Tokyo 102, Japan

Chapman & Hall Australia, 102 Dodds Street, South Melbourne, Victoria 3205, Australia

Chapman & Hall India, R. Seshadri, 32 Second Main Road, CIT East, Madras 600 035, India

First edition in three volumes published by  
Eyre & Spottiswoode (Publishers) Ltd:

Volume I published 1934

Volume II published 1936

Volume III published 1937

Second edition of Volume I published 1943

Volumes II and III reprinted with supplement 1944

Volumes I, II and III reprinted 1947

Third edition in four volumes published 1953

Fourth edition in five volumes published 1965

Fifth edition in seven volumes published 1982 by Chapman and Hall

This Sixth edition in nine volumes published 1996

© 1996 Chapman & Hall

Typeset and printed in Great Britain at the University Press, Cambridge

ISBN 0 412 54090 8 (Nine volume set)

# Note to Readers

---

## **Annual supplements keep *Dictionary of Organic Compounds* up-to-date**

Supplements to *Dictionary of Organic Compounds* will be published each year subsequent to publication of the Main Work. The first annual supplement will be published in Autumn 1996.

Each volume will contain about 2,000 new and revised entries derived from the primary literature of the preceding year, and will provide a complete updating service for all organic chemistry. Cumulative indexes will appear in supplements as space permits.

## ***Dictionary of Organic Compounds* on CD-ROM**

A CD-ROM version is also available, which is searchable by text or by substructure. For more details of either the CD-ROM or printed version, please write to:

Product Manager  
Electronic Publishing Division

# **Caution**

---

**Treat all chemical substances as if they have dangerous properties.**

**The publisher makes no representation, express or implied, with regard to the accuracy of the information contained in this Dictionary, and cannot accept any legal responsibility or liability for any errors or omissions that may be made.**

**The specific information in this publication on the hazardous and toxic properties of certain substances is included to alert the reader to possible dangers associated with the use of those compounds. The absence of such information should not however be taken as an indication of safety in use or misuse.**

# Molecular Formula Index

---

The Molecular Formula Index lists the molecular formulae of all compounds in the Dictionary whether they occur as main Entry compounds or as derivatives.

Where a molecular formula applies to a compound listed as a derivative the Dictionary Number is prefixed by the word 'in'.

The symbol ► preceding an index term indicates that the Dictionary Entry contains information on toxic or hazardous properties of the compound.

The symbol † refers to a name which is known to be a duplicated name.
