The Author

Prof. Christine Kirchberger (editor of this monograph and main author)

Christine Kirchberger earned her Law Degree from the University of Vienna in 1997. After working as a trainee with the European Parliament and at two district courts in Austria, she obtained a Master's Degree in Law and Information Technology from the University of Stockholm in 2000.

Christine Kirchberger joined the Swedish Law and Informatics Research Institute at Stockholm University in 2001 as a junior lecturer. She has been involved in teaching legal informatics to law students as well as computer scientists, both in Stockholm and other Swedish universities as well as at King's College in London. Within IT law, her main focus areas have been data protection, electronic commerce, and intellectual property rights. She has also been teaching and publishing articles on legal information retrieval and legal informatics in general.

Since 2006, Christine Kirchberger has been writing her doctoral thesis 'Legal Information as a Tool' where she focuses on legal information retrieval, the concept of legal information within the framework of the doctrine of legal sources and also examines the information-seeking behaviour of lawyers.

She is the editor of this monograph and has written the Introduction as well as the parts on Protection of Intellectual Property in the ICT Sector (original version), Electronic Transactions, Privacy Protection, and the Conclusion. She can be found as @iinek on Twitter and at iinek.net. Together with Pam Storr she founded legalgeekgirls.com.
