PREFACE

Laboratory Animal Medicine has made enormous strides in the 47 years since R. Jaffé published his "Anatomy and Pathology of Spontaneous Diseases of Small Laboratory Animals" in 1931. So much new information had accumulated that in a new edition in 1958, Jaffé, aided by Cohrs and Meessen, needed the assistance of 46 colleagues to do the subject justice. Like its predecessor, this two volume comprehensive treatise on "Pathologie der Laboratoriumstiere" was written in German and thus not readily available to the widening circle of veterinarians and pathologists who now are interested in laboratory animals.

Aside from the need to have a comprehensive review of laboratory animal pathology in English, the subject matter has expanded enormously so that an entirely new effort seemed in order. More species have joined the ranks of laboratory animals since the earlier efforts, a large variety of new diseases has been discovered, virology, genetics and "animal models for human disease" have made their appearance and many more discoveries make it difficult to summarize the available information in two volumes. We hope the volumes will find a useful place in the hands of our colleagues.

We deeply appreciate the efforts of each of the authors and co-authors of the 23 chapters in this two volume work. In some instances the reader will note what appears to be repetition in certain chapters. This repetition was allowed to stand in some cases because different approaches seemed useful, although efforts were made to delete most of the redundancy which inevitably arises in a venture of this kind. We will be grateful if our colleagues point out errors and send us specific and general criticism of this work to allow corrections in the event of reprinting or a next edition.

One objective has been to assemble current information in the pathologic aspects of diseases of laboratory animals. The text has been directed toward persons with knowledge of the principles of pathology but we hope others will find it useful.

The production of this book has been a long and arduous task and without the constant guidance of the publishers it would never have been accomplished. The Editors wish to express their gratitude for the competent, far-sighted outlook and the patient efforts of Dr. Heinz Götze, Mr. Bernd Grossmann, and Mr. Victor Borsodi of Springer-Verlag.

TABLE OF CONTENTS

- Chapter 12 **Tumors.** ROBERT A. SQUIRE, DAWN G. GOODMAN, MARION G. VALERIO, TORGNY N. FREDRICKSON, JOHN D. STRANDBERG, MORTON H. LEVITT, CAROLYN H. LINGEMAN, JOHN C. HARSHBARGER, and CLYDE J. DAWE
- Chapter 13 **Viral Diseases.** RONALD D. HUNT, WILLIAM W. CARLTON, and NORVAL W. KING, JR.
- Chapter 14 **Bacterial Diseases.** WILLIAM W. CARLTON, RONALD D. HUNT
- Chapter 15 **Diseases Due to Mycoplasmas and Rickettsias.** J. RUSSELL LINDSEY, GAIL H. CASSELL, and HENRY J. BAKER
- Chapter 16 **Fungal Diseases.** GEORGE MIGAKI, and FRANK A. VOELKER and JOHN W. SAGARTZ
- Chapter 17 **Protozoal and Metazoal Diseases.** JOHN A. SHADDUCK and STEVEN P. PAKES
- Chapter 18 **Cytogenetics.** K. BENIRSCHKE
- Chapter 19 **Clinical Biochemistry.** MAXINE M. BENJAMIN and DOUGLAS H. MCKELVIE
- Chapter 20 **Developmental Abnormalities.** JAMES G. WILSON, HAROLD KALTER, A. K. PALMER, RICHARD M. HOAR, RAY E. SHENEFELT, FELIX BECK, F. L. EARL, NEAL S. NELSON, EZRA BERMAN, JERRY F. STARA, LLOYD A. SELBY, and WILLIAM J. SCOTT, JR.
- Chapter 21 **Immunopathology.** ROBERT M. LEWIS
- Chapter 22 **Hereditary Diseases.** T. C. JONES
- Chapter 23 **Nutritional and Metabolic Diseases.** PAUL M. NEWBERNE

Chapter 8

Diseases of Skin	581
SVEND W. NIELSEN. With 18 Figures.	
Structure and Function	582
Hair Follicles	582
Sebaceous Glands	582
Apocrine Sweat Glands	583
Ceruminous Glands	584
Eccrine Sweat Glands	584
Peri- or Circumanal Glands	584
Anal Sac or Pouch (Sinus Paranalisis)	584
Reaction to Injury	585
Tumors of Skin	586
Epithelial Tumors	586
Basal Cell Tumor	586
Clinical Appearance	586
Microscopic Appearance	587
