Welcome to ISTM/2003

Jing Zu

Chairman of ISTM/2003

Welcome to 5th International Symposium on Test and Measurement (ISTM) in Shenzhen, China. I'm happy to have this symposium again in China and meet both old and new friends here.

Information science is the center of the development of modern science and technology. Testing science is the eye of the information science. Development of testing science will strongly promote the development of science and technology and economy. Instrument industry is one of the important props of world economic development. Following the successful symposium of ISTM/2001 in Shanghai, ISTM/2003 aim to provide a forum for those working in the field of test and measurement throughout the world to exchange their newest achievements, exhibit their latest products and promote the development in this field and furthermore the development in every area.

I hope this Symposium will be informative and stimulating for all participants. I wish the conference a success and all the representatives a good staying in Shenzhen.
