# Acknowledgments

from First Edition

It is difficult to thank all the individuals who have been instrumental in the completion of this project. First, I would like to give honor to God, the creator, without whom nothing I have achieved would be possible.

I would like to thank my wife, Sharon W. Giles, who has been my rock and partner and who has provided unconditional love and support. Sharon, thank you for always being there for the family and me. You bring balance, joy, and love to me always. I place this work with respect and humility at your feet. To my children Nakisha, Bradford, and Justin, thank you for your gift of love and understanding about all the time I spent away from home. You make a father proud. Bradford and Justin, thank you for being patient during this project. I love you all and appreciate the sacrifices you have endured.

I would like to dedicate this book to my mother, Lake Giles, and Father, the late Enour-mas Giles, whose love and support has sustained me through all these years. Mother, you and Father made me reach higher than I ever would have; thank you. I would like to thank my sisters Gertrude Good, Shirley Good, Vera Jean Dogan, Dorothy Ngongane, Emily Land, Sandra Mcbeth, Mary Watkins, Ruthie Mae Holland, and Vergie Mae Glenn for all the love, support, and encouragement. A special thanks to my brother, James Giles, who sacrificed himself for us during the lean times. James, thanks for providing the framework of knowledge you taught me about business; I am forever indebted to you. Thank you from the bottom of my heart, and I will always be there when you need me. Mildred Giles, my sister-in-law, is the best, always willing to assist where needed; thanks. My in-laws, Fred and Margaret Watts, without your support and love, I would be nowhere. I don't think that anyone could have in-laws as thoughtful and supporting as you; many thanks.

I would like to thank the village who assisted in shaping me as a individual. First, thanks go to all the students who have attended courses at Information Management Systems, Inc., over the years. Thank you for trusting us in your learning process. We are forever grateful. The Emanuel Chapel Baptist Church membership—thanks for the encouragement. The late Leo and Ila Thomas; Dr. Julia Long, professor of Mathematics at the University of South Carolina, nature has removed the braids; Dr. John Donovan of MIT; and Rick Strasser of Milliken and Company, who saw the positive and gave me a chance. Thanks for the vote of confidence and for being my mentor, Rick. Gus Allen, thanks for the opportunity. Nelson Smith, thanks for the words of encouragement during my tenure in LaGrange. Jessie Johnson, thanks for the promotion, and a special thanks goes to Mr. Roger Milliken, Chairman of the Board of Milliken & Company, who gave me the opportunity to work for one of the best-run companies in the world. Thanks to James Mcbeth and Tony Steward for guiding me through the difficult times in learning my new job at Milliken & Company. Thank you, Becky Sanders and Betty Joe, for helping me hone my typing skills and for being such good friends. Thanks to the late Mr. and Mrs. Emzie Smith, Mrs. Willie Mae Smith,

---

## XXII Acknowledgments

the late Mr. Bennie Smith, Aunt Deara Washington, Frank and Doris Giles, and my late grandmother Beulah Copeland for all the support during my upbringing.

The encouragement and support of friends like Richard and Linda Costa, Dr. Moses and Rita Jones; Dr. Cameron Alexander; John Collier; Marvin Anderson; Alvin and Janice Johnson; James P. Cavanagh; Bill and Sharon Livingston; Curtis Crawford, President of AT&T Micro-Electronics; and Edward Meniffee made the time special.

Special thanks to Dave Brambert, who as a friend and business partner, was always willing to encourage and listen. Thanks also for making my writing better with your comments.

### Information Management Systems, Inc., Personnel

I am one of the luckiest individuals in the world to have such a dedicated staff of Support and Systems Engineers. I would like to thank the following Systems Engineers for their hard work putting this book together. These individuals deserve special recognition: Curtis Watts and Kenneth Jones who labored very hard and long with this project and were there all the way. Thanks, guys, for keeping the fire alive. Special thanks to Palaniappan Alagan in addition to CCIE for your steadfast devotion: Larry Mobley, J.C Fang, Johnny Bass, Richard Deal, and Patrick Delio. The support staff of Cheryl Johnson, Jackie Derico, Carol Cook, Hanifah McClendon, and Sandra Jones, thanks for putting up with me during this project.

I would like to dedicate this book to my wife, Suh-Jiuan, my son, Yi-Feng, and my daughter, Xin-Hui, for their understanding and caring.

—Jeh-Chuan Fang

I would like to dedicate this book to my beloved parents and sister, Vignes, for all the fond memories.

—Palaniappan Alagan CCIE #1922

I would like to dedicate this book to my father, A.G. Watts, mother, the late Willie Pearl Watts, and the rest of my family who have supported me through all my endeavors. Mom, I will always take you with me, wherever I go. Special thanks go to my Aunt Lonnie Green, who has been a second mother to me and a best friend, and to my partner, Sheryl Jackson, for putting up with me. (Baby, it is all going to be worth it.) To my friends Shelton, Tunji, and Kenny for keeping me motivated. I would like to thank the Rev. R.L. White for his words of inspiration in times of need.

—Curtis Watts

I would like to dedicate this book to my mother, Rosetta M. Jones, for all the love and support that she has given to me; to my brothers for helping me keep it real; to my fraternity, Kappa Alpha Psi Spring '86 Mu Gamma Chapter, for grooming me for life; and to my daughter, Kiesha, and son, Kentrell, who motivate me. I also would like to thank Samella C. Walker for all of her love and support and Rhonda Blassingame for being a true friend.

—Kenneth A. Jones

**Vendor Support**

Putting together a book of this magnitude requires assistance beyond the author's scope and resources. I would like to thank Imran Qureshi of Cisco for the outstanding support given during this project; Network Associates for the Sniffer Tools used in the frame captures; Laura M. Ellertson of Novell; Prem Kaliappan of Proteon LAN Development Group; and Jay Guillette of Banyan Corporation.

This book would not have come to fruition without the patience and diligence of the staff at McGraw-Hill. I would like to thank Steve Elliot for his unwavering support and guidance during this project. Thanks, Steve, for the encouragement when I felt down and out. Also, special thanks for all the behind-the-scenes support personnel at McGraw-Hill and D&G Limited, LLC. Alan, thank you and the others at D&G—Claude, Kelly, Molly, Denny, and Linda—for a great job.

## SOFTWARE AND INFORMATION LICENSE

The software and information on this diskette (collectively referred to as the "Product") are the property of The McGraw-Hill Companies, Inc. ("McGraw-Hill") and are protected by both United States copyright law and international copyright treaty provision. You must treat this Product just like a book, except that you may copy it into a computer to be used and you may make archival copies of the Products for the sole purpose of backing up our software and protecting your investment from loss.

By saying "just like a book," McGraw-Hill means, for example, that the Product may be used by any number of people and may be freely moved from one computer location to another, so long as there is no possibility of the Product (or any part of the Product) being used at one location or on one computer while it is being used at another. Just a book cannot be read by two different people in two different places at the same time, neither can the Product be used by two different people in two different places at the same time (unless, of course, McGraw-Hill's rights are being violated).

McGraw-Hill reserves the right to alter or modify the contents of the Product at any time.

This agreement is effective until terminated. The Agreement will terminate automatically without notice if you fail to comply with any provisions of this Agreement. In the event of termination by reason of your breach, you will destroy or erase all copies of the Product installed on any computer system or made for backup purposes and shall expunge the Product from your data storage facilities.

### LIMITED WARRANTY

McGraw-Hill warrants the physical diskette(s) enclosed herein to be free of defects in materials and workmanship for a period of sixty days from the purchase date. If McGraw-Hill receives written notification within the warranty period of defects in materials or workmanship, and such notification is determined by McGraw-Hill to be correct, McGraw-Hill will replace the defective diskette(s). Send request to:

Customer Service  
McGraw-Hill  
Gahanna Industrial Park  
860 Taylor Station Road  
Blacklick, OH 43004-9615

The entire and exclusive liability and remedy for breach of this Limited Warranty shall be limited to replacement of defective diskette(s) and shall not include or extend any claim for or right to cover any other damages, including but not limited to, loss of profit, data, or use of the software, or special, incidental, or consequential damages or other similar claims, even if McGraw-Hill has been specifically advised as to the possibility of such damages. In no event will McGraw-Hill's liability for any damages to you or any other person ever exceed the lower of suggested list price or actual price paid for the license to use the Product, regardless of any form of the claim.

**THE MCGRAW-HILL COMPANIES, INC. SPECIFICALLY DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.** Specifically, McGraw-Hill makes no representation or warranty that the Product is fit for any particular purpose and any implied warranty of merchantability is limited to the sixty day duration of the Limited Warranty covering the physical diskette(s) only (and not the software or information) and is otherwise expressly and specifically disclaimed.

This Limited Warranty gives you specific legal rights; you may have others which may vary from state to state. Some states do not allow the exclusion of incidental or consequential damages, or the limitation on how long an implied warranty lasts, so some of the above may not apply to you.

This Agreement constitutes the entire agreement between the parties relating to use of the Product. The terms of any purchase order shall have no effect on the terms of this Agreement. Failure of McGraw-Hill to insist at any time on strict compliance with this Agreement shall not constitute a waiver of any rights under this Agreement. This Agreement shall be construed and governed in accordance with the laws of New York. If any provision of this Agreement is held to be contrary to law, that provision will be enforced to the maximum extent permissible and the remaining provisions will remain in force and effect.
