## Advances in Nephrology

Volumes 1-11 (out of print)

### Volume 12

- Human Antirenin Antibody: A New Tool for Studying the Renin-Angiotensin System, by *Pierre Corvol, Francois-Xavier Galen, Claudine Devaux, T. Pham Guyene, Joel Menard, Jean Bariety, Jean-Pierre Camilleri, Vong N. Phat, and Dominique Nochy*
- Arterial Hypertension and Ethnic Factors, by *Jean Fabre, Aurelia Baczko, Pierre Laravoire, Pierre Dayer, and Hilke Fox*
- Prevalence, Etiology, and Treatment of Late Post-Transplant Hypertension, by *C. van Ypersele de Strihou, P. Vereerstraeten, M. Wauthier, Ch. Toussaint, Y. Pirson, J. F. De Plaen, J. L. Vanherweghem, J. Dautrebande, P. Kinnaert, J. van Geertruyden, E. Dupont, and G. P. J. Alexandre*
- Mechanisms of Proximal Tubular Reabsorption: Contribution of Electrophysiologic Techniques, by *T. Anagnostopoulos, A. Edelman, J. Teulon, and G. Planelles*
- The Role of Lysosomes in the Renal Concentration of Mineral Elements, by *P. Galle*
- Immunopathogenetic Aspects of IgA Nephropathy, by *J. Egido, J. Sancho, R. Blasco, F. Rivera, and L. Hernando*
- Proteinuria and Nonsteroid Anti-inflammatory Drugs, by *P. Michielsen, and Y. Varenterghem*
- Allergy and Lipoid Nephrosis, by *G. Lagrue, and J. Laurent*
- Renal Disease in 18 Patients with Mixed Type II IgM-IgG Cryoglobulinemia: Monoclonal Lymphoid Infiltration (2 Cases) and Membranoproliferative Glomerulonephritis (14 Cases), by *D. Cordonnier, P. Vialtel, J. Ch. Renversez, F. Chenais, M. Favre, A. Tournoud, C. Barioz, F. Bayle, E. Dechelette, M. C. Denis, and P. Coudere*
- Circulating Immune Complexes in End-Stage Renal Disease: Comparative and Kinetic Studies of Various Types of Complexes, by *H. Favre, P. Glasson, G. O. Perez, P. H. Lambert, and M. Leski*
- Clinical and Theoretical Interest of the Immunochemical Analysis of Antinuclear Antibodies in Systemic Lupus Erythematosus, by *François Tron, Laurent Jacob, and Jean-François Bach*
- Interleukin-2 and Autoimmune Disease, by *Norman Talal, Michael Dauphinée, Premkumar Christodoss, Gabriel Fernandes, I. Jon Russell, Nobuyuki Miyasaka, and Tsuneyoshi Nakamura*
- Comparative Nephrotoxicity of Four Aminoglycosides: Biochemical and Ultrastructural Modifications of Lysosomes, by *J. P. Fillastre, J. Hemet, P. Tulkens, J. P. Morin, G. Viotte, B. Olier, and M. Godin*

- Acute Interstitial Nephritis Due to Drug Hypersensitivity. An Up-to-Date Review with a Report of 19 Cases, by *D. Kleinknecht, Ph. Vanhille, L. Morel-Maroger, A. Kanfer, V. Lamaitre, J. P. Mery, L. Laederich, and P. Callard*
- Transplant Biopsies and Short-Term Outcome of Cadaveric Renal Allografts, by *D. Durand, A. Segonds, C. Orfila, F. Degroc, P. Bories, P. Giraud, and J. M. Suc*
- Disorders of Calcium and Phosphorus Metabolism after Successful Kidney Transplantation, by *André Ulmann, Nadira Chkoff, and Bernard Lacour*

## Volume 13

- Clinical Aspects and Pathophysiology of Diuretic-Induced Hyponatremia, by *M. Abramow and E. Cogan*
- Role of Lithium-ADH Interaction in Lithium-Induced Polyuria, by *M. Abramow and E. Cogan*
- Metabolism and Secretion of Antidiuretic Hormone in Patients with Renal Failure, Cardiac Insufficiency, and Liver Insufficiency, by *Raymond Ardaillou, Mustapha Benmansour, Eric Rondeau, and Henri Caillens*
- Role of Vasopressin in Cardiac, Pulmonary, Hepatic, and Adrenal Disorders, by *Daniel G. Bichet and Robert W. Schrier*
- Coagulation and Thromboembolic Complications in the Nephrotic Syndrome, by *J. Stewart Cameron*
- Experimental Autoimmune Nephropathies: Induction and Regulation, by *Philippe Druet and Denis Glotz*
- Dopamine: Vascular and Renal Effects and Alterations in Hypertension, by *J. L. Elghozi, J. T. Earnhardt, and P. Meyer*
- Forces Determining Selection of Uremia Therapy, by *Eli A. Friedman and Andrew P. Lundin III*
- The Mechanisms of Action of Antidiuretic Hormone, by *Serge Jard, Daniel Butlen, Bernard Cantau, Giles Guillon, Jacky Marie, and Christian Roy*
- Conception and Development of Strategies for Treating End-Stage Renal Failure at Necker Hospital, by *H. Kreis, J. P. Juquel, C. Ciancioni, and T. Druke*
- Antigens of the Human Glomerulus, by *Alfred F. Michael, Ronald J. Falk, Jeffrey L. Platt, Tyrone Melvin, and Ji-Yun Yang*
- Granulomatous Interstitial Nephritis, by *F. Mignon, J. Ph. Méry, B. Mougnot, P. Ronco, J. Roland, and L. Morel-Maroger*
- Nephrogenic Diabetes Insipidus: Clinical and Pathophysiological Aspects, by *P. Niaudet, M. Dechaux, C. Trivin, C. Loirat, and M. Broyer*
- Recent Advances in Familial Mediterranean Fever, by *M. Pras, J. Gafni, E. T. Jacob, S. Cabili, D. Zemer, and E. Sohar*
- Genetic Aspects of Complement and Glomerulonephritis, by *F. Praz, L. Halbwachs, and P. Lesavre*

- Effects of Antidiuretic Hormone on Renal Reabsorption of Electrolytes, by C. de Rouffignac and M. Imbert-Teboul
- Interaction of cAMP and Calcium-Calmodulin in the Action of Vasopressin, by Detlef Schlondorff, Sherman L. Levine, and Jeffrey Salisbury
- Factors Influencing the Endocytosis of Immune Complexes, by L. A. van Es and M. R. Daha
- Dialysis and Transplantation in Newcastle upon Tyne, by R. Wilkinson, L. Sellars, R. W. Elliot, M. K. Ward, and D. N. S. Kerr

## **Volume 14**

- Liver Changes and Complications in Adult Polycystic Kidney Disease, by J.-P. Grünfeld, G. Albouze, P. Jungers, P. Landais, A. Dana, D. Droz, A. Moynet, B. Lafforgue, E. Boursztyn, and D. Franco
- Prenatal Diagnosis of Urinary Tract Malformations, by M. Broyer, G. Guest, F. Lestage, and F. Buffet Gacoin
- Use of Antimicrobial Agents in Treating Urinary Tract Infection, by C. M. Kunin
- Life-Threatening Acid-Base Disorders, by J. P. Kassirer
- Na-K-ATPase: General Considerations, Role and Regulation in the Kidney, by A. Doucet
- Chemical, Experimental, and Clinical Studies on Endogenous Ouabain-Like Substance in Hypertension, by J. F. Cloix, M. Crabos, M. A. Devynck, J. L. Elghozi, G. Henning, L. A. Kamal, L. C. Lacerda-Jacomini, P. Meyer, M. G. Pernollet, J. B. Rosenfeld, and H. De Thé
- Calcium Flux Regulation in Myocardial and Vascular Smooth Muscle, by A. M. Moura, G. Hamon, and M. Worcel
- Calcium Antagonists in the Treatment of Hypertension: A Critical Overview, by P. Weidmann, A. Gerber, and K. Laederach
- Synthesis of Prostaglandins by Vascular Endothelial Cells, by F. Russo-Marie
- The Role of Prostaglandins in Arterial Hypertension: A Critical Review, by H.-J. Groene and M. J. Dunn
- Effects of Nonsteroidal Anti-Inflammatory Drugs on Blood Pressure and Renal Function in Man, by M. B. Vallotton and L. Faure
- New Approaches to the Diagnosis of Renovascular Hypertension, by M. H. Maxwell, M. R. Rudnick, and A. U. Waks
- Recent Advances on the Mechanisms and Genetic Aspects of Lupus Erythematosus, by A. D. Steinberg
- Atypical Lupus With Special Reference to ANA Negative Lupus and Lupus Subsets, by G. R. V. Hughes and R. A. Asherson
- Membranous Glomerulopathy in Systemic Lupus Erythematosus, by H. Gonzalez-Dettoni and F. Tron
- Immunologic Problems and Perspectives in the Therapeutic Use of Monoclonal Antibodies in Nephrology, by J.-F. Bach and L. Chatenoud
- Therapeutic Use of Monoclonal Antibodies in Kidney Transplantation, by

- H. Kreis, N. Chkoff, Ph. Viger, L. Chatenoud, M. Lacombe, H. Campos, A. Pruna, G. Goldstein, J.-F. Bach, and J. Crosnier*  
 Side Effects Due to Materials Used in Hemodialysis Equipment, by *J. Bommer, E. Ritz, and K. Andrassy*  
 Prevention and Treatment of Aluminum Intoxication in Chronic Renal Failure, by *P. Simon, P. Allain, K. S. Ang, G. Cam, and Y. Mauras*  
 Calcium, Parathyroid Hormone, and Hypertension, by *D. A. McCarron and C. D. Morris*

## Volume 15

- Water Homeostasis and Vasopressin Secretion During Gestation, by *M. D. Lindheimer, W. M. Barron, J. Dürr, and J. M. Davison*  
 The Renin-Angiotensin System in Pregnancy and Parturition, by *F. Alhenc-Gelas, A. Tache, J. P. Saint-Andre, J. Milliez, C. Sureau, P. Corvol, and J. Menard*  
 Immune Regulation in Human Pregnancy, by *W. P. Faulk and J.A. McIntyre*  
 Frequency and Perinatal Consequences of Hypertensive Disease of Pregnancy, by *P. F. Plouin, G. Chatellier, G. Breart, P. Blot, A. Ioan, and M. Azoulay*  
 Can Focal Segmental Glomerulosclerosis Appear in Preeclampsia? by *D. Nochy, C. Gaudry, N. Hinglais, M. Rouchon, and J. Bariety*  
 Prospective Controlled Study of Early Antiplatelet Therapy in Prevention of Preeclampsia, by *M. Beaufils, S. Uzan, R. Donsimoni, and J. C. Colau*  
 Urinary Tract Infections and the Outcome of Pregnancy, by *R. L. Naeye*  
 Chronic Kidney Disease and Pregnancy, by *P. Jungers, D. Forget, M. Henry-Amar, G. Albouze, P. Fournier, U. Vischer, D. Droz, L.-H. Noël, and J.-P. Grünfeld*  
 Hantavirus Nephropathy in Western Europe: Ubiquity of Hemorrhagic Fevers With Renal Syndrome, by *C. van Ypersele de Strihou, G. van der Groen, and J. Desmyter*  
 The Concepts of Crystal Growth From Solution, by *R. Boistelle*  
 Methods of Urinary Calculus Analysis: A Critical Review, by *M. Daudon and R.-J. Reveillaud*  
 The Role of Bacterial Adherence in the Initiation of Clinical Pyelonephritis, by *S. B. Svenson and G. Kallenius*  
 Low-Pressure System in Essential Hypertension, by *G. M. London and M. E. Safar*  
 Autoimmune Disorders in Diabetes, by *C. Boitard, M. Debray-Sachs, and J.-F. Bach*  
 Recent Progress in the Treatment of Diabetes Mellitus, by *J. Mirouze*  
 HL-A and Disease, by *J. Hors and J. Gony*  
 Viral Infections in Renal Transplant Recipients: An Evolutionary Problem, by *B. Charpentier*  
 Update on Drugs in Renal Failure, by *W. M. Bennett*
