Medicine is an ever-changing field. Standard safety precautions must be followed, but as new research and clinical experience broaden our knowledge, changes in treatment and drug therapy may become necessary or appropriate. Readers are advised to check the most current product information provided by the manufacturer of each drug to be administered to verify the recommended dose, the method and duration of administrations, and contraindications. It is the responsibility of the treating physician, relying on experience and knowledge of the patient, to determine dosages and the best treatment for each individual patient. Neither the publisher nor the authors assume any liability for any injury and/or damage to persons or property arising from this publication.

No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying, recording, or any information storage and retrieval system, without permission in writing from the publisher. Details on how to seek permission, further information about the Publisher's permissions policies and our arrangements with organizations such as the Copyright Clearance Center and the Copyright Licensing Agency, can be found at our website: www.elsevier.com/permissions.

COFFEE IN HEALTH AND DISEASE PREVENTION

Preface

The consumption of coffee as a beverage has a history dating back thousands of years but it is only in the past few decades that evidence has been provided to support the notion that it has an extremely complex food matrix in which individual components have therapeutic potential. On the other hand, it has been argued that excessive consumption of coffee may be detrimental. Understanding the biology of coffee and its impact on health is complicated by the fact that coffee contains many bioactive compounds. The well-known ones include caffeine, the diterpenes, and chlorogenic acids. However, several hundred (if not thousands) of other compounds and their derivatives are also present in coffee, too numerous to mention here. They occur in varying quantities and are contained either within the coffee beans themselves or produced by the commercial production process. After ingestion of the coffee beverage, many of these analytes undergo modification via the tissues or even intestinal bacteria. Each of these modified compounds in turn has their own chemistry, biochemistry, and health effects. Understanding the whole nature of coffee production, composition, impact on health, and the putative role of individual coffee-related analytes is thus very complex. This is addressed in the scientific treatise *Coffee in Health and Disease Prevention*, which aims to be the most comprehensive book on coffee in all its aspects.

It has the following four main sections:

SECTION 1: INTRODUCTORY AND GENERAL TEXT

- 1.1 The Plant
- 1.2 Coffee Processing
- 1.3 Constituents and Composition
- 1.4 Coffee Types and Coffee Drinking Culture
- 1.5 By-products and Secondary Usage

SECTION 2: EFFECTS OF COFFEE CONSUMPTION

- 2.1 Infection and Immunity
- 2.2 Cancer

- 2.3 Cardiovascular
- 2.4 Nervous System and Behavior
- 2.5 Diabetes and Glucose Control
- 2.6 Metabolism and Other Organ Systems
- 2.7 Cellular and Molecular Biology

SECTION 3: EFFECTS OF SPECIFIC COMPOUNDS FOUND IN COFFEE

- 3.1 Infection and Immunity
- 3.2 Cancer
- 3.3 Cardiovascular
- 3.4 Nervous System and Behavior
- 3.5 Diabetes and Glucose Control
- 3.6 Metabolism and Other Organ Systems
- 3.7 Cellular and Molecular Biology

SECTION 4: ANALYSIS AND METHODS

This book is thus a comprehensive approach to everything one needs to know about coffee. The book encompasses botany, preclinical and clinical studies. The material ranges from the gene to geographical populations. While there has been some attempt to broadly subdivide the material, it should be emphasized that some chapters assigned to a particular section can equally be allocated to another part of the book. The expert indexing system offsets this, so that material of interest can be readily located.

This book, *Coffee in Health and Disease Prevention*, is designed for nutritionists and dietitians, food scientists, food chemists, pharmacologists, public health scientists and workers, epidemiologists, agriculturists, botanists, health care professionals of various disciplines, policy makers, and marketing and economic strategists. It is designed for teachers and lecturers, undergraduates and graduates, and those undertaking postgraduate research or studies.

The Editor

Biography

Victor R. Preedy BSc, PhD, DSc, FSB, FRSH, FRIPHH, FRSPH, FRCPath, FRSC is a senior member of King's College London (Professor of Nutritional Biochemistry) and King's College Hospital (Professor of Clinical Biochemistry; Hon). He is attached to both the Diabetes and Nutritional Sciences Division and the Department of Nutrition and Dietetics. He is also Director of the Genomics Centre and a member of the School of Medicine. Professor Preedy graduated in 1974 with an Honours Degree in Biology and Physiology with Pharmacology. He gained his University of London PhD in 1981. In 1992, he received his Membership of the Royal College of Pathologists and in 1993 he gained his second Doctoral degree, for his contribution to the science of protein metabolism in health and disease. Professor Preedy was elected as a Fellow of the Institute of Biology in 1995 and to the Royal College of Pathologists

in 2000. Since then he has been elected as a Fellow to the Royal Society for the Promotion of Health (2004) and The Royal Institute of Public Health and Hygiene (2004). In 2009, Professor Preedy became a Fellow of the Royal Society for Public Health and in 2012 a Fellow of the Royal Society of Chemistry. In his career Professor Preedy worked at the National Heart Hospital (part of Imperial College London) and the MRC Centre at Northwick Park Hospital. He has collaborated with research groups in Finland, Japan, Australia, USA and Germany. He is a leading expert on biomedical sciences and has a long standing interest in how nutrition and diet affects health. He has lectured nationally and internationally. To his credit, Professor Preedy has published over 570 articles, which includes peer-reviewed manuscripts based on original research, reviews and numerous books and volumes.

SECTION 1

INTRODUCTORY AND GENERAL TEXT

Part 1.1 The Plant

1. The Coffee Plant and Beans: An Introduction

ADRIANA FARAH, THIAGO FERREIRA DOS SANTOS

- 1.1 The Plant 5
- 1.2 Green Coffee Production 7
- 1.3 Summary Points 9
- References 10

2. Highlights in the History of Coffee Science Related to Health

MARIA LETÍCIA GALLUZZI BIZZO, ADRIANA FARAH, JULIE ANN KEMP,
LUIZA BERGUININS SCANCETTI

- 2.1 Introduction 11
- 2.2 Coffee, Health, and Science 11
- 2.3 Main Bioactive Substances in Coffee 13
- 2.4 Implications of the Amount Consumed 13
- 2.5 Coffee and Associated Habits 14
- 2.6 Effects Related to Organs and Diseases 14
- 2.7 Coffee and Nutrition 15
- 2.8 Concluding Remarks 16
- 2.9 Summary Points 16
- References 16

3. Plant Biochemistry: Trigonelline Biosynthesis in *Coffea arabica* and *Coffea canephora*

HIROSHI ASHIHARA

- 3.1 Introduction 19
- 3.2 Secondary Metabolites Produced in Coffee Plants 19
- 3.3 Occurrence of Trigonelline 20
- 3.4 Biosynthesis of Trigonelline 20
- 3.5 Degradation of Trigonelline 22
- 3.6 Physiological Aspects of Trigonelline Metabolism in
Coffee 22
- 3.7 Summary Points 27
- References 27

4. *Coffea* Genome Organization and Evolution

PERLA HAMON, SERGE HAMON, NOROSOA J. RAZAFINARIVO, ROMAIN
GUYOT, SONJA SILJAK-YAKOVLEV, EMMANUEL COUTURON, DOMINIQUE
CROUZILLAT, MICHEL RIGOREAU, SÉLASTIQUE AKAFFOU,
JEAN-JACQUES RAKOTOMALALA, ALEXANDRE
DE KOCHKO

- 4.1 Introduction 29
- 4.2 Genomic Divergence 29
- 4.3 Genetic Diversity Based on Transposable
Elements 34
- 4.4 Summary Points 36
- References 36

5. Caffeine-free Species in the Genus *Coffea*

PERLA HAMON, JEAN-JACQUES RAKOTOMALALA, SÉLASTIQUE
AKAFFOU, NOROSOA J. RAZAFINARIVO, EMMANUEL COUTURON,
ROMAIN GUYOT, DOMINIQUE CROUZILLAT, SERGE HAMON,
ALEXANDRE DE KOCHKO

- 5.1 Introduction 39
- 5.2 Caffeine Content, Botanical Classification, and
Geographical Distribution of the Species 39
- 5.3 Genetic Control of Caffeine Biosynthesis 43
- 5.4 Caffeine Content and Duration of the Flowering–
Fructification Period 43
- 5.5 Summary Points 44
- References 44

6. Characterization of Coffee Genes Involved in Isoprenoid and Diterpene Metabolic Pathways

LUIZ FILIPE PROTASIO PEREIRA, SUZANA TIEMI
IVAMOTO

- 6.1 Introduction 45
- 6.2 Overview of the Isoprenoid Metabolic
Pathway 45
- 6.3 Chemical Composition and Biochemical Analysis of
Diterpenes 47
- 6.4 Regulatory Enzymes and Candidate Genes Involved in
Isoprenoid and Diterpene Biosynthesis 48
- 6.5 Conclusions 50
- 6.6 Summary Points 51
- References 51

7. Botanical Aspects of the Antioxidant System in Coffee

IGOR CESARINO, PAULO MAZZAFERA

- 7.1 Introduction 53
- 7.2 Conclusions 59
- References 59

8. Coffee Industry in India: Production to Consumption—A Sustainable Enterprise

NAYANI SURYA PRAKASH, JEENA DEVASIA, JAYARAMA,
RAMESH KUMAR AGGARWAL

- 8.1 Introduction 61
- 8.2 Overview of Indian Coffee Industry 61
- 8.3 Trends in Coffee Exports and Consumption 62
- 8.4 Indian Coffees: Quality Perspective 62
- 8.5 History of Coffee Cultivation in India and Early Cultivated Varieties 62
- 8.6 Unique Features of Coffee Cultivation in India 63
- 8.7 Genetic Resources and Diversity of Coffee Gene Pool 64
- 8.8 Coffee Germplasm in India 64
- 8.9 Molecular Characterization of Representative Coffee Germplasm Available in India 65
- 8.10 Coffee Species Endemic to India 65
- 8.11 Taxonomic Status of Indigenous *Psilanthus* Species Compared with *Coffea* Species 65
- 8.12 Growth Habit and Agronomic Traits of Interest of Indigenous Coffee Species 66
- 8.13 Genetic Improvement and Commercially Grown Varieties in Indian Context 66
- 8.14 Future Perspective 67
- 8.15 Summary Points 69
- References 69

Part 1.2 Coffee Processing

9. Coffee Beans and Processing

MAIK KLEINWÄCHTER, GERHARD BYTOF, DIRK SELMAR

- 9.1 Introduction 73
- 9.2 The Mode of Processing Influences Coffee Quality 73
- 9.3 Coffee Seeds Exhibit Active Metabolism during Processing 75
- 9.4 Seed Germination in the Course of Green Coffee Processing 76
- 9.5 Green Coffee Beans Suffer Drought Stress while Drying 77
- 9.6 Material Differences in Differently Processed Green Coffees 78
- 9.7 Deliberately Influencing the Metabolism of Green Coffee to Improve Its Quality 78
- 9.8 Conclusion 80
- 9.9 Summary Points 80
- References 80

10. Chemical Changes in the Components of Coffee Beans during Roasting

FEIFEI WEI, MASARU TANOKURA

- 10.1 Introduction 83
- 10.2 Components in Roasted Coffee Beans 83
- 10.3 The Roasting Degrees 83
- 10.4 Changes of Carbohydrates 84
- 10.5 Changes of Chlorogenic Acids 85
- 10.6 Changes of Trigonelline 87

- 10.7 Changes of Proteins and Free Amino Acids 87
- 10.8 Formation of Aroma Components 88
- 10.9 Torrefacto Roasting 90
- References 90

11. Generating Biomedical Polyphenolic Compounds from Spent Coffee or Silverskin

SOLANGE I. MUSSATTO

- 11.1 Introduction 93
- 11.2 Polyphenolic Compounds in Spent Coffee and Silverskin and Benefits for Human Health 93
- 11.3 Extraction of Phenolic Compounds from Natural Sources 97
- 11.4 Technologies for Extraction of Polyphenolic Compounds from Spent Coffee 98
- 11.5 Technologies for Extraction of Polyphenolic Compounds from Coffee Silverskin 102
- 11.6 Conclusions 102
- 11.7 Summary Points 104
- References 104

12. Authentication of Coffee Blends

NATALE G. FREGA, DEBORAH PACETTI, MASSIMO MOZZON,
MICHELE BALZANO

- 12.1 Introduction 107
- 12.2 Chromatography-Based Analytical Techniques 108
- 12.3 Spectroscopy-Based Analytical Techniques 113
- 12.4 Genetic Engineering-Based Analytical Techniques 114
- 12.5 Summary Points 115
- References 115

Part 1.3 Constituents and Composition

13. Unsaponifiable Matter of Coffee

DEBORAH PACETTI, PAOLO LUCCI, NATALE G. FREGA

- 13.1 Introduction 119
- 13.2 Analytical Techniques for Oil Extraction and Unsaponifiable Matter Analysis 120
- 13.3 Composition of Coffee Oil 121
- 13.4 Unsaponifiable Matter Composition: Influence of Coffee Species and Roasting Process 122
- 13.5 Summary Points 126
- References 126

14. Volatile Chemicals from Thermal Degradation of Less Volatile Coffee Components

TAKAYUKI SHIBAMOTO

- 14.1 Introduction 129
- 14.2 Volatile Chemicals Formed from Lipids in Coffee 130
- 14.3 Volatile Chemicals Formed from Carbohydrates and Sugars in Coffee 131
- 14.4 Volatile Chemicals Formed in Coffee by Maillard Reaction 132

- 14.5 Volatile Compounds Formed from Amino Acids and Proteins 132
- 14.6 Volatile Chemicals Formed from Quinic Acid, Caffeic Acid, and Chlorogenic Acids 133
- 14.7 Summary Points 134
- References 134

15. Phenolic Compounds in Coffee Compared to Other Beverages

MAURICIO A. ROSTAGNO, RENATA M.S. CELEGHINI, ISABEL C.N. DEBIEN,
GISLAINE C. NOGUEIRA, MARIA ANGELA A. MEIRELES

- 15.1 Introduction 137
- 15.2 Phenolic Compounds in Coffee 137
- 15.3 Phenolic Compounds in Tea 139
- 15.4 Phenolic Compounds in Wine 140
- 15.5 Phenolic Compounds in Fruit Juices 140
- 15.6 Concluding Remarks 141
- 15.7 Summary Points 141
- References 141

16. Isoflavones in Coffee

RITA C. ALVES, CRISTINA M.D. SOARES, M. BEATRIZ P.P. OLIVEIRA

- 16.1 Introduction 143
- 16.2 Isoflavones in Coffee 143
- 16.3 Conclusion 147
- 16.4 Summary Points 148
- Acknowledgments 148
- References 148

17. Organic Compounds in Green Coffee Beans

FEIFEI WEI, MASARU TANOKURA

- 17.1 Introduction 149
- 17.2 Composition of Green Coffee Beans 149
- 17.3 Caffeine 149
- 17.4 Trigonelline 150
- 17.5 Chlorogenic Acids 150
- 17.6 Organic Acids 150
- 17.7 Sucrose and Other Reducing Sugars 151
- 17.8 Polysaccharides 151
- 17.9 Protein and Amino Acids 159
- 17.10 Lipids 159
- 17.11 Minerals 160
- 17.12 Chemical Composition of Defective Coffee Beans 160
- References 161

18. Polysaccharides in Coffee and Their Relationship to Health: An Overview

CARMEN L. DE OLIVEIRA PETKOWICZ

- 18.1 Introduction 163
- 18.2 Green Coffee 163
- 18.3 Roasted Coffee 167
- 18.4 Health Aspects of Coffee Polysaccharides 169
- 18.5 Summary Points 171
- References 171

19. Galactomannans in Coffee

ANA S.P. MOREIRA, FERNANDO M. NUNES, M. ROSÁRIO M. DOMINGUES,
MANUEL A. COIMBRA

- 19.1 Introduction 173
- 19.2 Structural Features of Green Coffee Galactomannans 174
- 19.3 Effect of the Roasting Process on the Structure of Coffee Galactomannans 176
- 19.4 Potential Health Implications of Coffee Polysaccharides 178
- 19.5 The Effect of Galactomannans on Organoleptic Properties of Coffee Beverages 180
- 19.6 Summary Points 181
- References 181

20. Melanoidins in Coffee

JOSÉ A. RUFIÁN-HENARES, SILVIA PASTORIZA

- 20.1 Introduction 183
- 20.2 Chemical Composition 183
- 20.3 Mechanistic Formation and Structure of Coffee Melanoidins 185
- 20.4 Final Remarks 187
- 20.5 Summary Points 187
- References 188

21. Chlorogenic Acids from Coffee

YUSAKU NARITA, KUNIYO INOUE

- 21.1 Introduction 189
- 21.2 CGAs in Green Coffee Beans 192
- 21.3 CGAs in Roasted Coffee Beans 192
- 21.4 CGAs in Defective Coffee Beans, Spent Coffee Grounds, and Coffee Silverskin 197
- 21.5 Summary Points 197
- References 197

22. Caffeine in Coffee

FRANCISZEK BURDAN

- 22.1 Introduction 201
- 22.2 Content of Caffeine in Coffee and in Nutritional and Medical Products 201
- 22.3 Caffeine Consumption 205
- 22.4 Pharmacokinetics of Caffeine 206
- 22.5 Summary Points 206
- References 207

23. Coffee and Hippuric Acid

MASANORI OGAWA

- 23.1 Introduction 209
- 23.2 Metabolism of CGA to HA 209
- 23.3 Elevation of HA in Human Studies 209
- 23.4 Variation of Colonic Microflora 210
- 23.5 Biological Properties of CGA and HA 210
- 23.6 Other Sources of HA 212

- 23.7 Present Status in the Estimation of Toluene Exposure in the Occupational Field 213

- 23.8 Summary Points 213
References 214

24. Factors Affecting Acrylamide Levels in Coffee Beverages

CRISTINA M.D. SOARES, RITA C. ALVES, M. BEATRIZ P.P. OLIVEIRA

- 24.1 Introduction 217
24.2 Factors Affecting Acrylamide Levels in Coffee Beverages 217
24.3 Reduction of Acrylamide in Coffee Products 222
24.4 Conclusion 223
24.5 Summary Points 223
Acknowledgments 223
References 223

25. Mycotoxins in Coffee

TIAGO VIEIRA, SARA CUNHA, SUSANA CASAL

- 25.1 Introduction 225
25.2 What are Mycotoxins? 225
25.3 Major Mycotoxins in Coffee 226
25.4 Coffee Processing and Mycotoxin Contamination 229
25.5 Summary Points 231
Acknowledgments 231
References 231

26. Pesticide Residues in Coffee Agroecosystems

MARCELO RODRIGUES DOS REIS, FLÁVIO LEMES FERNANDES,
EVERALDO ANTÔNIO LOPES, JÉSSICA EMILIANE RODRIGUES GORRI,
FLÁVIA MARIA ALVES

- 26.1 Introduction 235
26.2 Pesticides (Fungicides, Herbicides, Insecticides, and Nematicides) 235
26.3 New Strategies for Reducing Pesticide Residues in Coffee 243
26.4 Summary Points 243
References 244

Part 1.4 Coffee Types and Coffee Drinking Culture

27. Physicochemical Characteristics of Roasted Coffee

XIUJU WANG, LOONG-TAK LIM

- 27.1 Introduction 247
27.2 Physical and Structural Characteristics of Roasted Coffee Beans 247
27.3 Chemical Composition 249
27.4 Summary Points 252
References 253

28. Espresso Machine and Coffee Composition

SAURO VITTORI, GIOVANNI CAPRIOLI, MANUELA CORTESE,
GIANNI SAGRATINI

- 28.1 Introduction 255
28.2 Espresso Coffee Machine: Working Principles 256
28.3 Influence of Water Temperature and Water Pressure on ECs Quality 257
28.4 Time Portions: Extraction Kinetic 259
28.5 Conclusions 262
28.6 Summary Points 263
References 263

29. Boiled Coffee: An Arctic Example of Potential Residual and Unmeasured Confounding in Coffee Epidemiology

LENA MARIA NILSSON

- 29.1 Introduction 265
29.2 Residual and Unmeasured Confounding in Coffee Epidemiology 265
29.3 Coffee: A Part of the Scandinavian Culture Since the 1700s 266
29.4 Chemical Implications of the Preparation of Boiled Coffee 267
29.5 Risk Associations in Boiled and Filtered Coffee 268
29.6 Lifestyle Factors Associated with Consumption of Boiled and Filtered Coffee 268
29.7 Discussion 272
29.8 Summary Points 273
References 273

30. Personality Traits and Coffee Intake

DIOGO R. LARA

- 30.1 Introduction 275
30.2 Personality Traits Associated with Coffee and Caffeine Intake 276
30.3 Differential Response to Caffeine According to Personality Traits and Psychiatric Disorders 276
30.4 Chronic Use of Coffee, Personality Traits, and Psychiatric Disorders 277
30.5 Conclusions 278
30.6 Summary Points 278
References 279

Part 1.5 By-Products and Secondary Usage

31. An Overview of the Potential Uses for Coffee Husks

LEANDRO S. OLIVEIRA, ADRIANA S. FRANCA

- 31.1 Introduction 283
31.2 Coffee Processing 283

- 31.3 Chemical Composition of CHs and CP 285
- 31.4 Review of Proposals for the Profitable Exploitation of CHs and CP 286
- 31.5 Concluding Remarks 290
- 31.6 Summary Points 290
- Acknowledgments 290
- References 290

32. Use of Coffee Husk Waste for Production of Biopesticides for Mosquito Control

SUBBIAH POOPATHI, C. MANI

- 32.1 Introduction 293
- 32.2 Method of Biopesticide Production from CHW 294
- 32.3 Salient Features of the Study 296
- 32.4 Conclusion 299
- 32.5 Summary Points 299
- Acknowledgments 299
- References 300

33. Production of Selenium-Enriched Mushrooms in Coffee Husks and Use of This Colonized Residue

MARIA CATARINA MEGUMI KASUYA, JOSÉ MARIA RODRIGUES DA LUZ, MATEUS DIAS NUNES, MARLIANE DE CÁSSIA SOARES DA SILVA, DANIELE RUELA DE CARVALHO, LAÉLIA SOARES DE ASSUNÇÃO, THIAGO DE ALMEIDA PAULA, CAROLINE MOURA, CLÁUDIA BRAGA PEREIRA BENTO

- 33.1 Introduction 301
- 33.2 Production of Different Types of Mushrooms 302
- 33.3 Enrichment of Mushrooms with Selenium 303
- 33.4 Potential Use of the Coffee Husk in Animal Feed after Fungal Colonization 305
- 33.5 Conclusions/Summary Points 307
- Acknowledgments 308
- References 308

34. Spent Coffee-Based Activated Carbons: Production, Properties, and Environmental Applications

TERESA J. BANDOSZ, KARIFALA KANTE

- 34.1 Introduction 311
- 34.2 Preparation of Coffee-Based Activated Carbons and Their Surface Features 312
- 34.3 Applications as Adsorbents from Gas and Vapor Phases 314
- 34.4 Applications of Coffee-Derived Carbons as Adsorbents from Liquid Phase 314
- 34.5 Applications of Coffee-Derived Carbons as Supercapacitors 315
- 34.6 Summary Points 316
- References 317

SECTION 2

EFFECTS OF COFFEE CONSUMPTION

Part 2.1 Infection and Immunity

35. Coffee Consumption and C-reactive Protein: Epidemiological Studies

NGOC M. PHAM, VICTOR R. PREEDY

- 35.1 Introduction 323
- 35.2 Epidemiological Evidence for the Relationship between Coffee and CRP 325
- 35.3 Interpreting and Analyzing the Data on the Relationship between Coffee and CRP 329
- 35.4 Conclusions 332
- 35.5 Summary Points 332
- References 332

36. Effects of Coffee on Antigen-Specific Immune Responses In Vivo and In Vitro

MASAO GOTO, YUKO TAKANO-ISHIKAWA

- 36.1 Introduction 335
- 36.2 Effects of Coffee Administration in a DO11.10 Allergic Mouse Model 336
- 36.3 Change in Antigen-Specific Proliferation of Splenocytes Caused by Drinking Coffee 340
- 36.4 Summary Points 341
- References 342

37. Anti-Hepatitis C Virus Treatment and Coffee Drinking

ALEXANDRE PARIENTE, RODOLPHE ANTNY

- 37.1 Factual Associations 343
- 37.2 Coffee Drinking and Liver Lesions in Hepatitis C 343
- 37.3 Coffee Drinking and Response to Treatment with Peginterferon and Ribavirin 345
- 37.4 An Interventional Study of Coffee in Hepatitis C 346
- 37.5 Conclusion 346
- References 346

Part 2.2 Cancer

38. Epidemiological Evidence on the Relation between Coffee Intake and the Risk of Head and Neck Cancer

ALESSANDRA TAVANI, CARLOTTA GALEONE, FEDERICA TURATI, LODOVICA CAVALLI, CARLO LA VECCHIA

- 38.1 Introduction 349
- 38.2 Main Text 349

- 38.3 Summary Points 357
- Acknowledgments 357
- References 357

39. Coffee Consumption and Prostate Cancer

VAN DONG HOANG, VAN DINH TRAN, ANDY H. LEE

- 39.1 Introduction 359
- 39.2 Literature Search 360
- 39.3 Epidemiological Evidence (Before 2000) 360
- 39.4 Epidemiological Evidence (2001–Present) 363
- 39.5 Limitations 364
- 39.6 Conclusions and Future Perspectives 365
- 39.7 Summary Points 365
- References 365

40. Coffee Intake and Pancreatic Cancer Risk

JEANINE M. GENKINGER, VALERIE GEBARA

- 40.1 Introduction 367
- 40.2 Coffee Consumption and Carcinogenesis 367
- 40.3 Pancreatic Cancer Epidemiology 367
- 40.4 Pancreatic Cancer Risk Factors 368
- 40.5 Coffee Intake and Pancreatic Cancer Risk in Epidemiologic Studies 368
- 40.6 Summary 372
- 40.7 Summary Points 372
- References 372

Part 2.3 Cardiovascular

41. Coffee and Risk of Cardiovascular Disease: An Overview of Epidemiologic Studies

ROMINA DI GIUSEPPE, JANINE WIRTH, CORNELIA WEIKERT

- 41.1 Introduction 377
- 41.2 Coffee and CHD Risk 377
- 41.3 Coffee and Stroke Risk 380
- 41.4 Coffee and Heart Failure Risk 382
- 41.5 Coffee and CVD Mortality 383
- 41.6 Concluding Remarks 383
- 41.7 Summary Points 384
- Acknowledgments 384
- References 384

42. Coffee Polyphenols and High Cardiovascular Risk Parameters

ANNA TRESSERRA-RIMBAU, ALEXANDER MEDINA-REMÓN,
RAMON ESTRUCH, ROSA M. LAMUELA-RAVENTÓS

- 42.1 Introduction 387
- 42.2 Coffee: An Important Source of Polyphenols 387
- 42.3 Bioavailability of Coffee Polyphenols 388

- 42.4 In Vitro and Human Cell Studies 389
- 42.5 Animal Studies 390
- 42.6 Epidemiological Studies 390
- 42.7 Clinical Trials 391
- 42.8 Summary Points 393
- References 393

43. Coffee and Hypertension: A Focus on Contrasting Acute and Chronic Effects and Nutrigenetics

GIULIA RENDA, RAFFAELE DE CATERINA

- 43.1 Introduction 395
- 43.2 Acute Effects of Coffee on Blood Pressure 396
- 43.3 Effects of Coffee on the Long-term Risk of Hypertension 397
- 43.4 Nutrigenetics of Blood Pressure Responses to Coffee Drinking 399
- 43.5 Conclusions 400
- 43.6 Summary Points 400
- References 401

44. Coffee Consumption and Risk of Venous Thromboembolism

KRISTIN E. ENGA, JOHN-BJARNE HANSEN

- 44.1 Clinical Presentation 403
- 44.2 Incidence and Complications 403
- 44.3 Pathogenesis and Risk Factors 403
- 44.4 Coffee Consumption and Risk of VTE 405
- 44.5 Underlying Protective Mechanisms of Coffee on Risk of VTE 406
- 44.6 Limitations of Findings on Behavioral Factors in Observational Studies 407
- 44.7 Conclusions 407
- 44.8 Summary Points 407
- References 407

45. Coffee Consumption and Serum Lipids: A Review of Epidemiological Studies and Experimental Studies in Humans

DEFU MA, LI CAI, XIAOLONG HAN, PEIYU WANG

- 45.1 Introduction 409
- 45.2 Epidemiological Studies on Coffee Consumption and Serum Lipids 409
- 45.3 Experimental Studies on Coffee Consumption and Serum Lipids 410
- 45.4 Boiled Coffee and Filter Coffee 411
- 45.5 Caffeinated Coffee and Decaffeinated Coffee 418
- 45.6 Conclusions 419
- 45.7 Summary Points 419
- References 419

Part 2.4 Nervous System and Behaviour

46. Coffee and its Active Compounds are Neuroprotective

JYOUNG KIM, KI WON LEE

- 46.1 Introduction 423
- 46.2 Caffeine as a Neuroprotectant 423
- 46.3 Decaffeinated Coffee Is Neuroprotective 423
- 46.4 Neuroprotective Active Compounds in Coffee 424
- 46.5 Antioxidative Activities of Phytochemicals in Coffee 425
- 46.6 Anti-inflammatory Activities of Phytochemicals in Coffee 425
- 46.7 Conclusion 426
- 46.8 Summary Points 426
- Acknowledgments 426
- References 426

47. Coffee and Amyotrophic Lateral Sclerosis

GIORGIA GIUSSANI, ELISABETTA PUPILLO, PAOLO MESSINA, ETTORE BEGHI

- 47.1 Introduction: The Disease 429
- 47.2 Coffee and ALS: The Epidemiological Evidence 429
- 47.3 Molecular Targets of Caffeine in the Central Nervous System 431
- 47.4 Studies in Animal Models 431
- 47.5 Electrophysiological Effects of Caffeine 432
- 47.6 Caffeine and Other Neurodegenerative Disorders 432
- 47.7 Effects of Other Constituents of Coffee 433
- 47.8 Summary Points 433
- References 433

48. Coffee, Granulocyte Colony-Stimulating Factor (G-CSF), and Neurodegenerative Diseases

CHUANHAI CAO, THEA MOORE, LI CHU, QING XU

- 48.1 Background 435
- 48.2 Coffee, Caffeine, and AD and Parkinson's Disease 437
- 48.3 Coffee and G-CSF 440
- 48.4 The Mechanism of Coffee Benefit in Neurodegenerative Disease 440
- 48.5 Conclusions 441
- 48.6 Summary Points 441
- Acknowledgments 441
- References 441

49. Coffee-Induced Neural Tube Defects

GIANFRANCO CARLOMAGNO, SARA DE GRAZIA, ALBERTO VIARELLI, VITTORIO UNFER

- 49.1 Introduction 443
- 49.2 NTDs, Folic Acid, and Inositol 444
- 49.3 Caffeine Intake and NTDs 445
- 49.4 Summary Points 447
- References 447

50. Coffee and Anxiety

CONCEPCIÓN VINADER-CAEROLS, SANTIAGO MONLEÓN, ANDRÉS PARRA

- 50.1 Introduction 449
- 50.2 What Is Anxiety? 449
- 50.3 Coffee and Normal Anxiety 450
- 50.4 Coffee and Pathological Anxiety 452
- 50.5 Conclusions 453
- 50.6 Summary Points 454
- Acknowledgments 454
- References 454

51. Coffee-Related Insomnia

JENNIFER COUSINS, IRIS R. BELL, RICHARD R. BOOTZIN

- 51.1 Introduction 457
- References 463

Part 2.5 Diabetes and Glucose Control

52. Coffee Intake and Diabetes

TERESA H.M. DA COSTA, CAIO E.G. REIS, ADRIANA LOFRANO PORTO, ANGÉLICA AMATO, JOSÉ G. DOREA

- 52.1 Introduction 467
- 52.2 Prospective Longitudinal Cohort Studies of Coffee and Type 2 Diabetes 467
- 52.3 Cross-sectional Studies of Coffee and Type 2 Diabetes 474
- 52.4 Summary Points 477
- References 477

53. The Influence of Acute Caffeine and Coffee Consumption on Glucose Homeostasis: Whole-Body and Tissue-Specific Effects and Mechanisms of Actions

MARIE-SOLEIL BEAUDOIN, TERRY E. GRAHAM

- 53.1 Introduction 479
- 53.2 Acute Effects of Alkaloid Caffeine on Glucose Homeostasis 479

- 53.3 Acute Effects of Caffeinated Coffee on Carbohydrate Homeostasis 481
- 53.4 Considerations in Caffeine/Coffee-Induced Insulin Resistance 484
- 53.5 Proposed Mechanisms of Action for Caffeine 484
- 53.6 Conclusion 487
- 53.7 Summary Points 488
- References 488

Part 2.6 Metabolism and Other Organ Systems

54. Coffee Consumption and Neglected Risk-Benefits on Health and Disease

ELENA ALONZO, FRANCESCA M. TROVATO, DANIELA CATALANO, GUGLIELMO M. TROVATO

- 54.1 Introduction 493
- 54.2 Surgical and Anesthesia-Related Conditions 493
- 54.3 Pregnancy, Fertility, and Sexual-Related Ailments 494
- 54.4 Menopause 494
- 54.5 Childbearing and Infancy 495
- 54.6 Infectious Disease 495
- 54.7 Respiratory Disease (Asthma and COPD) 495
- 54.8 Dentistry 495
- 54.9 Occupational Disease 495
- 54.10 Conclusions 495
- 54.11 Summary Points 495
- References 496

55. Coffee Consumption and Body Weight Regulation

MARIE-PIERRE ST-ONGE

- 55.1 Introduction 499
- 55.2 Epidemiological Evidence Linking Coffee Consumption and Weight Status 499
- 55.3 Impact of Coffee and Caffeine on EE 501
- 55.4 Effects of Coffee Consumption on Appetite Regulation 502
- 55.5 Effects of Coffee Consumption in Weight Loss 503
- 55.6 Summary Points 505
- References 505

56. Coffee Consumption and Adiponectin: An Overview of Epidemiological Studies

TAKUYA IMATOH

- 56.1 Introduction 507
- 56.2 Adiponectin 508
- 56.3 Published Epidemiological Studies on Association between Coffee Consumption and Adiponectin Level 510
- 56.4 Potential Mechanisms that Increase the Levels of Adiponectin 510

- 56.5 Which Coffee Components Play an Important Role on Increasing Adiponectin Levels? 512
- 56.6 Discussion 513
- 56.7 Summary Points 514
- References 514

57. Effect of Coffee Consumption on Oral Health

FLÁVIO HENRIQUE BAGGIO AGUIAR, NÚBIA PAVESI PINI, DÉBORA ALVES NUNES LEITE LIMA, JOSÉ ROBERTO LOVADINO

- 57.1 Introduction 517
- 57.2 Review of Literature 517
- 57.3 Summary and Conclusions 520
- 57.4 Summary Points 520
- References 520

58. Role of *Coffea arabica* Extract and Related Compounds in Preventing Photoaging and Photodamage of the Skin

HSIU-MEI CHIANG, CHIEN-WEN CHEN, CHIEN-CHIA CHEN, HSIAO-WEN WANG, JHE-HUA JHANG, YA-HAN HUANG, KUO-CHING WEN

- 58.1 Introduction 523
- 58.2 Aging and Photoaging 523
- 58.3 Mechanisms of Photoaging 524
- 58.4 Antioxidant Activity of Coffee 525
- 58.5 Coffee Prevents Skin Photoaging 525
- 58.6 Coffee Prevents Skin Tumor Formation 526
- 58.7 Effect of Coffee Constituents on Photoaging and Photocarcinogenesis 526
- 58.8 Conclusion 529
- 58.9 Summary Points 529
- References 529

59. Coffee and Renal Function and Disease

DANIELA CATALANO, FRANCESCA M. TROVATO, FABIO MARTINES, GUGLIELMO M. TROVATO

- 59.1 Introduction 531
- 59.2 Conclusion 534
- References 534

60. Coffee and Gastrointestinal Glucuronosyltransferases

CHRISTIAN P. STRASSBURG, SANDRA KALTHOFF

- 60.1 Introduction 535
- 60.2 UDP-Glucuronosyltransferases 535
- 60.3 Glucuronidation of Hydroxycinnamic Acids 537
- 60.4 Coffee-Mediated UGT1A Regulation in Cell Culture 537
- 60.5 Coffee-Mediated UGT1A Activation in Mouse Models 539
- 60.6 Contribution of UGTs to the Coffee-Mediated Protective Effects on the Metabolism and Genotoxicity of the Dietary Carcinogen PhIP 540
- 60.7 Summary Points 542
- References 542

61. Effects of Coffee on Estrogen Sulfation in Human Colon Carcinoma Caco-2 Cells

HIROOMI TAMURA

- 61.1 Introduction 545
- 61.2 Coffee Inhibits Sulfation of Estradiol in Caco-2 Cells 546
- 61.3 Characterization of the Inhibitory Activity in Coffee Toward E₂ Sulfation in Caco-2 Cells 546
- 61.4 Effects of Coffee on the Expression of *SULT1E1* 547
- 61.5 Effects of Coffee on *STS* and *BCRP* 547
- 61.6 Characterization of the Active Constituents that Regulate the Expression of the Estrogen Sulfation-Related Genes *SULT1E1*, *STS*, and *BCRP* 549
- 61.7 Conclusion 551
- 61.8 Summary Points 551
- Acknowledgments 551
- References 551

62. Coffee and the Liver: An Overview of Epidemiologic Studies

RODOLPHE ANTJ, ALEXANDRE PARIENTE

- 62.1 Summary Points 553
- 62.2 The Limits of Epidemiological Studies 553
- 62.3 Coffee and Liver Enzymes 554
- 62.4 Coffee, Cirrhosis, and Liver Fibrosis 554
- 62.5 Coffee, NAFLD, and NASH 556
- 62.6 Coffee and Hepatocellular Carcinoma 556
- 62.7 Putative Mechanisms of Action of Coffee on the Liver 557
- 62.8 Conclusions 557
- Acknowledgment 557
- References 557

63. Organic and Conventional Arabica Coffee L: Protective Effects on Liver Under Pre-neoplastic Conditions

CRISTIANA SCHMIDT DE MAGALHÃES, LUCIANA AZEVEDO,
JESSICA EMI TAKARADA, NATHÁLIA CARVALHO COSTA,
DAYENE DO CARMO CARVALHO

- 63.1 Introduction 559
- 63.2 Differentiation in Coffee Production System 560
- 63.3 Coffee Compounds 561
- 63.4 Liver Neoplasia 562
- 63.5 Coffee: Bioprotector Effect in Liver Neoplasia 562
- 63.6 Conclusion 565
- 63.7 Summary Points 565
- References 565

64. Coffee and Prevention of Nonalcoholic Fatty Liver Disease

FRANCESCA M. TROVATO, DANIELA CATALANO,
GIUSEPPE F. MARTINES, GUGLIELMO M. TROVATO

- 64.1 Introduction 567
- 64.2 Coffee and NAFLD 568

- 64.3 Summary Points 572
- References 572

65. Estimate of Acrylamide Intake from Coffee and Health Risk Assessment

ADRIANA PAVESI ARISSETO, EDUARDO VICENTE

- 65.1 Introduction 575
- 65.2 Toxicological Aspects of Acrylamide 576
- 65.3 Exposure Assessment to Acrylamide from Coffee 577
- 65.4 Health Risk Assessment 581
- 65.5 Cancer Evidence from Epidemiological Studies 582
- 65.6 Considerations about Risk Management Actions 582
- 65.7 Conclusions 582
- 65.8 Summary Points 583
- References 583

Part 2.7 Cellular and Molecular Biology

66. Protective Effects of Coffee Against Induction of DNA Damage and Cancer by Aflatoxin B₁

FRANZISKA FERK, KARL SPEER, MIROSLAV MIŠÍK, ARMEN NERSESYAN,
SIEGFRIED KNASMÜLLER

- 66.1 Introduction 587
- 66.2 Occurrence of Aflatoxins in Foods and Human Cancer Risks Caused by Consumption of Contaminated Foods 587
- 66.3 Metabolism and Detoxification of AFB₁ 588
- 66.4 Prevention of DNA Damage and Inhibition of Preneoplastic Lesions 588
- 66.5 Prevention of DNA Damage by Different Constituents of Coffee 588
- 66.6 Molecular Mechanisms 591
- 66.7 Does Coffee Protect Humans against Aflatoxin B₁? 593
- 66.8 Summary Points 594
- References 594

67. Instant Coffee and Protection against DNA Damage

TAKESHI HIRANO, HARUKI MORII,
TAMIJI NAKASHIMA

- 67.1 Introduction 597
- 67.2 Coffee Consumption and Cancer 597
- 67.3 8-Oxoguanine 598
- 67.4 8-Oxoguanine Repair System 599
- 67.5 Instant Coffee Consumption and 8-Oxoguanine Generation and Repair 599
- 67.6 Conclusions 601
- 67.7 Summary Points 601
- Acknowledgments 601
- References 601

SECTION 3

EFFECTS OF SPECIFIC COMPOUNDS FOUND IN COFFEE

Part 3.1 Infection and Immunity

68. Anti-Hepatitis B Virus Activity of Chlorogenic Acid and Its Related Compounds

JIANPING ZUO, WEI TANG, YIBIN XU

- 68.1 Anti-Hepatitis B Virus Activity of Chlorogenic Acid
and Its Related Compounds 607
- 68.2 Chlorogenic Acid Possesses Potent Anti-HBV
Activity 608
- 68.3 Anti-HBV Activity of Chlorogenic Acid-Related
Compounds 609
- 68.4 Hybrids of Caudatin and Chlorogenic Acid 610
- 68.5 Summary Points 612
- References 612

69. *Coffea canephora*: A Promising Natural Anticariogenic Product

DANIEL COHEN GOLDEMBERG, ANDREA GONÇALVES ANTONIO,
ADRIANA FARAH, LUCIANNE COPLE MAIA

- 69.1 Introduction 615
- 69.2 *Coffea canephora* 616
- 69.3 Dental Caries Pathogenesis and the Protective Role of
Coffee: A Focus on *C. canephora* Species 617
- 69.4 Conclusions 623
- 69.5 Summary Points 624
- Acknowledgments 624
- References 624

70. Kahweol, a Coffee Diterpene with Anti-inflammatory Properties

CASIMIRO CÁRDENAS, ANA R. QUESADA, MIGUEL Á. MEDINA

- 70.1 Introduction 627
- 70.2 Kahweol Modulates Nitric Oxide Synthesis 627
- 70.3 Kahweol Modulates Cyclooxygenase-2
Expression 628
- 70.4 Kahweol Modulates Cell Adhesion 629
- 70.5 Kahweol Protects against Oxidative Stress and DNA
Damage 629
- 70.6 Kahweol Targets NF- κ B/STAT-1-Mediated Inflammatory
Responses 630
- 70.7 Kahweol Targets MCP-1 Secretion in Endothelial
Cells 630
- 70.8 Kahweol Behaves as an Anti-Angiogenic
Agent 630
- 70.9 Concluding Remarks 631
- 70.10 Summary Points 632
- References 632

71. Antifungal Inhibitory Activities of Caffeic and Quinic Acid Derivatives

JAN-NAN MA, CHAO-MEI MA

- 71.1 Introduction 635
- 71.2 Caffeoylquinic, Caffeic, and Quinic Acid Derivatives
with Antifungal Activity 637
- 71.3 Summary Points 640
- Acknowledgment 641
- References 641

Part 3.2 Cancer

72. On the Linkage between Caffeine, Cytokine Secretion, and Cancer

MEIR DJALDETTI, MICHAEL BERGMAN, HERTZEL SALMAN,
HANNA BESSLER

- 72.1 Introduction 645
- 72.2 Caffeine, Cytokine Secretion, and Cancer 645
- 72.3 Summary Points 652
- References 652

73. Anticancer Effect of Caffeic Acid on Human Cervical Cancer Cells

G. KANIMOZHI, N.R. PRASAD

- 73.1 Introduction 655
- 73.2 Caffeic Acid on Cancer Cell Proliferation 656
- 73.3 Caffeic Acid on Intracellular ROS Level, Mitochondrial
Membrane Potential, and Apoptosis 656
- 73.4 Changes in the Levels of Lipid Peroxidative and the
Activities of Enzymatic Antioxidants 658
- References 660

74. Caffeic and Ferulic Acid Derivatives: Use in Breast Cancer

TERESA L. SERAFIM, NUNO MILHAZES, FERNANDA BORGES,
PAULO J. OLIVEIRA

- 74.1 Introduction: Coffee Consumption and Breast
Cancer 663
- 74.2 Caffeic and Ferulic Acid Antibreast Cancer
Activity 665
- 74.3 Summary Points 669
- References 670

75. Molecular Targets of Coffee Phytochemicals Caffeic Acid and Chlorogenic Acid in Chemoprevention

ANN M. BODE, ZIGANG DONG

- 75.1 Introduction 673
- 75.2 Antioxidant Activity of Coffee and Its
Components 674
- 75.3 Strategies for Identifying Molecular Targets of Coffee
Components 676
- 75.4 Summary Points 678
- References 678

Part 3.3 Cardiovascular

76. Caffeine and SPECT Myocardial Perfusion Imaging

FURQAN H. TEJANI, SARITA KONKA

- 76.1 Introduction 683
- 76.2 Coronary Artery Disease 683
- 76.3 TIMI Risk Score 683
- 76.4 Myocardial Ischemia 683
- 76.5 Principle of Cardiac Stress Testing 684
- 76.6 Types of Cardiac Stress Tests 684
- 76.7 Sensitivity/Specificity of Cardiac Stress Testing 684
- 76.8 Effects of Caffeine on Stress Testing 684
- 76.9 Current Guidelines Regarding Caffeine and Stress Testing 688
- 76.10 Topics to Consider and Future Investigations 688
- 76.11 Summary Points 688
- References 688

77. Caffeine and Atrial Fibrillation

ANNA VITTORIA MATTIOLI

- 77.1 Introduction 691
- 77.2 Pathophysiological Link between Caffeine and Arrhythmias 691
- 77.3 Human Studies 693
- 77.4 Energy Drinks and Caffeine 695
- 77.5 Conclusions 697
- 77.6 Summary Points 697
- References 697

78. Caffeine Cardiovascular Toxicity: Too Much of a Good Thing

CLÁUDIA DEUS, ANA F. BRANCO, PAULO J. OLIVEIRA,
VILMA SARDÃO

- 78.1 Introduction 699
- 78.2 Caffeine and the Heart 699
- 78.3 Summary Points 706
- References 707

79. Potential Effects of Chlorogenic Acids on Platelet Activation

JAE B. PARK

- 79.1 Introduction 709
- 79.2 Coffee and Its Chemicals 709
- 79.3 Chemical Properties, Absorption, and Metabolism of CHAs 710
- 79.4 Bioavailability of Chlorogenic Acids 711
- 79.5 Cardiovascular Disease and Chlorogenic Acids 712
- 79.6 Effects of Chlorogenic Acids on ROS 713
- 79.7 Effects of Chlorogenic Acids on COX-I and II Enzymes 714
- 79.8 Effects of Chlorogenic Acids on P-Selectin 714
- 79.9 Conclusion 715
- References 715

Part 3.4 Nervous System and Behaviour

80. Use of Caffeine for Cognitive Enhancement

ANDREAS G. FRANKE, CHRISTIANA BAGUSAT

- 80.1 Introduction 721
- 80.2 Mechanism of Action 722
- 80.3 Cognitive-Enhancing Effects and Side Effects of Caffeine 723
- 80.4 Epidemiology of the Use of Caffeine for CE 724
- 80.5 Conclusions 726
- 80.6 Summary Points 726
- References 726

81. Caffeoylquinic Acid Protects against Alzheimer's Disease through Inhibition of Amyloid Beta-Induced Toxicity

JUNKYU HAN, ABDEL FATTEH EL OMRI, KAZUNORI SASAKI,
HIROKO ISODA

- 81.1 Introduction 729
- 81.2 Caffeoylquinic Acid 729
- 81.3 Amyloid β 731
- 81.4 Neuroprotective Effect of CQA 731
- 81.5 Protective Effect on the Aggregation of A β 732
- 81.6 Conclusion 733
- 81.7 Summary Points 733
- References 734

82. Neuroactive β -Carbolines Norharman and Harman in Coffee

SUSANA CASAL

- 82.1 Introduction 737
- 82.2 Norharman and Harman: The Molecules 737
- 82.3 Norharman and Harman Health Impact 738
- 82.4 Norharman and Harman in Coffee 740
- 82.5 Summary Points 742
- References 742

Part 3.5 Diabetes and Glucose Control

83. Caffeine, Insulin Resistance, and Hypertension

MARIA PEDRO GUARINO, JOANA SACRAMENTO, MARIA JOÃO RIBEIRO,
SILVIA VILARES CONDE

- 83.1 Caffeine and the Metabolic Syndrome 747
- 83.2 Caffeine—Pharmacology and Mechanisms of Action 748
- 83.3 Effect of Caffeine on Insulin Action 749
- 83.4 Caffeine and Hypertension 750
- 83.5 Chronic Caffeine Administration in the Prevention and Reversion of Diet-Induced Insulin Resistance and Hypertension 751
