

The background of the cover is an underwater photograph of a coral reef. The reef is covered in various types of coral, including branching and table corals. The water is a deep blue. A dark, vertical rectangular band runs down the center of the image, partially obscuring the coral. The title is printed in a yellow, serif font over this band.

For Charles J. and Wilma F. Birkeland

## Acknowledgments

The authors thank the many colleagues and friends who generously helped with this book in many ways. Kelly K. Gathers, C. Messing, Daniel Norris, and John Starmer skillfully produced some of the figures. Other illustrations were contributed by Greta S. Aeby, Lucy Bunkley-Williams, T. J. Done, J. W. Focke, C. Louise Goggin, John C. Halas, M. Harmelin-Vivien, R. C. Highsmith, Harold H. Hudson, T. P. Hughes, P. L. Jokiel, H. A. Lowenstam, I. G. Macintyre, M. J. Risk, Klaus Rützler, B. Salvat, T. P. Scoffin, C. R. C. Sheppard, James W. Warren, C. R. Wilkinson, and J. D. Woodley. We thank Mei Tsu Birkeland, H. Carpenter, S. Longmore, Martha M. Martin, and C. Zilberberg for their assistance with the references and other editorial matters.

S. S. Amesbury, Marlin J. Atkinson, Robert Buddemeier, M. H. Carr, M. W. Colgan, L. Collins, J. Connell, C. B. Cook, Paul Copper, D. G. Fautin, R. N. Ginsburg, John S. Glazebrook, R. W. Grigg, J. A. Harding, Rosalind Hunter-Anderson, P. Hutchings, David Hopley, T. P. Hughes, Noah Idechong, A. T. Kaltenberg, W. E. Kiene, Mark M. Littler, P. S. Lobel, I. G. Macintyre, Harley Manner, Harry B. McCarty, D. W. Meadows, S. G. Nelson, C. Osenberg, R. T. Paine, Valerie J. Paul, Rob Rowan, Garry R. Russ, P. W. Sammarco, Michael C. Schmale, T. P. Scoffin, H. Galt Siegrist, Jr., G. D. Stanley, Jr., Ernest H. Williams, Jr., and the students in the University of Guam class on Advances in Ecology provided constructive reviews of drafts of certain chapters. T. Schoener allowed us to use his unpublished manuscript.

Cindy Ahearn, Frederick Bayer, Steve Cairns, Lu Eldredge, Bert Hoeksema, Arthur Humes, Alan Kabat, Roy Kropp, Rich Mooi, Rob Myers, Jack Randall, and Klaus Rützler helped with references and provided information on a variety of taxa.

Nancy Budd, Bern Holthuis, Alan Kohn, Brian Rosen, Geerat Vermeij, and Charlie Veron contributed valuable comments and discussion. The authors of the chapters in this book also provided constructive critiques, advice, and illustrations for chapters other than their own. We thank Rob van Woesik and G.B.R.M.P.A. for the photographs on the cover of this book.

# **Life and Death of Coral Reefs**

# Contents

Acknowledgments	xv
Contributors	xvii
Chapter 1. Introduction (by Charles Birkeland)	1
1.1 The Value of Reefs	2
1.2 Present Conditions of Coral Reefs	6
1.3 Shift in Controlling Factors	10
Chapter 2. Reefs and Reef Limestones in Earth History (by Pamela Hallock)	13
2.1 Biogenic Sediments and Bioherms	14
2.2 Basic Carbonate Chemistry	16
2.3 Limestones and Earth History	17
2.4 The Atmosphere and the Evolution of Life	19
2.5 CO <sub>2</sub> and Time Scales	22
2.6 Atmospheric CO <sub>2</sub> as an Evolutionary Driving Force	24
2.7 What It Takes to Accumulate CaCO <sub>3</sub>	26
2.8 History of Biogenic Reefs Through Time	29
2.8.1 Paleozoic Era—Time of Ancient Animal Life	31
2.8.2 Mesozoic Era—Time of Intermediate Animal Life	33
2.8.3 Cretaceous Boundary Extinctions	34
2.8.4 Cenozoic Era—Time of Recent Animal Life	36
2.9 Modern Reefs	38
2.10 Conclusion	42
Chapter 3. Reefs as Dynamic Systems (by Dennis K. Hubbard)	43
3.1 Process: The Ultimate Control of Reef Development	44
3.1.1 Macroscale Controls	44
Tectonics	44

Sea Level	46
Reef Accretion Under the Influence of Relative Sea-Level Change	48
3.1.2 Mesoscale Controls	50
Temperature	50
Salinity	52
Wave Energy	52
3.1.3 Microscale Controls	56
Light	56
Nutrients	56
Sediment	57
Antecedent Topography	58
3.2 Reef Accretion: How It Works	60
3.3 Reefs and Global Warming	64
3.3.1 Reefs in Flux	64
3.3.2 Reefs as Mediators of Global Climate	65
3.3.3 The Reef Response	66
3.3.4 Evolving Methodologies	66
3.4 Where Do We Go from Here?	67
Chapter 4. Bioerosion and Coral-Reef Growth: A Dynamic Balance (by Peter W. Glynn)	68
4.1 Bioeroder Diversity	70
4.1.1 Bacteria	71
4.1.2 Fungi	73
4.1.3 Algae	73
4.1.4 Sponges	75
4.1.5 Polychaete Worms	77
4.1.6 Crustacea	77
4.1.7 Sipuncula	79
4.1.8 Mollusca	79
4.1.9 Echinoidea	84
4.1.10 Fishes	84
4.2 Conditions Favoring Bioerosion	85
4.3 Variety of Effects	89
4.4 Case Studies	91
4.4.1 El Niño–Southern Oscillation	91
4.4.2 Crown-of-Thorns Seastar ( <i>Acanthaster</i> )	91
4.4.3 Runoff (Eutrophication, Sedimentation, Freshwater, and Pollutants)	92
4.4.4 Overfishing	92
4.5 Conclusion	94
Chapter 5. Interactions Between Corals and Their Symbiotic Algae (by Gisèle Muller-Parker and Christopher F. D’Elia)	96
5.1 Description of the Symbiosis	96

5.1.1	Coral Anatomy and Location of Zooxanthellae	96
5.1.2	Zooxanthellae	98
5.1.3	Acquisition of zooxanthellae by corals	99
5.2	Nutrition and Adaptations to Environmental Factors	100
5.2.1	Coral Nutrition	100
5.2.2	Productivity of Corals and Role of Zooxanthellae in Calcification	102
5.2.3	Effect of Light and Temperature on Productivity of Zooxanthellae	102
5.2.4	Effect of Nutrient Supply on Zooxanthellae in Corals	104
5.3	Stability of the Symbiosis	105
5.4	Cost-Benefit Analysis of the Symbiosis	106
5.5	Environmental Effects on the Symbiosis	110
5.5.1	Local and Regional Stresses to Symbiotic Corals	110
5.5.2	Global Stresses on Symbiotic Corals	111
5.6	Conclusion	112
Chapter 6.	Diseases of Coral-Reef Organisms (by Esther C. Peters)	114
6.1	Diseases of Reef Plants	116
6.2	Diseases of Reef Invertebrates	118
6.2.1	Corals	118
6.2.2	Sponges	122
6.2.3	Molluscs	123
6.2.4	Crustaceans	126
6.2.5	Echinoderms	127
6.3	Diseases of Reef Vertebrates	128
6.3.1	Fishes	129
6.3.2	Sea Snakes	131
6.3.3	Sea Turtles	131
6.4	Unanswered Questions	132
6.5	Ecological Implications	136
Chapter 7.	Organic Production and Decomposition (by Bruce G. Hatcher)	140
7.1	Definitions and Methodologies of Production	144
7.1.1	Currencies of Production	145
7.1.2	Pools of Organic Materials in Coral Reefs and Control Volumes	146
7.1.3	The Concepts of Turnover in Coral-Reef Ecology	147
7.1.4	Scaling Up	151
7.2	Producers and Consumers	153
7.2.1	Microbial Communities Rule	153
7.2.2	Algae: The Engines of the Reef	155
7.2.3	Macroconsumers: Pretty Fishes and Others	157
7.3	Rates of Coral-Reef Metabolism and Their Variation in Space and Time	158

7.3.1	Habitat-Scale Variation in Community Metabolism and Export	158
7.3.2	Reef-Scale Variation in Community Metabolism and Export	162
7.4	Controls on Coral-Reef Production	165
7.4.1	Limitation of Gross Production	166
7.4.2	Nutrient Limitation of Excess Production	167
7.4.3	Organic Inputs Support Excess Production	169
7.4.4	Secondary Production and Decomposition	171
7.5	Interactions Between Humans and Coral-Reef Production	173
7.5.1	Anthropogenic Effects on the Trophic Status of Reefs	173
7.5.2	Harvestable Yields from Reefs	174
Chapter 8.	Reproduction and Recruitment in Corals: Critical Links in the Persistence of Reefs (by Robert H. Richmond)	175
8.1	Coral Reproduction	176
8.1.1	Asexual Reproduction	176
8.1.2	Sexual Reproduction	177
8.1.3	Gonochorism Versus Hermaphroditism	177
8.1.4	Brooding Versus Spawning	178
8.1.5	Self-Fertilization Versus Outcrossing	187
8.1.6	Hybridization	189
8.1.7	Larval Development	189
8.2	Larval Recruitment	190
8.2.1	Settlement	190
8.2.2	Metamorphosis	191
8.3	Reproductive and Recruitment Failure of Corals	192
8.3.1	Terrestrial Runoff and Water Clarity	193
8.3.2	Water Pollution	195
8.3.3	Population Depletion	195
8.3.4	Prevention and Mitigation	196
Chapter 9.	Invertebrate Predators and Grazers (by Robert C. Carpenter)	198
9.1	Invertebrates Having Minor Effects	200
9.1.1	Corallivores	200
9.1.2	Herbivores	204
9.2	Invertebrates Having Major Effects	207
9.2.1	Corallivores	207
	<i>Eucidaris thouarsii</i>	207
	<i>Acanthaster planci</i>	210
9.2.2	Herbivores	220
	<i>Echinometra mathaei</i>	220
	<i>Diadema antillarum</i>	221
9.3	Disproportionate Effects of Some Invertebrate Species	226

Chapter 10. Effects of Reef Fishes on Corals and Algae (by Mark A. Hixon)	230
10.1 The Players: Corallivorous and Herbivorous Reef Fishes	231
10.2 Fish Effects on Algae	233
10.2.1 Schooling Herbivores	233
10.2.2 Territorial Damselfishes	236
10.2.3 Conclusion	239
10.3 Fish Effects on Corals	241
10.3.1 Direct Consumption	241
10.3.2 Indirect effects	242
10.3.3 Conclusion	244
10.4 Fish Effects on Invertebrate Corallivores and Herbivores	245
10.5 Ramifications for Reef Management	246
Chapter 11. Indirect Interactions on Coral Reefs (by Steven C. Pennings)	249
11.1 Definition, Variety, and Examples of Indirect Effects	250
11.1.1 Trophic-Linkage Indirect Effects	251
Competition Between Fish and Urchins for Algae and Its Mediation by Predators	254
Herbivore Mediation of Algal-Coral Competition	256
Cascading Effects of Predation	257
Cleaning Symbioses	258
11.1.2 Behavioral Indirect Effects	260
Associational Defenses	260
Mixed-Species Foraging Schools	261
Coral Zonation Patterns Indirectly Created by Damselfish	262
Mediation of <i>Acanthaster</i> Predation on Corals by Coral Symbionts and Damselfishes	262
Presence of Predators Affects Grazing Behavior of Herbivores	263
11.1.3 Chemical-Response Indirect Effects	264
Sequestering of Dietary Secondary Metabolites	264
Use of Chemically Defended Plants as Domiciles	265
Induced Defenses Affecting Multiple Grazers	265
11.2 Relative Importance on Coral Reefs	266
11.3 Some Practical Considerations	268
11.4 Future Directions	271
11.5 Conclusion	272
Chapter 12. Geographic Differences in Ecological Processes on Coral Reefs (by Charles Birkeland)	273
12.1 Physical Processes That Bring About Geographic Differences	276
12.1.1 Longitudinal Differences	276
12.1.2 Latitudinal Differences	279

12.2 Geographic Differences in Characteristics of Dominant Species	280
12.3 Regional Differences in Ecological Processes	282
12.3.1 Grazing and Predation Pressure	282
12.3.2 Food Webs	284
12.3.3 Diversity and Ecosystem Function	285
12.4 Management Considerations	286
 Chapter 13. Ecosystem Interactions in the Tropical Coastal Seascape (by John C. Ogden)	 288
13.1 Biological Interactions in the Seascape	288
13.1.1 Edge Effects	288
13.1.2 Nurseries	289
13.2 Fluxes of Nutrients and Organic Material in the Seascape	290
13.3 Physical Interactions in the Seascape	292
13.3.1 Lagoons	292
13.3.2 Buffers and Sinks	293
13.4 Reef Management, Global Change, and Comparative Research	295
 Chapter 14. Diversity and Distribution of Reef Organisms (by Gustav Paulay)	 298
14.1 Definitions and Scales	299
14.1.1 What Is Diversity?	299
14.1.2 Taxonomic Diversity: Spatial Scales	299
14.1.3 Taxonomic Diversity: Phylogenetic Scales	300
14.2 Biota of Reefs	301
14.2.1 Species Richness on Reefs	301
14.2.2 Ecological Restriction to Reefs	304
14.2.3 Why Are Coral-Reef Environments so Diverse?	306
14.3 Role of Diversity in Reef Ecosystems	308
14.3.1 Diversity in Photosymbiotic Relationships	308
14.3.2 Diversity Among Reef Constructors and Eroders	309
14.3.3 Diversity and Ecosystem Function	312
14.4 Practical Biodiversity: Identification of Reef Organisms	314
14.5 Distribution of Diversity: Large-Scale Patterns	316
14.5.1 Variation in Diversity with Latitude	316
14.5.2 Variation in Diversity with Longitude	320
14.6 Distribution of Diversity: History of Regionalization	326
14.6.1 Tectonic Provincialization	327
14.6.2 Dynamics of Species Biogeography During the Late Cenozoic	327
Western Atlantic	328
Eastern Pacific	328
Eastern Atlantic	331
Indo-West Pacific	332

14.7 Distribution of Diversity: Evolutionary Diversification	332
14.7.1 Interregional Speciation	333
14.7.2 Speciation within the Indo-West Pacific	334
14.7.3 Speciation within Other Regions	340
14.8 Effects of Human Activities	341
14.8.1 Extinction	341
14.8.2 Introduced Species	344
14.9 Conclusion	345
 Chapter 15. Disturbances to Reefs in Recent Times (by Barbara E. Brown)	 354
15.1 Conceptual Framework	355
15.2 Tolerances of Reef Corals	357
15.2.1 Geographic Variations in Environmental Tolerances	358
15.2.2 Within-Site Variation in Environmental Tolerances	359
15.2.3 Between Species Variations in Environmental Tolerances	359
15.2.4 Within-Species Variations in Environmental Tolerances	360
15.2.5 Within-Colony Variations in Environmental Tolerances	361
15.3 Natural Disturbances on Coral Reefs	362
15.3.1 Effects of Storms, Cyclones, and Hurricanes	363
15.3.2 Coral Bleaching	365
15.3.3 Outbreaks of the Crown-of-Thorns Starfish <i>Acanthaster planci</i>	366
15.3.4 Mass Mortality of the Sea Urchin <i>Diadema antillarum</i> in the Caribbean and Consequences on Coral Communities	368
15.4 Human Disturbances to Coral Reefs	370
15.4.1 Eutrophication	370
15.4.2 Sedimentation	372
15.4.3 Oil Pollution	373
15.4.4 Coral Mining	374
15.5 Human Versus Natural Influences on Coral Reefs	375
15.6 Prediction of Responses of Reefs to Climate Change	377
15.6.1 Sea-Level Rise	377
15.6.2 Effects of Increased Seawater Temperature Increase	378
15.6.3 Carbonate Mineral Saturation State	378
15.6.4 Ultraviolet Radiation	378
 Chapter 16. Traditional Coral-Reef Fisheries Management (by Robert E. Johannes)	 380
16.1 Value of Traditional Knowledge	381
16.2 Putting Management Back at the Village Level	383
16.3 Applying Traditional Knowledge in Modern Settings	383
