Federal Courts

The federal court system is a complex of courts that handle cases involving federal law, the Constitution, and disputes between states. The system is organized into three main levels: the Supreme Court, the Circuit Courts of Appeals, and the District Courts. The Supreme Court is the highest court in the land, and it has the final say on all federal cases. The Circuit Courts of Appeals are the intermediate courts, and they review the decisions of the District Courts. The District Courts are the trial courts, and they handle the vast majority of federal cases. The federal court system is a vital part of our government, and it plays a crucial role in protecting our rights and ensuring the rule of law.
