Volume 2

List of Contributors

Numbers in parentheses indicate the chapter number of the author's contribution

Paul D. Allen, MD, PhD

(56), Department of Anesthesia, Perioperative and Pain Medicine, Brigham and Women's Hospital, Harvard Medical School, Boston, Massachusetts

Ovid C. Amadi, BS

(14), Harvard Stem Cell Institute and the Cardiovascular Division, Department of Medicine, Brigham and Women's Hospital and Harvard Medical School, Cambridge, Massachusetts

Mark Anderson, MD, PhD

(22), University of Iowa Carver College of Medicine, Iowa City, Iowa

Daniel C. Andersson, MD

(12), Department of Physiology and Cellular Biophysics, Clyde and Helen Wu Center for Molecular Cardiology, College of Physicians and Surgeons, Columbia University, New York, New York

Stephen L. Archer, MD, FRCP(C), FAHA, FACC

(38), Section of Cardiology, Department of Medicine, University of Chicago, Chicago, Illinois

Andrea L.H. Arnett, PhD

(76), Department of Neurology, Medical Scientist Training Program, and Program in Molecular and Cellular Biology, University of Washington, Seattle, Washington

Richard Arnoldi, MSc

(88), Department of Pathology and Immunology, Faculty of Medicine, University of Geneva, Geneva, Switzerland

Sarah Arrowsmith, PhD

(90), Department of Cellular and Molecular Physiology, University of Liverpool, Liverpool, UK

Elisabeth R. Barton, PhD

(80), School of Dental Medicine, Department of Anatomy and Cell Biology, University of Pennsylvania, Philadelphia, Pennsylvania

Rhonda Bassel-Duby, PhD

(61), Department of Molecular Biology, University of Texas Southwestern Medical Center, Dallas, Texas

Stephen L. Belmonte, PhD

(8), Aab Cardiovascular Research Institute, Department of Medicine, University of Rochester School of Medicine and Dentistry, Rochester, New York

Rabah Ben Yaou, MD

(72), Inserm, UMR S974; Université Pierre et Marie Curie-Paris 6, UM 76; CNRS, UMR7215; Institut de Myologie, IFR14; Association Institut de Myologie, Paris, France

Ivor J. Benjamin, MD

(43), Division of Cardiology, University of Utah School of Medicine, Salt Lake City, Utah

Bradford C. Berk, MD, PhD

(98), Aab Cardiovascular Research Institute, University of Rochester School of Medicine and Dentistry, Rochester, New York

Donald M. Bers, PhD

(11), Department of Pharmacology, University of California, Davis, Davis, California

Anne T. Bertrand, PhD

(72), Inserm, UMR S974; Université Pierre et Marie Curie-Paris 6, UM 76; CNRS, UMR7215; Institut de Myologie, IFR14, Paris, France

Matthew J. Betzenhauser, PhD

(12), Department of Physiology and Cellular Biophysics, Clyde and Helen Wu Center for Molecular Cardiology, College of Physicians and Surgeons, Columbia University, New York, New York

Morris J. Birnbaum, MD, PhD

(59), Institute for Diabetes, Obesity, and Metabolism, Perelman School of Medicine, University of Pennsylvania, Philadelphia, Pennsylvania

Brian L. Black, PhD

(3), Cardiovascular Research Institute, and Department of Biochemistry and Biophysics, University of California, San Francisco, California

Burns C. Blaxall, PhD

(8), Aab Cardiovascular Research Institute, Department of Medicine, University of Rochester School of Medicine and Dentistry, Rochester, New York

Roberto Bolli, MD

(28), Department of Medicine, Division of Cardiovascular Medicine, University of Louisville, Louisville, Kentucky

Elena Bonanno, MD

(105), Department of Biopathology and Diagnostic Imaging – Section of Anatomic Pathology, University of Rome “Tor Vergata”, Rome, Italy

Gisèle Bonne, PhD

(72), Inserm, UMR S974; Université Pierre et Marie Curie-Paris 6, UM 76; CNRS, UMR7215; Institut de Myologie, IFR14; AP-HP, Groupe Hospitalier Pitié-Salpêtrière, UF Cardiogénétique et Myogénétique Moléculaire, Service de Biochimie Métabolique, Paris, France

Carsten G. Bönnemann, MD

(70), Neuromuscular and Neurogenetic Disorders of Childhood Section, National Institute of Neurological Disorders and Stroke/NIH, Porter Neuroscience Research Center, Bethesda, Maryland

Nina Bowens, MD

(82), Department of Surgery and University of Pennsylvania Cardiovascular Institute, Philadelphia, Pennsylvania

Hasse Brønnum, MSc PhD

(29), Division of Matrix Biology, Department of Medicine, Beth Israel Deaconess Medical Center and Harvard Medical School, Boston, Massachusetts

Benoit G. Bruneau, PhD

(3), Gladstone Institute of Cardiovascular Disease, San Francisco, California; Department of Pediatrics, University of California, and Cardiovascular Research Institute, University of California, San Francisco, California

Margaret Buckingham, DPhil

(52), CNRS URA 2578, Department of Developmental Biology, Institut Pasteur, Paris, France

Theodor Burdya, PhD, DSc

(86), Department of Cellular and Molecular Physiology, Institute of Translational Medicine, University of Liverpool, Liverpool, UK

Gillian Butler-Browne, PhD

(77), Université Pierre et Marie Curie-Paris 6, UM76, INSERM U974, and CNRS UMR 7215, Institut de Myologie, Paris, France

Peter Buttrick, MD

(24), Division of Cardiology, University of Colorado, Denver, Denver, Colorado

P.A. Cahill, PhD

(92), School of Biotechnology, Faculty of Science and Health, Dublin City University, Dublin, Ireland

John W. Calvert, PhD

(6), Department of Surgery, Division of Cardiothoracic Surgery, Carlyle Fraser Heart Center, Emory University School of Medicine, Atlanta, Georgia

Kevin P. Campbell, PhD

(66), Howard Hughes Medical Institute, Department of Molecular Physiology and Biophysics, Department of Neurology, Department of Internal Medicine, Roy J. and Lucille A. Carver College of Medicine, The University of Iowa, Iowa City, Iowa

Stephen C. Cannon, MD, PhD

(73), University of Texas Southwestern Medical Center, Dallas, Texas

Paola Cattaneo, PhD

(25), Casa di Cura Multimedita, Istituto di Ricovero e Cura a Carattere Scientifico, Milan, Italy; Università di Bicocca, Dipartimento di Scienze Chirurgiche, Monza, Italy

Aravinda Chakravarti, PhD

(18), Center for Complex Disease Genomics, McKusick–Nathans Institute of Genetic Medicine, Johns Hopkins University School of Medicine, Baltimore, Maryland

Jeffrey S. Chamberlain, PhD

(76), Department of Neurology, Program in Molecular and Cellular Biology, Department of Biochemistry, and Department of Medicine, University of Washington, Seattle, Washington

Christine Chaponnier, PhD

(88), Department of Pathology and Immunology, Faculty of Medicine, University of Geneva, Geneva, Switzerland

Stephanie E. Chin, MD

(34), Department of Pediatrics, Division of Pediatric Cardiology, Mount Sinai School of Medicine, New York, New York

Ethan David Cohen, PhD

(32), Department of Medicine and Cardiovascular Institute, University of Pennsylvania, Philadelphia, Pennsylvania

Ronald D. Cohn, MD

(71), McKusick–Nathans Institute of Genetic Medicine and Johns Hopkins Center for Hypotonia, Johns Hopkins University School of Medicine, Baltimore, Maryland

Gianluigi Condorelli, MD, PhD

(25), Casa di Cura Multimedita, Istituto di Ricovero e Cura a Carattere Scientifico, and Consiglio Nazionale delle Ricerche (CNR), Istituto di Ricerca Genetica e Biomedica (IRGB), Milan, Italy; Department of Medicine, University of California, San Diego, La Jolla, CA

James H. Cummins, MS

(62), Stem Cell Research Center, Department of Orthopaedic Surgery, University of Pittsburgh, Pittsburgh, Pennsylvania

Kelvin P. Davies, PhD

(102), Albert Einstein College of Medicine, Bronx, New York

Bridget Deasy, PhD

(62), Stem Cell Research Center, Department of Orthopaedic Surgery, Department of Bioengineering, and McGowan Institute for Regenerative Medicine, University of Pittsburgh, Pittsburgh, Pennsylvania

Deeptankar DeMazumder, MD, PhD

(7, 41), Department of Internal Medicine (Cardiology), Johns Hopkins University School of Medicine, Baltimore, Maryland

Linda Demer, MD, PhD

(106), David Geffen School of Medicine at UCLA, Los Angeles, California

Cor de Wit, MD

(94), Department of Physiology, University of Lübeck, Lübeck, Germany

Harry C. Dietz III, MD

(71), Howard Hughes Medical Institute and Institute of Genetic Medicine, Departments of Pediatrics, Medicine, and Molecular Biology & Genetics, Johns Hopkins University School of Medicine, Baltimore, Maryland

Fabio Di Lisa, MD

(17), Department of Biomedical Sciences, University of Padua, Padua, Italy

Salvatore DiMauro, MD

(75), H. Houston Merritt Clinical Research Center for Muscular Dystrophy and Related Diseases, Columbia University Medical Center, New York, New York

Stephan Dobner, MD, PhD

(14), Harvard Stem Cell Institute and the Cardiovascular Division, Department of Medicine, Brigham and Women's Hospital and Harvard Medical School, Cambridge, Massachusetts

Gerald W. Dorn II, MD

(31), Center for Pharmacogenomics, Department of Internal Medicine, Washington University School of Medicine, St Louis, Missouri

Shirin Doroudgar, BS

(10), SDSU Heart Institute and Department of Biology, San Diego State University, San Diego, California

V. Reggie Edgerton, PhD

(55), Department of Integrative Biology and Physiology, University of California, Los Angeles, Los Angeles, California

Charles P. Emerson Jr, PhD

(69), Boston Biomedical Research Institute, Watertown, Massachusetts

Andrew G. Engel, MD

(53), Department of Neuroscience, Mayo Clinic, Rochester, Minnesota

Karyn A. Esser, PhD

(64), Center for Muscle Biology, Department of Physiology, College of Medicine, University of Kentucky, Lexington, Kentucky

Yong-Hu Fang, MD, PhD

(38), Section of Cardiology, Department of Medicine, University of Chicago, Chicago, Illinois

QiPing Feng, PhD

(67), Department of Medicine, Division of Clinical Pharmacology, Vanderbilt University Medical Center, Nashville, Tennessee

Glenn I. Fishman, MD

(40), New York University School of Medicine, Leon H. Charney Division of Cardiology, New York, New York

Thomas Force, MD

(47), Center for Translational Medicine, Thomas Jefferson University, Philadelphia, Pennsylvania

Nikolaos G. Frangogiannis, MD

(36), Department of Medicine, Albert Einstein College of Medicine, Bronx, New York

Clara Franzini-Armstrong, PhD

(53,58), Department of Cell and Developmental Biology, Perelman School of Medicine, University of Pennsylvania, Philadelphia, Pennsylvania

Norbert Frey, MD

(35), Department of Cardiology, University of Kiel, Kiel, Germany

Maria G. Frid, PhD

(103), University of Colorado Denver, Anschutz Medical Campus, Department of Pediatric Critical Care Medicine and Developmental Lung Biology Laboratory, Aurora, Colorado

Giulio Gabbiani, MD, PhD

(88), Department of Pathology and Immunology, Faculty of Medicine, University of Geneva, Geneva, Switzerland

Bruce D. Gelb, MD

(34), Child Health and Development Institute, Departments of Pediatrics and Genetics & Genetic Sciences, Mount Sinai School of Medicine, New York, New York

Eric M. George, PhD

(101), Department of Physiology and Biophysics and the Center for Excellence in Cardiovascular-Renal Research, University of Mississippi Medical Center, Jackson, Mississippi

A. Martin Gerdes, PhD

(5), New York College of Osteopathic Medicine at New York Institute of Technology, Old Westbury, New York

Burhan Gharaibeh, PhD

(62), Stem Cell Research Center, Department of Orthopaedic Surgery, Department of Bioengineering, and McGowan Institute for Regenerative Medicine, University of Pittsburgh, Pittsburgh, Pennsylvania

Hamilton S. Gillespie, MD

(43), Division of Cardiology, University of Utah School of Medicine, Salt Lake City, Utah

Christopher C. Glembotski, PhD

(10), SDSU Heart Institute and Department of Biology, San Diego State University, San Diego, California

Tommaso Gori, MD, PhD

(91), II Medical Clinic for Cardiology and Angiology, Mainz, Germany

Joey P. Granger, PhD

(101), Department of Physiology and Biophysics and the Center for Excellence in Cardiovascular-Renal Research, University of Mississippi Medical Center, Jackson, Mississippi

Kathy K. Griendling, PhD

(96), Department of Medicine, Division of Cardiology, Emory University, Atlanta, Georgia

Susan J. Gunst, PhD

(104), Department of Cellular and Integrative Physiology, Indiana University School of Medicine, Indianapolis, Indiana

Denis C. Guttridge, PhD

(65), Department of Molecular Virology, Immunology, and Medical Genetics, Human Cancer Genetics Program, The Ohio State University, Columbus, Ohio

Roger J. Hajjar, MD

(46), Cardiovascular Research Center, Mount Sinai School of Medicine, New York, New York

Ronald G. Haller, MD

(75), Department of Neurology, University of Texas Southwestern Medical Center and North Texas VA Medical Center, and Neuromuscular Center, Institute for Exercise and Environmental Medicine, Texas Health Presbyterian Hospital, Dallas, Texas

Erick O. Hernández-Ochoa, MD, PhD

(57), Department of Biochemistry and Molecular Biology, School of Medicine, University of Maryland, Baltimore, Maryland

Neil Herring, DPhil, MRCP

(20), Burdon Sanderson Cardiac Science Centre, Department of Physiology, Anatomy and Genetics, University of Oxford, Oxford, UK

Lula L. Hilenski, PhD

(96), Department of Medicine, Division of Cardiology, Emory University, Atlanta, Georgia

Joseph A. Hill, MD, PhD

(1, 7, 35), Departments of Internal Medicine (Cardiology) and Molecular Biology, University of Texas Southwestern Medical Center, Dallas, Texas

Michael A. Hill, PhD

(93), Dalton Cardiovascular Research Center and the Department of Medical Pharmacology and Physiology, University of Missouri, Columbia, Missouri

Charis L. Himesda, PhD

(69), Boston Biomedical Research Institute, Watertown, Massachusetts

Boris Hinz, PhD

(88), Laboratory of Tissue Repair and Regeneration, Matrix Dynamics Group, Faculty of Dentistry, University of Toronto, Toronto, Canada

Steven R. Houser, PhD

(11), Department of Physiology, Temple University School of Medicine, Philadelphia, Pennsylvania

Johnny Huard, PhD

(62), Cell Research Center, Department of Orthopaedic Surgery, Department of Bioengineering, McGowan Institute for Regenerative Medicine, Department of Pathology, and Departments of Molecular Genetics and Biochemistry, Physical Medicine and Rehabilitation, University of Pittsburgh, Pittsburgh, Pennsylvania

William F. Jackson, PhD

(89), Pharmacology and Toxicology, Michigan State University, East Lansing, Michigan

John Lynn Jefferies, MD, MPH

(33), The Heart Institute, Cincinnati Children's Hospital, Cincinnati, Ohio

Raghu Kalluri, MD, PhD

(29), Division of Matrix Biology, Department of Medicine, Beth Israel Deaconess Medical Center and Harvard Medical School, Boston, Massachusetts

Fadia A. Kamal, PhD

(8), Aab Cardiovascular Research Institute, Department of Medicine, University of Rochester School of Medicine and Dentistry, Rochester, New York

Ashish Kapoor, PhD

(18), Center for Complex Disease Genomics, McKusick–Nathans Institute of Genetic Medicine, Johns Hopkins University School of Medicine, Baltimore, Maryland

David A. Kass, MD

(21), Division of Cardiology, Department of Biomedical Engineering, Johns Hopkins University School of Medicine, Baltimore, Maryland

Arnold M. Katz, MD

(2), Professor of Medicine Emeritus, University of Connecticut School of Medicine, Farmington, Connecticut; Visiting Professor of Medicine and Physiology, Dartmouth Medical School, Hanover, New Hampshire; Visiting Professor of Medicine, Harvard Medical School, Boston, Massachusetts

Daniel P. Kelly, MD

(16), Sanford–Burnham Medical Research Institute, Orlando, Florida

Aarif Y. Khakoo, MD, MBA

(9, 47), Executive Director Research, Metabolic Disorders, Amgen, San Francisco, California

Sujay V. Kharade, PhD

(84), Department of Pharmacology and Toxicology, College of Medicine, University of Arkansas for Medical Sciences, Little Rock, Arkansas

Eugene Kim, MD

(40), New York University School of Medicine, Leon H. Charney Division of Cardiology, New York, New York

Jung A. Kim, PhD

(55), Department of Integrative Biology and Physiology, University of California, Los Angeles, Los Angeles, California

Richard N. Kitsis, MD

(31), Wilf Family Cardiovascular Research Institute, Departments of Medicine and Cell Biology, Albert Einstein College of Medicine, Bronx, New York

Yvonne M. Kobayashi, PhD

(66), Howard Hughes Medical Institute, Department of Molecular Physiology and Biophysics, Department of Neurology, Department of Internal Medicine, Roy J. and Lucille A. Carver College of Medicine, The University of Iowa, Iowa City, Iowa

Issei Komuro, MD, PhD

(51), Department of Cardiovascular Medicine, Osaka University Graduate School of Medicine, Osaka, Japan

Irina Kramerova, PhD

(78), Department of Neurology and Center for Duchenne Muscular Dystrophy at UCLA, Los Angeles, California

Callie S. Kwartler, BA

(97), Department of Internal Medicine, University of Texas Health Science Center at Houston, Houston, Texas

Edward G. Lakatta, MD

(44), Laboratory of Cardiovascular Science, Intramural Research Program, National Institute on Aging, National Institutes of Health, Baltimore, Maryland

Triona Lally, PhD

(92), School of Mechanical and Manufacturing Engineering, Dublin City University, Dublin, Ireland

Lars Larsson, MD, PhD

(74), Department of Neuroscience, Clinical Neurophysiology, Uppsala University Hospital, Uppsala, Sweden

Michael V.G. Latronico

(25), Casa di Cura Multimedita, Istituto di Ricovero e Cura a Carattere Scientifico, Milan, Italy

Sergio Lavandero, PhD

(30), Department of Internal Medicine (Cardiology), University of Texas Southwestern Medical Center at Dallas, Texas, and Center for Molecular Studies of the Cell, Faculty of Chemical and Pharmaceutical Sciences/Faculty of Medicine, University of Chile, Santiago, Chile

Mitra Lavasani, PhD

(62), Stem Cell Research Center, Department of Orthopaedic Surgery, School of Medicine, University of Pittsburgh, Pittsburgh, Pennsylvania

Richard T. Lee, MD

(14), Harvard Stem Cell Institute and the Cardiovascular Division, Department of Medicine, Brigham and Women's Hospital and Harvard Medical School, Cambridge, Massachusetts

Se-Jin Lee, MD, PhD

(79), Department of Molecular Biology and Genetics, Johns Hopkins University School of Medicine, Baltimore, Maryland

Young il Lee, PhD

(54), Section of Molecular Cell and Developmental Biology, School of Biological Sciences, University of Texas, Austin, Texas

David J. Lefer, PhD

(6, 28), Department of Surgery, Division of Cardiothoracic Surgery, Carlyle Fraser Heart Center, Emory University School of Medicine, Atlanta, Georgia

Leslie A. Leinwand, PhD

(13), University of Colorado at Boulder, Molecular, Cellular and Developmental Biology, Boulder, Colorado

Benjamin Levine, MD

(24), Institute for Exercise and Environmental Medicine, Texas Health Resources and University of Texas, Southwestern Medical Center, Dallas, Texas

Yong Li, PhD

(62), Stem Cell Research Center, Department of Orthopaedic Surgery, Department of Bioengineering, McGowan Institute

for Regenerative Medicine, and Department of Pathology, University of Pittsburgh, Pittsburgh, Pennsylvania; Recently relocated to Department of Pediatric Surgery at The University of Texas, School of Medicine at Houston

Stephen B. Liggett, MD

(45), Departments of Medicine and Physiology, University of Maryland School of Medicine, Baltimore, Maryland

Zhiqiang Lin, PhD

(39), Department of Cardiology, Children's Hospital Boston, Boston, Massachusetts; Harvard Stem Cell Institute, Cambridge, Massachusetts

Ning Liu, PhD

(61), Department of Molecular Biology, University of Texas Southwestern Medical Center, Dallas, Texas

Jose R. Lopez, MD, PhD

(56), Department of Anesthesia, Perioperative and Pain Medicine, Brigham and Women's Hospital, Harvard Medical School, Boston, Massachusetts

Douglas W. Losordo, MD

(48), Feinberg Cardiovascular Research Institute, Northwestern University; and Program in Cardiovascular Regenerative Medicine, Northwestern Memorial Hospital, Chicago, Illinois

Calum A. MacRae, MD, PhD

(42), Cardiovascular Division, Department of Medicine, Brigham and Women's Hospital, and Harvard Medical School, Boston, Massachusetts

Yasuhiro Maejima, MD, PhD

(23), Department of Cell Biology and Molecular Medicine, University of Medicine and Dentistry of New Jersey, New Jersey Medical School, Newark, New Jersey

Mark W. Majesky, PhD

(108), Departments of Pediatrics and Pathology, Center for Cardiovascular Biology, Institute for Stem Cell and Regenerative Medicine, Seattle Children's Research Institute, University of Washington, Seattle, Washington

Andrew R. Marks, MD

(12), Department of Physiology and Cellular Biophysics, Clyde and Helen Wu Center for Molecular Cardiology, and Department of Medicine, College of Physicians and Surgeons, Columbia University, New York, New York

Melissa L. Martin, BS

(8), Aab Cardiovascular Research Institute, Department of Medicine, University of Rochester School of Medicine and Dentistry, Rochester, New York

Alessandro Mauriello, MD

(105), Department of Biopathology and Diagnostic Imaging – Section of Anatomic Pathology, University of Rome "Tor Vergata", Rome, Italy

Alicia Mayeuf, MSc

(52), CNRS URA 2578, Department of Developmental Biology, Institut Pasteur, Paris, France

John J. McCarthy, PhD

(64), Center for Muscle Biology, Department of Physiology, College of Medicine, University of Kentucky, Lexington, Kentucky

Elizabeth McNally, MD, PhD

(81), Department of Medicine, Section of Cardiology, Department of Human Genetics, University of Chicago, Chicago, Illinois

Gerald A. Meininger, PhD

(93), Dalton Cardiovascular Research Center and the Department of Medical Pharmacology and Physiology, University of Missouri, Columbia, Missouri

Mark Mercola, PhD

(49), Muscle Development and Regeneration Program, Sanford–Burnham Medical Research Institute, La Jolla, California

Joseph M. Miano, PhD

(95), Aab Cardiovascular Research Institute, University of Rochester School of Medicine and Dentistry, Rochester, New York

M. Carrie Miceli, PhD

(78), Departments of Microbiology, Immunology and Molecular Genetics, and Center for Duchenne Muscular Dystrophy, David Geffen School of Medicine at UCLA, Los Angeles, California

Dianna M. Milewicz, MD, PhD

(97), Department of Internal Medicine, University of Texas Health Science Center at Houston, Houston, Texas

Kathleen G. Morgan, PhD

(87), Health Sciences Department, Boston University, Boston, Massachusetts

Edward E. Morrisey, PhD

(32), Department of Medicine, Department of Cell and Developmental Biology, Cardiovascular Institute and Institute for Regenerative Medicine, University of Pennsylvania, Philadelphia, Pennsylvania

Vincent Mouly, PhD

(77), Université Pierre et Marie Curie-Paris 6, UM76, INSERM U974, and CNRS UMR 7215, Institut de Myologie, Paris, France

Thomas Münzel, MD

(91), II Medical Clinic for Cardiology and Angiology, Mainz, Germany

Anne Murphy, MD

(19), Department of Pediatrics, School of Medicine, Johns Hopkins University, Baltimore, Maryland

Anthony J. Muslin, MD

(37), Novartis Institutes for Biomedical Research, Inc., Cambridge, Massachusetts

R. Kannan Mutharasan, MD

(48), Department of Medicine, Northwestern University, Feinberg School of Medicine, Chicago, Illinois

Kanneboyina Nagaraju, DVM, PhD

(78), Research Center for Genetic Medicine, Children's National Medical Center, Washington, DC

Atsuhiko T. Naito, MD, PhD

(51), Department of Cardiovascular Medicine, Osaka University Graduate School of Medicine, Osaka, Japan

Carlo Napolitano, MD, PhD

(42), Molecular Cardiology Laboratories, IRCCS Salvatore Maugeri Foundation, Pavia, Italy; Cardiovascular Genetics, Leon Charney Division of Cardiology, Langone Medical Center, New York University School of Medicine, New York; Department of Cardiology, University of Pavia, Italy

Sandeep Nathan, MD, MSc

(38), Section of Cardiology, Department of Medicine, University of Chicago, Chicago, Illinois

Eva Nozik-Grayck, MD

(103), University of Colorado Denver, Anschutz Medical Campus, Department of Pediatric Critical Care Medicine and Developmental Lung Biology Laboratory, Aurora, Colorado

Julien Ochala, PhD

(74), Department of Neuroscience, Clinical Neurophysiology, Uppsala University Hospital, Uppsala, Sweden

Stefan Offermanns, MD

(85), Max-Planck-Institute for Heart and Lung Research, Department of Pharmacology, Bad Nauheim, Germany

Eric N. Olson, PhD

(35), Department of Molecular Biology, University of Texas Southwestern Medical Center, Dallas, Texas

Augusto Orlandi, MD

(105), Department of Biopathology and Diagnostic Imaging – Section of Anatomic Pathology, University of Rome “Tor Vergata”, Rome, Italy

Roberto Papait, PhD

(25), Casa di Cura Multimedia, Istituto di Ricovero e Cura a Carattere Scientifico, and Consiglio Nazionale delle Ricerche (CNR), Istituto di Ricerca Genetica e Biomedica (IRGB), Milan, Italy

Michael S. Parmacek, MD

(82), Department of Medicine and University of Pennsylvania Cardiovascular Institute, Philadelphia, Pennsylvania

Amit R. Patel, MD

(38), Section of Cardiology, Department of Medicine, University of Chicago, Chicago, Illinois

David J. Paterson, DPhil, DSc

(20), Burdon Sanderson Cardiac Science Centre, Department of Physiology, Anatomy and Genetics, University of Oxford, Oxford, UK

Asif R. Pathan, MS

(84), Department of Pharmacology and Toxicology, College of Medicine, University of Arkansas for Medical Sciences, Little Rock, Arkansas

Cam Patterson, MD, MBA

(27), Departments of Medicine, Pharmacology, and Cell and Developmental Biology, University of North Carolina at Chapel Hill, Chapel Hill, North Carolina

Richard J. Paul, PhD

(86), Department of Molecular and Cellular Physiology, University of Cincinnati College of Medicine, Cincinnati, Ohio

Lin Piao, PhD

(38), Section of Cardiology, Department of Medicine, University of Chicago, Chicago, Illinois

Silvia G. Priori, MD, PhD

(42), Molecular Cardiology Laboratories, IRCCS Salvatore Maugeri Foundation, Pavia, Italy; Cardiovascular Genetics, Leon Charney Division of Cardiology, Langone Medical Center, New York University School of Medicine, New York; Department of Cardiology, University of Pavia, Italy

William T. Pu, MD

(39), Department of Cardiology, Children's Hospital Boston, Boston, Massachusetts; Harvard Stem Cell Institute, Cambridge, Massachusetts

Rashmi Ram, PhD

(8), Aab Cardiovascular Research Institute, Department of Medicine, University of Rochester School of Medicine and Dentistry, Rochester, New York

J. Eduardo Rame, MD, MPhil

(50), Mechanical Circulatory Support Program, Division of Cardiovascular Medicine, University of Pennsylvania, Philadelphia, Pennsylvania

Julian N. Ramos, BS

(76), Department of Neurology, and Program in Molecular and Cellular Biology, University of Washington, Seattle, Washington

E.M. Redmond, PhD

(92), Department of Surgery, University of Rochester Medical Center, Rochester, New York

Carlo Reggiani, MD

(60), Consiglio Nazionale delle Ricerche (CNR), Institute of Neurosciences, and Department of Human Anatomy and Physiology, University of Padua, Padua, Italy

Stuart Rich, MD

(38), Section of Cardiology, Department of Medicine, University of Chicago, Chicago, Illinois

Chiara Rinaldi, PhD

(63), Department of Integrative Biology and Physiology, University of California, Los Angeles, Los Angeles, California

Beverly A. Rothermel, PhD

(30), Departments of Internal Medicine (Cardiology) and Molecular Biology, University of Texas Southwestern Medical Center at Dallas, Texas

Roland R. Roy, PhD

(55), Brain Research Institute, University of California, Los Angeles, Los Angeles, California

Nancy J. Rusch, PhD

(84), Department of Pharmacology and Toxicology, College of Medicine, University of Arkansas for Medical Sciences, Little Rock, Arkansas

John J. Ryan, MB, BCh

(38), Section of Cardiology, Department of Medicine, University of Chicago, Chicago, Illinois

Junichi Sadoshima, MD, PhD

(23), Department of Cell Biology and Molecular Medicine, University of Medicine and Dentistry of New Jersey, New Jersey Medical School, Newark, New Jersey

Alejandra San Martín, PhD

(96), Department of Medicine, Division of Cardiology, Emory University, Atlanta, Georgia

Richard C. Scarpulla, PhD

(16), Department of Cell and Molecular Biology, Northwestern University Medical School, Chicago, Illinois

Stefano Schiaffino, MD

(60), Venetian Institute of Molecular Medicine (VIMM), and Consiglio Nazionale delle Ricerche (CNR), Institute of Neurosciences, Padua, Italy

Ernesto L. Schiffrin, MD, PhD

(99), Lady Davis Institute for Medical Research and Department of Medicine, Sir Mortimer B. Davis—Jewish General Hospital, McGill University, Montreal, QC, Canada

Jay W. Schneider, MD, PhD

(49), Department of Internal Medicine/Cardiology, University of Texas Southwestern Medical Center, Dallas, Texas

Martin F. Schneider, PhD

(57), Department of Biochemistry and Molecular Biology, School of Medicine, University of Maryland, Baltimore, Maryland

Andreas Schober, MD

(107), Institute for Molecular Cardiovascular Research, RWTH Aachen University, Aachen, Germany

Manuel Scimeca, MB

(105), Department of Biopathology and Diagnostic Imaging – Section of Anatomic Pathology, University of Rome “Tor Vergata”, Rome, Italy

Luca Scorrano, MD, PhD

(17), Department of Cell Physiology and Medicine, Geneva, Switzerland

Tiffany L. Shih, BSE

(9), Medical Student, University of Texas MD Anderson Medical Cancer Center, Houston, Texas

Ichiro Shiojima, MD, PhD

(51), Department of Cardiovascular Medicine, Osaka University Graduate School of Medicine, Osaka, Japan

Marion J. Siegman, PhD

(83), Department of Molecular Physiology and Biophysics, Thomas Jefferson University, Philadelphia, Pennsylvania

Elaine Smolock, PhD

(98), Aab Cardiovascular Research Institute, University of Rochester School of Medicine and Dentistry, Rochester, New York

R. John Solaro, PhD

(13), Department of Physiology and Biophysics (M/C 901), University of Illinois at Chicago College of Medicine, Chicago, Illinois

Avril V. Somlyo, PhD

(83), Department of Molecular Physiology and Biological Physics, University of Virginia, Charlottesville, Virginia

James R. Sowers, MD

(100), MU Diabetes and Cardiovascular Center, Department of Medical Pharmacology & Physiology, University of Missouri-Columbia, Columbia, Missouri

Luigi Giusto Spagnoli, MD

(105), Department of Biopathology and Diagnostic Imaging – Section of Anatomic Pathology, University of Rome “Tor Vergata”, Rome, Italy

Melissa J. Spencer, PhD

(78), Department of Neurology, and Center for Duchenne Muscular Dystrophy, David Geffen School of Medicine at UCLA, Los Angeles, California

David Spragg, MD

(50), Division of Cardiology, Johns Hopkins Hospital, Johns Hopkins Bayview Medical Center, Baltimore, Maryland

Miroslava Stastna, PhD

(19), Johns Hopkins Bayview Proteomics Center, Division of Cardiology, Department of Medicine, School of Medicine, Johns Hopkins University, Baltimore, Maryland; Institute of Analytical Chemistry of the ASCR, Brno, Czech Republic

Charles Steenbergen, MD, PhD

(36), Department of Pathology, Johns Hopkins Medical Institutions, Baltimore, Maryland

Kurt R. Stenmark, MD

(103), University of Colorado Denver, Anschutz Medical Campus, Department of Pediatric Critical Care Medicine and Developmental Lung Biology Laboratory, Aurora, Colorado

James B. Strait, MD, PhD

Acknowledgments

Many people contributed directly and indirectly to this book, and without their input, *Muscle* would never have appeared in its present form. First, a host of thought leaders in muscle biology generously agreed to devote considerable time and energy to the book, recognizing that a work of this sort has never been attempted before. These authors, without exception, dedicated enormous energy and attention to providing a state-of-the-art snapshot of their area of expertise. Remarkably, some did this in the face of significant personal issues, which included an episode of appendicitis complicated by peritonitis, a co-author being detained in the Middle East during the Arab Spring, and a house fire!

Next, the Section Editors — Drs Kathy Griendling, Rick Kitsis, Jim Stull, Lee Sweeney — devoted near-countless hours to ensuring that the topics under their direction were covered in a comprehensive, rigorous, thoughtful, and unbiased manner, without overlooking — or over-treating — areas of importance. Their wide-ranging knowledge of their fields, combined with assiduous attention to detail, were critical to our success. This book is truly the result of their hard work.

Our colleagues at Elsevier, including Mara Conner, Janice Audet, and April Graham, deserve recognition and thanks for their support and patience throughout this journey.

A number of professional colleagues and personal friends have contributed importantly to the project. These

include Drs Rhonda Bassel-Duby, Jay Schneider, Hesham Sadek, Beverly Rothermel, Thomas Gillette, and Anwarul Ferdous, our close scientific collaborators. Everything we do professionally relies critically on support from our administrative colleagues, including Cindy Lawson, Wanda Simpson, Christie Evans, and Jennifer Brown. We thank John Shelton for providing extraordinary images of cardiac, skeletal, and smooth myocytes for the cover.

Each of us is fortunate to work with an impressive cadre of scientific professionals and trainees, too numerous to mention, in our labs. These folks challenge us, enlighten us, occasionally frustrate us, but always strive to move the frontiers of science forward.

A long list of personal friends deserve recognition, including Joe Illick and Gina Browning, from whom we have learned much about life and art, and Mo Ghomi, from whom we have learned much about life and muscle.

Finally, we are grateful — indeed most grateful — to our families, who have listened to our frustrations, tolerated our whims, and shouldered an extra burden during this project. These include our wives, Beverly and Laurie, and our children, Christopher and Theodore (Teddy) [Hill] and Eric, Sarah, and Emily [Olson]. Without exception, they are the lights of our lives and — ultimately — the final motivators of our work.

Joseph A. Hill and Eric N. Olson

Volume 2

PART III Skeletal Muscle

Section A: Basic Physiology

52. Skeletal Muscle Development 749
Margaret Buckingham and Alicia Mayeuf
53. Skeletal Muscle: Architecture of Membrane Systems 763
Clara Franzini-Armstrong and Andrew G. Engel
54. The Vertebrate Neuromuscular Junction 775
Young il Lee and Wesley J. Thompson
55. Neuromechanical Interactions that Control Muscle Function and Adaptation 789
Jung A. Kim, Roland R. Roy, and V. Reggie Edgerton
56. Control of Resting Ca^{2+} Concentration in Skeletal Muscle 801
Jose R. Lopez and Paul D. Allen
57. Skeletal Muscle Excitation—Contraction Coupling 811
Martin F. Schneider and Erick O. Hernández-Ochoa
58. The Contractile Machinery of Skeletal Muscle 823
Clara Franzini-Armstrong and H. Lee Sweeney
59. Skeletal Muscle Metabolism 841
Morris J. Birnbaum
60. Skeletal Muscle Fiber Types 855
Stefano Schiaffino and Carlo Reggiani

Section B: Adaptations and Response

61. Regulation of Skeletal Muscle Development and Function by microRNAs 871
Ning Liu and Rhonda Bassel-Duby

62. Musculoskeletal Tissue Injury and Repair: Role of Stem Cells, Their Differentiation, and Paracrine Effects 881
Burhan Gharaibeh, Bridget Deasy, Mitra Lavasani, James H. Cummins, Yong Li, and Johnny Huard
63. Immunological Responses to Muscle Injury 899
James G. Tidball and Chiara Rinaldi
64. Skeletal Muscle Adaptation to Exercise 911
John J. McCarthy and Karyn A. Esser
65. Skeletal Muscle Regeneration 921
Denis C. Guttridge
66. Skeletal Muscle Dystrophin-Glycoprotein Complex and Muscular Dystrophy 935
Yvonne M. Kobayashi and Kevin P. Campbell

Section C: Skeletal Muscle Disease

67. Statin-Induced Muscle Toxicity: Clinical and Genetic Determinants of Risk 945
QiPing Feng and Russell A. Wilke
68. Myotonic Dystrophy 955
Charles Thornton
69. Facioscapulohumeral Muscular Dystrophy: Unraveling the Mysteries of a Complex Epigenetic Disease 969
Charis L. Himeda and Charles P. Emerson, Jr
70. ECM-Related Myopathies and Muscular Dystrophies 979
Carsten G. Bönnemann and Nicol C. Voermans
71. Molecular Pathogenesis of Skeletal Muscle Abnormalities in Marfan Syndrome 995
Ronald D. Cohn and Harry C. Dietz III
72. Diseases of the Nucleoskeleton 1003
Anne T. Bertrand, Rabah Ben Yaou, and Gisèle Bonne
73. Channelopathies of Skeletal Muscle Excitability 1013
Stephen C. Cannon
74. Thick and Thin Filament Proteins: Acquired and Hereditary Sarcomeric Protein Diseases 1023
Julien Ochala and Lars Larsson
75. Metabolic and Mitochondrial Myopathies 1031
Ronald G. Haller and Salvatore DiMauro

Section D: Therapeutics

76. Gene Therapy of Skeletal Muscle Disorders Using Viral Vectors 1045
Andrea L.H. Arnett, Julian N. Ramos, and Jeffrey S. Chamberlain
77. Cell-Based Therapies in Skeletal Muscle Disease 1053
Denis Vallese, Erica Yada, Gillian Butler-Browne, and Vincent Mouly
78. Immunological Components of Genetically Inherited Muscular Dystrophies: Duchenne Muscular Dystrophy and Limb-Girdle Muscular Dystrophy Type 2B 1065
Melissa J. Spencer, Irina Kramerova, M. Carrie Miceli, and Kanneboyina Nagaraju
79. Myostatin: Regulation, Function, and Therapeutic Applications 1077
Se-Jin Lee
80. Insulin-Like Growth Factor I Regulation and Its Actions in Skeletal Muscle Growth and Repair 1085
Elisabeth R. Barton
81. Novel Targets and Approaches to Treating Skeletal Muscle Disease 1095
Elizabeth McNally

PART IV

Smooth Muscle

Section A: Basic Physiology

82. Development of the Smooth Muscle Cell Lineage 1109
Nina Bowens and Michael S. Parmacek
83. Smooth Muscle Myocyte Ultrastructure and Contractility 1117
Avril V. Somlyo and Marion J. Siegelman
84. Potassium, Sodium, and Chloride Channels in Smooth Muscle Cells 1133
Keshari M. Thakali, Asif R. Pathan, Sujay V. Kharade, and Nancy J. Rusch
85. G-Protein-Coupled Receptors in Smooth Muscle 1145
Angela Wirth and Stefan Offermanns
86. Calcium Homeostasis and Signaling in Smooth Muscle 1155
Theodor Burdyla and Richard J. Paul
87. Regulation of Smooth Muscle Contraction 1173
Susanne Vetterkind and Kathleen G. Morgan

Section B: Heterogeneities

88. Heterogeneity of Smooth Muscle 1183
Richard Arnoldi, Christine Chaponnier, Giulio Gabbiani, and Boris Hinz
89. Microcirculation 1197
William F. Jackson
90. Uterine Smooth Muscle 1207
Susan Wray and Sarah Arrowsmith

Section C: Adaptations and Response

91. Oxidative Stress, Endothelial Dysfunction, and Its Impact on Smooth Muscle Signaling 1219
Thomas Münzel and Tommaso Gori
92. Hemodynamic Control of Vascular Smooth Muscle Function 1231
Eileen M. Redmond, Caitriona Lally, and Paul A. Cahill
93. Myogenic Tone and Mechanotransduction 1243
Michael A. Hill and Gerald A. Meininger
94. Cell–Cell Communication Through Gap Junctions 1259
Cor de Wit
95. Vascular Smooth Muscle Cell Phenotypic Adaptation 1269
Joseph M. Miano
96. Molecular Pathways of Smooth Muscle Disease 1279
Alejandra San Martín, Lula Hilenski, and Kathy K. Griendling

Section D: Smooth Muscle Disease

97. Genetic Variants in Smooth Muscle Contraction and Adhesion Genes Cause Thoracic Aortic Aneurysms and Dissections and Other Vascular Diseases 1291
Dianna M. Milewicz and Callie S. Kwartler
98. Vascular Smooth Muscle Cell Remodeling in Atherosclerosis and Restenosis 1301
Elaine Smolock and Bradford C. Berk
99. Arterial Hypertension 1311
Rhian M. Touyz and Ernesto L. Schiffrin
100. Diabetic Vascular Disease 1321
Adam Whaley-Connell, Hanrui Zhang, Cuihua Zhang, and James R. Sowers
101. Vascular Mechanisms of Hypertension in the Pathophysiology of Preeclampsia 1329
Eric M. George and Joey P. Granger
102. Erectile Dysfunction 1339
Kelvin P. Davies

103.	Smooth Muscle in the Normal and Diseased Pulmonary Circulation	1347	8.	G-Protein-Coupled Receptors in the Heart	87

Volume 1

PART I
Introduction

1.	An Introduction to Muscle	3
	<i>Joseph A. Hill and Eric N. Olson</i>	
2.	A History of Muscle	11
	<i>Arnold M. Katz</i>	

PART II
Cardiac Muscle

Section A: Basic Physiology

3.	Cardiac Myocyte Specification and Differentiation	25
	<i>Benoit G. Bruneau and Brian L. Black</i>	
4.	Transcriptional Control of Cardiogenesis	35
	<i>Katherine E. Yutzey</i>	
5.	Cardiomyocyte Ultrastructure	47
	<i>A. Martin Gerdes</i>	
6.	Overview of Cardiac Muscle Physiology	57
	<i>John W. Calvert and David J. Lefer</i>	
7.	Ionic Fluxes and Genesis of the Cardiac Action Potential	67
	<i>Yanggan Wang, Deeptankar DeMazumder, and Joseph A. Hill</i>	

Section B: Adaptations and Response

20.	Adaption and Responses: Myocardial Innervations and Neural Control	275
	<i>Neil Herring and David J. Paterson</i>	
21.	Regulation of Cardiac Systolic Function and Contractility	285
	<i>Eiki Takimoto and David A. Kass</i>
