CONTENTS

CHAPTER 1

THE ORIGIN AND DEVELOPMENT OF THE CELLS OF THE BLOOD IN THE EMBRYO, INFANT AND ADULT

Blood Formation in the Embryo	29
The Blood of the Fetus	31
The Interrelationship of the Blood Cells	35
Post-natal Hematopoiesis	38
Structure of the Bone Marrow	38
Cytology and Cytochemistry of the Bone Marrow	40
The Release of Mature Elements	44
Factors Which Govern the Formation, Maturation and Release of the Blood Cells into the Blood Stream	44
Extramedullary Hematopoiesis	48
The Study of the Bone Marrow	49
Technic	50
Dangers and Limitations of Marrow Biopsy	59
Bone Marrow Examination at Autopsy	59
The Normal Bone Marrow	60
The Bone Marrow in Disease	62
The Myeloid: Erythroid (M:E) Ratio	62
Spleen and Lymph Node Examination	66
The Inheritance of Abnormalities of the Blood	70
Bibliography	73

CHAPTER 2

THE ERYTHROCYTE

Morphology and Normal Values

Discovery of the Erythrocyte and Early Studies	79
Normal Development of the Erythrocyte	80
Pronormoblast	80
Basophilic Normoblast	80
Polychromatic Normoblast	81
Orthochromatic (Acidophilic) Normoblast	82
Diffuse Basophilia	83
Punctate Basophilia	83
Reticulocytes	84
The Megaloblast Series	88
The Mature Red Corpuscle	89
Structure	89
Function of the Erythrocyte	90
Red Corpuscles of Various Mammals and Lower Vertebrates	91
Abnormal Forms of the Erythrocyte	93
Elliptical Red Corpuscles	96
Normal Values for Number of Erythrocytes, Quantity of Hemoglobin and Volume of Packed Red Cells	99
"Per cent" of Hemoglobin	100
Physiological Variations	101
Normal Values for the Size and Hemoglobin Content of the Red Corpuscle	107
Physiological Variations	107
The Response to Increased Demands for Hemoglobin and Red Corpuscles	108
Rôle of the Spleen	109
Increased Activity of the Hematopoietic System	110
Reticulocytosis	110
Other Morphological Changes in the Red Corpuscles	111
Thrombocytosis and Leukocytosis	112
Bibliography	112

CHAPTER 3

THE ERYTHROCYTE—(Continued)

The Production and the Destruction of Red Corpuscles

Introduction	118
Chemical Composition and Metabolism of the Red Corpuscle	120
Special Enzymes	124
Biosynthesis and Catabolism of Hemoglobin	124
The Porphyrins	128
Catabolism of Hemoglobin	129
Iron Metabolism	131
Absorption of Iron	132
Excretion of Iron	134
Iron Requirements	134
Regulation of Iron Absorption	135
Iron Transport	136
Iron Storage	138
The Requirements for Red Cell Production	138
Amino Acids and Protein	140
Minerals	140
Copper	140
Rôle in Erythropoiesis	142
Cobalt	143
The B Vitamins	144
Vitamin B ₆	145
Riboflavin	146
Nicotinic Acid	146
Folic Acid, Vitamin B ₁₂ and Related Substances	146
Metabolism and Functions of Vitamin B ₁₂ and Folic Acid	150
Ascorbic Acid	153
Hormones and Miscellaneous Substances	154
The Fate of the Red Corpuscle	154
Life Span of Red Corpuscles	154
Manner of Destruction	155
Agglutination and Hemolysis of Red Corpuscles	156
Evidence of Exaggerated Red Cell Destruction	161
Hemoglobinemia	162
Methemalbumin	162
Hemosiderinuria	163
Icterus Index	163
Van den Bergh Test	164
Tests for Urobilinogen and Urobilin	165
Quantitative Aspects of Hemoglobin Production and Destruction	168
Erythrocyte Production	170
Erythrocyte Destruction	172
Abnormalities of Hemoglobin	173
Abnormalities Associated with the Heme Moiety	173
Carboxyhemoglobin	174
Methemoglobin	174
Sulfhemoglobin	176
Enterogenous Cyanosis	177
Porphyria	177
Congenital Porphyria	177
Acute Porphyria	178
Porphyria Cutanea Tarda	180
Abnormalities Associated with the Globin Moiety	181
Bibliography	184

CHAPTER 4

THE LEUKOCYTES

Description of the Leukocytes	200
The Myeloid Series	200
The Myeloblast	200
Myelocytes	202

Description of the Leukocytes—	
Metamyelocytes or "Juvenile" Forms	205
Polymorphonuclear Neutrophils	205
Eosinophils	209
Basophils ("Mast" Leukocytes)	209
Macropolycytes	209
Pelger-Huët Anomaly of the Granulocytes	209
Lymphocytic Series	210
Lymphoblasts	211
Plasma Cells	212
Monocytic Series	212
Monoblast	212
Monocytes	212
Promonocytes	213
Epithelioid Cell	213
Macrophage, Clasmatocyte or Histiocyte	215
Chemical Composition and Metabolism of Leukocytes	218
Function and Biologic Properties of Leukocytes	220
Life Span of Leukocytes	225
Normal Values for Leukocytes	226
Physiological Leukocytosis	226
Systems for Differential Counting	229
The Technic of the Differential Count	231
Normal Values for Different Types of Leukocytes	232
Variations of Leukocytes in Disease	232
Leukocytosis, Neutrophilia	232
Causes of Neutrophilia	232
Factors Affecting the Magnitude of Neutrophilia	235
Leukopenia	237
Causes of Leukopenia	237
Leukopenic Index	238
Neutropenia Without Leukopenia	239
Pathogenesis of Leukopenia	239
Eosinophilia	240
Basophilic Leukocytosis	243
Lymphocytosis	243
Acute Infectious Lymphocytosis	244
Plasma Cells	245
Monocytosis	246
Interpretation and Prognostic Value of the Leukocytic Picture	247
Leukemoid Blood Pictures	248
Bibliography	250

CHAPTER 5

BLOOD PLATELETS AND COAGULATION

The Blood Platelet	261
Morphology	261
Physical and Chemical Properties	262
Origin of Blood Platelets	263
Megakaryocytes	264
Enumeration of Blood Platelets	265
Indirect Methods	266
Direct Methods	267
Volume Occupied by Platelets	269
Normal Values for Platelets	269
Variations in Platelets in Disease	270
Thrombocythemia	271
Function of Platelets	272
Hemostasis and Coagulation	273
Hemostasis	273
Theories of Coagulation	275
Fibrinogen and Fibrin	275
Thrombin	276
Prothrombin	276
Factor V	276

Hemostasis and Coagulation—	
Factor VII	276
Thromboplastin	277
Antihemophilic Globulin, Plasma Thromboplastin Component, Plasma Thromboplastin Antecedent and Other Factors	278
Interaction of the Various Components in the Process of Coagulation	278
Natural Inhibitors of Coagulation	281
Fibrinolysis	283
The Causes of Hemorrhage	283
Manner of Production and Occurrence of Deficiencies of Prothrombin and Factors V and VII	283
Clinical Methods for the Measurement of Disturbances of Hemostatic Function	286
Coagulation Time	286
Retraction Time of Blood Clot	287
Estimation of Bleeding Time	288
Capillary Fragility Tests	288
Simple Screening Test for Abnormal Coagulation of Blood	289
Plasma Clotting Time	290
Quantitative Determination of Prothrombin, Factor V and Factor VII	290
Estimate of Available Thromboplastin: "Prothrombin Consumption Test"	293
Thromboplastin Generation Test	295
Test for Circulating Anticoagulants	295
Fibrinogen	296
Significance of Coagulation and Capillary Fragility Tests	296
Bibliography	297

CHAPTER 6

THE BLOOD AS A WHOLE

The Total Quantity of Blood	304
Methods for Determination	304
Normal Values	307
Physiological Variations	310
Variations in Disease	310
The Specific Gravity of Blood	310
The Blood Viscosity	313
Suspension Stability of the Blood—The Sedimentation Test	314
The Nature of the Sedimentation Phenomenon	315
Methods	317
Normal Values and Physiological Variations	320
Variations in Disease	321
Bibliography	322

CHAPTER 7

BLOOD GROUPS AND BLOOD TRANSFUSION

The Blood Groups	328
ABO System	328
MNSs Blood Groups	329
P Blood Groups	329
Rh System	329
Kell, Lewis, Lutheran, Duffy, Kidd and Other Blood Groups	332
Ethnological Distribution of Blood Groups	334
Relation to Genetics and to Anthropology	334
Medicolegal Applications	335
Relation to Human Disease	335
Methods of Blood Typing	336
Errors in Blood Typing and Their Prevention	338
Special Procedures for the Detection of Isoagglutinins	340
Blood Transfusion	341
Indications	341
Choice of Methods and Methods of Preservation	343
Beneficial Effects	347
Potential Unfavorable Effects of Transfusions	347
Prevention of Transfusion Reactions	354
Treatment of Reactions	356
Bibliography	358

CHAPTER 8

THE PRINCIPLES AND TECHNIC OF BLOOD EXAMINATION

Obtaining the Specimen	363
Small Samples	363
Collection of Blood From Veins	364
Anticoagulants	365
Macroscopic Examination of the Blood	366
Technic	366
Volume of Packed Red Cells	369
Reddish-gray Layer of Packed Leukocytes and Platelets	370
Color and Opacity of the Blood Plasma	372
Cleaning the Hematocrit	373
Other Methods for Determining Volume of Packed Red Cells	373
Enumeration of Red Corpuscles	374
Critique of Method	378
Enumeration of White Corpuscles	379
Inherent Errors in Leukocyte Counting	380
Hemoglobinometry	381
Types of Instruments	382
Procedures for Hemoglobin Measurement	382
Choice of Methods and Instruments	386
Calibration of Instruments	387
Measurement of Heme Pigments Other Than Hemoglobin	388
The Measurement of the Size and Hemoglobin Content of Red Corpuscles	390
Determination of Size of the Red Corpuscles	390
Measurement of Cell Diameter	390
Measurement of Volume of Red Corpuscles	392
Measurement of Mean Corpuscular Thickness	392
Estimation of Hemoglobin Content of the Red Corpuscles	393
Relative Value of Indexes and Corpuscular Constants	396
Accuracy of Methods	397
Care and Preparation of Slides and Cover-glasses	399
Examination of the Wet Film of Blood	399
Darkfield Illumination	400
Supravital Staining	400
Phase-contrast Microscopy	401
Preparation of Blood Smears	402
The Staining of Blood Smears	404
Choice of Methods for Microscopic Study of Leukocytes	409
Demonstration of L.E. Phenomenon	410
Bibliography	411

CHAPTER 9

ANEMIA: GENERAL CONSIDERATIONS AND TREATMENT

Definition of Anemia	416
Concept of the "Erythron"	416
Classification of Anemias	418
General Symptomatology of Anemia	423
Integumentary System	424
Respiratory and Circulatory Systems	425
Neuromuscular System	428
Gastro-intestinal System	428
Genito-urinary System	428
Metabolism	428
Other Systems	429
Treatment of Anemia	429
General Measures	435
Diet in Anemia	436
Agents Which Relieve or Modify the Underlying Disorder	437
Administration of Substances Specifically Lacking	440
Vitamin B ₁₂ , Folic Acid and Related Substances	440
Methods of Testing Potency of Anti-anemic Substances	447
Effects of Treatment	448
Untoward Effects	454

Treatment of Anemia—	
Iron	454
Relative Value of Various Sources of Iron	455
Administration of Iron	455
Effects of Iron Therapy	457
Bibliography	459

CHAPTER 10

PERNICIOUS ANEMIA AND RELATED MACROCYTIC ANEMIAS

Pernicious Anemia	465
Synonyms and Definition	465
History	465
Etiology	466
Symptomatology	471
Mode of Onset and Initial Symptoms	471
Outward Appearance of the Patient	472
Alimentary System	473
Circulatory System	474
Genito-urinary System	475
Nervous System	475
Laboratory Findings	476
The Anemia	476
Leukocytes	480
Platelets	480
Red Cell Resistance	480
Blood Plasma	481
Total Blood Volume	481
The Bone Marrow	481
Gastro-intestinal Secretions	483
Urine	485
Chemical and Other Evidences of Disturbed Metabolism	485
Diagnosis	488
Complications	492
Treatment	492
Prognosis	493
Pathology	495
Sprue, Idiopathic Steatorrhea and Celiac Disease	496
Definitions, Synonyms and History	497
Etiology	497
Symptomatology	498
Mode of Onset	498
Comparison of Clinical Picture with That of Pernicious Anemia	498
Alimentary System	499
Skeletal System	501
Nervous System	502
Outward Appearance of the Patient	502
Laboratory Findings	504
The Blood and Bone Marrow	504
Gastro-intestinal Secretions and Stool	505
Chemical Evidences of Metabolic Abnormalities	505
Diagnosis	507
Complications	509
Treatment	509
Prognosis and Maintenance Therapy	511
Pathology	512
Other Nutritional Macrocytic Anemias	512
" Tropical " Macrocytic Anemia	512
Temperate Zones	513
Pellagra	514
Macrocytic Anemia Developing during Pregnancy. Pernicious Anemia of Pregnancy	515
Macrocytic Anemia in Association With Surgical Procedures or Organic Disease in the Gastro-intestinal Tract	517
Carcinoma of the Stomach	517
Gastrectomy and Gastro-enterostomy	517
Intestinal Strictures and Anastomoses	518
Chronic Dysentery. Regional Ileitis. Chronic Pancreatic Disease and Resection of Small Intestine	519

Macrocytic Anemia in Disease of the Liver	519
Infestation With Fish Tapeworm	521
Macrocytic Anemia in Hypothyroidism	522
Refractory Megaloblastic and Achromic Anemia	524
Pathogenesis of Pernicious Anemia and Related Forms of Macrocytic Anemia	525
Rôle of Achylia Gastrica	526
Intrinsic Factor	527
The Anti-pernicious Anemia Principle	529
Rôle of Folic Acid and Relationship of Various Forms of Megaloblastic Anemia	529
Experimental Production of Pernicious Anemia and Related Disorders	533
Possible Rôle of Toxins	535
Possible Causes of Achylia Gastrica, and Faulty Intestinal Function in Pernicious Anemia, Sprue and Related Disorders	536
Bibliography	536

CHAPTER 11

THE NORMOCYTIC ANEMIAS

Acute Post-hemorrhagic, Primary Refractory, Simple Chronic and Myelophthisic Anemias

General Considerations	554
Acute Posthemorrhagic Anemia	555
Symptomatology	556
Blood Findings	557
Diagnosis	558
Treatment	559
Anemias Characterized Chiefly by Lack of Blood Formation	559
General Considerations	559
The Pancytopenias	560
Primary Refractory Anemias	561
Definition and Synonyms	561
Classification and Etiology	562
Benzol	564
Organic Arsenicals	566
Chloramphenicol, Mesantoin, Gold and Other Compounds	566
Exposure to Ionizing Radiation	567
Aplastic Anemia in Association with Various Disorders	572
Idiopathic Refractory Anemias	573
Symptomatology	574
Blood Changes	575
Bone Marrow	575
Diagnosis	576
Treatment	577
Prognosis	578
Pathology	580
Pathogenesis	580
Simple Chronic Anemia	581
Definition	581
Etiology	582
Inflammatory Disease	582
Renal Disease	582
Malignancy	582
Miscellaneous Disorders	583
Parasite Infestation	584
Endocrine Disorders	584
Vitamin Deficiencies	584
Pregnancy	584
Symptomatology	585
Blood Changes	585
Bone Marrow	587
Diagnosis	587
Treatment	587
Prognosis	588
Pathogenesis—Anemia of Infection	588
Anemia of Chronic Nitrogen Retention	591

Myelophthisic Anemia	592
Definition and Synonyms	592
Etiology	593
Symptomatology	595
Blood Changes	595
Diagnosis	595
Treatment	598
Prognosis	598
Pathology	598
Pathogenesis	599
Bibliography	600

CHAPTER 12

NORMOCYTIC ANEMIAS—(Continued): HEMOLYTIC ANEMIAS

Hemolytic Anemias	608
Definition	608
General Symptomatology	609
Variety of Forms	609
Onset	610
Symptoms of Rapid Destruction of Blood	610
Vascular Disturbances	612
Physical Findings	612
Findings in the Blood, Urine and Stool	612
Bone Marrow	616
Etiology	617
Hemolytic Anemia Due to Extracorporeal Factors	617
Infectious Agents	617
Chemical Agents	617
Physical Agents	621
Vegetable and Animal Poisons	626
Symptomatic Hemolytic Anemias	627
Idiopathic Acquired Hemolytic Anemias	629
Antibodies in Acquired Hemolytic Anemias	630
Diagnosis	632
Myoglobinuria. Haff Disease	632
Familial Non-hemolytic Jaundice	634
Special Tests for Differentiation of Hemolytic Anemias	634
Prognosis and Treatment	638
Blood Transfusion	639
Splenectomy	639
ACTH and Cortisone	640
Pathology	641
Pathogenesis	641
Paroxysmal (Cold) Hemoglobinuria	645
Definition	645
History, Etiology and Pathogenesis	645
Symptomatology	646
Laboratory Findings	646
Diagnosis	647
March Hemoglobinuria	648
Treatment	649
Chronic Hemolytic Anemia With Paroxysmal Nocturnal Hemoglobinuria	649
Definition, Synonyms and History	649
Symptomatology	649
Diagnosis	650
Prognosis and Treatment	651
Pathology	652
Pathogenesis	652
Hereditary Spherocytosis	654
Definition, History and Synonyms	654
Etiology	654
Symptomatology	655
Diagnosis	660
Complications	661
Treatment	661

Hereditary Spherocytosis—	
Prognosis	662
Pathology	662
Pathogenesis	663
Bibliography	664

CHAPTER 13

NORMOCYTIC (HEMOLYTIC) ANEMIAS—(Continued)

Sickle Cell Disease. Thalassemia and the Abnormal Hemoglobin Syndromes

Sickle Cell Anemia.	677
Definition, Synonyms and History	677
Inheritance, Incidence and Geographic Distribution	677
Age and Sex Incidence	680
Symptomatology	680
Laboratory Findings	684
Blood Changes in Persons Having Only the Sickle Cell Trait	692
Diagnosis	693
Treatment	693
Complications and Prognosis	694
Pathology	695
Pathogenesis	696
Other Disorders Associated with the Presence of Abnormal Hemoglobins	700
Hemoglobin C Trait	700
Homozygous C Disease	700
Sickle Cell-Hemoglobin C Disease	703
Hemoglobin D	704
Hemoglobin E	704
Hemoglobins G, H and I	704
Thalassemia	705
Definitions, Synonyms and History	705
Incidence and Racial Distribution	706
Inheritance	707
Symptomatology	707
Thalassemia Major. Cooley's Anemia	707
Thalassemia Minor	711
Diagnosis	714
Course and Prognosis	715
Treatment	716
Pathology	716
Pathogenesis	717
Combinations of Thalassemia and Various Abnormal Hemoglobins	719
Sickle Cell-Thalassemia. Micro-drepanocytic Disease	719
Hemoglobin C-Thalassemia	719
Hemoglobin E-Thalassemia	719
Other Gene Combinations	719
Differentiation of the Various Abnormal Hemoglobin Syndromes	719
Paper Electrophoresis	720
Alkali Denaturation	723
Bibliography	724

CHAPTER 14

HYPOCHROMIC MICROCYTIC (IRON DEFICIENCY) ANEMIA

Definition	733
Synonyms and Sub-groups	733
Etiology	733
Hemorrhage	734
Disorders of the Alimentary Tract	735
Diet	735
Infants	735
Pregnancy	735
Hookworm	735
Sex	735
Chlorosis	735
Chronic Hypochromic Anemia	738

Symptomatology	739
Gastro-intestinal Disturbances	739
Plummer-Vinson Syndrome	740
Cardio-respiratory Disturbances	740
Genito-urinary System	740
Endocrine Features	741
Neuromuscular System	741
Physical Examination	741
Laboratory Findings	743
The Blood	743
Gastric Secretion	745
Bone Marrow	745
Diagnosis	746
Complications and Sequelæ	747
Treatment	747
Prognosis and Course	749
Pathology	749
Pathogenesis	750
Bibliography	754

CHAPTER 15

ANEMIA AND OTHER DISORDERS IN INFANCY AND CHILDHOOD

General Considerations	758
Anemias of the Newborn Baby	760
Hemolytic Disease of the Newborn (Erythroblastosis Fetalis)	760
Definition. Hydrops Fetalis, Icterus Gravis Neonatorum, Congenital Anemia of the Newborn	760
Etiology	760
Symptomatology	761
The Blood	762
Other Laboratory Findings	763
Diagnosis	763
Course, Prognosis and Sequelæ	764
Treatment	765
Pathology	767
Pathogenesis	767
Congenital Hypoplastic Anemia	769
Nutritional Anemias	770
"Iron Deficiency" Anemia	770
Vitamin Deficiency, Goat's Milk Anemia, Macrocytic Anemias	772
Anemia of Prematurity and of Twins	774
Hemolytic Anemias	776
Diseases With Outstanding Splenomegaly	776
Gaucher's Disease	776
Definition and History	776
Etiology	776
Symptomatology	777
The Blood	778
Diagnosis	778
Treatment	778
Prognosis	778
Pathology	779
Pathogenesis	780
Niemann-Pick's Disease	780
Histiocytosis X (Eosinophilic Granuloma of Bone, Letterer-Siwe Disease, Schüller- Christian Disease)	781
The Blood	784
Diagnosis	784
Course, Prognosis and Treatment	784
Pathology	785
Pathogenesis	785
Bibliography	785

CHAPTER 16

POLYCYTHEMIA

Relative, Transient and Absolute Polycythemia	791
Erythrocytosis	792

Erythrocytosis—	
In the Newly Born	792
Congenital Heart Disease	792
Acquired Heart Disease	793
Pulmonary Disease	794
Ayerza's Syndrome	794
At High Altitudes	794
Chronic Mountain Sickness (Seroche)	794
Chemical and Physical Agents	796
Tumors and Miscellaneous Disorders	796
Erythremia	797
Definition	797
Synonyms	797
History	797
Etiology	798
Symptomatology	799
Onset	799
Skin and Mucous Membranes	800
Cardiovascular System	800
Gaisböck's Syndrome	800
Gastro-intestinal System	801
Splenomegaly	801
Respiratory System	801
Genito-urinary System	802
Neuromuscular System	802
Blood	802
Total Blood Volume	804
Bone Marrow	805
Other Findings	805
Diagnosis	805
Course, Complications and Duration	806
Treatment	807
Venesection	808
Phenylhydrazin	808
Irradiation	809
Chemotherapeutic Agents	811
Pathology	812
Pathogenesis	812
Bibliography	815

CHAPTER 17

THE PURPURAS

Definition and Classification	822
Purpura Hemorrhagica	822
Synonyms	822
Definition	822
History	824
Etiological Factors	824
Symptomatology	825
Genito-urinary Tract	827
Nervous System	827
Physical Examination	827
The Blood	827
The Bone Marrow	830
Types and Clinical Course	830
Purpura in Pregnancy and Congenital Purpura	832
Diagnosis	832
"Symptomatic" Thrombocytopenic Purpuras	834
Chemical, Vegetable, Animal and Physical Agents	834
Disorders Involving the Hemopoietic System	836
Infections and Other Conditions	838
Treatment	839
Splenectomy	841
Prognosis	844
Pathology	845
Pathogenesis	845

Allergic Purpura	848
Definition	848
Synonyms	848
Etiology and Pathogenesis	848
Symptomatology	849
<i>Henoch's Purpura</i>	850
<i>Schönlein's Purpura</i>	851
Nervous System and Special Sense Organs	851
Renal Hemorrhages	851
Laboratory Findings	851
Diagnosis	851
Other Forms of Nonthrombocytopenic Purpura	851
Infections	851
Chemical and Animal Agents	852
Avitaminosis	853
Chronic Diseases	853
Dysglobulinemia	853
Course	853
Prognosis	854
Treatment	854
Other Hemorrhagic (Purpuric) Disorders	854
Prolonged Bleeding Time: von Willebrand's Disease	854
Defective Clot Retraction: Glanzmann's Thrombasthenia	855
Increased Capillary Fragility	855
Miscellaneous Forms of Purpura	856
Purpura Senilis and Purpura Cachectica	856
Mechanical Purpura	856
Orthostatic Purpura	855
Purpura Fulminans	866
Bibliography	857

CHAPTER 18

HEMOPHILIA AND OTHER HEMORRHAGIC DISORDERS

Hemophilia	866
Synonyms and Definition	866
History	866
Etiology and Pathogenesis	867
Incidence	869
Symptomatology	870
Subcutaneous and Intramuscular Hemorrhages	870
Mucous Membrane and Internal Bleeding	870
Hematuria	871
Hemarthrosis	871
Roentgenographic Signs	873
The Blood	873
Varieties of Hemophilia	874
Diagnosis	875
Course and Prognosis	877
Treatment	877
Pathology	880
P.T.C. Deficiency	881
Synonyms and Definition	881
History, Clinical Manifestations and Pathogenesis	881
Treatment	881
P.T.A. Deficiency and Other Deficiencies of Thromboplastin Formation	882
The Hypoprothrombinemias	883
The Hypofibrinogenemias	886
Circulating Anticoagulants	887
Diagnosis	889
Treatment and Prognosis	889
Hemorrhagic Diseases of the Newborn	890
Synonyms	890
Definition	890
History	890
Etiology and Pathogenesis	890

Hemorrhagic Diseases of the Newborn—	
Symptomatology	891
Laboratory Findings	891
Diagnosis	891
Prognosis and Treatment	892
Pathology	892
Hereditary Hemorrhagic Telangiectasia	892
Definition	892
History	892
Etiology	892
Symptomatology	893
Diagnosis	896
Prognosis and Treatment	897
Pathology	898
Bibliography	898

CHAPTER 19

LEUKEMIA

Definition	906
History	906
Varieties of Leukemia and Terminology	907
Etiology and Pathogenesis	909
Mortality Statistics	909
Frequency of Various Types	909
Race	909
Hereditary and Familial Influences	910
Age	912
Sex	912
Possible Exogenous Factors Influencing the Development of Leukemia in	
Man	912
Leukemia in Animals	913
Role of Thymus, Bone Marrow and Hormones	914
The Nature of Leukemia in Man	914
Relationship to Neoplasms	914
Attempts to Transmit Leukemia	916
Clinical Manifestations	917
Chronic Leukemia	917
Mode of Onset and Course	917
Outward Appearance of the Patient	919
Lymph Glands	919
Spleen	920
Skin and Subcutaneous Tissues	920
Gastro-intestinal System	924
"Pseudo-leukemia Gastrointestinalis"	926
The Liver	926
Cardiovascular System	926
Respiratory System	926
Urogenital System	926
Bones and Joints	927
Special Senses	928
Nervous System	930
Fever	931
The Blood	931
Acute Leukemia	934
Mode of Onset and Course	934
Initial Symptoms	935
Lymph Nodes	935
Splenomegaly	935
Skin	935
Mucous Membranes	936
Respiratory Tract	936
Gastro-intestinal Tract	938
Genito-urinary Tract	938
Bones and Joints	939
Eyes and Ears	940

Clinical Manifestations—	
Nervous System	940
The Blood	940
Anemia	940
Thrombocytopenia	941
Leukocytes	942
Less Common Types of Leukemia	945
Subacute Leukemia	945
Aleukemic or Subleukemic Leukemia (Leukopenic Myelosis)	945
Chloroma (Chloroleukemia)	945
Chronic Monocytic Leukemia	946
Eosinophilic Leukemia	946
Basophilic or "Mast-cell" Leukemia	947
Neutrophilic Leukemic	947
Megakaryocytic Leukemia	947
Plasma Cell Leukemia	948
Leukosarcoma or Lymphosarcoma Cell Leukemia	948
Acute and Chronic Erythremic Myelosis and Erythroleukemia	949
Mixed Leukemia	950
Pseudoleukemia	950
Leukanemia	951
Additional Laboratory Findings	951
Bone Marrow	951
Mechanism of Anemia in Leukemia	952
Basal Metabolic Rate	953
Chemical Metabolism	954
Urine	954
Gastric Contents	955
Cerebrospinal Fluid	955
Total Volume of Blood	955
Diagnosis	955
Duration, Prognosis and Complications	958
Chronic Leukemia	958
Acute Leukemia	959
Cure of Leukemia	960
Effect of Infections	960
Occurrence of Pregnancy	961
Association with Various Diseases	962
Treatment of Leukemia	962
Approach to the Patient	963
General Measures	964
Diet	964
Oral Hygiene	964
Treatment of Anemia	964
Blood Transfusion	964
Splenectomy	965
Specific Measures	965
Choice of Therapeutic Agents	969
Irradiation	972
Indications for Irradiation	973
Technic of Roentgen-ray Therapy	973
Indications for Cessation or Modification of Irradiation	973
Irradiation Sickness	973
Signs of Imminent Relapse	974
Refractoriness to Irradiation	974
Contraindications to Irradiation	974
Radioactive Phosphorus	975
Chemotherapeutic Agents	978
Myleran	978
Urethane	978
Demecolcin	979
Nitrogen Mustard and Certain Congeners. TEM	980
Folic Acid Antagonists	983
Purine and Serine Analogues	986
Adrenocorticotrophic Hormone (ACTH) and Adrenocortical Hormones	988
The Choice of Therapeutic Agents in Acute Leukemia	990
Effects of Therapy on Survival in Leukemia	991
