ACKNOWLEDGMENTS

One of the greatest joys in writing this book was working as a team with all my PhD students. From 2010 to 2013, they contributed tremendously to making this book possible. The leader of the team was Ghassan Akrouch. I thank them all very sincerely for their magnificent help. The beautiful memories of our work together on this huge project will be with me as a source of strength and friendship forever.

- · Ghassan Akrouch (Lebanon)
- · Alireza Mirdamadi (Iran)
- Deeyvid Saez (Panama)
- Mojdeh Asadollahipajouh (Iran)
- · Congpu Yao (China)
- Stacey Tucker (USA)
- Negin Yousefpour (Iran)
- · Oswaldo Bravo (Peru)
- · DoHyun Kim (Korea)
- · Axel Montalvo (Puerto Rico)
- · Gang Bi (China)
- Mohsen Madhavi (Iran)
- · Seung Jae Oh (Korea)
- Seok Gyu Kim (Korea)
- · Mohammad Aghahadi (Iran)
- · Yasser Koohi (Iran)
- · Carlos Fuentes (Mexico)

My colleagues also provided advice on many topics:

- Marcelo Sanchez (Texas A&M University)
- Don Murff (Exxon)
- Jose Roesset (Texas A&M University)
- Giovanna Biscontin (Texas A&M University)
- Chuck Aubeny (Texas A&M University)
- · Zenon Medina Cetina (Texas A&M University)
- · Vincent Drnevich (Purdue)
- Chris Mathewson (Texas A&M University)

One person stands out as a major helper in this book project by her dedication to the task and her relentless denial of the impossible: my assistant Theresa Taeger, who took care of the hundreds of illustration permission requests in record time.

I also want to thank all those who share their knowledge and intellectual property online. Without the Internet as a background resource, this work would have taken much longer.

CONTENTS

Acknowledgments			xxi
CHAPTER 1	Introd	luction	1
	1.1	Why This Book?	1
	1.2	Geotechnical Engineering	1
	1.3	The Past and the Future	2
	1.4	Some Recent and Notable Projects	2
	1.5	Failures May Occur	5
	1.6	Our Work Is Buried	5
	1.7	Geotechnical Engineering Can Be Fun	5
	1.8	Units	5
		Problems	10
		Problems and Solutions	11
CHAPTER 2	Engir	neering Geology	15
	2.1	Definition	15
	2.2	The Earth	15
	2.3	Geologic Time	15
	2.4	Rocks	17
	2.5	Soils	17
	2.6	Geologic Features	19
	2.7	Geologic Maps	20
	2.8	Groundwater	20
		Problems	22
		Problems and Solutions	22
CHAPTER 3	Soil (Components and Weight-Volume Parameters	26
	3.1	Particles, Liquid, and Gas	26
	3.2	Particle Size, Shape, and Color	26
	3.3	Composition of Gravel, Sand, and Silt Particles	28
	3.4	Composition of Clay and Silt Particles	28
	3.5	Particle Behavior	29
	3.6	Soil Structure	30
	3.7	Three-Phase Diagram	30
	3.8	Weight-Volume Parameters	31
	3.9	Measurement of the Weight-Volume Parameters	32
	3.10	Solving a Weight-Volume Problem	33
		Problems	34
		Problems and Solutions	35

171	CONT	TENTS
V1	CON	LENIS

CHAPTER 4	Soil Classification			
	4.1	Sieve Analysis	46	
	4.2	Hydrometer Analysis	47	
	4.3	Atterberg Limits and Other Limits	50	
	4.4	Classification Parameters	53	
	4.5	Engineering Significance of Classification		
		Parameters and Plasticity Chart	55	
	4.6	Unified Soil Classification System	55	
		Problems	56	
		Problems and Solutions	57	
CHAPTER 5	Rock	s	63	
	5.1	Rock Groups and Identification	63	
	5.2	Rock Mass vs. Rock Substance	63	
*	5.3	Rock Discontinuities	66	
	5.4	Rock Index Properties	66	
	5.5	Rock Engineering Properties	67	
	5.6	Rock Mass Rating	68	
	5.7	Rock Engineering Problems	69	
	5.8	Permafrost	71	
	2.0	Problems	72	
		Problems and Solutions	74	
CHAPTER 6	Site Investigation, Drilling, and Sampling			
CHAI IERO	6.1	General	80	
	6.2	Preliminary Site Investigation	80	
	6.3	Number and Depth of Borings and In Situ Tests	80	
	6.4		81	
	0.4	Drilling 6.4.1 Wet Rotary Drilling Method	81	
		6.4.2 Hollow Stem Auger Drilling Method	82	
	6.5	Sampling	83	
		6.5.1 Sample Disturbance	83	
		6.5.2 Common Sampling Methods	84	
	6.6	Groundwater Level	85	
	6.7	Field Identification and Boring Logs	87	
	6.8	Soil Names	88	
	6.9	Offshore Site Investigations	89	
		6.9.1 Offshore Geophysical Investigations	94	
		6.9.2 Offshore Geotechnical Drilling	95	
		6.9.3 Offshore Geotechnical Sampling	99	
		Problems	99	
		Problems and Solutions	100	
CHAPTER 7	In Sit	tu Tests	104	
	7.1	Standard Penetration Test	104	
	7.2	Cone Penetration Test	107	
	7.3	Pressuremeter Test	111	
	7.4	Dilatometer Test	114	
	7.5	Vane Shear Test	115	

				CONTENTS	vii
	7.6	Borehol	e Shear Test		117
	7.7	Plate Lo	pad Test		119

CHAPTER 20	Compaction			698
	20.1	Genera	L	698
	20.2	Compa	ction Laboratory Tests	698
	20.3	Compa	700	
	20.4	Compa	701	
	20.5	Intelligent Roller Compaction		701
		20.5.1 20.5.2	Soil Modulus from Vibratory Rollers Roller Measurements as Compaction	704
			Indices	705
	20.6	Impact Roller Compaction		706
	20.7	Dynamic or Drop-Weight Compaction		707
		Problen	1S	710
		Problen	ns and Solutions	710
CHAPTER 21	Retaining Walls			716
	21.1	Differen	716	
	21.2	Active, At Rest, Passive Earth Pressure,		
			ociated Displacement	716
	21.3	Earth Pr	717	
		21.3.1	Coulomb Earth Pressure Theory	717
		21.3.2	•	719
		21.3.3	Earth Pressure Theory by Mohr Circle	720
		21.3.4	Water in the Case of Compression Stress	
			(Saturated)	722
		21.3.5	Water in the Case of Tension Stress	700
		21.26	(Unsaturated or Saturated)	722
		21.3.6	Influence of Surface Loading (Line Load, Pressure)	722
		21.3.7	General Case and Earth Pressure Profiles	723
	21.4		Case: Undrained Behavior of Fine-Grained	723
		Soils		723
	21.5	At-Rest Earth Pressure		724
	21.6	Earth Pressure Due to Compaction		725
	21.7	Earth Pressures in Shrink-Swell Soils		
	21.8	Displacements		
	21.9	Gravity Walls		
		Mechanically Stabilized Earth Walls		
	21.10		External Stability	729 729
			Internal Stability	729

	21.11		ver Top-Down Walls	732
		21.11.1	Depth of Embedment and Pressure Diagram	733
		21 11 2	Displacement of the Wall, Bending	733
		21.11.2	Moment, and P-y Curves	733
	21.12	Anchor	ed Walls and Strutted Walls	735
		21.12.1	Pressure Distribution	736
		21.12.2	Pressure vs. Movement	737
		21.12.3	Base Instability	738
		21.12.4	Movement of Wall and Ground Surface	739
			Anchors	740
			Embedment Depth and Downdrag	742
	21 12	Soil Na	P-y Curve Approach and FEM Approach	745
	21.13			746
			External Stability Internal Stability	746 748
			Wall Movement	751
			Other Issues	751
	21.14		Case: Trench	751
		Problem		752
		Problem	ns and Solutions	754
			20110	751
CHAPTER 22	Earthquake Geoengineering			784
	22.1	Backgro	784	
	22.2	Earthqu	784	
	22.3	Wave P	786	
	22.4	Dynami	786	
	22.5	Ground	786	
	22.6	Seismic	789	
	22.7	Ground Response Analysis		792
		22.7.1	One-Dimensional Solution for Undamped	
			Linear Soil on Rigid Rock	792
		22.7.2	One-Dimensional Solution for Damped	
			Linear Soil on Rigid Rock	793
		22.7.3	Layered Soils	793 794
	22.8	Design l	Design Parameters	
		22.8.1	Site Classes A-E for Different Soil	
			Stiffness	795
		22.8.2	Code-Based Spectrum	795
	22.0	22.8.3	Hazard Levels	797
	22.9	Liquefac		797
		22.9.1 22.9.2	Phenomenon When to Do a Liquefaction Study?	797 797
			When to Do a Liquefaction Study? When Can a Soil Liquefy?	797 797
	22.10		Slope Stability	801
			Design of Retaining Walls	802
	22.11		Seismic Design of Gravity Walls	802
			Water Pressures on Walls during	802
			Earthquake	804
			Seismic Design of MSE Walls	805
			Seismic Design of Cantilever Walls	805
		22.11.5	Seismic Design of Anchored Walls	805
