99 98 2

Interpretation of the printing code: the rightmost double-digit number is the year of the book's printing; the rightmost single-digit number, the number of the book's printing. For example, a printing code of 98-5 shows that the fifth printing of the book occurred in 1998.

Screens reproduced in this book were created using Collage Plus from Inner Media, Inc., Hollis, NH.

This book was produced digitally by Macmillan Computer Publishing and manufactured using computer-to-plate technology (a film-less process) by GAC/Shepard Poorman, Indianapolis, Indiana.

# Preface

## For our readers...

*Computers in Your Future 98* carries forward Que Education and Training's pioneering effort to show how computers affect our daily lives and how they will continue to have an increasing impact on our future. The common-sense, real-world emphasis of the first edition is evident in this 1998 edition. The many student learning aids present in the first and second editions appear in this edition, changed only to reflect current developments in the world of computers and computing. Among the special features are the following:

- **Sidebars** address current events in the computer world. In many cases, these events affect your personal or business life. Some examples tell you how computers are used all over the world:
  - Computers aid in scientific research, education, and law enforcement.
  - The Year 2000 problem and its potential impact on businesses and consumers worldwide. Information Technology professionals are in such short supply that the U.S. government is taking aggressive steps to help solve the problem.
  - Computers are used for timing and scoring at the Indy 500.
  - Virtual reality and computers help people overcome all kinds of handicaps.
- **TechTalk** margin notes provide clear definitions of computer jargon.
- **BITS** margin notes offer interesting sidelights to the text.

To help students learn, the authors have provided this information in *byte-sized* portions called lessons. Each lesson deals with one topic in a clear, succinct presentation. Because these lessons are modular, they can be covered in any sequence.

Each lesson opens with an outline of the major topics in that lesson. For easy review, the bulleted learning objectives, immediately following the outline, list the important concepts covered in the lesson. Key terms appear in boldface in the text and are defined within the lesson; they are also listed at the end of the lesson and are defined again in the Glossary at the end of the book. The end-of-lesson material provides additional self-testing through *matching, multiple-choice, completion, and review questions*. In the past decade, many educators have voiced the concern that schools have overemphasized the mastery of basic facts to the neglect of thinking skills. To address this issue, *Computers in Your Future 98* also includes brief **Critical Thinking** projects in both the book and the *Test Bank*. **On-line Discovery** sections provide practice in using the World Wide Web to research Internet resources and answer relevant questions.

To give you an extended review and greater success in this course, the authors of this text have written a **Student Study Guide**. This supplement provides a chapter overview; lesson outlines; learning objectives; key terms; and a large number of true/false, multiple-choice, matching, completion, and critical thinking questions.

Que Education & Training created **Computers in Your Future 98 Interactive Edition** to provide students with a unique, discovery-based learning tool. The *Interactive Edition* includes interactive multimedia explorations of key textbook topics, seamless integration of the World Wide Web, personalized study guides, and electronic review exercises with e-mailable results.

### For the Instructor...

Que Education & Training offers a dynamic and useful collection of teaching and learning resources for qualified adopters of *Computers in Your Future 98*.

#### **Computers in Your Future 98 Annotated Instructor's Edition (1-58076-079-1)**

*Computers in Your Future 98 Annotated Instructor's Edition* is chock full of teaching resources and includes a fully annotated version of the student text showing how and when to integrate the *Interactive Edition*, QuePresents, and [www.ciyf98.com](http://www.ciyf98.com). The annotations include ideas for alternative lecture topics, tips on dealing with common student questions, and other useful information designed to help you in the classroom.

#### **Computers in Your Future 98 Instructor's Manual (1-58076-080-5)**

The *Instructor's Manual* provides chapter outlines with learning objectives and lesson outlines. The manual also gives the answers to all the end-of-lesson material in the student edition. For the novice teacher, as well as seasoned instructors looking for new ways to teach this course, the *Instructor's Manual* includes Teaching Tips, Projects and Activities, and Lecture Notes beyond those presented in the *Annotated Instructor's Edition*.

#### **Computers in Your Future 98 QuePresents (1-58076-084-8)**

QuePresents is a CD-ROM packed with a library of PowerPoint 97 presentations designed to enhance your classroom presentations. These presentations include a variety of materials used by the author team in their classrooms. QuePresents can be used as is or customized to meet the needs of your students.

#### **QueTest by inQsit (1-58076-081-3)**

The finest Web-based testing system available! QueTest by inQsit (developed by Ball State University) utilizes the World Wide Web and Web technologies to present questions, record answers, and return customized graded results. HTML can be directly integrated within the test modules so graphics, sound, videos, and links to additional Web/Internet resources may be added. An internal security system prevents unauthorized access to questions, answer keys, and student scores. QueTest comes with a vault of questions for *Computers in Your Future 98*. QueTest uses Smart Wizards to help

you create your tests and has a variety of question types that can be selected at will or at random. QueTest supports proctored tests, transference of existing test questions, and test item analysis!

### **www.ciyf98.com**

This Web site is an extraordinary and unique teaching and learning resource. We've moved beyond the usual publisher Web sites to create a truly useful place for you and your students to expand your horizons. ciyf98.com includes a Listserve, Chat room, Message Boards, TEQNews clipping service that provides customizable news for your classes, and the On-line Discovery Zone.

### ***Computers in Your Future 98 Interactive Edition (1-58076-082-1)***

An innovative discovery-based learning tool helps you blow the covers off the textbook by offering interactive multimedia explorations of key textbook topics, seamless integration of the World Wide Web, personalized study guides, and electronic review exercises with e-mailable results.

- Navigation is easy and intuitive because it's done through Internet Explorer or Netscape Navigator.
- QueLabs provide students with opportunities to experience many of the concepts covered in the text. Each Lab includes sound, video, interactive review questions, and a hands-on exercise for a complete learning experience.
- QueNotes allows students to build a personal study guide by cutting and pasting or adding their own materials.
- The end-of-chapter Review Exercises are now available electronically with the capability for your students to e-mail their results to you!
- "Whacked" World Wide Web sites are included so that students without live access to the Web have an opportunity to experience the Web's power.

For more information about Que E&T's extraordinary teaching and learning resources, please contact your local Macmillan Computer Publishing representative. To obtain the name of your representative, call 1-800-428-5331. You may also contact us on the Web at <http://www.queet.com>

### **Que Education & Training's Software Applications Series**

Que Education & Training offers a variety of computer lab applications manuals to suit the needs of your students. Any of these manuals can be used in conjunction with *Computers in Your Future 98* or as stand-alone tutorials.

### **The Quest Custom Publishing Program...**

Que E&T also offers custom publishing that is as easy as 1,2,3 through our Quest Custom Publishing Program. Please contact your local Macmillan Computer Publishing representative for more details. To obtain the name of your representative, call 1-800-428-5331. You may also contact us on the Web at <http://www.queet.com>

## About Que Education and Training...

We are the educational publishing imprint of Macmillan Computer Publishing, the world's leading computer book publisher. Macmillan Computer Publishing books have taught more than 20 million people how to be productive with their computers.

This expertise in producing high-quality computer books is evident in every Que Education and Training title. The same tried-and-true authoring and product development process that makes Macmillan Computer Publishing books best-sellers is used to ensure that every Que Education and Training textbook has the most accurate and up-to-date information. Experienced and respected college instructors write and review every manuscript to provide class-tested pedagogy. Every Que Education and Training book receives

a thorough “tech edit,” quality assurance editors at Macmillan Computer Publishing check every keystroke and command in our books to guarantee that the instructions are clear and precise.

Above all, Macmillan Computer Publishing and, in turn, Que Education and Training have years of experience in meeting the learning demands of computer users in schools, homes, and businesses. This “real world” experience means that Que Education and Training textbooks help students understand how the skills they learn will be applied and why these skills are important.

Que Education and Training. Helping your students see the possibilities.

## Acknowledgments

We, the authors, have discovered that a partnership is much more than the sum of its parts. We have come to appreciate each other’s work, and the work of our hidden partners at Que Education and Training of Macmillan Publishing.

Que Education and Training is grateful for the assistance provided by the following reviewers of the first edition: Virginia T. Anderson, Ph.D., University of North Dakota; Greg Alexander, Davenport College; Bruce L. Black, Polk Community College; Kelly Black, California State University, Fresno; Frederick W. Bounds, DeKalb College; Robert M. Burris, Indiana University (IUPUI); Connie Campbell, Cincinnati State Technical and Community College; Mark Ciampa, Volunteer State Community College; James R. Daniels, St. Catherine College; Marvin Daugherty, Indiana VoTech College; Barbara B. Denison, Wright State University; Lynne Fairservice, Royal Melbourne Institute of Technology, Australia; Terry Fries, Jefferson Community College; John T. Gorgone, Bentley College; Jan Harris, Lewis and Clark Community College; Patricia Harris, Mesa Community College; Shirley Hudson, Southern Illinois University at Carbondale; Richard Lee Kerns, East Carolina University; Terry Kibiloski, Sullivan College; Ronald J. Kizior, Loyola University; Sim Kim Lau, University of Wollongong; Anthony Mann, Sinclair Community College; Donna Matherly, Tallahassee Community College; Anne Olsen, Wingate College; Pat Ormand, Utah Valley Community College; Sally Peterson, University of Wisconsin, Madison; Sylvia Clark Pulliam, Western Kentucky University; Dolores Pusins, Hillsborough Community College, Tampa; Cliff Ragsdale, Virginia Polytechnic Institute and State University; William Rayburn, Austin Peay State University; Dorothy Reiss, Manchester Community-Technical College; Linda Salchenberger, Loyola University, Chicago; Luann K. Stemler, Illinois State University; Dale Underwood, Lexington Community College; Karen Weil-Yates, Hagerstown Junior College; Melinda White, Santa Fe Community College, Gainesville, FL; Janice Willis, College of San Mateo; Judy Wright, Wayne State University; and Alan Wyatt, Discovery Computing Inc.

Que Education and Training is grateful also for the assistance provided by the following reviewers of the 98 edition: Michelle Bokoros, Manchester Community College; Mike Bozonie, Metropolitan State University; William F. Borowski, Trident Technical College; Sally Kurz, Coastline Community College; Dr. Jerome Lewis, University of South Carolina, Spartanburg; Dr.

Donna Matherly, Tallahassee Community College; Phillip Morrison, Aiken Technical College; Barbara B. Neequaye, Central Piedmont Community College; Femi Onabajo, Galveston College; Banks Peacock, Wayne Community College; Samantha Penrod, Purdue University, Calumet; Judith Scheeren, Westmoreland County Community College; Michael Shook, Embry-Riddle Aeronautical University; and Garrett Pease, Discovery Computing, for his technical review.

A hearty thank-you to the following individuals and firms for their help in gathering information about new and unusual uses of computers: Dr. Wayman Baker, National Oceanic and Atmospheric Administration (NOAA); C-CAD; Ty Cheatham, MicroServices; Chrysler Corporation; The CocaCola Company; Alice Curtin, AT&T Consumer Interactive Video Services; Frank DiGialleonardo, NOAA; Electronic Arts; Roger Frizzell, GTE; Art Graham, United States Auto Club; Indiana Pacers; Dean P. Inman, Ph.D., Oregon Research Institute, Virtual Reality Labs; Robert Kidwell, NOAA; Janis Lamar, TRW Information Services; Bisil "Bud" Littin, National Weather Service; Stephen Lord, National Meteorological Center; Andre F. Marion, President, Applied Biosystems Division of The Perkin Elmer Corporation; Steve Merritt, PianoDisc; Danielle Miller, The GLOBE Program; North Slope Borough School District; Ann Redelfs, San Diego SuperComputer Center; Hank Roden, The GLOBE Program; SEGA; Dr. Joseph Shaffer, National Weather Service, Severe Storm Watch Center; John Stackpole, National Meteorological Center; Julie Wright, EDS; Yamaha Corporation of America Keyboard Division.

## About the Authors

**Roberta L. Baber** has more than 30 years of experience in the computer field. Currently, she is Professor and Department Chair of Information Systems at Fresno City College. She started her career as a programmer, systems analyst, and project leader in southern California. After working in the industry for 17 years, she relocated to central California and began teaching at the college level. She is married, with two children currently attending college.

**Marilyn Wertheimer Meyer** is Professor of Information Systems at Fresno City College. She holds a B.S. in quantitative analysis and an M.S. in applied computer systems from California State University Fresno. She also holds a CCP and is working on her doctorate. She has been a computer programmer/analyst for several years and has extensive teaching experience at both the university and community college levels. She has written a number of information systems instructor's manuals and two computer programming texts. She is currently Student Success Coordinator at Fresno City College.

# Brief Table of Contents

|   |             |
|---|-------------|
| Preface .....   | xi          |
| <b>Part I The Basics</b>                                      |             |
| <b>Chapter 1 Understanding Computers</b> .....                | <b>1-2</b>  |
| Lesson 1A Computer Concepts and Computer Literacy .....       | 1-3         |
| Lesson 1B The Historical Perspective .....                    | 1-26        |
| <b>Chapter 2 Computer Hardware</b> .....                      | <b>2-1</b>  |
| Lesson 2A Processing and Memory .....                         | 2-2         |
| Lesson 2B How Computers Store Data .....                      | 2-22        |
| Lesson 2C Data In, Information Out .....                      | 2-43        |
| Lesson 2D Different Needs, Different Sizes .....              | 2-64        |
| <b>Part II Making Computers Work for You</b>                  |             |
| <b>Chapter 3 Software and Software Development</b> .....      | <b>3-2</b>  |
| Lesson 3A Software .....                                      | 3-3         |
| Lesson 3B Programming .....                                   | 3-21        |
| <b>Chapter 4 Systems Analysis and MIS</b> .....               | <b>4-1</b>  |
| Lesson 4A Systems Analysis .....                              | 4-2         |
| Lesson 4B Managing Information Technology .....               | 4-18        |
| <b>Chapter 5 Personal Productivity Software</b> .....         | <b>5-1</b>  |
| Lesson 5A Word Processing and Desktop Publishing .....        | 5-2         |
| Lesson 5B Spreadsheets .....                                  | 5-18        |
| Lesson 5C Databases .....                                     | 5-34        |
| <b>Chapter 6 Advanced Applications</b> .....                  | <b>6-1</b>  |
| Lesson 6A Multimedia and Presentation Packages .....          | 6-2         |
| Lesson 6B Other Useful Applications .....                     | 6-17        |
| <b>Part III Getting Connected</b>                             |             |
| <b>Chapter 7 Data Communications</b> .....                    | <b>7-2</b>  |
| Lesson 7A Telecommunications .....                            | 7-3         |
| Lesson 7B Computer Networking .....                           | 7-18        |
| <b>Chapter 8 Connecting the World</b> .....                   | <b>8-1</b>  |
| Lesson 8A The Information Superhighway and the Internet ..... | 8-2         |
| Lesson 8B The World Wide Web .....                            | 8-19        |
| <b>Part IV Computers Shaping Society and Your Future</b>      |             |
| <b>Chapter 9 The Social Challenge—Now and Tomorrow</b> .....  | <b>9-2</b>  |
| Lesson 9A Ethics—Doing the Right Thing .....                  | 9-3         |
| Lesson 9B The User, the Computer, and the Environment .....   | 9-16        |
| Lesson 9C Security and Privacy .....                          | 9-30        |
| Lesson 9D A View Toward the Future .....                      | 9-46        |
| <b>Chapter 10 Traditional Uses of Computers</b> .....         | <b>10-1</b> |
| Lesson 10A Careers in the Computer Industry .....             | 10-2        |
| Lesson 10B Business and Industry .....                        | 10-18       |
| Lesson 10C Science and Medicine .....                         | 10-32       |
| <b>Chapter 11 A Hardware Buyer's Guide</b> .....              | <b>11-1</b> |
| Lesson 11A Strategies for Selecting Hardware .....            | 11-2        |
| <b>Chapter 12 Emerging Uses of Computers</b> .....            | <b>12-1</b> |
| Lesson 12A Computers in Education .....                       | 12-2        |
| Lesson 12B Computers in Transportation .....                  | 12-19       |
| Lesson 12C Computers in Law Enforcement .....                 | 12-34       |
| Lesson 12D Arts and Entertainment .....                       | 12-47       |
| <b>Glossary</b> .....   | <b>G-1</b>  |
| <b>Answers</b> .....  | <b>A-1</b>  |
| <b>Index</b> .....  | <b>I-1</b>  |

| The Need for Computer Literacy .....           | 1-5        | Outline .....                                    | 2-22 |
| The Computer Defined .....                     | 1-8        | Learning Objectives .....                        | 2-22 |
| The Computer: Its Uses .....                   | 1-10       | Storage Media .....                              | 2-23 |
| The Five Elements of the Computing             |            | Traditional Storage—                             |      |
| Process .....                                  | 1-10       | Magnetic Tape .....                              | 2-23 |
| Hardware .....                                 | 1-11       | Today's Preferred Storage—                       |      |
| Software .....                                 | 1-12       | Magnetic Disk .....                              | 2-24 |
| Data .....                                     | 1-15       | The Storage of the Future—                       |      |
| People .....                                   | 1-16       | Optical Disk .....                               | 2-28 |
| Procedures .....                               | 1-17       | Storing Data in Files .....                      | 2-29 |
| The Computer: Its Advantages .....             | 1-17       | Types of Files .....                             | 2-29 |
| Positive and Negative Effects .....            | 1-18       | Naming Files .....                               | 2-30 |
| Lesson Summary .....                           | 1-19       | Organizing Files into Directories .....          | 2-31 |
| Lesson 1B The Historical Perspective .....     | 1-26       | Storage in Data Processing                       |      |
| Outline .....                                  | 1-26       | Applications .....                               | 2-33 |
| Learning Objectives .....                      | 1-26       | Types of Files in Data Processing                |      |
| The First Computers .....                      | 1-27       | Applications .....                               | 2-34 |
| Clockwork Calculators .....                    | 1-28       | File Organization in Data Processing             |      |
| Representing Data: From Looms to               |            | Applications .....                               | 2-35 |
| Business Machines .....                        | 1-28       | Sequential File Organization .....               | 2-35 |
| The Jacquard Loom .....                        | 1-29       | Direct (Random) File Organization .....          | 2-36 |
| Charles Babbage and the First                  |            | Indexed Sequential File                          |      |
| Modern Computer Design .....                   | 1-29       | Organization .....                               | 2-37 |
| Hollerith and the Automated                    |            | Lesson Summary .....                             | 2-38 |
| Census Bureau .....                            | 1-30       | Lesson 2C Data In, Information Out .....         | 2-43 |
| Toward Modern Computing .....                  | 1-31       | Outline .....                                    | 2-43 |
| Before the First Generation:                   |            | Learning Objectives .....                        | 2-43 |
| Early Electronic Computers .....               | 1-31       | Input Devices .....                              | 2-44 |
| The First Generation                           |            | Keyed Input .....                                | 2-44 |
| (1951 to 1959) .....                           | 1-33       | Pointing Devices .....                           | 2-46 |
| The Second Generation                          |            | Data Scanning Devices .....                      | 2-49 |
| (1959 to 1963) .....                           | 1-35       | Voice Recognition Devices .....                  | 2-50 |
| The Third Generation                           |            | Output Devices .....                             | 2-53 |
| (1963 to 1975) .....                           | 1-36       | Monitors .....                                   | 2-53 |
| The Fourth Generation                          |            | Audio Output .....                               | 2-55 |
| (1975 to Today) .....                          | 1-38       | Printers .....                                   | 2-55 |
| Computer Technology Today .....                | 1-40       | Plotters .....                                   | 2-57 |
| A Fifth Generation? .....                      | 1-41       | Microfilm, Microfiche, and                       |      |
| Lesson Summary .....                           | 1-43       | CD-ROM .....                                     | 2-57 |
| <b>Chapter 2 Computer Hardware</b> .....       | <b>2-1</b> | Robots .....                                     | 2-58 |
| Lesson 2A Processing and Memory .....          | 2-2        | Lesson Summary .....                             | 2-59 |
| Outline .....                                  | 2-2        | Lesson 2D Different Needs, Different Sizes ..... | 2-64 |
| Learning Objectives .....                      | 2-2        | Outline .....                                    | 2-64 |
| Processing .....                               | 2-3        | Learning Objectives .....                        | 2-64 |
| Data Representation .....                      | 2-3        |  |      |

|                                       |      |
|---------------------------------------|------|
| Supercomputers .....                  | 2-65 |
| Mainframes .....                      | 2-68 |
| Minicomputers .....                   | 2-69 |
| Workstations and Microcomputers ..... | 2-70 |
| Workstations .....                    | 2-70 |
| Microcomputers .....                  | 2-72 |
| Computers on the Move .....           | 2-74 |
| Embedded Computers .....              | 2-76 |
| Connectivity .....                    | 2-76 |
| Lesson Summary .....                  | 2-76 |

## Part II Making Computers Work for You

### Chapter 3 Software and Software Development 3-2

|  |      |
|--|------|
| Lesson 3A Software .....                                 | 3-3  |
| Outline .....  | 3-3  |
| Learning Objectives .....                                | 3-3  |
| The Role of Software .....                               | 3-4  |
| System Software .....                                    | 3-4  |
| Operating Systems .....                                  | 3-4  |
| Operating Environments .....                             | 3-7  |
| Commonly Used Operating Systems .....                    | 3-7  |
| Other System Software .....                              | 3-15 |
| Application Software and Packages .....                  | 3-16 |
| The Future of Software .....                             | 3-16 |
| Lesson Summary .....                                     | 3-16 |
| Lesson 3B Programming .....                              | 3-21 |
| Outline .....  | 3-21 |
| Learning Objectives .....                                | 3-21 |
| What Is Programming? .....                               | 3-22 |
| A Short History of Programming .....                     | 3-22 |
| When You Need to Develop a Program .....                 | 3-22 |
| Who Should Write a Program? .....                        | 3-23 |
| Beginning the Project .....                              | 3-23 |
| Designing the Program .....                              | 3-26 |
| Program Logic Constructs .....                           | 3-26 |
| Developing an Algorithm .....                            | 3-26 |
| Program Design Tools .....                               | 3-27 |
| Completing the Project .....                             | 3-30 |
| Coding the Program .....                                 | 3-30 |
| Testing and Debugging .....                              | 3-30 |
| Completing the Documentation .....                       | 3-30 |
| Implementation .....                                     | 3-31 |
| Maintenance .....  | 3-31 |
| Types of Programming Languages .....                     | 3-31 |
| Machine Language .....                                   | 3-32 |
| Assembly Language .....                                  | 3-32 |
| High-Level Languages .....                               | 3-34 |
| BASIC .....  | 3-35 |
| COBOL .....  | 3-35 |
| FORTRAN .....  | 3-35 |
| Pascal .....   | 3-35 |
| C and C++ .....  | 3-35 |
| Language Translators .....                               | 3-36 |
| Very High-Level Languages .....                          | 3-37 |
| Web Development Languages .....                          | 3-39 |
| Object-Oriented Languages .....                          | 3-41 |
| What Is OOP? .....                                       | 3-41 |
| The Nature of Objects .....                              | 3-41 |
| Basic Principles of Object-Oriented<br>Programming ..... | 3-42 |
| OOP Languages .....                                      | 3-42 |

|  |     |
|--|-----|
| Lesson 4A Systems Analysis .....         | 4-2 |
| Outline .....                            | 4-2 |
| Learning Objectives .....                | 4-2 |
| The Systems Development Life Cycle ..... | 4-3 |
| Analysis and Design .....                | 4-3 |
| Coding .....                             | 4-4 |
| Debugging .....                          | 4-4 |
| Testing and Acceptance .....             | 4-5 |
| Maintenance .....                        | 4-5 |
| Documentation .....                      | 4-6 |

#### Software Engineering Tools and

|  |      |
|--|------|
| Techniques .....                                     | 4-6  |
| Structured Techniques .....                          | 4-6  |
| Client-Server Tools .....                            | 4-9  |
| CASE Tools .....                                     | 4-10 |
| Information Engineering .....                        | 4-10 |
| Software Engineering Approaches .....                | 4-11 |
| Application Development Without<br>Programmers ..... | 4-11 |
| Prototyping .....                                    | 4-12 |
| Rapid Application Development .....                  | 4-13 |
| Lesson Summary .....                                 | 4-14 |
| Lesson 4B Managing Information Technology .....      | 4-18 |
| Outline .....  | 4-18 |
| Learning Objectives .....                            | 4-18 |
| Understanding Information Technology .....           | 4-19 |
| What Is Information Technology? .....                | 4-19 |
| Who Manages Information<br>Technology? .....         | 4-20 |
| Who Uses Information Technology? .....               | 4-22 |
| Organizational Structures .....                      | 4-24 |
| How Information Technology Is<br>Used .....          | 4-24 |
| The Information Technology Concept .....             | 4-26 |
| Trends in Information Technology .....               | 4-27 |
| Lesson Summary .....                                 | 4-29 |

### Chapter 5 Personal Productivity Software 5-1

|  |      |
|--|------|
| Lesson 5A Word Processing and Desktop<br>Publishing .....    | 5-2  |
| Outline .....  | 5-2  |
| Learning Objectives .....                                    | 5-2  |
| Historical Overview: Printing<br>Becomes a Mass Medium ..... | 5-3  |
| Basic Features of Word Processing<br>Software .....          | 5-5  |
| Writing .....  | 5-5  |
| Editing .....  | 5-5  |
| Formatting .....   | 5-6  |
| Saving .....   | 5-7  |
| Printing .....   | 5-7  |
| Additional Features of Word<br>Processing Software .....     | 5-7  |
| Word Processing and Writing Quality .....                    | 5-8  |
| Desktop Publishing .....                                     | 5-9  |
| Determining Page Layout .....                                | 5-9  |
| Entering Text and Graphics .....                             | 5-9  |
| Formatting .....   | 5-11 |
| Saving .....   | 5-12 |
| Printing .....   | 5-12 |
| Desktop Publishing versus Word<br>Processing .....           | 5-12 |
| Lesson Summary .....   | 5-12 |

|  |            |
|--|------------|
| Lesson 5B Spreadsheets                         | 5-18       |
| Outline  | 5-18       |
| Learning Objectives                            | 5-18       |
| Advantages of Spreadsheet Software             | 5-19       |
| Basic Spreadsheet Features                     | 5-20       |
| The Spreadsheet Screen                         | 5-20       |
| Operating Modes                                | 5-20       |
| Cells and Cell Contents                        | 5-21       |
| Spreadsheet Navigation                         | 5-23       |
| Ranges (Blocks)                                | 5-24       |
| Commands                                       | 5-24       |
| How to Create, Store, and Print a Spreadsheet  | 5-24       |
| Spreadsheet Graphics                           | 5-26       |
| Special Spreadsheet Features                   | 5-28       |
| Spreadsheet Tips                               | 5-28       |
| Lesson Summary                                 | 5-29       |
| Lesson 5C Databases                            | 5-34       |
| Outline  | 5-34       |
| Learning Objectives                            | 5-34       |
| The Advantages of Databases                    | 5-35       |
| Types of Database Software                     | 5-37       |
| File Management Programs                       | 5-37       |

## Part IV Computers Shaping Society and Your Future

### Chapter 9 The Social Challenge—Now and Tomorrow 9-2

|  |      |
|--|------|
| Lesson 9A Ethics—Doing the Right Thing ..... | 9-3  |
| Outline .....                                | 9-3  |
| Learning Objectives .....                    | 9-3  |
| What Is Ethics? .....                        | 9-4  |
| ACM Ethical Standards .....                  | 9-4  |
| Ethics for Computer Users .....              | 9-5  |
| Software Piracy .....                        | 9-5  |
| Unauthorized Access .....                    | 9-7  |
| Public and Private Networks .....            | 9-7  |
| Ethics for the Computer Professional .....   | 9-8  |
| Professional Standards .....                 | 9-8  |
| Programmer Liability .....                   | 9-9  |
| Ethics for Businesses .....                  | 9-9  |
| The Ten Commandments of                      |      |
| Computing .....                              | 9-10 |
| Lesson Summary .....                         | 9-10 |

|   |      |
|---|------|
| Lesson 9B The User, the Computer, and the |      |
| Environment .....                         | 9-16 |
| Outline .....                             | 9-16 |
| Learning Objectives .....                 | 9-16 |
| Caring for the User .....                 | 9-17 |
| Radiation Dangers .....                   | 9-17 |
| Eye Problems .....                        | 9-17 |
| Repetitive Stress Injuries .....          | 9-18 |
| Musculoskeletal Pain .....                | 9-19 |
| Caring for Your Computer .....            | 9-19 |
| Taking Care of the Hardware .....         | 9-20 |
| Protecting the Programs and Data .....    | 9-22 |
| Computers and the Law .....               | 9-23 |
| Computers and the Environment .....       | 9-24 |
| Lesson Summary .....                      | 9-26 |

|  |      |
|--|------|
| Lesson 9C Security and Privacy .....     | 9-30 |
| Outline .....                            | 9-30 |
| Learning Objectives .....                | 9-30 |
| The Need for Information .....           | 9-31 |
| The Right to Privacy .....               | 9-31 |
| Wiretapping and Data Encryption .....    | 9-33 |
| Electronic Mail Privacy .....            | 9-33 |
| Record Matching .....                    | 9-34 |
| Credit Reporting .....                   | 9-34 |
| Electronic Funds Transfer (EFT) .....    | 9-34 |
| Security .....                           | 9-35 |
| Natural Disasters .....                  | 9-35 |
| Access Control .....                     | 9-36 |
| Data Backups .....                       | 9-37 |
| Network Control .....                    | 9-37 |
| Computer Viruses .....                   | 9-38 |
| Types of Viruses .....                   | 9-38 |
| Precautions Against Viruses .....        | 9-39 |
| Legislation .....                        | 9-39 |
| United States Privacy Legislation .....  | 9-40 |
| European Privacy Legislation .....       | 9-41 |
| Lesson Summary .....                     | 9-41 |
| Lesson 9D A View Toward the Future ..... | 9-46 |
| Outline .....                            | 9-46 |
| Learning Objectives .....                | 9-46 |
| Artificial Intelligence—Computer or      |      |
| Human? .....                             | 9-47 |
| Natural Language .....                   | 9-50 |
| Expert Systems .....                     | 9-50 |
| Robots .....                             | 9-51 |
| Neural Networks .....                    | 9-52 |
| Fuzzy Logic .....                        | 9-52 |
| Artificial Life .....                    | 9-53 |
| Virtual Reality .....                    | 9-53 |
| Tomorrow's Technology .....              | 9-54 |
| Hardware .....                           | 9-54 |
| Software .....                           | 9-57 |
| Communications .....                     | 9-57 |
| Lesson Summary .....                     | 9-59 |

### Chapter 10 Traditional Uses of Computers 10-1

|   |       |
|---|-------|
| Lesson 10A Careers in the Computer Industry ..... | 10-2  |
| Outline .....                                     | 10-2  |
| Learning Objectives .....                         | 10-2  |
| Jobs in the Computer Industry .....               | 10-3  |
| Categories of Computer Careers .....              | 10-5  |
| Computer Information Systems                      |       |
| (CIS) .....                                       | 10-5  |
| Computer Science .....                            | 10-5  |
| Computer Engineering .....                        | 10-6  |
| New Career Paths .....                            | 10-7  |
| A Lifetime of Learning .....                      | 10-8  |
| Seminars .....                                    | 10-8  |
| On-line Services .....                            | 10-9  |
| Computer Magazines, Newspapers,                   |       |
| and Journals .....                                | 10-9  |
| Conferences and Shows .....                       | 10-9  |
| Professional Organizations .....                  | 10-9  |
| The Impact of Computers on Overall                |       |
| Employment .....                                  | 10-11 |
| Lesson Summary .....                              | 10-12 |

|  |             |   |            |
|--|-------------|---|------------|
| Lesson 10B Business and Industry .....             | 10-18       | On Land and Sea .....                         | 12-25      |
| Outline .....                                      | 10-18       | Logistics .....                               | 12-25      |
| Learning Objectives .....                          | 10-18       | Trains .....                                  | 12-27      |
| Retail .....                                       | 10-19       | Travel Guides .....                           | 12-27      |
| Banking and Finance .....                          | 10-21       | Toward the Future .....                       | 12-27      |

## Topical Sidebars

### Chapter 1

|   |      |
|---|------|
| Lesson 1A—Distance Learning Goes the Distance ..... | 1-6  |
| High-Tech Computer Games .....                      | 1-14 |
| Lesson 1B—Amazing Grace .....                       | 1-37 |
| Your Personal Translator .....                      | 1-42 |

### Chapter 2

|   |      |
|---|------|
| Lesson 2B—The Millennium Bug .....                            | 2-36 |
| Lesson 2C—The Future of the Human-Computer<br>Interface ..... | 2-52 |
| Lesson 2D—Supercomputer for Super Projects .....              | 2-67 |

### Chapter 3

|   |      |
|---|------|
| Lesson 3A—Speedy Timing .....                   | 3-13 |
| Lesson 3B—What Is a “Killer Application”? ..... | 3-33 |
| The Cathedral and the Bazaar .....              | 3-40 |

### Chapter 4

|  |      |
|--|------|
| Lesson 4A—Y2K: The Millennium Bug .....      | 4-7  |
| Lesson 4B—IT at L.L. Bean .....              | 4-20 |
| The IT Professional Is in Short Supply ..... | 4-23 |
| IT at Continental Airlines .....             | 4-26 |
| IT at Amazon.com .....                       | 4-29 |

### Chapter 5

|  |      |
|--|------|
| Lesson 5A—The New Novel .....                              | 5-10 |
| Lesson 5B—Financial Management for the<br>Individual ..... | 5-25 |
| Lesson 5C—Beyond the STATUS Quo .....                      | 5-41 |

### Chapter 6

|   |      |
|---|------|
| Lesson 6A—The Multifaceted Issues of a<br>Multimedia Patent ..... | 6-10 |
| Lesson 6B—The GPS Phenomenon .....                                | 6-27 |

### Chapter 7

|   |      |
|---|------|
| Lesson 7A—Interactive Television: TV You<br>Can Get Your Hands On ..... | 7-11 |
| Lesson 7B—The ATM Standard .....  | 7-29 |
| Computer Networks and Closed<br>Societies .....                         | 7-41 |

### Chapter 8

|  |      |
|--|------|
| Lesson 8A—Netiquette .....                 | 8-11 |
| Lesson 8B—Networking on the Internet ..... | 8-24 |

### Chapter 9

|   |      |
|---|------|
| Lesson 9A—The Issue Was Plagiarism .....                      | 9-6  |
| Lesson 9B—GLOBE: Student Monitors of the Earth .....          | 9-23 |
| Home Computers .....  | 9-25 |
| Lesson 9C—Individual Privacy in the Information<br>Age .....  | 9-32 |
| TRW: Giving Credit Where It's Due .....                       | 9-35 |
| Lesson 9D—Virtual Reality Is More Than Fun<br>and Games ..... | 9-55 |

### Chapter 10

|   |       |
|---|-------|
| Lesson 10A—Interview with Tonya Antonucci ..... | 10-10 |
| Lesson 10B—Home on the Range .....              | 10-20 |
| Lesson 10C—Computers Predict the Weather .....  | 10-38 |

### Chapter 12

|  |       |
|--|-------|
| Lesson 12A—Multimedia: The New Textbooks .....                             | 12-6  |
| Lesson 12B—Computerized Routing Systems .....                              | 12-26 |
| Lesson 12C—Taking a Bite Out of Crime .....                                | 12-37 |
| Lesson 12D—The Artful Balance: The Classic Piano<br>and the Computer ..... | 12-54 |
