About the Cover

The picture on the cover shows the positron emission tomograph, "Super PETT," developed at the Edward Mallinckrodt Institute of Radiology at Washington University, St. Louis. The device is used for whole body studies and incorporates photon time-of-flight information in the image reconstruction process. Mr. Herb Weitman of Washington University was the photographer.

Message from the President of the IEEE Engineering in Medicine and Biology Society

These national and international conferences are the highlight of our activities as a technical and professional society of the IEEE. This is our fourth conference year, and we hope it will contribute to the continuing emergence of engineers in health care delivery. As the organizer and sponsor of this conference, we have made every possible effort to have it serve as a focal point for the latest developments involving technology in health care. Members of our Society including those within the administrative committee (AdCom) have planned for the past year to bring together the relevant research efforts, the clinical developments, and the industrial applications. Key people have been invited to organize the sessions and workshops. Many invited papers have been included to ensure the proper balance in the sessions. Tutorials and workshops have been included as part of the regular conference program. The full conference papers are published in these Conference Proceedings, and the abstracts of each paper were published in the August issue of our *IEEE Transactions on Biomedical Engineering*.

It is a gratifying moment to see our EMBS Society meet and work together at our own annual conference. May I welcome you to our conference, and I hope that your interaction with the other participants will lead to a more effective communication for our Society.

I would like to express my gratitude to those who have labored to plan and organize the conference; and, in particular, to Al Potvin, Ph.D. for being the program chairman for Frontiers of Engineering in Health Care and Michael Negin, Ph.D. for being the program chairman for Frontiers of Computers in Medicine (COMP MED 82).

Lee Ostrander, Ph.D.
President, EMBS

Drexel University

Temple University

The University of Texas at Arlington

University of Pennsylvania

Philadelphia Convention and Visitors Bureau

Preface

Where are the Frontiers of Computers in Medicine? . . . The philosophy behind the Computed Axial Tomography scanning methodology introduced several years ago provides the answer better than any long message or drawn out thesis: . . . use computers to accomplish tasks that cannot be done in any other way; use computers to obtain information not otherwise obtainable; use computers to provide services not otherwise available.

The tutorials, scientific papers, and workshops will illustrate these points. Many of the papers in COMPMED 82 are focused toward delivery of a product now, as opposed to offering a promise for the future. Most of these "now"-oriented papers illustrate the use of computers to process data or medical information in new, immediately practical ways. The creativity that is applied to the modern devices available off-the-shelf is impressive. Other papers are speculative of future applications but with speculation based on solid investigatory work. The themes of these papers will appear in future COMPMED meetings, but with more complete answers to the questions posed. As you review the papers, reflect on the past few years' developments, and I believe that you'll be impressed by these recent advances.

Tomorrow is a topic that is most safely discussed retrospectively, but allow me to speculate at my own risk. The obvious advances that will affect Computers in Medicine are smaller, faster, cheaper processors and memories. Not so obvious are new operating system architectures, languages, processing methodologies, and communications techniques that will be applied to or invented for medical applications. New devices designed and fabricated *de novo* using VLSI technology will be introduced so that functions currently impossible (at finite cost) will become commonplace. The impact of floating-point and high-speed multiplier chips illustrates this. One of the papers presents a pacemaker design with VLSI; why not VLSI QRS detector devices, or arrhythmia detectors, or signal averagers? These new devices will change our way of thinking about computer applications.

I hope that you enjoy the COMPMED 82 Conference and the Proceedings as much as I have in assembling the program and documents. One of the rewards of this activity is learning from the wealth of new materials I've read and reviewed in selecting papers for presentation. The other reward will come from knowing that the participants and attendees have been exposed to new, exciting developments, and that they have left the Conference better informed and with some new perspective of the current Frontiers of Computers in Medicine.

Michael Negin, Ph.D.
Program Chairman

IEEE Engineering in Medicine and Biology Society

The Engineering in Medicine and Biology Society (EMBS) of the Institute of Electrical and Electronics Engineers (IEEE) is an association of 8,000 members who utilize engineering science and methodology to understand, define, and solve problems in biology, medicine, and health care delivery systems. EMBS is a Society within the umbrella framework of the IEEE, offering identification with the world's largest professional engineering organization of 230,000 members. Activities of the IEEE/EMBS include:

Publications—*The IEEE Transactions on Biomedical Engineering* is a monthly publication of reviewed articles reporting original research and application and development, short communications to disclose new ideas, and tutorials and reviews. *The Engineering in Medicine and Biology Magazine* is published quarterly and contains news and events of current interest to biomedical engineering professionals. The *IEEE Transactions on Medical Imaging* is a quarterly publication of reviewed articles cosponsored by EMBS and 3 other IEEE societies.

Conferences—Conference Proceedings are widely distributed and indexed through IEEE and may be purchased at member's prices from IEEE. The Society also cosponsors and/or cooperates in other national and regional biomedical conferences.

Technical and Professional Committees—EMBS Committees organize conference sessions, workshops and special activities on behalf of the Society. Technical Committees include: bioelectric phenomena, clinical engineering, medical instrumentation, prosthetic and sensory aids, signal processing and information handling, transducers and devices, and biomaterials. Professional Committees include: awards, biomedical coordination, education, ethics, membership, professional activities, publications, standards, government affairs, and industrial relations. In addition, EMBS participates, through appointed delegates, in other national bodies such as ANSI and NFPA as well as in broad-based IEEE Technical Committees addressing such issues as energy, ocean engineering, environmental quality, man and radiation, and social implications of technology.

Regional Councils and Chapters—Society members have the opportunity to exchange technical and professional information with colleagues in the same geographic area through meetings and activities of 7 EMBS Regional Councils and 33 Chapters. Membership in these geographically organized subdivisions is an automatic component of Society Membership.

Membership in IEEE/EMBS is open to all qualified persons in grades designated student, senior member, fellow, and affiliate. Biomedical professionals who wish to join EMBS but not join the IEEE umbrella organization may do so as affiliate members of EMBS. Affiliate members are accorded the opportunity to participate in all EMBS programs and activities as planned and administered by the EMBS elected Administrative Committee (AdCom).

Table of Contents

Frontiers of Computers in Medicine (COMPMED 82)

Tutorials

- 1 **Robotics in Medicine (Invited)**
D. R. Myers, *National Bureau of Standards, Gaithersburg*
- 2A **Medical Image Processing (Invited)**
O. J. Tretiak, *Drexel U*
- 3A **Ultrasonic Imaging and Tissue Characterization (Invited)**
R. C. Waag, *U Rochester*
- 4A **Microprocessor-Based Medical Instrumentation Design (Invited)**
W. J. Tompkins, *U Wisconsin-Madison*
- 2B **Laboratory Microcomputer Networks and Operating Systems (Invited)**
E. M. Kwatny, *Temple U*
- 3B **Interactive Intensive Care Monitoring (Invited)**
P. S. LaFollette, Jr., *Temple U*
- 4B **Computer Based Medical Education (Invited)**
K. W. Scholz, *Kulicke & Soffa Ind Inc, Horsham, PA*

Session 1

Computer Techniques for the Analysis of Ventricular Function

- 1.1 **Computer Based Quantitative Analysis of Left Ventricular Function from X-Ray Images (Invited)** 2
A. A. Bove, *Mayo Clinic*
- 1.2 **Rapid Assessment of Heart Function from Radiopaque Markers (Invited)** 5
W. P. Santamore, *Bockus Res Inst*, A. A. Bove, and C. M. Philips
- 1.3 **Recent Experience with Computerized Digital Radiography Using Linear Diode Arrays (Invited)** 10
D. Sashin, *U Pittsburgh*, E. J. Sternglass, K. M. Bron, B. S. Slasky, J. M. Herron, W. H. Kennedy, L. Shabason, J. Boyer, A. E. Pollitt, R. E. Latchaw, B. R. Girdany, and R. W. Simpson
- 1.4 **Reconstruction and Imaging for the Dynamic Spatial Reconstructor (Invited)** 16
G. T. Herman, *U Penn*
- 1.5 **Nuclear Magnetic Resonance: Imaging and In Vivo Metabolism (Invited)** 20
M. Osbakken, *Penn St U*

Session 2

- 1 **Real-Time Microcomputer-Based Experimental Control, Data Collection, and Signal Processing**
- 2.1 **Real-Time Detection of Steady-State Evoked Potentials** 24
J. G. Nelson, *Naval Air Dev Ctr*, and L. Hrebien
- 2.2 **A Dual Processor System for the Analysis of Evoked Responses** 28
B. A. Eisenstein, *Drexel U*, and E. B. Morgan
- 2.3 **Performance Specification of a Microcomputer-Based EEG Compressed Spectral Array System** 32
R. L. Epp, *Temple U*, M. Negin, and K. J. Lee
- 2.4 **A Microcomputer Controlled Nystagmus Data Acquisition and Analysis System** 40
W. G. Crosier, *Technology Inc*
- 2.5 **An Automated Multi-Unit Animal Activity Monitoring System** 45
F. Lombardi, *Texas Tech U*, O. J. Davies, V. M. B. D. Rumjanek, and J. Morley
- 2.6 **A Multi-Microprocessor Based Automated Holter Scanning System** 49
S. M. Dunn, *Hittman Med Sys*, S. Gallant, M. Negin, and E. Schmitt

Session 3

Topics in Image Processing

- 3.1 **Computed Tomography from a Few Ordinary Radiographs** 54
R. Gordon, *U Manitoba*, and M. R. Rangaraj
- 3.2 **Data Acquisition and Image Reconstruction for a High-Resolution Positron Camera** 59
D. Townsend, *Cantonal Hosp Switz*, R. Clack, P. Frey, A. Donath, A. Jeavons, and J. Kulick
- 3.3 **Quantitative Visual Concepts in Pictorial Medical Pattern Recognition** 65
E. T. Lee, *Memphis State U*

Session 4

Special Developments in Software and Hardware

- 4.1 **A Universal Programmable Software Data Capture Interface** 75
R. M. Kaplan, *Smith Kline & French*, and E. M. Kwatny

KEYNOTE ADDRESS

Medical Imaging by Means of Positron Emission Tomography (Invited)

M. M. Ter-Pogossian, *Washington U*

1

Session 1

Clinical Engineering

- 1.1 **Computerized Interpretation of Thallium Scintigraphs in the Practice of Cardiac Nuclear Medicine (Invited)**
J. G. Llaurado, *Wood VA Med Ctr*, J. D. Horgan, V. S. Bamrah, C. M. Kronenwetter, and P. P. Ruetz

2

- 1.2 **Educational Problems in Clinical Engineering (Invited)**
V. L. Newhouse, *Drexel U*

8

- 1.3 **Torque Measurement and Spinal Fixation-Instrumentation and Preliminary Results (Invited)**
R. A. Mostardi, *U Akron*, M. Savage, and D. Betham

12

- 1.4 **Patient Identification in an Automated Clinical Laboratory System**
R. L. Keenan, *City Hope Med Ctr*, B. E. Mount, G. W. Persinger, W. Stickel, and J. Melnyk

15

- 1.5 **Determination of the Optimal Set of Spares for Clinical System Reliability (Invited)**
M. D. Schwartz, *Cal State U, Long Beach*

19

- 1.6 **Controlled Potential Electrolysis for Urea Removal in Hemodialysis: Improved Efficiency in Urea Clearance**
S. J. Yao, *Montefiore Hosp*, J. M. Brown, S. K. Wolfson, Jr., K. V. Thiruvikraman, and M. A. Krupper

24

- 1.7 **A One-Way Packet Protocol for Patient Monitoring Networks**
L. W. Burton, *Duke U*, M. D. Rafal, F. E. Block, Jr., and M. H. Harmel

28

- 1.8 **The Maintenance of Electronic Equipment in Hospitals (Invited)**
D. P. Harrington, *New England Med Ctr*

30

- 1.9 **Ultrasound Velocity in Fixed Human Liver: Empirical Anova and Regression Modelling on Histologically Assessed Pathology**
K. P. Zimmermann, *U Missouri-Columbia*, and J. C. Smith

32

- 1.10 **Designing, Equipping and Staffing a Regional Burn Treatment Center (Invited)**
R. G. Jennings, *Upstate Med Ctr, Syracuse*

36

Session 2

Evoked Potentials

- 2.1 **Evoked Potential Testing—Introduction and Overview (Invited)**
B. A. Cohen, *Med Col Wisconsin*

39

- 2.2 **Short Latency Somatosensory Evoked Potentials to Median Nerve Stimulation (Invited)**
R. Q. Cracco, *State U New York*, and J. B. Cracco

41

- 2.3 **Lumbar and Thoracic Spinal Evoked Potentials in Man (Invited)**
E. M. Baran, *Jefferson U*

44

- 2.4 **Somatosensory Evoked Potentials Recorded in the Epidural Space in Man (Invited)**
A. M. Sherwood, *Texas Med Ctr*

50

- 2.5 **The Clinical Use of a Minicomputer to Assist the Acquisition, Analysis, and Reporting of Visual Evoked Potentials (Invited)**
L. J. Streletz, *Jefferson Med Col*, J. D. Steben, and E. Saltzman

56

- 2.6 **Effects of Ongoing EEG on Latency Measurements of Evoked Potentials (Invited)**
C. D. McGillem, *Purdue U*, K. B. Yu, and J. I. Aunon

60

- 2.7 **The Use of Equivalent Source Models in EP Research and Differential Diagnosis (Invited)**
R. D. Sidman, *U Southwestern Louisiana*, D. B. Smith, J. S. Henke, B. R. Kearfott, and V. Giambalvo

64

- 2.8 **Topographic Methods of Functional Cerebral Analysis (Invited)**
R. Coppola, *NIMH*

3.4	A New Model for the Design of Intra Aortic Balloon Pumping Control Strategy (Invited)	125	5.1	Features of Compliance Pumping (Invited)	176
	T. W. Moore, <i>Drexel U</i> , H. Ping, and D. Jaron			P. K. Porter, <i>U Pennsylvania</i> , W. A. Ryan, Jr., J. Melbin, and A. Noordergraaf	
3.5	An Electrohydraulic Left Heart Assist System (Invited)	129	5.2	Non-Invasive Diagnosis of Coronary Artery Disease by Enhanced Coronary Phonocardiography (Invited)	181
	K. C. Butler, <i>Aerojet Co</i> , J. W. Carriker, J. C. Moise, and D. C. Thomas			J. L. Semmlow, <i>Rutgers U</i> , J. Kostis, W. Welkowitz, and J. W. MacKenzie	
3.6	A Copulsating Left Heart Assist System (Invited)	135	5.3	Cardiovascular Diagnostic Parameters Derived from Pressure and Flow Pulses (Invited)	186
	P. I. Singh, <i>Appl Biomed Corp</i> , D. M. Lederman, D. C. de Sieyes, R. D. Cumming, B. B. Adams, and R. E. Lang			J. K. Li, <i>Rutgers U</i>	
3.7	Ventricular Kinetics of a Magnetically Actuated Artificial Heart	139	5.4	Three-Dimensional Digital Subtraction Angiography (Invited)	190
	S. G. Kovacs, <i>Haley VA Med Ctr</i> , D. O. Weber, and M. D. Yarnoz			B. G. Min, <i>Seoul Nat U, Korea</i> , S. J. Lee, T. S. Lee, H. C. Kim, J. H. Park, and M. C. Han	
Session 4			5.5	Mechanics of Left-Ventricular Contraction: Computer Graphics Analysis (Invited)	196
Microcomputer Applications in Medicine				J. Y. Kresh, <i>Jefferson U</i> , and S. K. Brockman	
4.1	Microprocessors: A Biomedical Toolkit (Invited)	145			
	G. Silverman, <i>Rockefeller U</i> , and M. Harrison				

Session 6

Arrhythmia Monitoring

- | | | |
|-----|---|-----|
| 6.1 | Trends in Ambulatory Electrocardiography (Invited)
W. J. Tompkins, <i>U Wisconsin-Madison</i> | 201 |
| 6.2 | An Annotated ECG Database for Evaluating Arrhythmia Detectors (Invited)
R. G. Mark, <i>MIT</i> , P. S. Schluter, G. Moody, P. Devlin, and D. Chernoff | 205 |
| 6.3 | Performance Measures for Computerized Arrhythmia Monitors: Annotated Database as the Golden Standard (Invited)
N. V. Thakor, <i>Northwestern-U</i> | 211 |
| 6.4 | A Multiprocessor System for Holter Tape Analysis (Invited)
C. L. Feldman, <i>CardioData Corp</i> , M. Hubelbank, V. Valvo, and B. Lane | 216 |
| 6.5 | Parallel Processing in a Two-Channel Arrhythmia Monitor (Invited)
J. M. Jenkins, <i>U Michigan</i> , and T. Kao | 222 |
| 6.6 | A Technique for Computer Control of Drug Infusion in Automatic Ambulatory Arrhythmia Management (Invited)
R. Arzbaecher, <i>II Inst Tech</i> , J. Poyezdala, and S. Collins | 226 |

Session 7

Cardiovascular System Dynamics

- | | | |
|-----|---|-----|
| 7.1 | Determinants of Mechanical Performance of Arterial Smooth Muscle (Invited)
R. H. Cox, <i>U Penn</i> | 230 |
| 7.2 | Biomechanics and Reactivity of Elastic and Muscular Arteries (Invited)
R. Busse, <i>U Freiburg Germany</i> , and C. Kellner | 235 |
| 7.3 | Contributions to Nonlinear Characterization of the Arterial Tissue (Invited)
R. N. Vaishnav, <i>Catholic U</i> | 241 |
| 7.4 | Tissue Elasticity in the Focus of Prager's "Locking Media" (Invited)
C. Hartung, <i>Med U Hannover, Germany</i> | 246 |
| 7.5 | Parameter Analysis of a Two-Layer Arterial Wall Model (Invited)
W. W. von Maltzahn, <i>U Texas Arlington</i> | 249 |
| 7.6 | Recent Developments in Finite-Element Cardiovascular Analyses (Invited)
Y. C. Pao, <i>U Nebraska-Lincoln</i> | 253 |

- | | | |
|------|---|-----|
| 7.7 | Continuous Recording of the Blood Density—A New Method for the Study of Cardiovascular Dynamics (Invited)
T. Kenner, <i>U Graz Austria</i> | 258 |
| 7.8 | Low-Frequency Dynamics of Blood Flow in the Leg of the Baboon (Invited)
F. A. Spelman, <i>U Washington</i> | 264 |
| 7.9 | A Model to Study Cardiac and Peripheral Interaction in Cardiovascular Control (Invited)
C. F. Rothe, <i>Indiana U</i> | 269 |
| 7.10 | Electrical Measurement of Fluid Distribution in Legs and Arms: Estimation of Extra-Cellular and Intra-Cellular Fluid
H. Kanai, <i>Sophia U, Japan</i> , M. Haeno, and K. Sakamoto | 273 |
| 7.11 | Distribution of Perfusion Measured by Hydrogen Clearance in Skeletal Muscle Following Sympathectomy
L. E. Ostrander, <i>RPI</i> , L. J. Zwirkoski, and B. Y. Lee | 277 |
| 7.12 | Mathematical Interrelationship between Ventricular Pressure and Myocardial Contractility
A. H. Rashwan, <i>Cairo U, Egypt</i> , and A. S. Ahmed | 280 |

Session 8

Medical Instrumentation

- | | | |
|-----|--|-----|
| 8.1 | Operating Room Care with Microprocessor Based Closed-Loop Controllers (Invited)
D. R. Westenskow, <i>U Utah</i> | 285 |
| 8.2 | A Real Time Anesthetic Data Acquisition and Processing System (Invited)
M. J. Lauria, <i>U Arizona</i> , K. C. Mylrea, J. M. Calkins, and R. J. Saunders | 288 |
| 8.3 | A Programmable Variable Waveshape Modulator for Simulation of Electrosurgery (Invited)
W. R. Elliott, <i>U New Hampshire</i> , G. C. Gerhard, and S. N. Selikowitz | 292 |
| 8.4 | A System for Non-Invasive Oximetry of Retinal Vessels
F. C. Delori, <i>Eye Res Inst</i> , F. J. Rogers, S. E. Bursell, and J. S. Parker | 296 |
| 8.5 | A V-Groove Silicon Planar Capillary for Insulin Microinfusers
M. G. Guvenc, <i>U Pittsburgh</i> | 300 |
| 8.6 | The Pressure Frequency Response of Catheters: A Model for the Wick and Slit Catheters
J. G. Logan, <i>U Western Ontario</i> , G. S. P. Castle, and C. H. Rorabeck | 303 |

Table of Contents (continued)

8.7	Estimating Human Energy Expenditure using an Accelerometer Device	309	Session 10	
	S. B. Servais, <i>U Wisconsin-Madison</i> , J. G. Webster, and H. G. Montoye		Computers in Clinical Research	
8.8	Noise Tolerance of a Video Eye Position Detector	313	10.1	MEDUS/A—Database Management for Research and Patient Care (Invited) 369
	M. Hatamian, <i>U Michigan</i> , and D. J. Anderson			C. King, <i>Harvard School of Public Health</i> , L. Goldstein, and R. Strong
8.9	A Video Sinusoidal Grating Generator	317	10.2	MERLIN: A Flexible Database System for Microcomputers (Invited) 375
	D. A. Erwin, <i>Data General</i> , H. G. Rylander III, and A. J. Welch			K. N. Jeejeebhoy, <i>Toronto Gen Hosp</i> , and J. Whitwell
8.10	A Fast Band-Pass Filter for ECG Processing	321	10.3	ARAMIS: Evolution of a National Arthritis Data Bank (Invited) 378
	T. Y. Lo, <i>Chung Yuan Christian U Taiwan</i> , and P. C. Tang			D. J. McShane, <i>Stanford U</i> , and J. F. Fries
8.11	A Man-Prostheses Interactive System	326	10.4	A Minicomputer-Based "Personal Database System" for Clinical Researchers, Supporting a Clinical Trial in Hypertension Management (Invited) 382
	A. Noyola-Isgleas, <i>Centro de Instrumentos Mexico</i> , H. Galvan, J. L. Perez, and H. Del-Castillo			N. H. McAlister, <i>Toronto Gen Hosp</i> , H. D. Covey, J. Lai, C. Tong, and E. D. Wigle
Session 9			10.5	Statistical and Computing Support for Medical Research (Invited) 388
Artificial Tactile Communications				G. A. Wells, <i>U Western Ontario</i> , J. H. Toogood, and I. B. MacNeill
9.1	Electrotactile Sensation and Pain Thresholds and Ranges as a Function of Body Site, Laterality and Sex (Invited)	329	10.6	Computer Based Analysis of Passive Motion Resistance 391
	M. Solomonow, <i>Tulane U</i> , and M. Preziosi			G. V. Kondraske, <i>U Texas Arlington</i> , R. M. Stewart, A. R. Potvin, and W. W. Tourtellotte
9.2	Perceptual Processing of Spatio-Temporal Patterns of Electrocutaneous Stimulation (Invited)	333	10.7	Computational Problems in the Clinical Neurosciences (Invited) 396
	L. E. Marks, <i>Yale U</i> , J. P. Girvin, P. Ning, M. O'Keefe, J. L. Antunes, D. O. Quest, and W. H. Dobelle			R. J. Scabassi, <i>U Pittsburgh</i> , and J. K. Vries
9.3	Further Evidence on Learning in the Tactile Sense (Invited)	339	Session 11	
	M. Solomonow, <i>Tulane U</i> , and D. Prados		Bioelectric Phenomena	
9.4	Comparison of Subdermal Versus Surface Electrocutaneous Stimulation (Invited)	343	11.1	The History and Future of the Ventricular Gradient in Medicine and Physiology (Invited) 403
	R. R. Riso, <i>Case Western Res U</i> , A. Y. J. Szeto, and M. W. Keith			J. A. Abildskov, <i>U Utah</i> , and L. S. Green
9.5	Neurophysiological and Perceptual Considerations for Tactile Sensory Substitution (Invited)	348	11.2	The Ventricular Gradient Revisited with Consideration of the Secondary T Wave and Simulation of Isoarea Maps (Invited) 407
	P. Bach-y-Rita, <i>Martinez VA Med Ctr</i>			D. B. Geselowitz, <i>Penn State U</i> , and N. S. Deno
9.6	Haptographics: Pursuit Tracking on a Tactile Matrix (Invited)	352	11.3	The Heart Muscle Signal Processor (Invited) 411
	C. E. Sherrick, <i>Princeton U</i> , and R. W. Cholewiak			L. G. Horan, <i>U Louisville</i> , and J. C. Johnson
9.7	Electrocutaneous Communication in Seeing-Eye Robot (MELDOG) (Invited)	356	11.4	A Noise-Reduction Method Applicable in Body-Surface Potential Mapping (Invited) 413
	S. Tachi, <i>MITI, Japan</i> , K. Tanie, K. Komoriya, and M. Abe			B. M. Horacek, <i>Dalhousie U, Canada</i> , and T. J. Montague
9.8	Quantitative Methods for the Comparative Evaluation of Artificial Tactile Speech Displays (Invited)	362		
	M. A. Clements, <i>MIT</i> , L. D. Braida, and N. I. Durlach			

11.5	A Contemporary View of the Ventricular Gradient of Wilson (Invited)	417	12.9	A Myopia Avoidance Effort	474
	R. Plonsey, <i>Case Western Res U</i>			O. S. Brown, <i>General Electric</i> , K. Montor, and F. A. Young	
11.6	Model Study of Effects of Local Change of Resting Potential on Injury Currents and ECG (Invited)	418	12.10	Human Eye in Presence of Electromagnetic Radiation	478
	S. Rush, <i>U Vermont</i> , R. Budd, A. F. Baldwin III, and E. Lepeschkin			S. C. Gupta, <i>U Roorkee, India</i>	
11.7	Conduction in Demyelinated Nerve Fibers: Computer Simulations of the Effects of Variation in Voltage-Sensitive Ionic Conductances	424	12.11	Non-Linear Electromagnetic Interactions with Living Systems	481
	S. L. Wood, <i>Palo Alto VA Med Ctr</i> , and S. G. Waxman			E. A. Byrd, <i>Naval Surface Weapons Center</i>	
11.8	The Influence of the Zinc Ion on the Dielectric Relaxation of Mucopolysaccharides	429	12.12	Towards a Better Understanding of Diabetes by Modelling Carbohydrate Metabolism (Invited)	486
	S. L. R. Vulimiri, <i>Drexel U</i> , and R. B. Beard			H. Glockle, <i>Med U Hannover, Germany</i> , and O. Anna	
11.9	On a Multiport Synthesized Relaxation Oscillator Representing A Bioelectric Rhythm	433	12.13	Computed Optimal Insulin Profiles in Diabetic Patients	489
	B. L. Bardakjian, <i>U Toronto</i> , T. Y. El-Sharkawy, and N. E. Diamant			J. H. Youn, <i>Seoul Nat U, Korea</i> , K. S. Park, S. I. Kim, and B. G. Min	
Session 12			Session 13		
Modelling and Control of Physiological Systems			Electrodes		
12.1	Modelling and Design of the Pulmonary Blood Flow Monitor (Invited)	437	13.1	Design Parameters for Polarographic Oxygen Sensors (Invited)	493
	L. Arena, <i>UCLA</i> , J. W. Bellville, and D. M. Wiberg			C. D. Ferris, <i>U Wyoming</i> , and D. N. Kunz	
12.2	Time-Varying Pulmonary Resistance and Compliance in Human	443	13.2	Drug Eluting Electrodes—Improved Pacemaker Performance (Invited)	499
	E. J. Cha, <i>Seoul Nat U, Korea</i> , B. G. Min, C. W. Lee, and K. Y. Kim			K. B. Stokes, <i>Medtronic Inc</i> , J. E. Graf, and W. A. Wiebusch	
12.3	Spectral Analysis of Periodic Breathing in Infants	448	13.3	EKG Electrode Electrolyte-Skin A. C. Impedance Studies (Invited)	503
	S. T. Nugent, <i>Dalhousie U, Canada</i> , and J. P. Finley			H. M. Carim, <i>3M</i> , and R. W. Hawkinson	
12.4	State Space Forced Oscillation Measurements of Histamine Induced Small Airway Constriction	452	13.4	New Applications of the Pill Electrode for Cardiac Recording and Pacing (Invited)	508
	W. K. Johnson, <i>Texas Tech U</i>			R. Arzbacher, <i>Illinois Inst Tech</i>	
12.5	Ventilatory Response to Stochastic Exercise (Invited)	456	13.5	Resistance of Electrode-Gel Interface for Defibrillator Paddles (Invited)	511
	C. Greco, <i>U Miami</i> , H. Baier, A. Saez			O. E. Clavin, <i>Insibio Argentina</i> , and J. G. Webster	
12.6	Adaptive Cardiovascular Control Using Multiple Drug Infusions (Invited)	459	13.6	Platinum Electrode Polarization: Onset of Nonlinear Behavior in the Frequency and Time Domains (Invited)	516
	R. J. Roy, <i>RPI</i>			B. Onaral, <i>Drexel U</i> , H. P. Schwan, and H. H. Sun	
12.7	On Parameter Estimation in an Intracranial Pressure Model (Invited)	465	13.7	Small and Large Amplitude Voltammetric Studies on Smooth Platinum Electrode in Bulk Solutions of Cl, Br, and I under Potential pH Control (Invited)	520
	D. J. Larnard, <i>Purdue U</i> , and A. J. Koivo			M. Brownstein, <i>Drexel U</i> , and R. B. Beard	
12.8	Understanding Dynamics and Control of Normal and Abnormal Head Movements by use of a Parameterized Head Movement Model	468	13.8	A Low-Potential Approach to Body Fluid Glucose Detection: In Vitro Studies	524
	W. H. Zangemeister, <i>U Hamburg</i> , and L. Stark			S. J. Yao, <i>U Pittsburgh</i> , Y. Dokko, S. K. Wolfson, Jr., and M. A. Krupper
