Table of Contents

1 Rapid Methods for Food Analysis – Possibilities and Limits

R. Matissek, Berlin

1.1	Introduction	23
1.2	What is a "Rapid Method"?	26
1.2.1	Explanation of the Term "Method"	26
1.2.2	Explanation of the Term "Rapid"	28
1.2.3	Category of Rapid Methods	28
1.3	Why and Where Are Rapid Methods Employed?	29
1.3.1	Food Production	29
1.3.2	Food Inspection	29
1.4	Which Parameter Should or Could Be Determined by Rapid Methods?	31
1.4.1	Substitution Type	31
1.4.1.1	Determination of Fat Content	31
1.4.1.2	Determination of Protein Content	33
1.4.1.3	Determination of Solid Matter Content/Extract Content/ Density	34
1.4.1.4	Determination of Carbohydrate Content	35
1.4.1.5	Further Quality Attributes	35
1.4.2	Organization Type	36
1.4.2.1	Chromatography	36
1.4.2.2	Spectrometry	38
1.4.2.3	Photometry	38
1.4.2.4	Colorimetry	38
1.4.2.5	Other Methods	39
1.5	Conclusion and Outlook	39

2 Rapid Tests for the Analysis of Water and Food

K.G.Schmidt, Darmstadt

2.1	Introduction	47
2.2	Test Strips	48
2.3	Titration Tests	49

2.4	Color Card Tests.....	49
2.5	Tests with Sliding Color Comparator	51
2.6	Test Vessels for Colorimetric Measurements	52
2.7	Rotating Disk Comparator	53
2.8	Spectroquant* Analysis System for Photometric Rapid Analysis	54
2.9	Application of Test Kits in Food Analysis	54

3 Equipment for Rapid Methods in Food Quality Control

K. H. Torkler, Hamburg

3.1	Introduction.....	59
3.2	Instrumentation for Rapid Determination of Moisture Content	60
3.2.1	Infra-red Drying	60
3.2.2	Microwave-Drying.....	61
3.2.3	Measuring the Electrical Conductivity	61
3.2.4	Measuring the Dielectric Constant	62
3.2.5	Refractometric Determination.....	62
3.3	Instrumentation for Rapid Determination of Protein Content	63
3.3.1	Automated Kjeldahl Method (Kjel-Foss-Automatic)	63
3.3.2	Direct Distillation.....	63
3.3.3	Color Binding Methods.....	64
3.3.4	Measuring the Thermal Conductivity.....	64
3.4	Instrumentation for Rapid Determination of the Fat Content	65
3.4.1	Density Determination of a Solvent-Fat-Mixture (Foss-Let)	65
3.4.2	Density Determination of Raw Meat	66
3.4.3	X-Ray Absorption.....	66
3.4.4	Gerber – Determination of Milk Fat.....	66
3.4.5	Turbidity Measuring (Milko-Tester).....	67
3.5	Instrumentation for Simultaneous Rapid Determination of Several Constituents.....	67
3.5.1	Infra-red Spectroscopy.....	67
3.5.1.1	NIR-Reflection Measurement.....	68
3.5.1.2	MIR-Transmission Measurement.....	68
3.6	Importance of Equipment for Rapid Methods in Food Quality Control	70

4 Ion-Selective Electrodes

F. Honold, Weilheim and K. Cammann, Münster

4.1	Introduction	75
4.2	Measuring with Ion-Selective Electrodes	75
4.3	Types of Electrodes	81
4.4	Analysis Techniques	85
4.4.1	Direct Potentiometry	85
4.4.2	Standard Addition	86
4.4.3	Potentiometric Titration	87
4.4.4	Flow-Injection	87
4.5	Applications	88

5 Rapid Determination of Metallic Contaminants in Food and Food Raw Materials by ICP-AES and AAS

H.-J. Hoffmann, München

5.1	Introduction	93
5.2	Sample Preparation	93
5.3	Method Selection	95
5.3.1	Atomic Absorption Spectrometry	95
5.3.1.1	Flame-AAS	96
5.3.1.1.1	Air/Acetylene Flame	96
5.3.1.1.2	Nitrous Oxide/Acetylene Flame	96
5.3.1.2	Furnace AAS	97
5.3.1.3	Cold Vapour AAS Technique	97
5.3.1.4	Hydride AAS Technique	97
5.3.2	Inductively Coupled Plasma – Atomic Emission Spectrometry (ICP-AES)	98
5.3.2.1	ICP Sequential Spectrometer	99
5.3.2.2	ICP Simultaneous Spectrometer	99
5.3.2.3	Characteristics of ICP-AES	101
5.3.2.3.1	Linear Dynamic Range	101
5.3.2.3.2	Detection Limits	101
5.3.2.3.3	High Speed Measurements	103
5.3.3	ICP-MS	103
5.4	Conclusion	103

6 Thin-Layer Chromatography – A Screening Method for Food Analysis

H. Jork, Saarbrücken

6.1	Preconditions for TLC as a Screening Method	107
6.2	Quantitative Determinations	110
6.2.1	External Standard Methods	110
6.2.2	Internal Standard Method	112
6.3	Automatization	118
6.3.1	Application Units	119
6.3.2	Developing Systems	120
6.3.3	Dipping Devices	121
6.3.4	Computer Controlled Chromatogram Evaluation	121
6.4	Screening Tests	122
6.4.1	Polycyclic Aromatic Hydrocarbons	123
6.4.2	Pesticides	133
6.4.3	Anabolics	133
6.4.4	Antibiotics and Chemotherapeutics	137
6.4.5	Mycotoxins	137
6.4.6	Preservatives and Antioxydants	144
6.4.7	Alkaloids	144
6.5	Summary and Discussion	151

7 High Performance Liquid Chromatography (HPLC) Reflections on Application in Food Analysis

H. Engelhardt, Saarbrücken

7.1	Introduction	167
7.2	Enhancing the Detection Sensitivity by Application of Micro Bore Columns	168
7.3	Sample Preparation and Sample Concentration by Column Switching	169
7.4	Coupling HPLC with UV/VIS Spectroscopy	172
7.5	Improvement of Detection Sensitivity by Derivatization Reactions	174
7.6	Outlook	181

8 Characterization of Changes during Processing and Storage by Chromatographic Determination of Tracer Substances

K.Eichner, Münster

8.1	Introduction	185
8.2	Separation and Detection of Amadori Compounds by Liquid Chromatography	186
8.2.1	Amino Acid Analysis	186
8.2.2	High Pressure Liquid Chromatography with Specific Post-Column Derivatization	188
8.3	Separation of Amadori Compounds by Capillary Gas Chromatography [12]	192
8.3.1	Methodology	192
8.3.2	Examination of Tomato Powder	193
8.3.3	Examination of Malts and Beers	194
8.4	Analytical Determination of Degree of Roasting of Cocoa [14]	199
8.4.1	Methodology	200
8.4.1.1	Separations by HPLC	200
8.4.1.2	Extraction of Cocoa Beans	201
8.4.1.3	Steam Distillation of Volatile Cocoa Constituents	201
8.4.2	Tracer Substances for Determination of Degree of Roasting of Cocoa Beans	201
8.5	Concluding Remarks	206

9 Rapid Sample Preparation for Instrumental Analysis

P. Schreier and O. Fröhlich, Würzburg

9.1	Introduction	211
9.2	Sorbent Extraction	215
9.2.1	Liquid/Liquid Technique	215
9.2.2	Liquid/Solid Technique	218
9.3	Practical Examples	221
9.4	Summary	231

10 Fast Quality Control by Headspace Analysis

R. Wittkowski, Berlin

10.1	Introduction.....	235
10.2	Methodology.....	237
10.3	Quantitative Analysis.....	238
10.4	Quantitative Analysis by Multiple Headspace Extraction.....	238
10.5	Purge and Trap Method.....	239
10.6	Application.....	240
10.7	Conclusion.....	244

11 Application of Infra-Red Spectroscopic Methods

L. Rudzik, Hannover

11.1	Introduction.....	249
11.2	Application Examples for MIR Spectroscopy.....	250
11.2.1	Advantages and Disadvantages of the Method.....	252
11.2.2	Practical Examples.....	252
11.3	NIR Spectroscopy.....	254
11.4	Summary.....	256

12 Application of NIR to Analysis of Dairy Products

G. Zaeschmar, Leer

12.1	Introduction.....	259
12.2	Discussion of the Method.....	259
12.3	Measurement Principles.....	261
12.4	Operation.....	261
12.5	Function.....	261
12.6	Calibration.....	262
12.7	Measuring Liquids.....	263

13 Low Resolution NMR

P. J. Barker, Melbourne

13.1	Introduction	267
13.2	NMR Methods – Continuous Wave (CW) or Pulsed NMR	268
13.2.1	What is NMR?	269
13.2.2	Continuous Wave (CW) NMR	269
13.2.3	Pulsed NMR	269
13.2.4	A Typical Pulsed NMR Spectrometer	270
13.3	Experimental Considerations	271
13.3.1	Sample Size	271
13.3.2	Different Types of Measurement	272
13.3.3	The "Spin Echo" Method	273
13.3.4	Calibration	274
13.3.5	Sample Preparation	275
13.4	Some Typical Results for the Food Industry	276
13.4.1	SFI of Edible Oils and Fats	276
13.4.2	Measurement of Cocoa Butter in Chocolate Powder	277
13.4.3	Moisture Determination in Maize Gluten	278
13.4.4	General Applications	278
13.4.5	Future Developments	279
13.4.6	Research Applications	280
13.5	Summary	280

14 Rapid Determination Methods for Drugs and Fattening Substances in Animals

H. Büning-Pfaue, Bonn

14.1	Introduction	287
14.2	Twelve Plate Inhibition Test	287
14.3	Sample Preparation/Drug Extraction	288
14.4	Sorbent Extraction/Solid-Liquid Extraction	289
14.5	Thin Layer Chromatography (TLC)	291
14.6	Immunological Tests	292
14.7	Selected Ion Monitoring (SIM-Technique)	293
14.8	UV Spectra Comparison	294
14.9	Combination of Several Detection Systems	294
14.10	Electro-Chemical Detection	294

15 Enzymatic Rapid Methods

G. Henniger, Tutzing

15.1	Enzymatic	299
15.2	Rapid	301
15.3	Methods	302
15.3.1	Reference Methods	303
15.3.2	Commonly Used Methods	303
15.3.3	Rapid Methods	303
15.4	The "Quality" of Enzymatic Methodology	304
15.5	Conclusion: Enzymatic Methods are Rapid Methods	306
15.6	The Enzymatic Methods	307
15.6.1	Carbohydrates	307
15.6.2	Inorganic and Organic Acids	309
15.6.3	Alcohols	313
15.6.4	Other Analytes	314

16 Immunochemical Methods

H.O. Günther, Augsburg

16.1	Introduction	321
16.2	Methods	322
16.2.1	Counter Current Electrophoresis According to Gocke and Howe [2]	322
16.2.1.1	Principle	322
16.2.1.2	Performance	322
16.2.1.3	Total Working Period	324
16.2.1.4	Applications for this Method	325
16.2.2	Enzyme Immuno Assay (=ELISA)	325
16.2.2.1	Principle	326
16.2.2.2	Production	326
16.2.2.3	Performance	328
16.2.2.4	Evaluation	329
16.3	Outlook	329

17 Theory and Application of Isotachophoresis in Food Analysis

P. Offizorz, Berlin

17.1	Introduction	333
17.2	Instrumentation.....	333
17.3	Basic Theory	334
17.3.1	Ionic Mobility	334
17.3.2	Concentrating Effect	337
17.4	Detection	337
17.4.1	UV-Detector.....	337
17.4.2	Thermometric Detector	337
17.4.3	Conductometric and Potential Gradient Detectors	338
17.5	Applications of Isotachophoresis in Food Analysis.....	339
17.6	Summary	344

18 "Rapid Methods" in Sensory Analysis of Food

A. Fricker, Karlsruhe

18.1	Introduction	349
18.2	Methods of Sensory Analysis	349
18.2.1	Difference Tests	350
18.2.1.1	Paired Difference Tests (DIN 10 954)	350
18.2.1.1	Duo-Trio Test.....	351
18.3	Comment on Terminology	351
18.4	Evaluation Tests	351
18.4.1	Evaluation Test with Scale.....	352
18.4.2	Ranking Test (DIN 10 963).....	353
18.5	Summary	353

19 Physical Methods for Rheology, Consistency and Particle Size Measurements

E. Windhab, Osnabrück

19.1	Rheology – Consistency	357
19.1.1	Rheological Fundamentals	357
19.1.2	Measurement of Rheological Parameters	360
19.1.2.1	Absolute Rheological Parameters	360
19.1.2.1.1	Presumptions	360
19.1.2.1.2	Experiments	360
19.1.2.1.3	Measuring Geometries	362
19.1.2.1.4	Measuring Equipment	362
19.1.2.1.5	New Measuring Principle	363
19.1.2.2	Measurement of Empirical Rheological Parameters	363
19.1.2.2.1	Measuring Principles	363
19.1.2.2.2	Measuring Devices (Manufacturers)	366
19.2	Particle Size Measurement	366
19.2.1	Fundamentals of Particle Size Measurement	367
19.2.2	Measuring Methods	369
19.2.2.1	Measuring Devices	370
19.2.2.2	Short Time Sieving Analysis	372

20 Microbiological Rapid Methods

R. Zschaler, Hamburg

20.1	Direct and Indirect Count Determination Methods	375
20.1.1	Direct Epifluorescence Filter Technique	375
20.1.2	Limulus Amoebocyte Lysate Test	378
20.1.3	Enzyme Linked Immuno Sorbent Assay	378
20.2	Cultural Methods	380
20.2.1	Impedance Measurement	380
20.2.2	Measurement of Gas Changes	381
20.2.3	ATP Measurement	382
20.2.4	Direct Detection Method for <i>E. coli</i>	382
20.3	Other Identification Methods and Confirmation Tests	384
20.3.1	Staphyslide-Test	384
20.3.2	Aminopeptidase Test	385
20.3.3	Detection of Cytochromoxidase	388
20.3.4	Identification of Enterobacteria, Non-Fermenter, Yeasts, Staphylococci and Clostridia	388
