Authors

Prof. Dr.-Ing. Konrad Reif, Dipl.-Ing. Karl-Heinz Dietsche and 160 authors from industry and the university and college sector.

Reproduction, duplication and translation of this publication, including excerpts therefrom, is only to ensue with our prior written consent and with particulars of source. Figures, descriptions, schematic diagrams, and other data are for explanatory purposes and illustration of the text only. They cannot be used as the basis for the design, installation, or specification of products. We accept no liability for the accuracy of the content of this document in accordance with the prevailing legal regulations.

Subject to alteration and amendment.

The brand names given in the contents are only examples and do not represent the classification or preference for a particular manufacturer. Trademarks are not identified as such.

Contents		Electronics Basic principles of semiconductor	80
Decis substitutes of aboutles		technology	80
Basic principles of physics		Discrete semiconductor devices	83
Quantities and units	100,000	Monolithic integrated circuits	95
	22	Microprocessors in the ECU	96
Legal units		Electrochemistry	99
Further units	0.000	Electrolytic conduction and	00
Natural constants	33	electrolysis	99
Basic equations used in mechanics	34	Applications	100
Rectilinear and rotary motion	34	48-41	
	34	Mathematics and methods	101
Friction County value was also on	0.00	Mathematics	104
Vibrations and oscillations		Number systems	104
Terms of the first and an expense of the		Functions - Laborated Laborated	
Equations Company Medical Annual Bridge		Equations in the plane triangle	
		Complex numbers	
Modal analysis	44	Mathematical signs and symbols	
		Greek alphabet	
General terminology	46	Finite-element method	
Measured quantities for noise			
emissions		FEM examples	
		Control engineering	
		Terms and definitions	116
		Control-engineering transfer	
Hydrostatics		elements	
Density and pressure	52	Designing a control task	
			120
Fluid mechanics			
Basic principles	53		
Basic equations of		Chemical elements	
fluid mechanics	54	Designations	122
Discharge from a pressure vessel		Periodic table of elements	
Resistance of bodies submerged		Substances	
in a fluid flow	55	Substance terminology	126
	56	Substance parameters	126
Enthalpy (heat content)	56	Properties of solids	128
Laws of thermodynamics	58	Properties of liquids	132
Changes of state for gases	59	Properties of water vapor	133
Electrical engineering	60	Properties of gases	
Electromagnetic fields	60	Materials	135
Electric field	60	Material groups	135
Direct current and direct voltage	62	EN metallurgy standards	139
Time-dependent current	65	Properties of metallic materials	144
Magnetic field	66	Casting and steel materials	144
Magnetic field and electric current	70	Nonferrous metals, heavy metals	149
Wave propagation	74	Nonferrous metals, light alloys	150
Electric effects in metallic		Sintered metals	151
conductors	77	Magnetic materials	154
		Solders and filler materials	163
		Electrical properties of materials	166

246

Penetration clinching 312

Vehicle physics		Engine cooling	446
Basic terms of automotive		Air cooling	446
engineering	314	Water cooling	446
Basic terms of vehicle handling	314	Intercooling (charge-air cooling)	450
Motor-vehicle dynamics	324	Oil and fuel cooling	451
Dynamics of linear motion	324	Cooling-module technology	452
Adhesion to road surface	329	Cooling-system technology	453
Accelerating and braking	331	Intelligent thermal management	453
Actions: Reaction, braking	001	Exhaust-gas cooling	455
and stopping	331	Engine lubrication	456
Passing (overtaking)	333	Force-feed lubrication system	456
Fuel consumption	335	Components	456
	338	Air filtration	459
Dynamics of lateral motion	330	Air impurities	459
Special operating dynamics for	244		459
commercial vehicles	344	Air filters (air cleaners)	462
Operating-dynamics test	040	Turbochargers and superchargers	402
procedures as per ISO	348	Superchargers	462
Aerodynamics	354	(mechanically driven)	
Aerodynamic parameters	354	Pressure-wave superchargers	465
Vehicle wind tunnels	355	Exhaust-gas turbochargers	467
Vehicle acoustics	360	Complex supercharging systems	475
Exterior noise measurements and	711762	Exhaust-gas system	480
statutory limits for motor vehicles	360	Design and purpose	480
Engineering acoustics	361	Exhaust manifold	48
Sound design	362	Catalytic converter	482
		Particulate filter	483
Internal-combustion engines		Mufflers	483
Internal-combustion engines	366	Connecting elements	485
Thermal engines	366	Acoustic tuning devices	486
Cycles	368	Commercial-vehicle exhaust-gas	
Real cycles	373	systems	487
Design and operating principle	442	ISSNIPPRIME Services	
Mixture formation, combustion,		Emission-control and	
emissions	376	diagnosis legislation	
Gasoline engine	376	Emission-control legislation	488
Diesel engine	386	Overview	488
Mixed forms and alternative	000	CARB legislation	
operating strategies	391	(passenger cars/	
Charge cycle and supercharging	392	light commercial vehicles)	490
Gas exchange	392	EPA legislation	
Variable valve timing	395	(passenger cars/	
			49
Supercharging processes	399	light commercial vehicles)	45
Exhaust-gas recirculation	403	EU legislation	
Reciprocating-piston engine	404	(passenger cars/	40
Components	404	light commercial vehicles)	49
Reciprocating-piston engine types		Japanese legislation	
Crankshaft-assembly design	419	(passenger cars/	
Tribology and friction	427	light commercial vehicles)	49
Empirical values and		US legislation	190,000
data for calculation	431	(heavy commercial vehicles)	49
Wankel rotary engine	442	EU legislation	
Design and operating principle	442	(heavy commercial vehicles)	50
Properties of a rotary engine	445	Japanese legislation	
		(heavy commercial vehicles)	50
