FOREWORD

Welcome to the sixteenth edition of *Physicians' Desk Reference For Nonprescription Drugs*. This companion volume to the main edition of *PDR* provides detailed information on nearly 700 over-the-counter remedies, as well as a number of home diagnostic tests and other medical aids for consumers.

This edition offers you an important new feature: an in-depth analysis of the changing role of over-the-counter drugs. The growing self-care movement among consumers, increasing cost pressures throughout the health care system, and the expanding number of Rx-to-OTC conversions have all conspired to make nonprescription drugs an ever more significant factor in the health care equation. This up-to-the-minute analysis, which can be found in Section 5, spells out the changes and examines their impact on medical therapy.

As the role of over-the-counter drugs continues to expand, we feel certain that you'll find *PDR For Nonprescription Drugs* to be an increasingly important part of your working reference library. In conjunction with *Physicians' Desk Reference* and *PDR for Ophthalmology*, it supplies you with America's most authoritative, comprehensive, and reliable database of product-specific drug information. In turn, this core database is fully indexed in the 1,500 page *PDR Guide to Drug Interactions • Side Effects • Indications™*. An invaluable addition to the *PDR* library of drug references, the *PDR Guide* permits fast, easy identification of an adverse reaction's probable source — and the approved alternatives for the problem medication.

Data from these printed references is also available in a variety of electronic formats:

- *Pocket PDR™* — A handheld personal database of key sections from the prescription-drug listings in *PDR*.
- *PDR Library on CD-ROM™* — Complete prescribing information from all *PDR* volumes — with the full contents of *The Merck Manual* and *Stedman's Medical Dictionary* as optional enhancements — all on one convenient disc for use on PC networks and individual PC's.
- *PDR Drug Interactions/Side Effects/Indications Diskettes™* — A powerful screening program for patient regimens of up to 20 drugs.
- *PDR Tape Services* — A preformatted text file suitable for integration in large mainframe-based information systems.

In the current cost-conscious health care environment, you should also be aware of the newest volume in the *PDR* family of references. Entitled *PDR Generics™*, this exhaustive pharmaceutical compendium includes generic monographs covering virtually all prescription drugs—plus brand/generic unit cost comparisons, average generic prices by package size for all therapeutically equivalent products, and average wholesale prices of all available supplies. Drugs in this volume are indexed by brand and generic name, therapeutic category, and indication. Off-label indications are included.

Also new and noteworthy is the *PDR® Medical Dictionary*, an authoritative reference that combines a complete medical lexicon with *PDR's* unparalleled database of brand and generic drug names.

For more information on any of these important references, please call, toll-free, 1-800-232-7379 or fax 201-573-4956.

PDR For Nonprescription Drugs is published annually by Medical Economics in cooperation with participating manufacturers. The function of the publisher is the compilation, organization, and distribution of product information obtained from manufacturers. Each product description has been prepared by the manufacturer, and edited and approved by the manufacturer's medical department, medical director, and/or medical consultant. During compilation of this information, the publisher has emphasized the necessity of describing products comprehensively, in order to provide all the facts necessary for sound and intelligent decision making. The descriptions seen here include all information made available by the manufacturer.

In organizing and presenting this material in *Physicians' Desk Reference For Nonprescription Drugs*, the publisher does not warrant or guarantee any of the products described, or perform any independent analysis in connection with any of the product information contained herein. *Physicians' Desk Reference For Nonprescription Drugs* does not assume, and expressly disclaims, any obligation to obtain and include any information other than that provided to it by the manufacturer. It should be understood that by making this material available the publisher is not advocating the use of any product described herein, nor is the publisher responsible for misuse of a product due to typographical error. Additional information on any product may be obtained from the manufacturer.

CONTENTS

Manufacturers' Index (White Pages)	1
Section 1	
<i>Lists all participating pharmaceutical manufacturers. Includes addresses, phone numbers, and emergency contacts. Shows each manufacturer's products and the page number of the company's entries in the "Product Information" section.</i>	
Product Name Index (Pink Pages)	101
Section 2	
<i>Gives the page number of each product description in the "Product Information" section. Products are listed alphabetically by brand name.</i>	
Product Category Index (Blue Pages)	201
Section 3	
<i>Lists by prescribing category all products in the "Product Information" section.</i>	
Active Ingredients Index (Yellow Pages)	301
Section 4	
<i>A cross-reference by generic ingredient of all products appearing in the "Product Information" section.</i>	
Nonprescription Drugs: Their Impact and Use (White Pages)	401
Section 5	
<i>An in-depth analysis of the growing importance of over-the-counter drugs.</i>	
Product Identification Guide (Gray Pages)	501
Section 6	
<i>Presents full-color, actual-size photos of tablets and capsules, plus pictures of a variety of other dosage forms and packages. Arranged alphabetically by manufacturer.</i>	
Product Information (White Pages)	601
Section 7	
<i>The main section of the book. Provides information on nearly 700 over-the-counter medications and home testing products. Entries are arranged alphabetically by manufacturer.</i>	
U.S. Food and Drug Administration Telephone Directory	423
<i>For frequently requested information.</i>	
State Boards of Pharmacy	425
<i>Lists contact information for all state boards.</i>	
Drug Information Centers	883
<i>A directory of facilities throughout the nation.</i>	

SECTION 1

MANUFACTURERS' INDEX

Listed in this index are all manufacturers that have supplied information in this edition. Each company's entry includes the address, phone, and fax number of its headquarters and regional offices, as well as contacts for inquiries, orders, and emergency information. A list of the company's major over-the-counter products is also included.

The ♦ symbol marks drugs shown in the Product Identification Guide. If a company has two page numbers, the first refers to its photographs in the "Product Identification Guide," the second to its prescribing information.
