ABOUT THE AUTHOR

MARGARET C. JASPER is an attorney engaged in the general practice of law in South Salem, New York, concentrating in the areas of personal injury and entertainment law. Ms. Jasper holds a Juris Doctor degree from Pace University School of Law, White Plains, New York, is a member of the New York and Connecticut bars, and is certified to practice before the United States District Courts for the Southern and Eastern Districts of New York, the United States Court of Appeals for the Second Circuit, and the United States Supreme Court.

Ms. Jasper has been appointed to the law guardian panel for the Family Court of the State of New York, is a member of a number of professional organizations and associations, and is a New York State licensed real estate broker operating as Jasper Real Estate, in South Salem, New York.

Margaret Jasper maintains a website at <http://www.JasperLawOffice.com>.

In 2004, Ms. Jasper successfully argued a case before the New York Court of Appeals, which gives mothers of babies who are stillborn due to medical negligence the right to bring a legal action and recover emotional distress damages. This successful appeal overturned a 26-year old New York case precedent, which previously prevented mothers of stillborn babies from suing their negligent medical providers.

Ms. Jasper is the author and general editor of the following Legal Almanacs:

AIDS Law (3d Ed.)

The Americans with Disabilities Act (2d Ed.)

Animal Rights Law (2d Ed.)

Auto Leasing

Bankruptcy Law for the Individual Debtor

Banks and Their Customers (3d Ed.)

Your Rights Under the Family and Medical Leave Act

You've Been Fired: Your Rights and Remedies

INTRODUCTION

The Internet has become a significant source of both commercial and financial activity, and has become this nation's primary medium for the exchange of news, mail, and general information. Unfortunately, these great benefits expose Internet users to serious privacy risks, which can lead to catastrophic results. Thus it is crucial that Internet users understand how to safely and securely "surf the net," without exposing themselves to all sorts of criminal activity and other intrusions into their personal information.

This Almanac discusses some of the most important security methods, including the effective use of passwords, utilizing virus software, installing firewalls, understanding encryption technology, and being vigilant about the type of information one shares on the Internet. The problem of Internet identity theft is also presented as an overview.

The legal obligations of various entities, particularly financial institutions, of protecting the private information of Internet users is also explored, including Internet privacy policies and applicable laws. A discussion of online privacy protection for children, which encompasses the governing law is included.

In addition, this Almanac sets forth the role of the Federal Trade Commission (FTC) in enforcing privacy rights, including a review of some of the major enforcement cases brought by the FTC.

The Appendix provides resource directories, applicable statutes, and other pertinent information and data. The Glossary contains definitions of many of the terms used throughout the Almanac.

Table of Contents

ABOUT THE AUTHOR	vii
INTRODUCTION	xiii

CHAPTER 1: SECURING YOUR COMPUTER

IN GENERAL	1
INTERNET ACCESS	2
Dial-Up	2
Broadband	2
Types of Broadband Service	3
Cable Modem	3
Digital Subscriber Lines (DSL)	3
Fiber Optic	3
Wireless	3
Broadband Risk Factors	3
WIRELESS NETWORKS	4
Risk Factors and Security Measures	4
Encryption	4
Firewall/Anti-Virus Software	4
Turn Off Identifier Broadcasting	4
Administrative Password Protection	5
Setting Your Media Access Control (MAC)	5
Turn Off Your Wireless Network	5
Wi-Fi Hotspots	5
VOICE OVER INTERNET PROTOCOL (VoIP)	6
BEWARE OF MALWARE	6
FILE-SHARING RISKS	7
ACCESS BY INTERNET SERVICE PROVIDERS	7
ISP Access to E-mail	8
Electronic Communications Privacy Act	8

PUBLIC FORUMS	9
THE RISK OF "COOKIES"	9
DOMAIN REGISTRATION SERVICES	10
EMPLOYER ACCESS	11
LAW ENFORCEMENT ACCESS	11
The Privacy Protection Act of 1980	11
The U.S. Patriot Act Reauthorized	12
PRIVACY LEGISLATION AND ADVOCACY	12
PRIVACY POLICIES	13
THE ROLE OF THE FEDERAL TRADE COMMISSION	13
Enforcement of Privacy Rights	14
Privacy Initiatives	14
Anti-Spam Enforcement Initiative	14
Identity Theft Prevention Initiative	14
Anti-Pretexting Initiative	15
Privacy Promises Enforcement Initiative	15
Children's Online Privacy Initiative	15
Privacy Complaints Hotline	16

CHAPTER 2: E-MAIL AND INTERNET SCAMS

IN GENERAL	17
SECURING E-MAIL	17
Encryption	17
Anonymous Remailers	17
Deleting Stored E-mail	18
Web-Based E-mail Service	18
Employer Access	18
E-mail Forwarding	18
Identity Verification	18
E-MAIL VIRUSES	19
SPAM E-MAIL	19
Spam Reduction Tactics	19
Do Not Publicize Your E-mail Address	19
Mask Your E-mail Address	20
Use Two E-mail Addresses	20
Use a Disposable E-mail Address	20
Create a Unique E-mail Address	20
Filter Junk E-mail	20
Check Out Website Privacy Policies	21
Register for an E-mail Preference Service	21
The CAN-SPAM Act of 2003 (Pub. L. No. 108-187)	21
COMMON E-MAIL SCAMS	23

Phishing E-mails	23
Chain E-mails	23
Work-at-Home Scam	24
Credit Repair Offers	24
Advance Fee Loan Scam	24
Nigerian Advance-Fee Scam	24
Internet Service Provider Scam	24
Adult Entertainment Invitation Scam	25
Government Rebate Check Scam	25

CHAPTER 1:

SECURING YOUR COMPUTER

IN GENERAL

The “Internet” was initially conceived for military purposes in 1962 as a decentralized computer network to protect the ability of the military command to communicate in case of a nuclear attack. It took seven years to develop the prototype, which initially consisted of four computer networks located at three universities and one research facility.

Since that time, the Internet has grown tremendously. It has provided the public with a revolutionary tool for marketing, banking and communication. We are able to access all sorts of information and entertainment; perform banking and other financial activities online; purchase products from all over the world; and even work conveniently from home or away while still being able to communicate efficiently with our main office location.

Unfortunately, along with the tremendous advantages the Internet provides, there are great risks. Internet use opens up a gateway to our personal information, our security and safety. The Internet enhances the availability and accessibility of personal identifying information, and thus creates greater risks for consumers and greater opportunities for criminal activity.

Registering for online services generally requires the consumer to provide personal information, including financial information. In addition, there are many scams being perpetrated on the Internet that fool the consumer into revealing personal information. Those seeking to invade the privacy of Internet users, often for criminal purposes, are constantly seeking to decode the massive amount of data being transmitted on the Internet.
