AUTHOR/EDITOR

Dr. Dean W. Collinwood

The author/editor of *Global Studies: Japan and the Pacific Rim* is research professor of management, coordinator of the Master of Science and Technology Program, and adjunct professor of political science at the University of Utah in Salt Lake City. He also heads an international consulting firm with offices in Japan and China and directs a program for the U.S. government that trains scientists for Asia-related careers. He received his Ph.D. from the University of Chicago, his M.Sc. in international relations from the University of London, and his B.A. in political science with a Japanese minor from Brigham Young University. Dr. Collinwood was a Fulbright scholar at Tokyo University and Tsuda College in Japan, and he has conducted research throughout Asia and the Pacific. He is board chairman of the Asia Pacific Council and past president of the Western Conference of the Association for Asian Studies. He is the author of books and articles on Japan, Korea, and other countries.

Using *Global Studies: Japan and the Pacific Rim*

THE GLOBAL STUDIES SERIES

The Global Studies series was created to help readers acquire a basic knowledge and understanding of the regions and countries in the world. Each volume provides a foundation of information—geographic, cultural, economic, political, historical, artistic, and religious—that will allow readers to better assess the current and future problems within these countries and regions and to comprehend how events there might affect their own well-being. In short, these volumes present the background information necessary to respond to the realities of our global age.

Each of the volumes in the Global Studies series is crafted under the careful direction of an author/editor—an expert in the area under study. The author/editors teach and conduct research and have traveled extensively through the regions about which they are writing.

MAJOR FEATURES OF THE GLOBAL STUDIES SERIES

The Global Studies volumes are organized to provide concise information on the regions and countries within those areas under study. The major sections and features of the books are described here.

Regional Essays

For *Global Studies: Japan and the Pacific Rim*, the author/editor has written two essays focusing on the religious, cultural, sociopolitical, and economic differences and similarities of the countries and peoples in the region: “The Pacific Rim: Diversity and Interconnection,” and “The Pacific Islands: Opportunities and Limits.” Detailed maps accompany each essay.

Country Reports

Concise reports are written for each of the countries within the region under study. These reports are the heart of each Global Studies volume. *Global Studies: Japan and the Pacific Rim, Seventh Edition*, contains 21 country reports, including a lengthy special report on Japan.

The country reports are composed of five standard elements. Each report contains a detailed map visually positioning the country among its neighboring states; a summary of statistical information; a current essay providing important historical, geographical, political, cultural, and economic information; a historical timeline, offering a convenient visual survey of a few key historical events; and four “graphic indicators,” with summary statements about the country in terms of development, freedom, health/welfare, and achievements.

A Note on the Statistical Reports

The statistical information provided for each country has been drawn from a wide range of sources. (The most frequently referenced are listed on page 2.) Every effort has been made to provide the most current and accurate information available. However, sometimes the information cited by these sources differs to some extent; and, all too often, the most current information available for some countries is somewhat dated. Aside

from these occasional difficulties, the statistical summary of each country is generally quite complete and up to date. Care should be taken, however, in using these statistics (or, for that matter, any published statistics) in making hard comparisons among countries. We have also provided comparable statistics for the United States and Canada, which can be found on pages 8 and 9.

World Press Articles

Within each Global Studies volume is reprinted a number of articles carefully selected by our editorial staff and the author/editor from a broad range of international periodicals and newspapers. The articles have been chosen for currency, interest, and their differing perspectives. There are 23 articles in *Global Studies: Japan and the Pacific Rim, Seventh Edition*. The articles section is preceded by an annotated table of contents, which offers a brief summary of each article.

WWW Sites

An extensive annotated list of selected World Wide Web sites can be found on the facing page (7) in this edition of *Global Studies: Japan*. In addition, the URL addresses for country-specific Web sites are provided on the statistics page of most countries. All of the Web site addresses were correct and operational at press time. Instructors and students alike are urged to refer to those sites often to enhance their understanding of the region and to keep up with current events.

Glossary, Bibliography, Index

At the back of each Global Studies volume, readers will find a glossary of terms and abbreviations, which provides a quick reference to the specialized vocabulary of the area under study and to the standard abbreviations used throughout the volume.

Following the glossary is a bibliography that lists general works, national histories, and current-events publications and periodicals that provide regular coverage on Japan.

The index at the end of the volume is an accurate reference to the contents of the volume. Readers seeking specific information and citations should consult this standard index.

Currency and Usefulness

Global Studies: Japan and the Pacific Rim, like the other Global Studies volumes, is intended to provide the most current and useful information available necessary to understand the events that are shaping the cultures of the region today.

This volume is revised on a regular basis. The statistics are updated, regional essays and country reports revised, and world press articles replaced. In order to accomplish this task, we turn to our author/editor, our advisory boards, and—hopefully—to you, the users of this volume. Your comments are more than welcome. If you have an idea that you think will make the next edition more useful, an article or bit of information that will make it more current, or a general comment on its organization, content, or features that you would like to share with us, please send it in for serious consideration.

GEOGRAPHY

Area in Square Miles (Kilometers):

3,717,792 (9,629,091) (about 1/2 the size of Russia)

Capital (Population): Washington, DC (3,997,000)

Environmental Concerns: air and water pollution; limited freshwater resources, desertification; loss of habitat; waste disposal; acid rain

Geographical Features: vast central plain, mountains in the west, hills and low mountains in the east; rugged mountains and broad river valleys in Alaska; volcanic topography in Hawaii

Climate: mostly temperate, but ranging from tropical to arctic

PEOPLE

Population

Total: 280,563,000

Annual Growth Rate: 0.89%

Rural/Urban Population Ratio: 24/76

Major Languages: predominantly English; a sizable Spanish-speaking minority; many others

Ethnic Makeup: 77% white; 13% black; 4% Asian; 6% Amerindian and others

Religions: 56% Protestant; 28% Roman Catholic; 2% Jewish; 4% others; 10% none or unaffiliated

Health

Life Expectancy at Birth: 74 years (male); 80 years (female)

Infant Mortality: 6.69/1,000 live births

Physicians Available: 1/365 people

HIV/AIDS Rate in Adults: 0.61%

Education

Adult Literacy Rate: 97% (official)

Compulsory (Ages): 7–16; free

COMMUNICATION

Telephones: 194,000,000 main lines

Daily Newspaper Circulation: 238/1,000 people

Televisions: 776/1,000 people

Internet Users: 165,750,000 (2002)

TRANSPORTATION

Highways in Miles (Kilometers): 3,906,960 (6,261,154)

Railroads in Miles (Kilometers): 149,161 (240,000)

Usable Airfields: 14,695

Motor Vehicles in Use: 206,000,000

GOVERNMENT

Type: federal republic

Independence Date: July 4, 1776

Head of State/Government: President

George W. Bush is both head of state and head of government

Political Parties: Democratic Party;

Republican Party; others of relatively minor political significance

Suffrage: universal at 18

MILITARY

Military Expenditures (% of GDP): 3.2%

Current Disputes: various boundary and territorial disputes; "war on terrorism"

ECONOMY

Per Capita Income/GDP: \$36,300/\$10.082 trillion

GDP Growth Rate: 0%

Inflation Rate: 3%

Unemployment Rate: 5.8%

Population Below Poverty Line: 13%

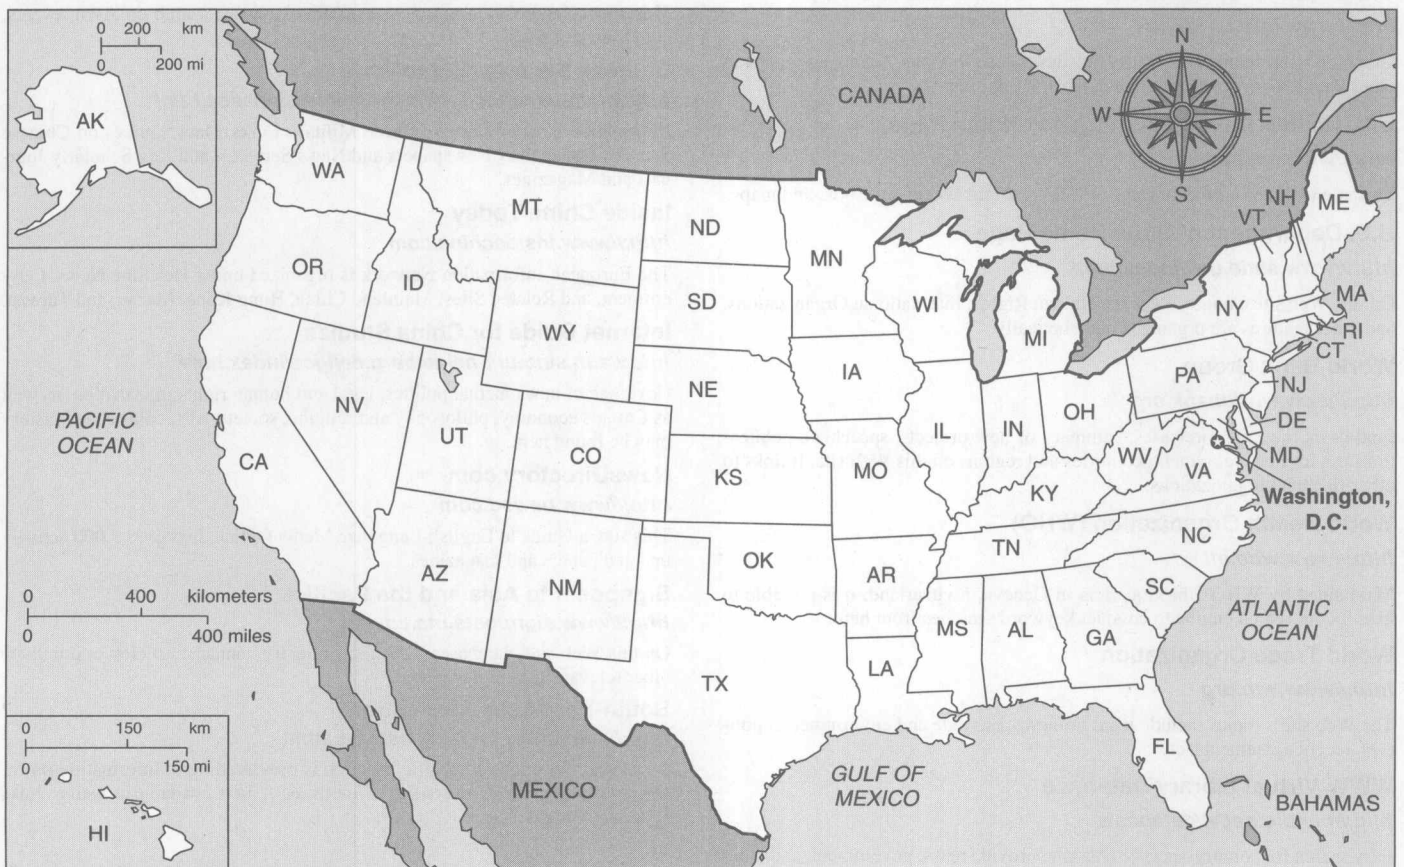

Natural Resources: many minerals and metals; petroleum; natural gas; timber; arable land

Agriculture: food grains; feed crops; fruits and vegetables; oil-bearing crops; livestock; dairy products

Industry: diversified in both capital and consumer-goods industries

Exports: \$723 billion (primary partners Canada, Mexico, Japan)

Imports: \$1.148 trillion (primary partners Canada, Mexico, Japan)

Canada

GEOGRAPHY

Area in Square Miles (Kilometers):

3,850,790 (9,976,140) (slightly larger than the United States)

Capital (Population): Ottawa (1,094,000)

Environmental Concerns: air and water pollution; acid rain; industrial damage to agriculture and forest productivity

Geographical Features: permafrost in the north; mountains in the west; central plains; lowlands in the southeast

Climate: varies from temperate to arctic

PEOPLE

Population

Total: 31,903,000

Annual Growth Rate: 0.96%

Rural/Urban Population Ratio: 23/77

Major Languages: both English and French are official

Ethnic Makeup: 28% British Isles origin; 23% French origin; 15% other European; 6% others; 2% indigenous; 26% mixed

Religions: 46% Roman Catholic; 36% Protestant; 18% others

Health

Life Expectancy at Birth: 76 years (male); 83 years (female)

Infant Mortality: 4.95/1,000 live births

Physicians Available: 1/534 people

HIV/AIDS Rate in Adults: 0.3%

Education

Adult Literacy Rate: 97%

Compulsory (Ages): primary school

COMMUNICATION

Telephones: 20,803,000 main lines

Daily Newspaper Circulation: 215/1,000 people

Televisions: 647/1,000 people

Internet Users: 16,840,000 (2002)

TRANSPORTATION

Highways in Miles (Kilometers): 559,240 (902,000)

Railroads in Miles (Kilometers): 22,320 (36,000)

Usable Airfields: 1,419

Motor Vehicles in Use: 16,800,000

GOVERNMENT

Type: confederation with parliamentary democracy

Independence Date: July 1, 1867

Head of State/Government: Queen Elizabeth II; Prime Minister Jean Chrétien

Political Parties: Progressive Conservative Party; Liberal Party; New Democratic Party; Bloc Québécois; Canadian Alliance

Suffrage: universal at 18

MILITARY

Military Expenditures (% of GDP): 1.1%

Current Disputes: maritime boundary disputes with the United States

ECONOMY

Currency (\$U.S. equivalent): 1.39 Canadian dollars = \$1

Per Capita Income/GDP: \$27,700/\$875 billion

GDP Growth Rate: 2%

Inflation Rate: 3%

Unemployment Rate: 7%

Labor Force by Occupation: 74% services; 15% manufacturing; 6% agriculture and others

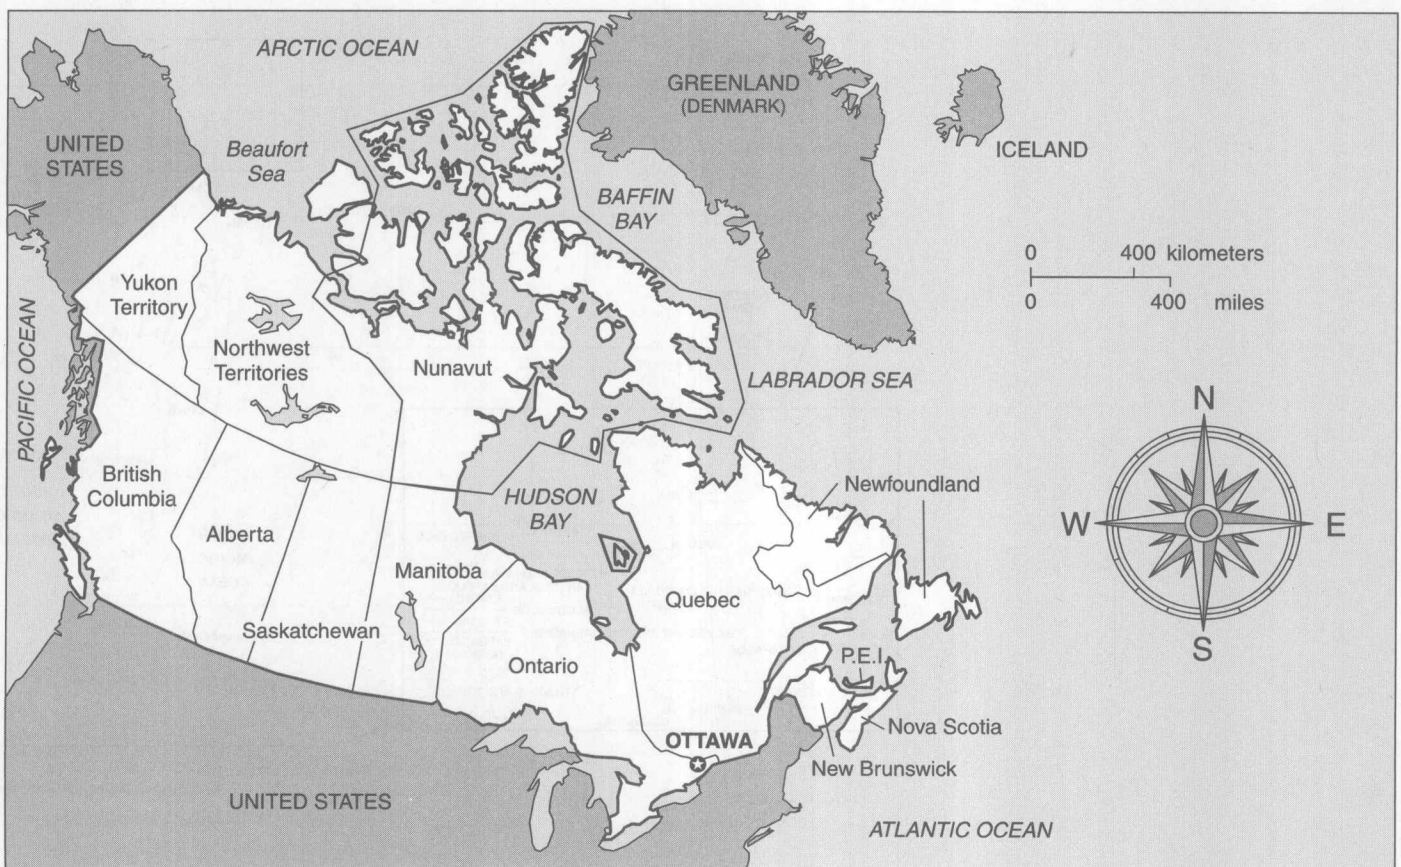

Natural Resources: petroleum; natural gas; fish; minerals; cement; forestry products; wildlife; hydropower

Agriculture: grains; livestock; dairy products; potatoes; hogs; poultry and eggs; tobacco; fruits and vegetables

Industry: oil production and refining; natural-gas development; fish products; wood and paper products; chemicals; transportation equipment

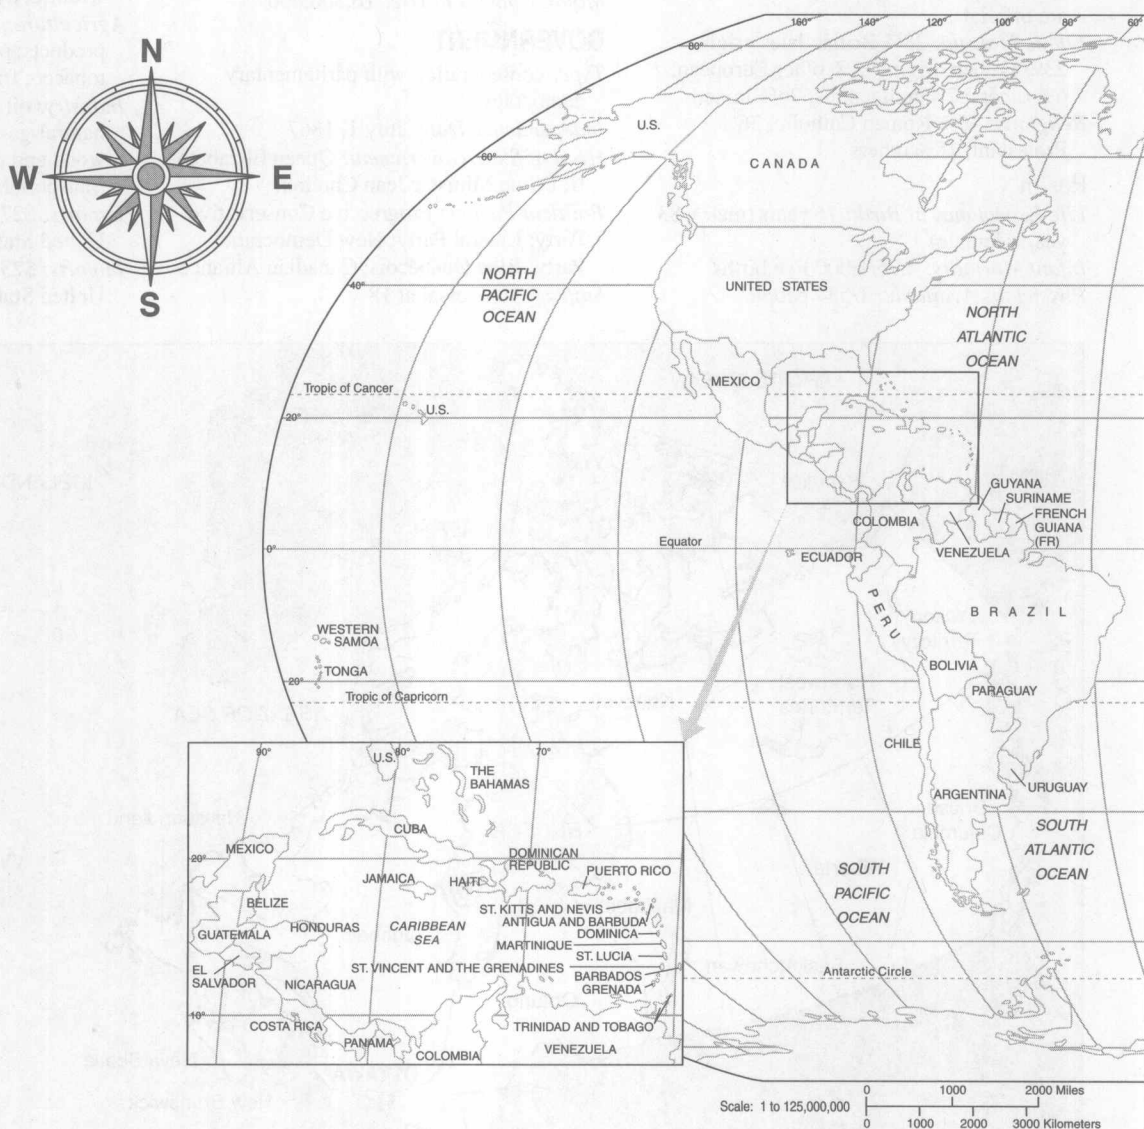

Exports: \$273.8 billion (primary partners United States, Japan, United Kingdom)

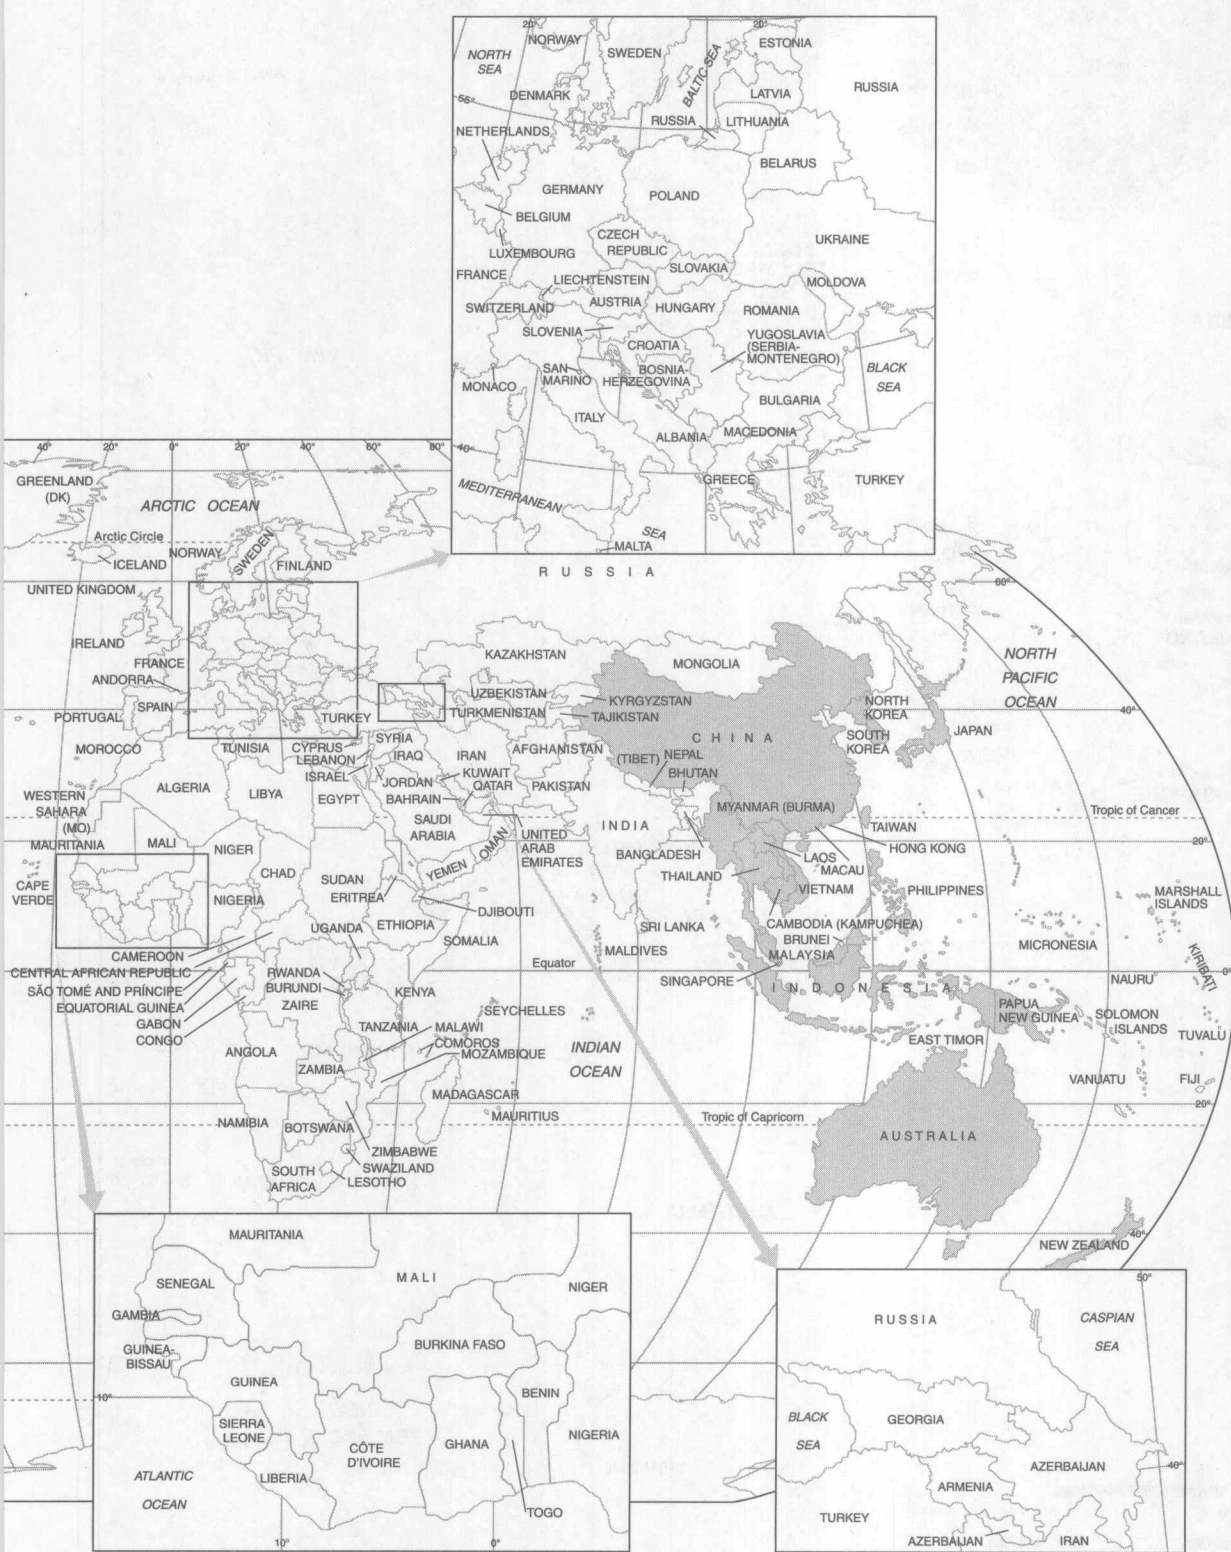

Imports: \$238.3 billion (primary partners United States, European Union, Japan)

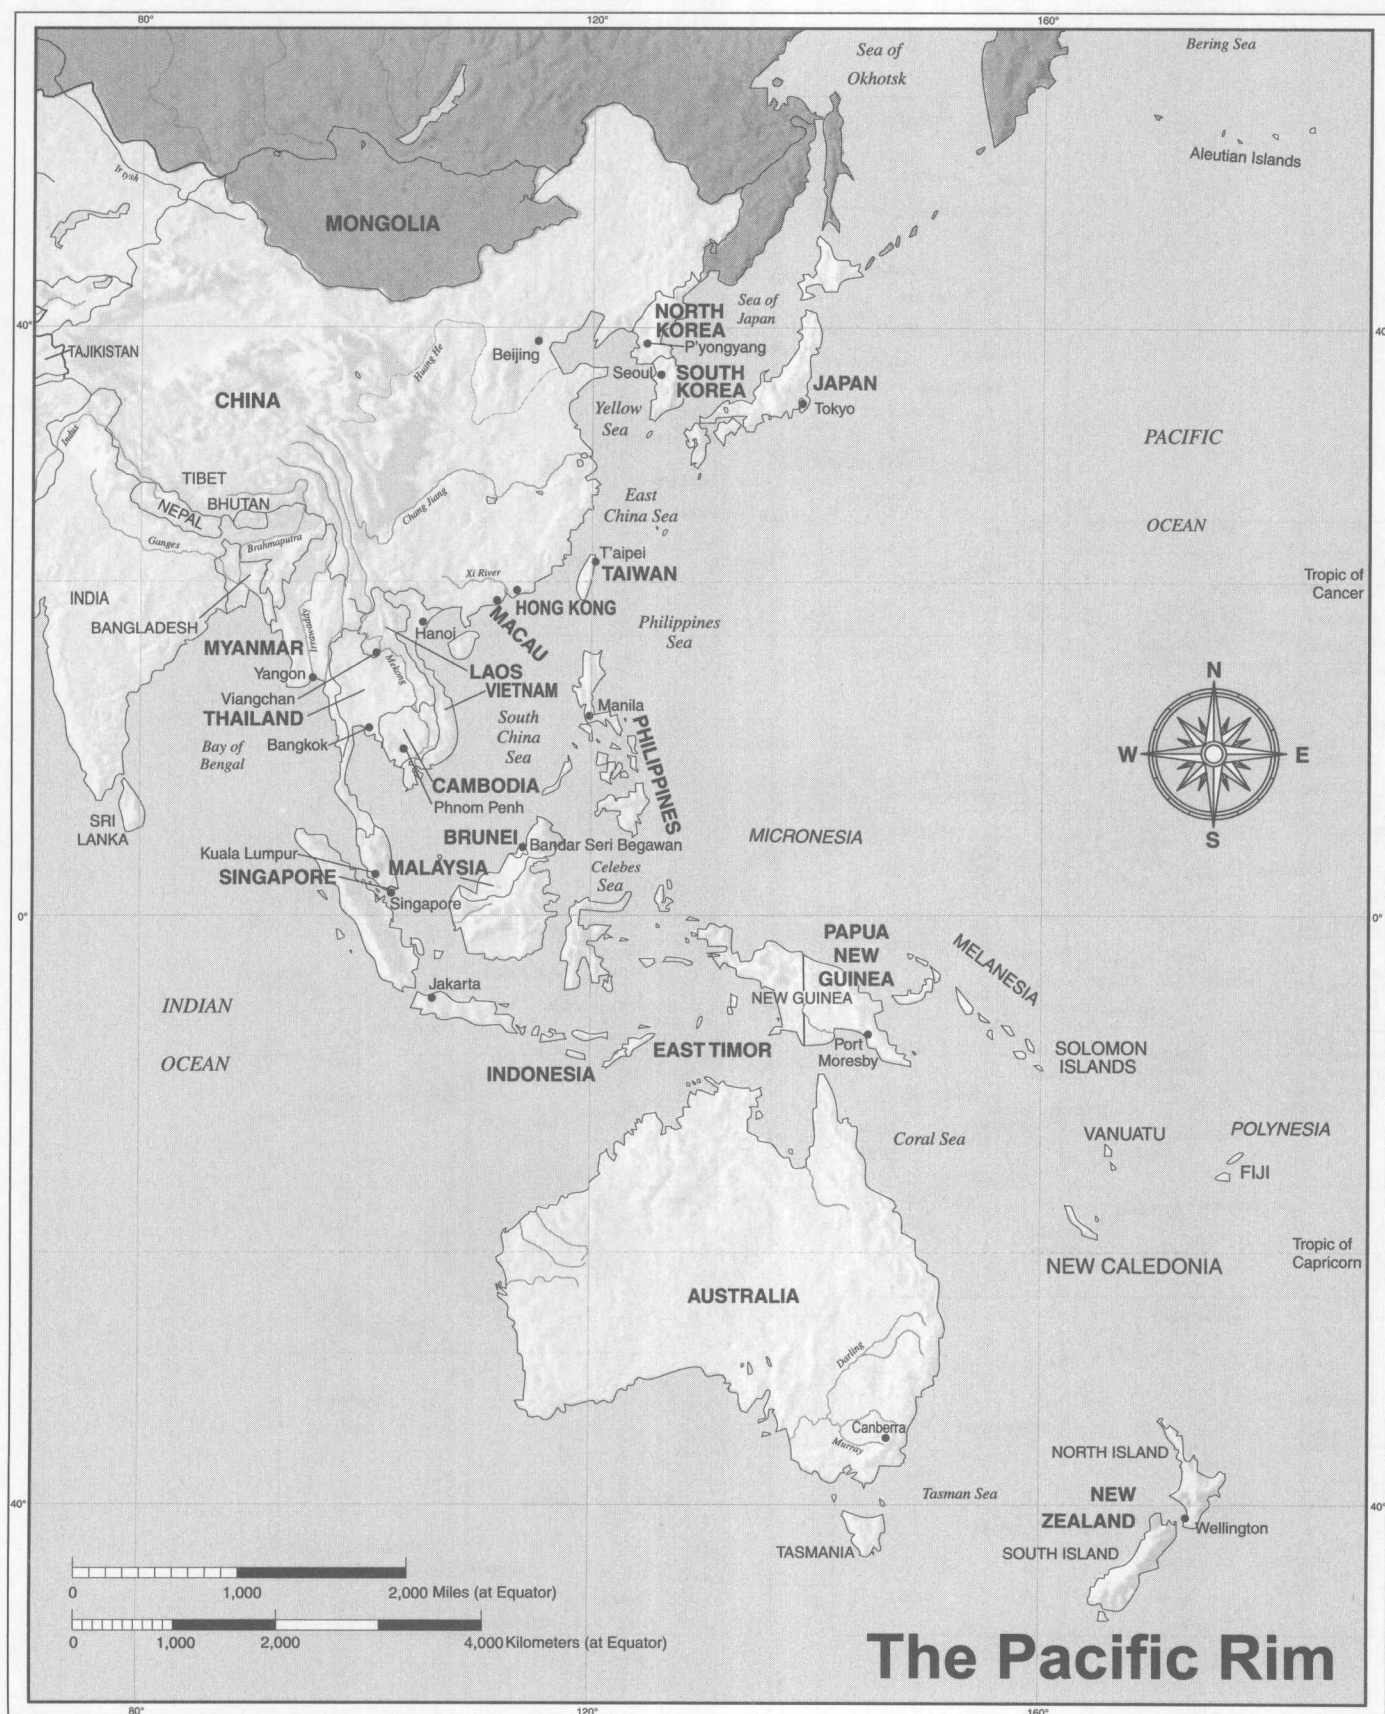

GLOBAL STUDIES

This map is provided to give you a graphic picture of where the countries of the world are located, the relationship they have with their region and neighbors, and their positions relative to major trade and power blocs. We have focused on certain areas to illustrate these crowded regions more clearly. The Japan and Pacific Rim region is shaded for emphasis.

Pacific Rim

The Pacific Rim

The Pacific Rim: Diversity and Interconnection

WHAT IS THE PACIFIC RIM?

The term *Pacific Rim*, as used in this book, refers to 21 countries or administrative units along or near the Asian side of the Pacific Ocean, plus the numerous islands of the Pacific. Together, they are home to approximately 30 percent of the world's population and produce about 20 percent of the world's gross national product (GNP).

It is not a simple matter to decide which countries to include in a definition of the Pacific Rim. For instance, if we were thinking geographically, we might include Mexico, Chile, Canada, the United States, Russia, and numerous other countries that border the Pacific Ocean, while eliminating Myanmar (Burma) and Laos, since they are not technically on the rim of the Pacific. But our definition, and hence our selected inclusions, stem from fairly recent developments in economic and geopolitical power that have affected the countries of Asia and the Pacific in such a way that these formerly disparate regions are now being referred to by international corporate and political leaders as a single bloc.

Most people living in the region that we have thus defined do not think of themselves as "Pacific Rimmers." In addition, many social scientists, particularly cultural anthropologists and comparative sociologists, would prefer not to apply a single term to such a culturally, politically, and sociologically diverse region. Some countries, it is true, share certain cultural influences, such as Buddhism and rice cultivation. But these commonalities have not prevented the region from fracturing into dozens of societies, often very antagonistic toward one another.

However, for more than 20 years, certain powerful forces have been operating in the Rim that have had the effect of pulling all of the countries toward a common philosophy. Indeed, it is very likely that all Pacific Rim countries will one day be implementing some version of free-market capitalism (as opposed to communism, ascetism, and other practices) and will be espousing similar fundamental values—namely, materialism and consumerism. It is also likely that a common awareness will develop of the value of peaceful interdependence, rather than aggression, for the improvement and maintenance of a high standard of living.

What are the powerful forces that are fueling lifestyle convergence in the Rim? There are many, including nationalism and rapid advances in global communications. Japanese investment money is another; it has perhaps been the most important factor in jump-starting the formerly sleepy economies of many Pacific Rim nations. Japanese yen, in the forms of direct investment, loans, and development aid, have been saturating the region for years. Using these resources, many countries have copied Japan's export-oriented market strategy, producing economic growth never before even dreamed of.

It is true that by the mid-1990s the Japanese government, worried about the loss of jobs at home, began to urge private businesses to pull back on investment in other countries in the region. The Japanese government itself cut overseas development assistance (ODA) by 10 percent in 2002; but even as re-

cently as 1999, Japan's ODA was \$11 billion, as compared to only \$8.4 billion for the United States. More cuts in overseas investments may be forthcoming (despite pleas from world organizations for Japan not to abandon the region) as Japan continues to struggle with a decade-long recession caused by sloppy lending and bad loan management by Japan's banks. But dire predictions of Japanese economic weakness notwithstanding, Japan is not likely to withdraw from active involvement in the economies of the region. To do so would only exacerbate its problems. Japan continues to be an economic powerhouse; some companies have never made more money than they have during the current recession. Toyota, for example, now has a larger share of the U.S. auto market than ever. Economic aid to Pacific Rim countries (such as the \$1.56 billion aid package granted to Indonesia in 2000) will continue, and thus the homogenizing economic trends will also likely continue.

In the 1960s, when the Japanese economy had completely recovered from the devastation of World War II, the Japanese looked to North America and Europe for markets for their increasingly high-quality products. Japanese business continues to seek out markets and resources globally; but, in the 1980s, in response to the movement toward a truly common European economic community as well as in response to free trade agreements among North American countries, Japan began to invest more heavily in countries nearer its own borders. The Japanese hoped to guarantee themselves market and resource access should they find their products frozen out of the emerging European and North American economic blocs. Now China, Taiwan, Singapore, and others are doing the same thing. The unintended, but not unwelcome, consequences of this policy were the revitalization of many Asia-Pacific economies and the solidification of lines of communication between governments and private citizens within the region. Recognizing this interconnection has prompted many people to refer to the countries we treat in this book as a single unit, the Pacific Rim.

TROUBLES IN THE RIM

Twenty years ago, television images of billionaire Japanese businesspeople buying up priceless artworks at auction houses, and filthy-rich Hong Kong Chinese driving around in Rolls-Royces overshadowed the harsh realities of life for most people in the Rim. For the most part, Pacific Rim countries have not met the needs of their peoples. Whether it is the desire of rice farmers in Myanmar (formerly called Burma) for the right to sell their grain for personal profit, or of Chinese students to speak their minds without repression—in these and many other ways, the Pacific Rim has failed its peoples. In Vietnam, Myanmar, Laos, and Cambodia, for example, life is so difficult that thousands of families have risked their lives to leave their homelands. Some have swum across the wide Mekong River on moonless nights to avoid detection by guards, while others have sailed into the South China Sea on creaky and overcrowded boats (hence the name commonly given such refugees: "boat people"), hoping that people of goodwill, rather than marauding

(Photo by Lisa Clyde Nielsen)

The small island of Macau was acknowledged by China as a Portuguese settlement in 1557. The Portuguese influence is evident in the architecture of the downtown plaza pictured above. Today Macau is a gambling mecca, drawing an enormous number of avid fans from Hong Kong. This last outpost of European colonial power returned to Chinese control on December 20, 1999, after 442 years under Portugal.

pirates, will find them and transport them to a land of safety. With the cut-off of refugee-support funds from the United Nations (UN), thousands of refugees remain unrepatriated, languishing in camps in Thailand, Malaysia, and other countries. Thousands of villagers driven from their homes by the Myanmar Army await return. Meanwhile, the number of defectors from North Korea has been increasing steadily.

Between 1975 and 1994, almost 14,000 refugees reached Japan by boat, along with 3,500 Chinese nationals who posed as refugees in hopes of being allowed to live outside China. In 1998, the Malaysian government, citing its own economic problems, added to the dislocation of many people when it began large-scale deportations of foreign workers, many from Indonesia. Many of these individuals had lived in Malaysia for years. This "Operation Get Out" was expected to affect at least 850,000 people. These examples, and many others not mentioned here, stand as tragic evidence of the social and political instability of many Pacific Rim nations and of the intense ethnic rivalries that divide the people of the Rim.

Warfare

Of all the Rim's troubles, warfare has been the most devastating. In Japan and China alone, an estimated 15.6 million people died as a result of World War II. Not only have there been wars in which foreign powers like Britain, the United States, France, and the former Soviet Union have been involved, but there have been and continue to be numerous battles between local peoples of different tribes, races, and religions.

The potential for serious conflict remains in most regions of the Pacific Rim. Despite international pressure, the military dictators of Myanmar continue to wage war against the Karens and other ethnic groups within its borders. Japan remains locked in a dispute with Russia over ownership of islands to the north of Hokkaido. Taiwan and China still lay claim to each other's territory, as do the two Koreas; and both Taiwan and Japan lay claim to the Senkaku Island chain. The list of disputed borders, lands, islands, and waters in the Pacific Rim is very long; indeed, there are some 30 unresolved disputes involving almost every country of Asia and some of the Pacific Islands.

One example is the Spratly (sometimes spelled Spratley) Islands dispute. When the likelihood of large oil and cobalt deposits in the 340,000-square-mile ocean near the Spratlys was announced in the 1970s, China, Taiwan, Vietnam, the Philippines, Malaysia, and Brunei instantly laid claim to the area. By 1974, the Chinese Air Force and Navy were bombing a South Vietnamese settlement on the islands; by 1988, Chinese warships were attacking Vietnamese transport ships in the area. And by 1999, the Philippine Navy was sinking Chinese fishing boats off Mischief Reef. Both China and Vietnam have granted nearby oil-drilling concessions to different U.S. oil companies, so the situation remains tense, especially because China claims sovereignty over almost the entire South China Sea and has been flexing its muscles in the area by stopping, boarding, and sometimes confiscating other nations' ships in the area. Some agreements among the claimants on protocol were reached in 2001, but as long as each—especially China—claims ownership, the dispute will continue to simmer.

In addition to these cross-border disputes, internal ethnic tensions are sometimes severe. Most Asian nations are composed of scores of different ethnic groups with their own languages, religions, and worldviews. In Fiji, it is the locals versus the immigrant Indians; in Southeast Asia, it is the locals versus the Chinese or the Muslims versus the Christians; in China, it is the Tibetans and most other ethnic groups versus the Han Chinese.

With the end of the Cold War in the late 1980s and early 1990s, many Asian nations found it necessary to seek new military, political, and economic alliances. For example, South Korea made a trade pact with Russia, a nation that, during the Soviet era, would have dealt only with North Korea; and, forced to withdraw from its large naval base in the Philippines, the United States increased its military presence in Singapore. The United States also began encouraging its ally Japan to assume a larger military role in the region. However, the thought of Japan re-arming itself causes considerable fear among Pacific Rim nations, almost all of which suffered defeat at the hands of the Japanese military only six decades ago. Nevertheless, Japan has acted to increase its military preparedness, within the narrow confines of its constitutional prohibition against re-armament.

The number of elderly people in China will triple by the year 2025. ~~even though—and, ironically, because—it limits most couples to only one child,~~ China will be faced with the increasing need of caring for retirement-age citizens. This group of elders in a village near Chengdu represents just the tip of an enormous problem for the future.

It now has the second-largest military budget in the world (it spends only 1 percent of its budget on defense, but because its economy is so large, the actual absolute expenditure is huge).

In response, China has increased its purchases of military equipment, especially from cash-strapped Russia. As a result, whereas the arms industry is in decline in some other world regions, it is big business in Asia. Four of the nine largest armies in the world are in the Pacific Rim. Thus, the tragedy of warfare, which has characterized the region for so many centuries, could continue unless governments manage conflict very carefully and come to understand the need for mutual cooperation.

In some cases, mutual cooperation is already replacing animosity. Thailand and Vietnam are engaged in sincere efforts to resolve fishing-rights disputes in the Gulf of Thailand and water-rights disputes on the Mekong River; North and South Korea have agreed to allow some cross-border visitation; and even Taiwan and China have amicably settled issues relating to fisheries, immigration, and hijackings. Yet greed and ethnic and national pride are far too often just below the surface; left unchecked, they could catalyze a major confrontation in the region.

Population Imbalances

Another serious problem in the Pacific Rim is population imbalance. In some cases, there are too many people; in others,

there will be too few in the future. At the moment, there are well over 2 billion people living in the region. Of those, approximately 1.2 billion are Chinese. Even though China's government has implemented the strictest family-planning policies in world history, the country's annual growth rate is such that more than 1 million inhabitants are added *every month*. This means that more new Chinese are born each year than make up the entire population of Australia! The World Health Organization (WHO) reports, however, that today about 217 million people in East Asia use contraceptives, as compared to only 18 million in 1965. Couples in some countries, including Japan, Taiwan, and South Korea, have been voluntarily limiting family size. Other states, such as China and Singapore, have promoted family planning through government incentives and punishments. The effort is paying off. The United Nations now estimates that the proportion of the global population living in Asia will remain relatively unchanged between now and the year 2025, and China's share will decline. A drop in birth rates is characteristic of almost the entire region: Birth rates started to drop in Japan and Singapore in the 1950s; Hong Kong, South Korea, the Philippines, Brunei, Taiwan, Malaysia, Thailand, and China in the 1960s; and Indonesia and Myanmar in the 1970s. In fact, in some countries, especially Japan, South Korea, and Thailand, single-child families and an aging popu-

lation are creating problems in their own right as the ratio of productive workers to the overall population declines. The birth rate in Tokyo in 2001, for example, was 1.01 children per couple—far below replacement level. At this rate, Japan's population will be half its current size by the year 2100. Some experts are calling the situation a "demographic collapse." The low births are caused, in part, by the number of Japanese who do not marry—approximately 14 percent of all males over age 40 and 6 percent of females over 40 are not married. Many of these unmarrieds continue to live at their parents' home, coining the phrase "parasite singles." It is likely that these downward trends in Japan will soon be commonplace all over the Pacific Rim, some countries excepted.

The lack of young workers will be a problem for the next generation, but for now, so many children have already been born that Pacific Rim governments simply cannot meet their needs. For these new Asians, schools must be built, health facilities provided, houses constructed, and jobs created. This is not an easy challenge for many Rim countries. Moreover, as the population density increases, the quality of life decreases. In crowded New York City, for example, the population is about 1,100 per square mile, and residents, finding the crowding to be too uncomfortable, frequently seek more relaxed lifestyles in the suburbs. Yet in Tokyo, the density is approximately 2,400 per square mile; and in Macau, it is 57,576! Today, many of the world's largest cities are in the Pacific Rim: Shanghai, China, has about 12.9 million people (in the wider metropolitan area); Jakarta, Indonesia, has more than 11.4 million; Manila, the Philippines, is home to over 10 million; while Bangkok, Thailand, has about 7.5 million residents. And migration to the cities continues despite miserable living conditions for many (in some Asian cities, 50 percent of the population live in slum housing). One incredibly rapid-growth country is the Philippines; home to only about 7 million in 1898, when it was acquired by the United States, it is projected to have 130 million people in the year 2020.

Absolute numbers alone do not tell the whole story. In many Rim countries, 40 percent or more of the population are under age 15. Governments must provide schooling and medical care as well as plan for future jobs and housing for all these children. Moreover, as these young people age, they will require increased medical and social care. Scholars point out that, between 1985 and 2025, the numbers of old people will double in Japan, triple in China, and quadruple in Korea. In Japan, where replacement-level fertility was achieved in the 1960s, government officials are already concerned about the ability of the nation to care for the growing number of retirement-age people while paying the higher wages that the increasingly scarce younger workers are demanding.

Political Instability

One consequence of the overwhelming problems of population imbalances, urbanization, and continual military or ethnic conflict is disillusionment with government. In many countries of the Pacific Rim, people are challenging the very right of their governments to rule or are demanding a complete change in the political philosophy that undergirds governments.

For instance, despite the risk of death, torture, or imprisonment, many college students in Myanmar have demonstrated

TYPES OF GOVERNMENT IN SELECTED PACIFIC RIM COUNTRIES

PARLIAMENTARY DEMOCRACIES

Australia*
Fiji
New Zealand*
Papua New Guinea

CONSTITUTIONAL MONARCHIES

Brunei
Japan
Malaysia
Thailand

REPUBLICS

Indonesia
The Philippines
Singapore
South Korea
Taiwan

SOCIALIST REPUBLICS

China
Laos
Myanmar (Burma)
North Korea
Vietnam

OVERSEAS TERRITORIES/COLONIES

French Polynesia
New Caledonia

**Australia and New Zealand have declared their intention to become completely independent republics.*

against the current military dictatorship, and rioting students and workers in Indonesia were successful in bringing down the corrupt government of President Suharto. In some Rim countries, opposition groups armed with sophisticated weapons obtained from foreign nations roam the countryside, capturing towns and military installations. In less than a decade, the government of the Philippines endured six coup attempts; elite military dissidents have wanted to impose a patronage-style government like that of former president Ferdinand Marcos, while armed rural insurgents have wanted to install a Communist government. Thousands of students have been injured or killed protesting the governments of South Korea and China. Thailand has been beset by numerous military coups, the former British colony of Fiji recently endured two coups, and half a million residents of Hong Kong took to the streets to oppose Great Britain's decision to turn over the territory to China in 1997. Military takeovers, political assassinations, and repressive policies have been the norm in most of the countries in the region. Millions have spent their entire lives under governments
