SIMON & SCHUSTER

FOR J.B.F.

The world is so full of a number of things, I'm sure we should all be as happy as kings.

—R. L. STEVENSON

Contents

	Preface	11
1	The Shores of Light	23
	in which the tenets of the standard big bang model are outlined	
2	The Expansion of the Universe	40
	in which the dynamic cosmos is depicted, and its prediction by Einstein and the unheralded Friedmann recounted	
3	The Shape of Space	68
	in which we explore the geometry of a finite but unbounded universe	
4	Blast from the Past	104
	in which the physics of the big bang is related to the origin of chemical elements	
5	The Black Taj	120
	in which the riddle of dark matter is posed, and various suspects interrogated as to whether they might be it	
6	The Large-Scale Structure of the Universe	145
	in which we ask how it happens that the universe at large is so smooth, yet locally is so lumpy	
7	Cosmic Evolution	170
	in which the histories of planets, stars, galaxies, and the cosmos are scrutinized for signs of Darwinian evolution, and found not entirely wanting	

8	Symmetry and Imperfection	204
	in which the universe is portrayed as a shattered mirror, and unified theory as a way to fit it back together	
9	The Speed of Space	229
	in which the inflationary hypothesis is set forth, its ability to oil the troubled waters of cosmological theorizing appraised, and its vision of a really big universe presented	
10	The Origin of the Universe(s)	245
	in which, like Achilles chasing the turtle in Zeno's paradox, we pursue but fail to snare the enigma of genesis	
11	Quantum Weirdness	265
	in which the reader is asked to run a gauntlet of puzzling ideas, and is rewarded with a radical vision of the universe as composed not of many things but of one	
12	A Place for Us	290
	in which we living and (we think) thinking be- ings ask what we're doing here, and whether we would be around were things much different	
	Contrarian Theological Afterword	303
	in which God, questioned about cosmological matters, responds with his customary silence	
	Notes	313
	Glossary	353
	Acknowledgments	369
	Index	371
