Preface

These four volumes contain the 1991 edition of the American Jurisprudence 2d General Index. This revised index provides detailed, up-to-date coverage of volumes 1-82 of American Jurisprudence 2d, including all replacement volumes published as of December, 1990.

The publisher's staff of attorney-editors has created and meticulously compiled more than one million entries in this index, tying together in one place related entries, and where appropriate, cross-referring to collateral and interrelated material so that relevant points are not overlooked.

When necessary, the new index will be updated by the issuance of a supplemental pamphlet or by a complete replacement.
