children's Research Hospital, Memphis, Tennessee
- Marisa Brini (118)**, Department of Biochemistry, University of Padova, Padova, Italy; and Department of Experimental Veterinary Sciences, University of Padova, Legnaro, Padova, Italy
- Ross I. Brinkworth (182)**, School of Molecular and Microbial Sciences and Institute for Molecular Bioscience, University of Queensland, Brisbane, Queensland, Australia
- Kenneth D. Bromberg (203)**, Department of Pharmacology and Systems Therapeutics, Mt Sinai School of Medicine, New York, New York
- Felrecia Brown (180)**, Department of Physiology, College of Medicine, University of South Alabama, Mobile, Alabama
- Michael S. Brown (298)**, Department of Molecular Genetics, University of Texas Southwestern Medical Center at Dallas, Dallas, Texas
- Anne Brunet (250)**, Division of Neuroscience, Children's Hospital and Department of Neurobiology, Harvard Medical School, Boston, Massachusetts
- Matthew H. Brush (89)**, Department of Pharmacology and Cancer Biology, Duke University Medical Center, Durham, North Carolina
- Robert Bucki (141)**, Institute for Medicine and Engineering, Department of Physiology, University of Pennsylvania, Philadelphia, Pennsylvania
- Dmitry V. Bulavin (271)**, Institute of Molecular and Cell Biology, Proteos, Singapore
- Robert D. Burgoyne (122)**, The Physiological Laboratory, School of Biomedical Sciences, University of Liverpool, Liverpool, England, UK
- Tara L. Burke (285)**, Department of Biochemistry and Molecular Genetics, University of Virginia School of Medicine, Charlottesville, Virginia
- Janice E. Buss (213)**, Department of Pharmaceutical Sciences, University of Kentucky, Lexington, Kentucky
- Michael D. Cahalan (31)**, Department of Physiology and Biophysics, and the Center for Immunology, University of California, Irvine, California
- Karyn B. Cahill (177)**, Department of Biochemistry and Molecular Biology, University of New Hampshire, Durham, New Hampshire
- Paul M. Campbell (329)**, Lee Moffitt Cancer Center and Research Institute, Tampa, Florida
- Ernesto Carafoli (118)**, Department of Biochemistry, University of Padova, Padova, Italy; and Venetian Institute of Molecular Medicine, Padova, Italy
- Graham Carpenter (110)**, Department of Biochemistry, Vanderbilt University School of Medicine, Nashville, Tennessee
- Catherine Carrière (310)**, Departments of Medicine, and Pharmacology and Toxicology, Dartmouth Medical School, Norris Cotton Cancer Center and Dartmouth Hitchcock Medical Center, Lebanon, New Hampshire
- Patrick J. Casey (202)**, Department of Pharmacology and Cancer Biology, and Department of Biochemistry, Duke University Medical Center, Durham, North Carolina
- Amanda Caster (220)**, Department of Biochemistry and Neuroscience Graduate Program, Emory University School of Medicine, 1510 Clifton Rd, Atlanta, Georgia
- William A. Catterall (112)**, Department of Pharmacology, University of Washington, Seattle, Washington
- Richard A. Cerione (218, 219)**, Department of Molecular Medicine, Department of Chemistry and Chemical Biology, Cornell University, Ithaca, New York
- Denise A. Chan (269)**, Division of Radiation Biology, Department of Radiation Oncology, Stanford University School of Medicine, Stanford, California
- Gordon Chan (98)**, Ontario Cancer Institute, Toronto, Ontario, Canada
- Moses V. Chao (234)**, Molecular Neurobiology Program, Skirball Institute of Biomolecular Medicine, New York University School of Medicine, New York, New York
- Harry Charbonneau (96)**, Department of Biochemistry, Purdue University, West Lafayette, Indiana
- Nilanjana Chatterjee (282)**, Department of Biochemistry and Molecular Biology, Southern Illinois University School of Medicine, Springfield, Illinois

- Chyi-Ying A. Chen (277)**, Department of Biochemistry and Molecular Biology, University of Texas, Medical School at Houston, Houston, Texas
- Jau-Nian Chen (230)**, Department of Molecular, Cell and Developmental Biology, University of California, Los Angeles, California
- Mingming Chen (284)**, Department of Carcinogenesis, Science Park Research Division, University of Texas M.D. Anderson Cancer Center, Smithville, Texas
- Philip Chen (263)**, Queensland Cancer Fund Research Laboratory, Queensland Institute of Medical Research, Brisbane, Australia
- S. R. Wayne Chen (116)**, Department of Physiology and Biophysics, University of Calgary, Calgary, Alberta, Canada
- Xin Chen (193)**, Department of Orthopaedics, Case Western Reserve University & Case Medical Center, Cleveland, Ohio
- Yi-Yun Chen (105)**, Institute of Biological Chemistry, and National Core Facility for Proteomic Research, Academia Sinica, Taipei, Taiwan; and Institute of Biochemical Sciences, College of Life Sciences, National Taiwan University, Taipei, Taiwan
- Zhijian J. Chen (83)**, Department of Molecular Biology, and Howard Hughes Medical Institute, University of Texas Southwestern Medical Center, Dallas, Texas
- Peter Cheung (288)**, Department of Medical Biophysics, University of Toronto, and Division of Signaling Biology, Ontario Cancer Institute, Toronto, Ontario, Canada
- Anne Elisabeth Christensen (191)**, Department of Biomedicine, Medical Faculty, University of Bergen, Norway
- Chung-Sik Choi (180)**, Department of Physiology, College of Medicine, University of South Alabama, Mobile, Alabama
- Jerold Chun (147)**, Department of Molecular Biology, Helen L. Dorris Child and Adolescent Neuropsychiatric Disorder Institute, The Scripps Research Institute, La Jolla, California
- Grant C. Churchill (111)**, Department of Pharmacology, Oxford University, Oxford, England, UK
- Aaron Ciechanover (255)**, Vascular and Tumor Biology Research Center, Bruce Rappaport Faculty of Medicine, Technion-Israel Institute of Technology, Haifa, Israel
- Andrew H.A. Clayton (48)**, Ludwig Institute for Cancer Research, Royal Melbourne Hospital, Victoria, Australia
- Lena Claesson-Welsh (236)**, Department of Genetics and Pathology, Rudbeck Laboratory, Uppsala University, Uppsala, Sweden
- Robert Clarke (317)**, Department of Oncology, Lombardi Comprehensive Cancer Center, Georgetown University, Washington, DC
- Charles V. Clevenger (36)**, Department of Pathology, Northwestern University Medical School, Robert H. Lurie Comprehensive Cancer Center, Chicago, Illinois
- Shamshad Cockcroft (142)**, Department of Physiology, Rockefeller Building, University College London, University Street, London, England, UK
- Patrice Codogno (306)**, INSERM U756, Faculté de Pharmacie, Université Paris-Sud 11, Châtenay-Malabry, France
- Patricia T.W. Cohen (85)**, Medical Research Council Protein Phosphorylation Unit, College of Life Sciences, University of Dundee, Dundee, Scotland, UK
- Philip Cohen (76)**, MRC Protein Phosphorylation Unit, University of Dundee, Dundee, Scotland, UK
- Roger J. Colbran (167)**, Department of Molecular Physiology and Biophysics, Center for Molecular Neuroscience, Vanderbilt-Kennedy Center for Research on Human Development, Vanderbilt University School of Medicine, Nashville, Tennessee
- Marco Conti (174)**, Center for Reproductive Sciences, Department of Obstetrics and Gynecology, University of California San Francisco, San Francisco, California
- Peter J. Cook (245)**, Howard Hughes Medical Institute, Department and School of Medicine, University of California, San Diego, La Jolla, California
- Max D. Cooper (22)**, Department of Pathology and Laboratory Medicine, Emory Vaccine Center of Emory University School of Medicine, Atlanta, Georgia
- Jackie D. Corbin (176, 178)**, Department of Molecular Physiology and Biophysics, Vanderbilt University School of Medicine, Nashville, Tennessee
- Daniela Corda (204)**, Department of Cell Biology and Oncology, Consorzio Mario Negri Sud, Santa Maria Imbaro, Chieti, Italy
- Seth J. Corey (327, 328)**, Division of Pediatric Hematology/Oncology/Stem Cell Transplantation, Children's Memorial Hospital, Chicago, Illinois, Department of Pediatrics, Northwestern University Feinberg School of Medicine, Chicago, Illinois, and Robert H. Lurie Comprehensive Cancer Center, Northwestern University, Chicago, Illinois
- Rick H. Cote (177, 178)**, Department of Biochemistry and Molecular Biology, University of New Hampshire, Durham, New Hampshire
- Shaun R. Coughlin (26)**, Departments of Medicine and Cellular and Molecular Pharmacology, Cardiovascular

- Research Institute, University of California, San Francisco, California
- Adrienne D. Cox (214, 222)**, Departments of Pharmacology and Radiation Oncology, Lineberger Comprehensive Cancer Center, and Curriculum in Genetics and Molecular Biology, University of North Carolina at Chapel Hill, Chapel Hill, North Carolina
- Scott D. Cramer (323)**, Department of Cancer Biology, Wake Forest University School of Medicine, Winston-Salem, North Carolina
- Fernando Cruz-Guilloty (254)**, Department of Pathology, Harvard Medical School and the Immune Disease Institute, Boston, Massachusetts
- Xiaopoing Cui (262)**, University of Southern California Keck School of Medicine, USC Norris Comprehensive Cancer Center, Los Angeles, California
- Sami Damak (209)**, Nestlé Research Center, Vers-chez-les-Blanc, Lausanne, Switzerland
- Steven M. Damo (49)**, Department of Biochemistry, Weill Medical College of Cornell University, York Avenue, New York, New York
- Mary Dasso (215)**, Laboratory of Gene Regulation and Development/National Institute of Child Health and Human Development, Bethesda, Maryland
- David R. Davies (21)**, Laboratory of Molecular Biology, National Institute of Diabetes and Digestive and Kidney Diseases, National Institutes of Health, Bethesda, Maryland
- Anthony J. Davis (168)**, Department of Pharmacology, University of Texas Southwestern Medical Center, Dallas, Texas
- Roger J. Davis (164)**, Howard Hughes Medical Institute and Program in Molecular Medicine, University of Massachusetts Medical School, Worcester, Massachusetts
- Nicholas O. Deakin (156)**, Department of Cell and Developmental Biology, State University of New York, Upstate Medical University, Syracuse, New York, New York
- Tushar B. Deb (317)**, Department of Oncology, Lombardi Comprehensive Cancer Center, Georgetown University, Washington, DC
- Eva Degerman (175)**, Department of Cell and Molecular Biology, Lund University, Lund, Sweden
- Lanika DeGraffenreid (329)**, Lineberger Comprehensive Cancer Center, University of North Carolina at Chapel Hill, Chapel Hill, North Carolina
- Katrin Deinhardt (234)**, Molecular Neurobiology Program, Skirball Institute of Biomolecular Medicine, New York University School of Medicine, New York, New York
- Mark L. Dell'Acqua (165)**, Department of Pharmacology, University of Colorado Denver School of Medicine, Aurora, Colorado
- Bruce Demple (259)**, Department of Genetics and Complex Diseases, Harvard School of Public Health, Boston, Massachusetts
- Jeroen den Hertog (101)**, Hubrecht Institute, Uppsalalaan 8, Utrecht, The Netherlands
- Larry Denner (320)**, McCoy Stem Cells and Diabetes Mass Spectrometry Research Laboratory, Stark Diabetes Center, and Sealy Center for Molecular Medicine, Department of Internal Medicine, University of Texas Medical Branch, Galveston, Texas
- Edward A. Dennis (1, 149)**, Department of Chemistry and Biochemistry, Department of Pharmacology, School of Medicine and Revelle College, University of California at San Diego, La Jolla, California
- Anna A. DePaoli-Roach (88)**, Department of Biochemistry and Molecular Biology and Center for Diabetes Research, Indiana University School of Medicine, Indianapolis, Indiana
- Channing J. Der (214, 322, 329)**, Department of Pharmacology, Lineberger Comprehensive Cancer Center, and Curriculum in Genetics and Molecular Biology, University of North Carolina at Chapel Hill, Chapel Hill, North Carolina
- Céline DerMardirossian (106)**, Department of Immunology, The Scripps Research Institute, La Jolla, California
- E. M. De Robertis (243)**, Howard Hughes Medical Institute and Department of Biological Chemistry, University of California, Los Angeles, California
- Johan de Rooij (186)**, The Netherlands Cancer Institute, Division of Cell Biology, Amsterdam, The Netherlands
- Veronica De Sanctis (265)**, Centre for Integrative Biology, CIBIO, University of Trento, Italy
- Frederic de Sauvage (229)**, Department of Molecular Biology Genentech, Inc., South San Francisco, California
- Lakshmi A. Devi (28)**, Department of Pharmacology and Systems Therapeutics, Mount Sinai School of Medicine, New York, New York
- Victor C. de Vries (51)**, Department of Microbiology and Immunology, Dartmouth Medical School and The Norris Cotton Cancer Center, Lebanon, New Hampshire
- Peter N. Devreotes (207)**, Department of Cell Biology, Johns Hopkins University School of Medicine, Baltimore, Maryland

- Nupur Dey (180)**, Department of Physiology, College of Medicine, University of South Alabama, Mobile, Alabama
- Salim Dhanji (98)**, Ontario Cancer Institute, Toronto, Ontario, Canada
- Jennifer S. Dickey (273)**, Laboratory of Molecular Pharmacology, Center for Cancer Research, National Cancer Institute, National Institutes of Health, Bethesda, Maryland
- Robert B. Dickson (deceased) (317)**, Department of Oncology, Lombardi Comprehensive Cancer Center, Georgetown University, Washington, DC
- K.M. Dibb (128)**, Unit of Cardiac Physiology, University of Manchester, Manchester, England, UK
- Pier Paolo Di Fiore (305)**, IFOM, Fondazione Istituto FIRC di Oncologia Molecolare, and Dipartimento di Medicina, Chirurgia ed Odontoiatria, Università degli Studi di Milano, and Dipartimento di Oncologia Sperimentale, Istituto Europeo di Oncologia, Milan, Italy
- Ivan Dikic (69)**, Institute of Biochemistry II, Goethe University School of Medicine, Frankfurt am Main, Germany
- Francesca Di Leva (118)**, Department of Biochemistry, University of Padova, Padova, Italy; and Department of Experimental Veterinary Sciences, University of Padova, Legnaro, Padova, Italy
- Anna Dimberg (236)**, Department of Genetics and Pathology, Rudbeck Laboratory, Uppsala University, Uppsala, Sweden
- Zhao Ding (115)**, Department of Pharmacology, Tennis Court Road, Cambridge, England, UK
- Julie Diplexcito (87)**, MRC Protein Phosphorylation Unit, College of Life Sciences, University of Dundee, Dundee, Scotland, UK
- Ben Distel (296)**, Department of Medical Biochemistry, Academic Medical Center, University of Amsterdam Amsterdam, The Netherlands
- Jack E. Dixon (133)**, The Life Science Institute and Department of Biological Chemistry, University of Michigan Medical School, Ann Arbor, Michigan
- Teuta Domi (118)**, Department of Biochemistry, University of Padova, Padova, Italy; and Department of Experimental Veterinary Sciences, University of Padova, Legnaro, Padova, Italy
- Ian M. Donaldson (170)**, The Biotechnology Centre of Oslo, and the Department for Molecular Biosciences, University of Oslo, Blindern, Oslo, Norway
- Daniel J. Donoghue (237)**, Department of Chemistry and Biochemistry, University of California San Diego, La Jolla, California; and Moores University of California San Diego Cancer Center, La Jolla, California
- Russell F. Doolittle (17)**, Departments of Molecular Biology and Chemistry & Biochemistry, University of California, San Diego, La Jolla, California
- Thomas Dörner (336)**, Department of Medicine, Rheumatology, and Clinical Immunology, Charité University Medicine Berlin, Germany
- Stein Ove Døskeland (191)**, Department of Biomedicine, Medical Faculty, University of Bergen, Norway
- Wolfgang R. Dostmann (181)**, Department of Pharmacology, University of Vermont, College of Medicine, Burlington, Vermont
- Ryan J.O. Dowling (281)**, Department of Biochemistry, McGill Cancer Centre, McGill University, Montreal, Quebec, Canada
- Kristine A. Drafahl (237)**, Department of Chemistry and Biochemistry, University of California San Diego, La Jolla, California
- Matthias K. Dreyer (43)**, Sanofi-Aventis Deutschland GmbH, Structural Biology, Industriepark Höchst, Frankfurt, Germany
- Michael R. Duchon (121)**, Department of Physiology and UCL Mitochondrial Biology Group, University College London, London, England, UK
- Michael L Dustin (11)**, Department of Pathology, New York University School of Medicine, Program in Molecular Pathogenesis, Helen L and Martin S Kimmel Center for Biology and Medicine of the Skirball Institute for Biomolecular Medicine, New York, New York
- Edward Eivers (243)**, Howard Hughes Medical Institute and Department of Biological Chemistry, University of California, Los Angeles, California
- Raul Elgueta (51)**, Department of Microbiology and Immunology, Dartmouth Medical School and The Norris Cotton Cancer Center, Lebanon, New Hampshire
- Elaine A. Elion (163)**, Department of Biological Chemistry and Molecular Pharmacology, Harvard Medical School, Boston, Massachusetts
- D.A. Eisner (128)**, Unit of Cardiac Physiology, University of Manchester, Manchester, England, UK
- Christian D. Ellson (137)**, Koch Institute for Integrated Cancer Research, Massachusetts Institute of Technology, Cambridge, Massachusetts
- Scott D. Emr (138)**, Weill Institute for Cell and Molecular Biology, Department of Molecular Biology and Genetics, Cornell University, Ithaca, New York

- Peter J. Espenshade (298)**, Department of Cell Biology, Johns Hopkins University School of Medicine, Baltimore, Maryland
- Edward D. Esplin (168)**, Department of Pharmacology, University of Texas Southwestern Medical Center, Dallas, Texas
- B. Mark Evers (311)**, Department of Surgery, The University of Texas Medical Branch, Galveston, Texas
- Andrei D. Fagarasanu (303)**, Department of Cell Biology, University of Alberta, Edmonton, Alberta, Canada
- Yanshan Fang (108)**, Howard Hughes Medical Institute, Department of Neuroscience, University of Pennsylvania School of Medicine, Philadelphia, Pennsylvania
- Marilyn G. Farquhar**, Department of Cellular and Molecular Medicine, University of California San Diego, La Jolla, California (Part IV Introduction)
- Laura Fedrizzi (118)**, Department of Biochemistry, University of Padova, Padova, Italy; and Department of Experimental Veterinary Sciences, University of Padova, Legnaro, Padova, Italy
- Carol A. Feghali-Bostwick (335)**, University of Pittsburgh, Pittsburgh, Pennsylvania
- Qiyu Feng (218)**, Department of Molecular Medicine, Department of Chemistry and Chemical Biology, Cornell University, Ithaca, New York
- James J. Fiordalisi (222)**, Departments of Radiation Oncology and Pharmacology and the Lineberger Comprehensive Cancer Center, University of North Carolina at Chapel Hill, Chapel Hill, North Carolina
- Rodolphe Fischmeister (195)**, INSERM UMR-S 769, and Université Paris-Sud 11, Châtenay-Malabry, France
- Garret A. FitzGerald (150)**, Institute for Translational Medicine and Therapeutics, University of Pennsylvania, Philadelphia, Pennsylvania
- Albert J. Fornace Jr. (257)**, John B. Little Center for the Radiation Sciences and Environmental Health, Harvard School of Public Health, Boston, Massachusetts, and Lombardi Comprehensive Cancer Center, and Department of Biochemistry and Molecular and Cellular Biology, Georgetown University, Washington, DC
- James J. Foti (258)**, Department of Biology, Massachusetts Institute of Technology, Cambridge, Massachusetts
- Sheelagh Frame (76)**, MRC Protein Phosphorylation Unit, University of Dundee, Dundee, Scotland, UK
- Jonathan Franca-Koh (207)**, Department of Cell Biology, Johns Hopkins University School of Medicine, Baltimore, Maryland
- Sharron H. Francis (176, 178)**, Department of Molecular Physiology and Biophysics, Vanderbilt University School of Medicine, Nashville, Tennessee
- Robert E. Friesel (308)**, Center for Molecular Medicine, Maine Medical Center Research Institute, Portland, Maine
- Günter Fritz (124)**, Department of Biology, University of Konstanz, Konstanz, Germany
- Michael A. Frohman (144)**, Center for Developmental Genetics, Graduate Program in Molecular and Cellular Pharmacology, and the Department of Pharmacology, Stony Brook University, Stony Brook, New York, New York
- David A. Fruman (132)**, Department of Molecular Biology & Biochemistry, and Center for Immunology, University of California, Irvine, California
- Luis C. Fuentealba (243)**, Howard Hughes Medical Institute and Department of Biological Chemistry, University of California, Los Angeles, California
- Muneyoshi Futami (327, 328)**, Division of Pediatric Hematology/Oncology/Stem Cell Transplantation, Children's Memorial Hospital, Chicago, Illinois, Department of Pediatrics, Northwestern University Feinberg School of Medicine, Chicago, Illinois, and Robert H. Lurie Comprehensive Cancer Center, Northwestern University, Chicago, Illinois
- Antony Galione (111)**, Department of Pharmacology, Oxford University, Oxford, England, UK
- Stepan Gambaryan (192)**, Institute of Clinical Biochemistry and Pathobiochemistry, University of Würzburg, Würzburg, Germany
- Magtouf Gatei (263)**, Queensland Cancer Fund Research Laboratory, Queensland Institute of Medical Research, Brisbane, Australia
- Larry Gerace (304)**, Department of Cell Biology, Scripps Research Institute, La Jolla, California
- Tatyana Gerachshenko (210)**, Department of Biological Sciences, University of Illinois at Chicago, Chicago, Illinois
- Aurnab Ghose (94)**, Indian Institute of Science Education and Research (IISER), NCL Innovation Park, Pune, India
- Amato J. Giaccia (269)**, Division of Radiation Biology, Department of Radiation Oncology, Stanford University School of Medicine, Stanford, California
- Davide Gianni (216)**, Departments of Immunology and Cell Biology, The Scripps Research Institute, La Jolla, California

- Vincent Giguère (246)**, McGill Cancer Centre, Faculty of Medicine, McGill University, Montréal, Québec, Canada
- Nicolas Girard (82)**, Human Oncology and Pathogenesis Program, Memorial Sloan-Kettering Cancer Center, New York, New York
- Maria Di Girolamo (204)**, Department of Cell Biology and Oncology, Consorzio Mario Negri Sud, Santa Maria Imbaro, Chieti, Italy
- Emanuele Giurisato (160)**, Department of Pathology and Immunology, Washington University School of Medicine, Howard Hughes Medical Institute, Saint Louis, Missouri
- Christopher K. Glass (244)**, Department of Cellular and Molecular Medicine, School of Medicine, University of California, San Diego, La Jolla, California
- Werner Göbel (321)**, Department of Neurophysiology, Brain Research Institute, Zurich, Switzerland
- Matthew G. Gold (153)**, University of Washington, School of Medicine, Department of Pharmacology, Seattle, Washington
- Joseph L. Goldstein (298)**, Department of Molecular Genetics, University of Texas Southwestern Medical Center at Dallas, Dallas, Texas
