

INTERNATIONAL JOINT
CONFERENCE ON
NEURAL NETWORKS

VOL II

IJCNN-91-SEATTLE

International
Joint
Conference on
Neural Networks

July 8-12, 1991
Washington State
Convention & Trade Center
Seattle, WA

Volume II

Co-sponsored by the
International Neural Network Society
and the
Institute of Electrical and Electronics Engineers, Inc.

TABLE OF CONTENTS CONTINUED

VOLUME II

LEARNING & GENERALIZATION I *Poster Presentations*

Estimation of Generalization Capability by Combination of New Information Criterion and Cross Validation	II-1
Y. Wada, M. Kawato, <i>ATR Auditory and Visual Perception Research Laboratories</i>	
Learning of Category Boundaries Based on Inverse Recall by Multi-layer Neural Network	II-7
K. Yasmada, <i>University of California, San Diego</i>	
A Fast On-line Learning Algorithm for Recurrent Neural Networks	II-13
G. Sun, H. Chen, Y. Lee, <i>University of Maryland at College Park</i>	
A Non-iterative Method for Training Feed Forward Networks	II-19
W. Schmidt, M. Kraaijveld, R. Duin, <i>University of Technology Delft</i>	
Comparison of Perceptron Training by Linear Programming and by the Perceptron Convergence Procedure	II-25
A. Mansfield, <i>National Physical Laboratory</i>	
Mean-variance Back-propagation: A Connectionist Learning Algorithm with a Selective Attention Mechanism	II-31
Y. Lacouture, <i>Universite Laval</i>	
Learning Sequential Structure with Recurrent pRAM Nets	II-37
J. Taylor, D. Gorse, <i>University of London</i>	
Induction of Neural Networks for Parallel Binary Operations	II-43
T. Co, <i>Michigan Technological University</i>	
A Superior Error Function for Training Neural Networks	II-49
B. Kalman, S. Kwasny, <i>Washington University</i>	
Flash Learning for a Multi-layer Network	II-53
A. Namatame, Y. Tsukamoto, <i>National Defense Academy</i>	
An Unsupervised Hyperspheric Multi-layer Feedforward Neural Network Classifier	II-59
D. Nissani, <i>Elisra Electronic Systems Ltd.</i>	
Characteristics of the Associative Memory Trained by the Learning-unlearning Algorithm	II-65
K. Suzuki, Y. Kakazu, <i>Hokkaido University</i>	
Genetic Reinforcement Learning for Neural Networks	II-71
S. Dominic, R. Das, D. Whitley, C. Anderson, <i>Colorado State University</i>	
Generalization in Feed Forward Neural Networks	II-77
D. Whitley, N. Karunanithi, <i>Colorado State University</i>	
Learning Explicit Rules in a Neural Network	II-83
C. McMillan, M. Mozer, P. Smolensky, <i>University of Colorado</i>	
Minimum-cost Ho-kashyap Associative Processor for Piecewise-hyperspherical Classification	II-89
B. Telfer, <i>Naval Surface Warfare Center, D. Casant, Carnegie Mellon University</i>	
Continuous-time Temporal Back-propagation	II-95
S. Day, D. Camporese, <i>University of British Columbia</i>	

CONTINUED TABLE OF CONTENTS

VOLUME II

Relating Logical Neural Network to Conventional Models of Computation T. Ludemir, <i>King's College London</i>	II-101
Connectionist Generalization for Production: An Example from GridFont D. Stork, <i>Stanford University</i> , R. Keesing, <i>Ricoh California Research Center</i> , S. Mims, I. Grebert	II-105
Training of a Three-layer Dynamical Recurrent Neural Network for Nonlinear Input-output Mapping M. K. Sundareshan, S. I. Sudharsanan, <i>University of Arizona</i>	II-111
Hybrid Learning in Expert Networks S. Hruska, D. Kuncicky, R. Lacher, <i>The Florida State University</i>	II-117

LEARNING & GENERALIZATION II *Poster Presentations*

Back Propagation Simulations Using Limited Precision Calculations J. Holt, <i>University of Washington</i> ; T. Baker, <i>Adaptive Solutions, Inc.</i>	II-121
The Capacity of a Two Layer Network with Binary Weights C. Ji, D. Psaltis, <i>California Institute of Technology</i>	II-127
How Gaussian Radial Basis Functions Work Y. Wong, <i>California Institute of Technology</i>	II-133
Multilayer Feedforward Networks Can Learn Strange Attractors S. Welstead, <i>COLSA, Inc.</i>	II-139
Double Backpropagation Increasing Generalization Performance H. Drucker, Y. Le Cun, <i>AT&T Bell Laboratories and Monmouth College</i>	II-145
ART 2-A: An Adaptive Resonance Algorithm for Rapid Category Learning and Recognition G. Carpenter, S. Grossberg, D. Rosen, <i>Boston University</i>	II-151
On the Capacity and Generalisation Ability of More Realistic Neurons J. Taylor, P. Bressloff, <i>King's College London</i>	II-157
A Frobenius Approximation Reduction Method (FARM) for Determining Optimal Number of Hidden Units S. Kung, <i>Princeton University</i> ; Y. Hu, <i>University of Wisconsin, Madison</i>	II-163
Optimal Learning Algorithm in Bidirectional Associative Memories T. Wang, X. Zhuang, X. Xing, F. Lu, <i>Zhejiang University</i>	II-169
Local Minima and Back Propagation T. Poston, C. Lee, Y. Choie, Y. Kwon, <i>POSTECH</i>	II-173
Reduction of Interconnection Weights in Higher Order Associative Memory Networks J. Wang, T. Krile, J. Walkup, <i>Texas Tech University</i>	II-177
Learning in Analog Hopfield Networks V. Barbosa, L. Alfredo, V. de Carvalho, <i>COPPE, Universidade Federal do Rio de Janeiro</i>	II-183
Self Organizing Modular Neural Networks I. Smotroff, D. Friedman, D. Connolly, <i>The MITRE Corporation</i>	II-187

TABLE OF CONTENTS CONTINUED

VOLUME II

A Comparison of Two Eigen-Networks F. Palmieri, J. Zhu, <i>University of Connecticut</i>	II-193
Improved Rate of Convergence In Kohonen Neural Network Z. Lo, B. Bavarian, <i>University of California, Irvine</i>	II-201
Application of GRG2 for Training Neural Networks V. Subramanian, <i>University of Wisconsin - Parkside</i> ; M. Hung, <i>Kent State University</i>	II-207
Strategies of Unsupervised Learning for a Parallel Parsing Architecture M. Roques, D. Beroule, <i>LIMS CNRS</i>	II-215
Optimal Pruning of Neural Tree Networks for Improved Generalization A. Sankar, R. Mammone, <i>Rutgers University</i>	II-219
Netclass - A Fresh Look at Connectionist Category Formation M. Gera, <i>Imperial College</i>	II-225
A Neural Net Model of Normal and Dyslexic Spelling R. Loosemore, G. Brown, F. Watson, <i>University of Wales</i>	II-231

NETWORK DYNAMICS *Oral Presentations*

Dynamics of the Amari-Takeuchi Competitive Learning Model T. Troyer, <i>University of California, Berkeley</i>	II-237
Segmentation and Binding in an Oscillatory Neural Network D. Horn, <i>Tel Aviv University</i> ; M. Usher, <i>Weizmann Institute of Science</i>	II-243
Synchronized Oscillations During Cooperative Feature Linking in Visual Cortex S. Grossberg, D. Somers, <i>Boston University</i>	II-249
Dynamic Properties of Neural Network with Adapting Synapses D. Dong, <i>California Institute Technology, Beckman Institute</i>	II-255
On a Neural Network with Synaptic Weight Having Double Minimum Potential Y. Usami, <i>Kanagawa University</i>	II-261
The Kanerva Memory Is Stable T. Chiueh, <i>National Taiwan University</i> ; R. Goodman, <i>California Institute of Technology</i>	II-267
Second-order Recurrent Neural Networks for Grammatical Inference D. Chen, H. Chen, G. Sun, Y. Lee, <i>NEC Research Institute</i> ; C.L. Giles, C.B. Miller, <i>University of Maryland</i>	II-273
Stability of Image Processing Neuro Chips: Spatial and Temporal T. Matsumoto, <i>Waseda University</i> ; H. Kobayashi, <i>Yokogawa Electric Corporation</i> ; Y. Togawa, <i>Science University of Tokyo</i>	II-283

CONTINUED TABLE OF CONTENTS

VOLUME II

NETWORK DYNAMICS *Poster Presentations*

- Continuum Model for Quadratic Memories** II-297
H. Loos, *Laguna Research Laboratory*
- On the Capacity of a Markov-chain Encoded Associative Memory** II-303
M. Shirazi, *Kansai Advanced Research Center*
- On the Complexity of Computing Equilibria for Nonsymmetric Analog Networks** II-313
D. Miller, S. Zucker, *McGill University*
- The Local Backward-forward Algorithm** II-321
A. Kehagias, *Brown University*
- Hardware Annealing for Fast Retrieval of Optimal Solutions in Hopfield Neural Networks** II-327
B. Sheu, C. Chang, *University of Southern California*; B. Lee, *Samsung Electronics Co.*
- Period-doublings to Chaos in a Simple Neural Network** II-333
X. Wang, *University of Southern California*
- Global Dynamics in Neural Networks III** II-341
F. Botelho, M. Garzon, *Memphis State University*
- Higher Degree Error Backpropagation in Cross-coupled Hopfield Nets** II-349
K. Tsutsumi, *Ryukoku University*
- Turing Equivalence of Neural Networks with Second Order Connection Weights** II-357
G. Sun, H. Chen, Y. Lee, *University of Maryland*; C. Giles, *NEC Research Institute*

NEURAL NETWORK ARCHITECTURES I

Oral Presentations

- Reliability Characteristics of Hebbian-type Associative Memories in Network Implementations** II-363
T. Krile, P. Chung, *Texas Tech University*
- The Autoregressive Backpropagation Algorithm** II-369
R. Leighton, B. Conrath, *The MITRE Corporation*
- Neural Net Method for Dual Subspace Pattern Recognition** II-379
L. Xu, A. Krzyzak, *Universite Concordia*; E. Oja, *Lappeenranta University of Technology*
- On Optimal Adaptive Classifier Design Criterion** II-385
W. Lee, M. Tenorio, *Purdue University*
- Using the Symmetries of a Multi-layered Network to Reduce the Weight Space** II-391
F. Jordan, G. Clement, *Institut National des Sciences Appliquees*
- Genetic Generation of Both the Weights and Architecture for a Neural Network** II-397
J. Koza, J. Rice, *Stanford University*

TABLE OF CONTENTS CONTINUED

VOLUME II

Using LMS Trees for Image Processing T. Sanger, <i>MIT</i>	II-405
---	--------

NEURAL NETWORK ARCHITECTURES II

Oral Presentations

Fuzzy Art: An Adaptive Resonance Algorithm for Rapid, Stable Classification of Analog Patterns G. Carpenter, S. Grossberg, D. Rosen, <i>Boston University</i>	II-411
Design of Unsupervised Classifier M. Sayeh, A. Ragu, <i>Southern Illinois University at Carbondale</i> ; H Hsu, <i>NSWC</i>	II-417
Error Propagation and Supervised Learning In Adaptive Resonance Networks R. Baxter, <i>Boston University</i>	II-423

NEURAL NETWORK ARCHITECTURES

Poster Presentations

On Fuzzy Neuron Models M. Gupta, J. Qi, <i>University of Saskatchewan</i>	II-431
Associative Memory Networks, Fault-tolerance and Coding theory N. Hendrich, <i>Fachbereich Informatik, Universitat Hamburg</i>	II-437
Using Stereographic Projection as a Preprocessing Technique for Upstart J. Saffery, C. Thornton, <i>University of Edinburgh</i>	II-441
Fault Tolerance of Pruned Multilayer Networks B. Segee, M. Carter, <i>University of New Hampshire</i>	II-447
Learning to Generate Subgoals for Action Sequences J. Schmidhuber, <i>Technische Universitat Munchen</i>	II-453
Optimal Dimensioning of Counterpropagation Neural Networks Y. Lirov, <i>AT&T Bell Laboratories</i>	II-455
Fuzzy Rule Extraction from a Multilayered Neural Network I. Enbutsu, K. Baba, N Hara, <i>Hitachi Ltd.</i>	II-461
The Augmented ART1 Neural Network G. Heileman, <i>The University of New Mexico</i> ; M. Georgiopoulos, <i>University of Central Florida</i>	II-467
Information Theoretic Derivation of Network Architecture and Learning Algorithms R. Jones, C. Barnes, Y. Lee, W. Mead, <i>Los Alamos National Laboratory</i>	II-473
An ART2-TPM Neural Network for Automatic Pattern Classification M. Fujita, B. Bavarian, <i>University of California, Irvine</i>	II-479
Using CNLS-Net to Predict the Mackey-glass Chaotic Time Series W. Mead, R. Jones, Y. Lee, C. Barnes, G. Flake, L. Lee, <i>Los Alamos National Laboratory</i>	II-485

CONTINUED TABLE OF CONTENTS

VOLUME II

A Neural Network for Interpretation of Multi-meaning Words T. Nagano, H. Ishijima, <i>Hosei University</i>	II-491
The Design of Multi-layer Perceptrons Using Building Blocks M. Manry, <i>University of Texas at Arlington</i> ; K. Rohani, <i>Motorola Incorporation</i>	II-503
Contrastive Hebbian Learning and the Traveling Salesman Problem M. Day, J. Zien, <i>Carnegie Mellon University</i>	II-509
A K-Nearest Neighbor Artificial Neural Network Classifier A. Jain, J. Mao, <i>Michigan State University</i>	II-515
Self-organizing Neural Network for Spatio-temporal Patterns M. Hagiwara, <i>Keio University, Dept. of Electrical Eng.</i>	II-521
Autoassociative Memory with "Inverted Pyramid" Logic Networks E. Fulcher, <i>Imperial College</i>	II-525
Unsupervised Clustering with Growing Cell Structures B. Fritzke, <i>University of Erlangen-Nuremberg</i>	II-531
Recurrent Multilayer Perceptron for Nonlinear System Identification K. Chong, A. Parlos, A. Atiya, <i>Texas A&M University</i> ; W. Tsai, <i>University of California at Irvine</i> ; B. Fernandez, <i>University of Texas at Austin</i>	II-537
Temporal Processing with Connectionist Networks Z. Ghahramani, <i>MIT</i> ; R. Allen, <i>Bellcore</i>	II-541
An Integrated Neurocomputing System P. Rocha, E. Nigri, P. Treleaven, <i>University College London</i>	II-547
Encoding and Classification in a Model of Olfactory Cortex T. Leen, M. Webb, S. Rehfuss, <i>Oregon Graduate Institute of Science and Technology</i>	II-553
Semi-local Units for Prediction E. Hartman, J. Keeler, <i>MCC</i>	II-561
Adaptive Transfer Functions J. Goulding, <i>Portland State University</i>	II-567
Cooperation of Neural Nets and Task Deomposition M. de Bollivier, P. Gallinari, <i>Universite de Paris Sud</i> ; S. Thiria, <i>CEDRIC/CNAM</i>	II-573
Frequency Based Computation in Neural Networks G. Eisman, <i>San Francisco State University</i>	II-577
A Biological Approach to Plasticity in Artificial Neural Networks F. Piazza, A. Uncini, <i>Universita di Ancona</i> ; G. Orlandi, A. Ascone, <i>Universita di Roma</i>	II-583
A Mapping Neural Network Using Unsupervised and Supervised Training G. Coghill, S. Kia, <i>University of Auckland</i>	II-587
Recurrent and Feedforward Backpropagation for Time Independent Pattern Recognition B. Schurmann, <i>Siemens</i> ; H. Behrens, J. Hollatz, <i>TU Munchen</i> ; D. Gawronska, <i>Universitat der Bundeswehr Munchen</i>	II-591

TABLE OF CONTENTS CONTINUED

VOLUME II

NEUROBIOLOGY *Oral Presentations*

Dimension Reduction, Generalized Deformable Models and the Development of Occularity and Orientation II-597

A. Yuille, J. Kolodny, C. Lee, *Harvard University*

Sensory Segmentation by Neural Oscillators II-603

J. Buhmann, *University of Southern California*; C. Von Der Malsburg, *Ruhr-Universitat Bochum*

Spatiotemporal Correlation in the Cerebellum II-609

M. Braamhof, *Frontier Research Program, RIKEN*

Unsupervised Learning for the Visual Cortex (Layer IV): Model and Simulations II-613

M. Mougeot, R. Azencott, *Ecole Normale Supérieure*

Neural Network Approach to Maintenance and Termination of Central Pattern Generation II-619

H. Pan, A. Guo, *Academia Sinica*; M. Qian, *Peking University*

Topography and Ocular Dominance Can Arise from Distributed Patterns of Activity II-623

G. Goodhill, *University of Sussex*

A Neural Model Suggesting How Speech Spectra may be Represented by the Nervous System II-629

D. Sanders, G.G.R. Green, *University of Newcastle upon Tyne*

NEUROBIOLOGY *Poster Presentations*

Adaptive Matched Filtering in Peripheral Nervous System II-633

R. Pinter, D. Osorio, M.V. Srinivasan, *University of Washington*

Dynamic Model-Based Controller in the Brain II-639

J. Schwaber, E. Graves, J. Paton, W. Rogers, *E.I. DuPont Co.*; K.M. Spyer, *Royal Free Hospital, London*

An Information Theoretical Interpretation of Neuronal Activities II-645

T. Takahashi, *Lab for Neural Networks, RIKEN*

Ontogenetic Development of Retinotopy and of Ocular Dominance Columns II-649

G. Barna, P. Erdi, *Hungarian Academy of Sciences*

Neurodynamic Approach to Odor Processing II-653

P. Erdi, G. Barna, *Hungarian Academy of Sciences*

Complex Oscillations and Chaos in a Simple Neuron Model II-659

T. Chay, *University of Pittsburgh*

Differentiation Processing of Linear and Nonlinear Information in Retinal Neural Network II-663

N. Ishii, *Nagoya Institute of Technology*

CONTINUED TABLE OF CONTENTS

VOLUME II

ROBOTICS & CONTROL *Oral Presentations*

- Evolving Neural Network Controllers for Unstable Systems** II-667
A. Wieland, *University of California, Los Angeles*
- Towards Practical Control Design Using Neural Computation** II-675
T. Troudet, W. Merrill, *NASA Lewis Research Center*
- Knowledge of Knowledge and Intelligent Experimentation for Learning Control** II-683
A. Moore, *MIT Artificial Intelligence Lab*
- Prejudicial Searches and the Pole Balancer** II-689
N. Cotter, T. Guillemin, J. Soller, P. Conwell, *University of Utah*
- Integrated Approximation and Non-convex Optimization Using Radial Basis Function Networks** II-695
A. Saha, D. Tang, C. Wu, *University of Texas at Austin*
- Learning to Control: Some Experiments with Neural Networks** II-695
G. Karsai, *Vanderbilt University*, N. Miyasaka, K. Okuda, *Osaka Gas Co.*
- A Structure by which a Recurrent Neural Network Can Approximate a Nonlinear Dynamic System** II-709
R. Lorenz, D. Seidl, *The University of Wisconsin-Madison*

ROBOTICS & CONTROL *Poster Presentations*

- Quadrupedal Walking Using Trained and Untrained Neural Models** II-715
M. Snaith, *Technology Applications Group*, O. Holland, *Artificial Life Technologies*
- NADINE - A Feedforward Neural Network for Arbitrary Nonlinear Time Series** II-721
H. Ahmed, F. Rauf, *Boston University*
- ANN Modeling of Volterra Systems** II-727
G. Davis, M. Gasperi, *Allen-Bradley, A Rockwell Intl. Co.*
- Linear Quadratic Regulation Using Neural Networks** II-735
K. Moore, S. Naidu, *Idaho State University*
- Adaptive Neural Network Control with Frequency-shaped Optimal Output Feedback** II-741
K. Cheok, J. Smith, *Oakland University*
- Intelligent Control of a Robotic Arm Using Hierarchical Neural Network Systems** II-747
L. Rabelo, X. Avula, *University of Missouri-Rolla*
- Ultrasonic Sensing Based Robot Localization Using Entropy Nets** II-753
I. Sethi, G. Yu, *Wayne State University*
- Integrating Optimal Control with Rules Using Neural Networks** II-759
C. Schley, Y. Chauvin, V. Mittal-Henkle, *Thomson-CSF, Inc.*
- Neural Network Architectures for Active Suspension Control** II-765
R. Hampo, K. Marko, *Ford Motor Co. Scientific Research Laboratory*

TABLE OF CONTENTS CONTINUED

VOLUME II

- Neural Modeling and Control of a Distillation Column** II-771
K. Krishnamurthy, B. McMillin, G. Leininger, *University of Missouri-Rolla*;
J. Steck, *Wichita State University*
- Vibration Cancellation at Multiple Locations Using Neurocontrollers with Real-time Learning** II-775
D. Bozich, H. MacKay, *Science Applications International Corporation*
- Machine Acquisition of Skills by Neural Networks** II-781
S. Lee, S. Shimoji, *University of Southern California*

SPEECH Oral Presentations

- Global Optimization of a Neural Network - Hidden Markov Model Hybrid** II-789
Y. Bengio, R. De Mori, G. Flammia, R. Kompe, *McGill University*
- Noise-Robust Speech Recognition Using a Cepstral Noise Reduction Neural Network Architecture** II-795
H. Sorensen, *University of Aalborg*
- Speaker-Independent Phonetic Classification in Continuous English Letters** II-801
R. Cole, R. Janssen, M. Fenty, *Oregon Graduate Institute of Science and Technology*
- Speaker Independent Vowel Recognition Using Neural Tree Networks** II-809
A. Sankar, R. Mammone, *Rutgers University*
- Learning Vector Quantization, Multi-Layer Perceptron and Dynamic Programming: Comparison and Cooperation** II-815
X. Driancourt, L. Bottou, P. Gallinari, *Universite de Paris-Sud*
- Improving a Phoneme Classification Neural Network Through Problem Decomposition** II-821
L. Pratt, *Rutgers University*, C. Kamm, *Bellcore*
- A Hopfield Network Implementation of the Viterbi Algorithm for Hidden Markov Models** II-827
S. Aiyer, F. Fallside, *Cambridge University*

SPEECH Poster Presentations

- From Lattices of Phonemes to Sentences: A Recurrent Neural Network Approach** II-833
C. Jooss, *LETI/DEIN/SIR*
- Speaker-Invariant Phoneme Recognition Using Multiple Neural Network Models** II-839
M. Palakal, M. Zoran, *Purdue University*
- Modular Connectionist Structure for 100-Word Recognition** II-845
H. Hackbarth, J. Mantel, *SEL Alcatel*
- Voiced-Unvoiced-Silence Classification of Speech Using Neural Nets** II-851
A. El-Jaroudi, T. Ghiselli-Crippa, *University of Pittsburgh*
- A Modular Connectionist Architecture for Text-Independent Talker Identification** II-857
Y. Bennani, P. Gallinari, *Universite de Paris-Sud*

CONTINUED TABLE OF CONTENTS

VOLUME II

An Analog Integrated Speech Front-end Based on the Auditory Periphery W. Liu, A. Andreou, M. Goldstein, Jr., <i>The Johns Hopkins University</i>	II-861
Training Speed-up Methods for Neural Networks Applied to Word Recognition A. Krause, H. Hackbarth, G. Thierer, <i>SEL Alcatel</i>	II-865
Processing Spatio-temporal Patterns by Mapping Time Into Intensity W. Banzhaf, <i>Mitsubishi Electric Corp. Central Research Laboratory</i>	II-871
A Neural Network Model of Serial Order Recall from Short-term Memory I. Boardman, D. Bullock, <i>Boston University</i>	II-879

APPLICATIONS I *Supplementary Poster Program Abstracts*

Computational Model of a Biologically Plausible Cognitive Map M. Palakal, X. Thai, <i>Purdue University - School of Science</i>	II A-885
Neural Network Routing for Multiple Stage Interconnection M. Goudreau, C. Giles, <i>NEC Research Institute, Inc.</i>	II A-885
Neural Network Analysis of DNA Sequences T. Alvager, B. Humpert, P. Lu, <i>Indiana State University</i>	II A-886
A Neural Network Approach to the Vehicle Dispatching Problem J. Potvin, Y. Shen, <i>Universite de Montreal</i>	II A-886
A Comparison of MLP and ID3-derived Approaches for ECG Classification Z. Chi, M. Jabri, <i>Sydney University</i>	II A-887
Jackknife Method for Validating Neural Network Models L. Allred, <i>Ogden Air Logistics Center</i>	II A-887
Applications of Neural Networks to F-16 Avionics L. Allred, <i>Ogden Air Logistics Center</i>	II A-888
Cooperative Schemes for Conventional and Neural Expert Systems Y. Hayashi, K. Reilly, D. Duong, P. Krishnamraju, <i>Ibaraki University</i>	II A-888
Approximate Representation of a Continuous Functions by a Neural Network with Scaled or Unscaled Sigmoid Units Y. Ito, <i>Nagoya University College of Medical Technology</i>	II A-889
Neural Network Learning of Structure-Activity Relationships L. Wang, <i>Oak Ridge National Laboratory</i>	II A-889
A Design Principle of the Analog Neural Network for Combinatorial Optimization: Findings from a Study on the Placement Problem H. Kita, O. Sekine, Y. Nishikawa, <i>Kyoto University</i>	II A-889
Polynomial Neural Networks for Signal Processing in Chaotic Backgrounds S. Gardner, <i>Naval Research Laboratory</i>	II A-890
An Application of Hopfield Network to Discrete Fourier Transform A. Iwata, <i>Nagoya Institute of Technology</i> , Y. Yoshida, W. Benjapolakul, <i>Mitec Inc.</i>	II A-890

TABLE OF CONTENTS CONTINUED

VOLUME II

A Novel Input Driven MLP Model and Its Application to the Recognition of Chinese Character H. Chung, J. Ryeu, <i>Kyungpook National University</i>	II A-891
Map Learning Using Associative Memory Neural Network A. McAuley, X. Xu, C. Chen, <i>Wright State University</i>	II A-891
Gestures and Neural Networks in Human-computer Interaction R. Beale, A. Edwards, <i>University of York</i>	II A-892
The Effect of ANN Hidden Layer Neurons on Boundary Identification for Constrained Optimization S. Lee, <i>Yuan-ze Institute of Technology</i>	II A-892
A Hierarchical Interaction Architecture for Pattern Recognition M. Kim, G. Lee, J. Kim, C. Lim, <i>Electronics & Telecommunications Research Institute</i>	II A-893
A Plant Modeling with a Fuzzy Associative Memory System K. Goto, T. Yamaguchi, <i>LIFE: Laboratory for International Fuzzy Engineering Research</i>	II A-893
Implementation of the Relaxation Process by the Interactive Activation and Competition Network S. Yu, <i>Industrial Technology Research Institute</i> ; W. Tsai, <i>National Chiao Tung University</i>	II A-894
Correct Reaction Neural Network and its Implementation K. Nakajima, Y. Hayakawa, S. Sato, T. Nishimura, J. Murota, Y. Sawada, <i>Tohoku University</i>	II A-894
Neuro-Controllers in Communications A. Pandya, <i>Florida Atlantic University</i> ; H. Keskiner, <i>Siemens Stromberg-Carlson</i>	II A-895
A Neural Network Based Expert System model M. Palakal, A. Hudli, M. Zoran, <i>Purdue University</i>	II A-895
Neurocomputing and Computer-Based Tutoring: Modeling Learner Performance R. Zerwekh, <i>Northern Illinois University</i>	II A-895
A Parallel Algorithm for Standard Cell Placement E. Horvath, R. Shanker, A. Pandya, <i>Florida Atlantic University</i>	II A-896
Backpropagation Converges for Multi-layered Networks and Linearly-separable Patterns M. Gori, A. Tesi, <i>Universita di Firenze</i>	II A-896
Prediction of Next Alphabets and Words of Four Sentences by Adaptive Junction Y. Ajioka, Y. Anzai, <i>Keio University</i>	II A-897
Temporal Pattern Identification in a Self-Organizing Neural Network with an Application to Data Compression M. Brooke, S. Goodman, <i>Georgia Institute of Technology</i>	II A-897
A Neural Network Model for Traffic Controls in Multistage Interconnection Networks Y. Takefuji, N. Funabiki, K. Lee, <i>Case Western Reserve University</i>	II A-898
Applying Neural Network Technology to Future Generation Military Flight Control Systems M. Steinberg, R. DiGirolamo, <i>Naval Air Development Center</i>	II A-898

CONTINUED TABLE OF CONTENTS

VOLUME II

Convex Error Functions for Multilayered Perceptrons II A-898
C. Devouge, *Ecole Normale Supérieure*

Nonlinear Modelling of Back-Propagation Neural Networks II A-899
M. Manry, M. Chen, *University of Texas at Arlington*

Method of Using MLP to Identify Decision Surface for Problems with Highly Uneven Training Examples II A-899
H. Chen, *GE Corporate Research and Development*

Nonlinear Time Series Prediction with a Discrete-Time Recurrent Neural Network Model II A-900
N. Hakim, H. Meadows, *Columbia University*; J. Kaufman, *Mount Sinai School of Medicine*; G. Cerf, *NYNEX Science and Technology*

Automatic Target Recognition with Chebyshev Networks II A-900
A. Namatame, N. Ueda, *National Defense Academy*

A Pairing Strategy in Associative Memory Classifier II A-901
M. Zhang, C. Suen, T. Bui, *Concordia University*

APPLICATIONS II *Supplementary Poster Program Abstracts*

Training Neural Networks for Deriving Bond Rating Formulas II A-903
A. Surkan, X. Ying, *University of Nebraska*

Identification of the Internal Forces of Structural Systems Using Neural Networks II A-903
A. Chassiakos, *California State University*; S. Masri, *University of Southern California*

Predicting the Number of Vias and Dimensions of Full-custom Circuits Using Neural Networks Techniques II A-904
M. Jabri, X. Li, *University of Sydney*

Decision Making for Investment in Manufacturing Equipment via PDP Network - The Application of Schema Model II A-904
H. Wu, *The Pennsylvania State University*

Novelty Detection on a Very Large Number of Memories Stored in a Hopfield-style Network II A-905
A. Jagota, *State University of New York Buffalo*

A Study of the Learning of Three-Layer Back-Propagation Recognizers for Statistical Quality Control Charts II A-905
H. Hwang, *Arizona State University*

Feature Extraction and Classification Using a Hierarchical Neural Network Topology II A-906
K. Priddy, S. Rogers, D. Ruck, M. Kabrisky, J. Jones, Jr., B. Welsh, *Air Force Institute of Technology*

Disbond Detection Through Ultrasonic Signal Classification Using Neural Networks II A-906
D. Prabhu, M. Abedin, W. Winfree, E. Madaras, *NASA Langley Research Center*

Neural Network Signal Classifier with Uncertain Output Rejection Algorithm II A-907
M. Iwamoto, T. Okada, M. Kondoh, *Mitsubishi Electric Corporation*

A Neural Net Solution of a Real-World Engineering Problem II A-907
A. Younger, *OEC-Diagnostics*

TABLE OF CONTENTS CONTINUED

VOLUME II

Networks for Programming M. Schaffner, <i>CPSB System</i>	II A-907
Commodity Trading with a Two Year old J. Collard, <i>Martingale Research Corporation</i>	II A-908
Pre-Segmented Handwritten Digit Recognition Using Neural Networks Y. Lee, <i>Digital Equipment Corporation</i>	II A-908
Visual Entity Identification: A Neural Network Approach P. Work, C. Riley, R. Miller, <i>Computer Sciences Corporation</i>	II A-909
Neural Network Based Pattern Recognition of Sequenced DNA Autoradiograms M. Murdock, <i>University of Utah</i> ; R. Gesteland, <i>Howard Hughes Medical Institute</i>	II A-909
Spreadsheet Simulation of Artificial Neural Networks R. Antonini, <i>Universita di Roma</i>	II A-910
Application of an Artificial Neural Network in the SAIC Explosive Detection System P. Shea, B. Yedidia, F. Liu, <i>Science Applications International Corporation</i>	II A-910
A Parallel Algorithm for Scheduling Problem Based on Hopfield Model for the Automated Synthesis of Digital Systems C. Papachristou, M. Nourani-Dargiri, Y. Takefuji, <i>Case Western Reserve University</i>	II A-910
Hyperspectral Data Fusion for Target Detection using Neural Nets J. Brown, E. De Rouin, H. Beck, D. Bergondy, S. Archer, <i>Martin Marietta Electronic, Information & Missile Systems</i>	II A-911
A Proposed Model for Comparing the Performance of Neural Networks and Statistical Approaches in Predicting Project Profits of an Asphalt Paving Co. J. Giaimo, <i>Giaimo Research</i> ; G. Kalley, <i>New Jersey Institute of Technology</i>	II A-911
Using Adaptive Neural Networks for Situation Recognition in High- and Low- Intensity Conflict C. Kowalski, <i>McDonnell Douglas Electronic Systems Co.</i>	II A-912
A PC-Based Simulated-Liver Tissue Classification Using Artificial Neural Net Classification Using Artificial Neural Net Classifier N. Bostros, H. Tee, <i>Southern Illinois University at Carbondale</i>	II A-912
Using Neural Network Technology for Predicting Military Attrition C. Wilkins, J. Dickieson, <i>Navy Personnel Research and Development Center</i>	II A-913
Adaptive Resonance Theory and the Classical Leader Algorithm A. Baruah, R. Welti, <i>Boeing Computer Services</i>	II A-913
Neural Network Architectures for Systolic Arrays J. Cheung, C. Shim, <i>The University of Oklahoma</i>	II A-914
An Adaptive Hysteresis Threshold Method for an Associative Memory Using Mutually Connected Neural Network K. Nakayama, N. Mitsutani, <i>Kanazawa University Faculty of Technology</i>	II A-914
Translational Invariant Object Recognition Using Back Propagation Network L. Chan, <i>The Chinese University of Hong Kong</i>	II A-915

CONTINUED TABLE OF CONTENTS

VOLUME II

Forecasting Multivariate Time Series: Confidence Intervals and Comparison of Performances of Feed-Forward Neural Network and Statespace Models M. Metzger, <i>University of Maryland</i>	II A-915
Minimum Misclassification Error Performance for Layered Networks of Artificial Fuzzy Neurons H. Szu, B. Teller, <i>Naval Surface Warfare Center</i>	II A-916
Neural recognition of handwriting P. Morasso, <i>Universita di Genova</i>	II A-916
Neural Estimator for Direction or Frequency Estimating and Tracking Z. Yang, Q. Yin, <i>Xi'an Jiaotong University</i> , L. Zou, <i>Louisiana Technical University</i>	II A-917
Identification and Application of Neural Operator Models In a Car Driving Situation K. Kraiss, H. Kuttelwesch, <i>Research Institute of Human Engineering (FGAN-FAT)</i>	II A-917
Neural Methods for Music Composition D. Stacey, D. Calvert, <i>University of Guelph</i>	II A-918
Alternative Simulated Annealing Processes for Global Optimization in Neural Networks T. Guillerm, N. Cotter, <i>University of Utah</i>	II A-918
Multimodular Neural Architecture for Teledetection C. Mejia, F. Badran, <i>Universite de Paris Sud</i> , S. Thiria, <i>Universite de Paris</i>	II A-919
A Data Compressed ART-1 Neural Network Algorithm T. Caudell, S. Smith, <i>Boeing Computer Services</i>	II A-919
An Industrial Application of Neural Networks to Reusable Design T. Caudell, S. Smith, G. Johnson, D. Wunsch, R. Escobedo, <i>Boeing Computer Services</i>	II A-919

ELECTRONIC & OPTICAL IMPLEMENTATIONS

Supplementary Poster Program Abstracts

Practical Difficulties to Design Real-Time Learning VLSI Neural Circuits B. Lee, S. Kim, <i>Samsung Electronics Co.</i>	II A-921
A New Optical Neuron Device for All-Optical Neural Networks A. Takimoto, K. Akiyama, M. Miyauchi, Y. Kuratomi, J. Asayama, H. Ogawa, <i>Matsushita Electric Industrial Co., Ltd.</i>	II A-921
A VLSI and WSI Systolic Architecture for Multilayer Feed-Forward Networks of Arbitrary Size S. Barro, A. Yanez, <i>Universidad de Santiago de Compostela</i>	II A-922
An Artificial Neural Network Simulator on the Loosely Coupled Parallel Processors T. Ejima, T. Oohashi, <i>Kyushu Institute of Technology</i>	II A-922
A Digital CMOS Fully Connected Neural Network with In-circuit Learning Capability and Automatic Identification of Spurious Attractors M. Weinfeld, J. Gascuel, <i>Ecole Polytechnique, Laboratoire D'informatique</i>	II A-923
A Complex Analogue Neural Network with Digitally Controlled Parameters O. Holland, <i>Artificial Life Technologies</i>	II A-923

TABLE OF CONTENTS CONTINUED

VOLUME II

A Stochastic Logic Neural Network as a Deterministic and Probabilistic Hopfield Network	II A-924
Y. Sawada, Y. Kondo, <i>Tohoku University</i>	
Real-time Unsupervised Neural Networks are Non-implementable in Natural Noise: a Refutable Hypothesis Based on Experiment.	II A-924
E. Nold, K. Tucker, R. Long, M. Georgiopoulos, <i>University of Central Florida</i>	
A VLSI Architecture for a Dedicated Back-Propagation Simulator	II A-925
Y. Hirose, <i>Fujitsu Laboratories Ltd.</i>	
NPL A Neural Programming Language	II A-925
H. Brown, <i>Florida Institute of Technology</i>	
A New Two-Dimensional Systolic Array for Image Processing and Neural Network Applications	II A-925
R. Means, <i>HNC, Inc.</i>	
A Hybrid Optoelectronic ART-1 Neural Processor	II A-926
T. Caudell, D. Wunsch, <i>Boeing Computer Services</i>	
Analytical Weight Shifting Models for Self-Recovery Networks	II A-926
J. Kim, H. Chu, C. Lursinap, <i>University of Southwestern Louisiana</i>	
Modeling Neural Information Transfer via Sample and Hold Circuits	II A-927
W. Mattis, <i>Villanova University</i>	
High-Speed Pulse Mode neural Network with EE Weights on On-Chip Learning	II A-927
M. Bagula, <i>Pico Design</i> ; J. Huffman, <i>Motorola Microprocessor Group</i>	

IMAGE PROCESSING & VISION

Supplementary Posters Program Abstracts

A Biologically Motivated Model for Rotation, Shift, Scaling and Distortion Invariant Pattern Recognition	II A-929
C. Wu, C. Li, <i>Auburn University</i>	
A Dipole Receptive Fields-Based Document Enhancement System	II A-929
C. Wu, F. Young, <i>Auburn University</i>	
Neural Network Based Classification of Highway Scenes for Vehicle Guidance	II A-930
S. Kenue, <i>General Motors Research Laboratories</i>	
Image Restoration Using Lagrange Programming Neural Networks	II A-930
X. Zhu, S. Zhang, A. Constantinides, <i>Imperial College</i>	
Coarse-Coding Applied to HONNs for PSRI Object Recognition	II A-931
L. Spirkovska, M. Reid, <i>NASA Ames Research Center</i>	
Neural Computation Methods for the Point Correspondence Problem	II A-931
H. Sakou, <i>Hitachi Ltd. Central Research Laboratory</i>
