PREFACE TO THE THIRD EDITION

THE names used in the third edition are taken from the nomenclature adopted by the Anatomical Society at Birmingham in 1933; but where they differ markedly from the Basle Nomina Anatomica, the B.N.A. are retained in square brackets.

PREFACE TO THE SECOND ENGLISH EDITION

IN the new edition twenty-eight new plates have been added, and some alterations and corrections have been made in the old plates and an index and alphabetical list of plates have been supplied.

PREFACE TO THE FIRST EDITION

I USED to teach anatomy and operative surgery in the Medical School at Amiens, where my lectures were always given, scalpel in hand. There was no lack of

vi PREFACE TO THE FIRST EDITION

subjects. My notes would have been allowed to perish had I not met with the anatomical draughtsman S. Dupret, an artist whose extraordinary powers of draughtsmanship, keen intelligence, devotion to work, and anatomical skill made the preparation of this book possible.

I submitted my project to my friend Gaston Doin, who, with skilled craftsmen to help, took up my idea and realised it without delay.

We have founded great hopes on this offspring of us three, for it carries in it the germ of success—convenience. We would like to see it in the hands of all students in the dissecting-room and in the wards: at the dissecting-table or by the bedside it will recall the facts of anatomy at once and without trouble—there is no text and no legends. We would like it to find place in the pockets of candidates for all examinations. In the omnibus or on the seats in the Luxembourg Gardens they can here revise, rapidly, the names and relations of the various structures. We would like it to find its way into the hospital, and into the surgeon's room, who, before an unusual operation, could, in five minutes, refresh his memory of the relations of the structures in the area in which he proposes to operate.

The book no doubt contains omissions and defects—these we will remedy as they come to light, trusting that the reader will bring them directly under our notice.

VICTOR PAUCHET.
